Technical Specification:

Connection method: 2.4G Wifi&Bluetooth

Control method: APP/Voice/Button

Adapter input voltage:100-240VAC

Adapter output voltage: 24VDC/1A

Rated working voltage: DC24V

Rated power: 22W

Lamp color: RGBW

Color temperature : 2200K

Control method: TTL

Memory function: yes

Working temperature: -20°C~+40°C

Protection class of lamps and controllers:IP67

Work with Amazon Alexa and Google Assistant.

Packinglist:

1. C015 controller
2. Light post(15 pixels)
3. RF remote control
4. Ground plug x 15
5. Waterproof power supply 24V/1A wall plug horizontal American standard UL (IP44)
6. 3M back glue x 15
7. Copy of the manual x 1

Manual of Controller:

Button Instruction:

Switch : Short press is ON/OFF. When the device is on, long press in 5 seconds is reset to pairing mode. Light will blink in white.

Technical parameter:

Working temperature: $-20^{\circ}\text{C}\sim+40^{\circ}\text{C}$

Size: 100mmx40mmx20mm (excluding wires)

FCC Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following.

Measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
