

SALUS SAUNAS

CARBON MODEL SAUNAS

INDOOR USE ONLY

120VAC 15AMP DEDICATED CIRCUIT REQUIRED
(Aspect FS / Respite FS)

120VAC 20AMP DEDICATED CIRCUIT REQUIRED
(Element FS)

**Aspect, Respite, Element Full Spectrum
1-2, 2, 3 Person Saunas Models**

OWNER'S MANUAL

Carefully and thoroughly read this Owner's Manual before using/operating the sauna. We recommend keeping this Owner's Manual for regular review and future reference. Parts and accessories may vary and are subject to change.

TABLE OF CONTENTS

Packing List	2
Visual Assembly Diagrams	6
Parts Description	9
Assembly Instructions	15
Operating the Sauna	24
Tips for Using Your Sauna	27
Safety Instructions	27
Safeguards for Your Sauna	29
Troubleshooting Guide	29
Warranty	33
Warranty Card	35

WARNING: Visually inspect all heaters before assembly to make sure they are not damaged. Any excessive vibrations during transport could cause damage to the heating elements. DO NOT START the sauna if damage is detected! Contact your dealer or manufacturer for troubleshooting and replacement parts.

Packing List (main panels)

1pc Front Panel	1pc Rear Panel	1pc Left Side Panel
1pc Right Side Panel	1pc Roof Panel	1pc Roof Cover
1pc Bench	1pc Himalayan Salt Block Panel	1pc Floor Panel

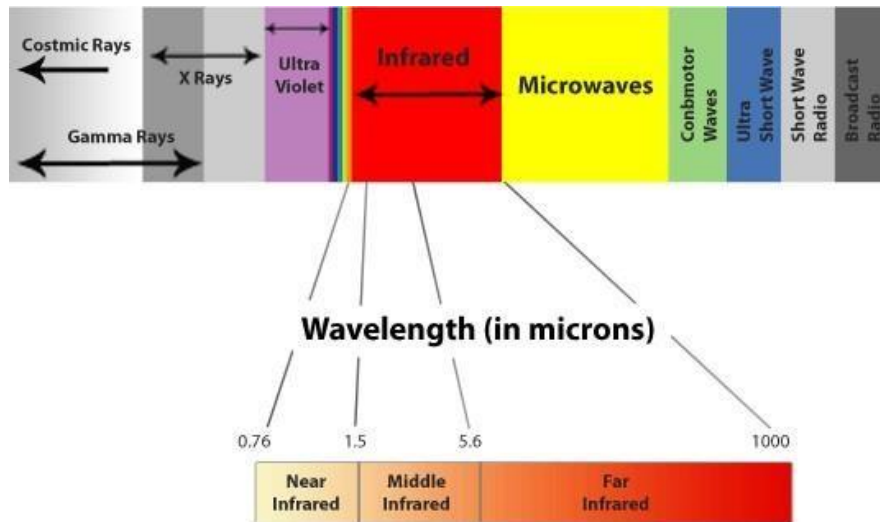

NOTE: Your model sauna has been completely assembled and tested prior to packaging. The rear wall panel is intentionally warped as part of the overall design. Two adults will be needed to assemble the sauna room.

CAUTION: Exit Sauna Immediately If You Feel Dizzy, Sleepy, Or Any Discomfort.

What Are Infrared Rays?

Infrared is the band of light we perceive as heat. We cannot see this band of light with the naked eye, but we can feel this type of light in the form of heat. Our sun produces most of its energy output in the infrared segment of the spectrum. Infrared rays heat your body without having to heat the air in-between. This process is called conversion.

The infrared is divided into 3 segments by wavelengths measured in microns: Near Infrared – 0.76-1.5 microns; Middle Infrared – 1.5-5.6 microns; and Far Infrared – 5.6-1000 microns. Among these segments, Far Infrared penetrates organic substances such as the human body two to three inches so that the warming effect is very uniform.

ARE INFRARED RAYS SAFE?

Because infrared rays are part of sunlight, they are not only safe but also highly beneficial to our bodies on a cellular level. Health professionals have used infrared heat lamps for decades to **treat muscle and joint problems**. In hospital baby care units, incubators are often equipped with infrared heating systems to **keep newborn babies warm**.

WHAT IS AN ELECTROMAGNETIC FIELD (also known as EMF)?

An Electromagnetic Field is a physical field produced by electrically charged objects. It is one of the fundamental forces of nature. The field can be viewed as the combination of an electric field and a magnetic field. The electric field is produced by stationary charges and the magnetic field by moving charges referred to as currents. The magnetic field is measured in milligauss (mG). Our sauna products have been developed to have low EMF. Our Low EMF carbon heater panels range between an average of 5mG-10mG at about two inches from the heater panel, our Ultra Low EMF carbon heater panels range between 3mG-5mG, and our Near Zero EMF/Full Spectrum

models range at less than 3mG (NIR heaters range at about 5mG-7mG at the same approximate 2 inches)

EMF Levels from Common Homes Sources

SOURCE	mG up to 4 inches	mG at 3 feet
Blender	50-220	0.3-3
Clothes Washer	8-200	0.1-4
Coffee Maker	6-29	0.1
Computer	4-20	2-5
Flourescent Lamp	400-4,000	0.1-5
Hair Dryer	60-20,000	0.1-6
Microwave Oven	100-500	1-25
Television	5-100	0.1-6
Vacuum Cleaner	230-1,300	3-40
Airplane	50	

Source: USA Environmental Protection Agency

After many years and numerous studies on EMF exposure, no government body including the Occupational Safety and Health Administration (OSHA) have established permissible exposure limits (PEL). Currently, there is no consensus on the potential health hazard from any exposure to EMF. The mainstream scientific evidence suggests that low-power, low-frequency, electromagnetic radiation associated with household currents like that of the infrared sauna does not constitute a short- or long-term health hazard.

DISCLAIMER

The infrared rays emitted by your sauna are reported to offer a wide range of possible therapeutic benefits based on research completed over the last 40 years from all around the world. These benefits are presented for reference purposes only and no implication of infrared saunas creating a cure for or treating any disease is implied nor should it be inferred. If you have a medical/health condition, are taking prescription drugs, or have acute joint injuries, please consult with your medical physician before using the sauna. Persons with surgical implants (metal pins/rods, artificial joints, silicone, or other types of surgical implants) typically do not experience any adverse effects, but should also consult their medical physician or surgeon before using the sauna room.

HOW IT WORKS

Infrared Saunas differ from traditional saunas in that they use infrared radiant energy to directly penetrate into the body's tissue to produce perspiration. Traditional saunas use steam to heat the air inside the sauna, which then heats your body until you begin to perspire. In order for this to be effective, temperatures would need to reach in the upwards of 190 degrees Fahrenheit. Infrared saunas only need a temperature of up to 120 degrees Fahrenheit to obtain the same effect. This lower temperature makes the environment more tolerable and allows you to breathe easier.

Health Benefits

Because infrared rays penetrate the body through convection, there is a deep heating effect in both the muscle tissues and internal organs without putting too much burden on the heart.

Our body reacts to the increased heating through the natural cooling process of perspiring. Through the perspiration process, acid and waste residue like toxins, sodium, alcohol, nicotine, cholesterol, and the potentially carcinogenic heavy metals are removed from the cells (especially zinc, lead, nickel, cadmium, etc.). The pores of our skin open and discharge waste products shedding any old skin cells leaving the skin glowing and clean, with improved tone, elasticity, texture, and color.

Health Benefits Include, But Are Not Limited To:

- | | | |
|--|---------------------------|---------------------|
| *Pain relief from Rheumatoid Arthritis | *Relaxes muscle spasms | *Reduces cellulite |
| *Increases blood circulation | *Clears, rashes, acne | *Enhances skin tone |
| *Cardiovascular conditioning | *Reduces stress & fatigue | *Removes toxins |

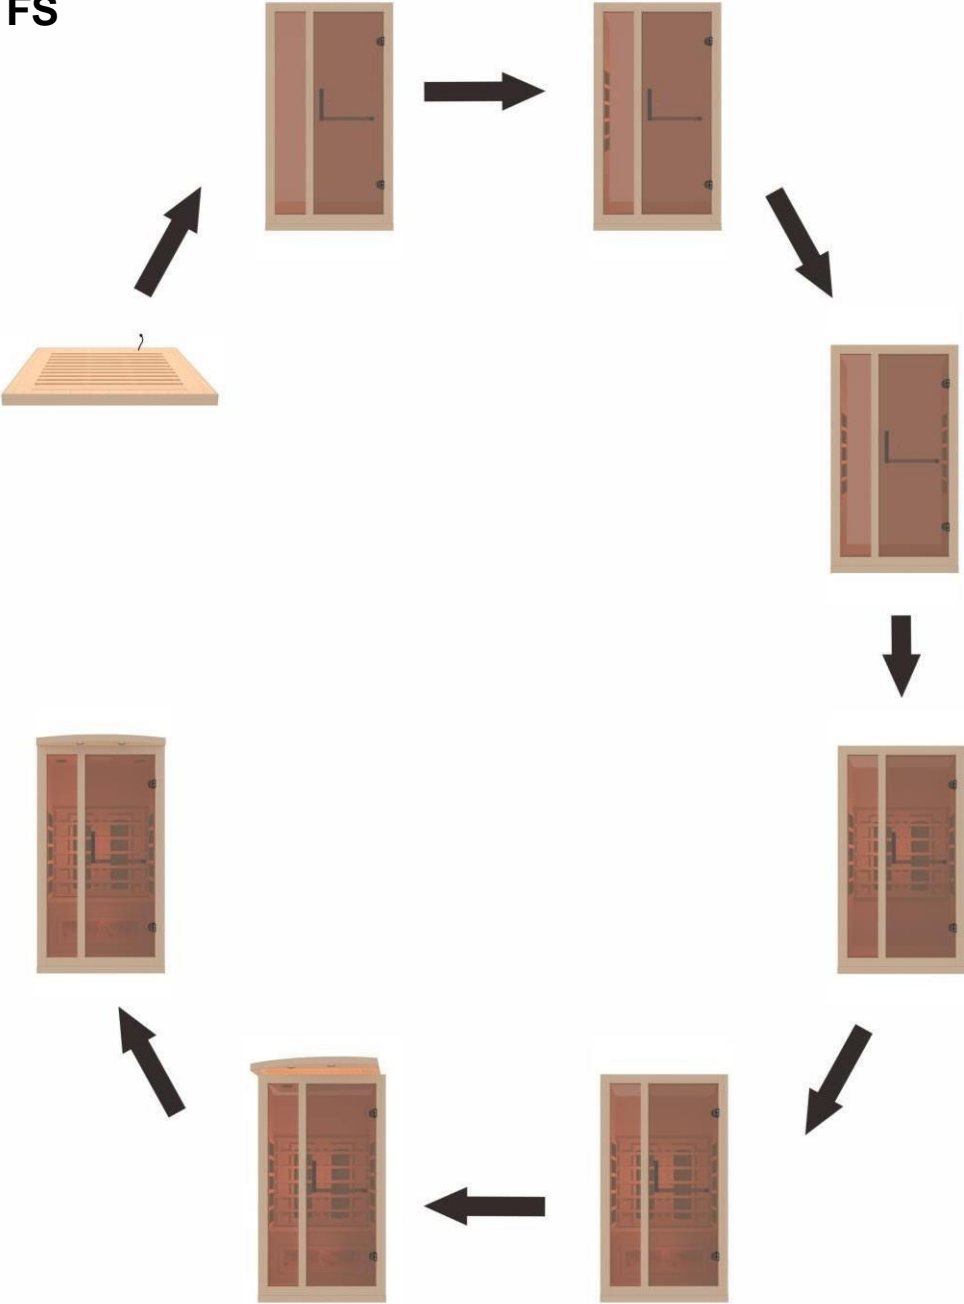

Sauna Maintenance

Since infrared saunas do not require hot rocks, water, or steam to operate, they require very little maintenance. You can simply wipe it down with water – use a damp, soft, and clean cloth. **Do not use any chemical-based cleaning agents** as they can be absorbed into the wood and be released into your sauna during use.

I. Power Supply (Control Box)

The POWER SUPPLY is the control center of the sauna room. It is installed on the topside of the ROOF PANEL and has inputs/outputs connected to it. (see Figure 1)

Figure 1

POWER IN - main power of the sauna room
HT1, HT2, HT3, HT4, HT5, HT6 – heat emitter cords
LAMPROOF – roof lamp power (optional)
LIGHTING – chromotherapy lights
PANEL CONTROL – control panel
FUSE RESET – protects against power

II. CD/Radio

The multifunction stereo features an FM receiver, CD player, colorful and wide LCD screen, volume/tone/balance controls, and an AUX input. (see Figure 2)

Figure 2 (Model Radio May Vary And Is Subject To Change)

III. Component Labeling

Power Cord – Main power cord connects the POWER SUPPLY to the dedicated wall outlet

HT1, HT2, HT3, HT4, HT5, HT6 – Heater cords connect the heat emitters to the POWER SUPPLY at these ports (HT5 & HT6 are not used on most models)

Lighting – Connects the interior lighting to the POWER SUPPLY at this port

LampRoof – Connects the exterior roof lights to the POWER SUPPLY at this port

Panel Control – Connects the Control Panel through the CTRL harness to the Power Supply at this port

L/R Speakers – Connects the speakers through these wires to the Control Panel

Temp Sensor – Connects the Temperature Sensor through this wire to the Control Panel

IV. Buckles

A. External Buckles

The external buckles are used to connect the REAR WALL PANEL to the LEFT SIDE WALL PANEL and RIGHT SIDE WALL PANEL. The Metal Guide Insert Brackets connect the FRONT WALL PANEL to the LEFT SIDE WALL PANEL and RIGHT SIDE WALL PANEL. (see Figure 3 and 3a)

Figure 3

Figure 3a

B. Wood Guide Inserts on the Floor Panel

The wood guide inserts are located on the FLOOR PANEL and allow the FRONT WALL PANEL and REAR WALL PANEL to seat snugly into place on the FLOOR PANEL. Please note that 3-person model saunas will have a notch cutout on the side moldings for the BENCH HEAT EMITTER PANEL. Side moldings may not be apparent on 2-person models. (see Figure 4)

V. Panel Descriptions

For easier installation, please understand and distinguish the differences between each panel.

A. Floor Panel

When you place the FLOOR PANEL at its designated location, leave enough space so that you are able to move around the FLOOR PANEL in order to install the sauna wall panels. To identify the front of the FLOOR PANEL, see the diagram below. The FLOOR HEATER black power cord will be situated at the right rear as seen below. (see Figure 5)

B. Understanding The Wall Panels

The SIDE WALL PANELS will have (1) carbon FAR Infrared heater and (1) NIR heater on each wall. There will be 3 NIR heaters on the rear wall. The REAR WALL PANEL and SIDE WALL PANELS will have heater cords coming from the top of each which will be connected on the roof once the ROOF PANEL is placed on top. The buckles on the REAR WALL PANEL will connect with the SIDE WALL PANELS. The FRONT WALL PANEL has the front glass door and stationary glass panels. (see Figure 6 and Figure 6a)

Figure 6

Figure 6a

C. Roof Panel

The ROOF PANEL houses the power supply, speakers, MP3 AUX jack, and reading lamp. Once installed, all the wiring harnesses, plugs, and connections will sit on the exterior side of the roof panel.

Assembly Instructions

A. Choose a good location to assemble the sauna

1. The location must be dry, leveled, and away from any source of water
2. MAIN POWER cord must be easily accessible
3. Two adults are required for installation
4. Wood cabin installation order: Floor Panel Front Wall Panel with Glass Door Left Side Wall Panel Right Side Wall Panel Rear Wall Panel Himalayan Salt Block Panel Bench Roof Panel Roof Cover
5. Tools Required: Philips Screwdriver and Ladder

PLEASE NOTE THAT SOME MODELS WILL VARY IN ASSEMBLY.

B. Installing the FLOOR PANEL

1. Place the FLOOR PANEL on the floor. Make sure the front side of the FLOOR PANEL is facing the correct direction. Please note the heater cord coming out of the topside of the floor panel at the rear right. (see Panel Descriptions) (see Figure 7)

C. Installing the FRONT WALL PANEL, RIGHT SIDE WALL PANEL, LEFT SIDE WALL PANEL, and DOOR HANDLE

1. Place the FRONT WALL PANEL up onto the FLOOR PANEL. Align the Metal Guide Insert Brackets on the FRONT WALL PANEL and the LEFT SIDE WALL PANEL. The LEFT SIDE WALL PANEL will need to be lifted in order to lock the Metal Guide Insert Brackets onto the FRONT WALL PANEL. Secure into place by pulling downward on the LEFT SIDE WALL PANEL. Make sure the Metal Guide Insert Brackets are locked into place and the top of the FRONT WALL PANEL is flush with the LEFT SIDE WALL PANEL. Do the same for the RIGHT SIDE WALL PANEL. (see Figure 8 and Figure 9)

Figure 8

Figure 9

D. Installing the REAR WALL PANEL

1. Remove the protection paper/tape (if present) from the buckles on the REAR WALL PANEL. Place the REAR WALL PANEL up onto the FLOOR PANEL. Next, attach the REAR WALL PANEL to the LEFT SIDE WALL PANEL and use the buckles to latch together. Do the same for the RIGHT SIDE WALL PANEL. (see Figure 10)

Figure 10

2. To install the DOOR HANDLE, first locate the DOOR HANDLE. It may need to be dismantled in order to install. Next, place the long handle section horizontally and install it on the glass door from the inside. You will need to secure the side of the long horizontal handle closest to the hinge side of the glass door by screwing it to the glass door. Now you can locate the shorter handle and connect it on the exterior side of the glass door to the long horizontal handle. It will need to attach to the long handle and rotate clockwise. Finally, you can secure the other end of the vertical handle by screwing it to the glass door. (see Figure 11)

Figure 11

E. Installing the HIMALAYAN SALT BLOCK PANEL and BENCH

1. Installing the HIMALAYAN SALT BLOCK PANEL can be done by sliding it downward between the two side wall panels. (see Figure 12)
2. Plug in the FLOOR HEATER cord and light connection (for the HIMALAYAN SALT BLOCK illumination) into the corresponding wall outlets.
3. Install the BENCH with the smooth and finished side facing upwards as also seen in Figure 13. Be sure to slide the BENCH all the way in and against the REAR WALL PANEL. If screws were provided, it is optional to use them to screw down the bench.

Figure 12

F. Installing the ROOF PANEL

1. The side of the ROOF PANEL with the power supply (control box) is the top of the roof panel.
2. The edge with the curve is the front of the ROOF PANEL. Be careful of the wires coming from the SIDE and REAR PANELS when you set the ROOF PANEL down onto the panels. Feed the wires through the holes in the ROOF PANEL. Feed the control cable and buzzer plug up through the ROOF PANEL.
3. Be careful not to force the ROOF PANEL into place. Make sure that the wires are properly fed through the holes. Furthermore, make sure the ROOF PANEL sits snugly into the RIGHT SIDE WALL PANEL and RIGHT FRONT WALL PANEL. Pull down on the ROOF PANEL slightly to make sure it is secured in place. (see Figure 13)

Figure 13

G. Connecting the plugs on the ROOF PANEL

1. Connect the plugs according to their respective labels. (see Figure 14)
2. You will need to connect the right and left speaker, the MP3, the CTRL (Panel Control), and the CD/SIG (radio power). The CD/SIG will be connected once the radio is installed in step 9 below. (see Figure 15 and 16)

Before Connecting

Figure 14

After Connecting

Figure 15

Figure 16

H. Installing the TEMPERATURE SENSOR and optional accessories (varies by model)

1. Enter the sauna and remove the protective covering (masking tape) from the TEMPERATURE SENSOR. Situate the TEMPERATURE SENSOR so that it is vertical and pointing downward. (see Figure 17)

Figure 17

Note: Some sauna models and not all sauna models are shipped with a spare TEMPERATURE SENSOR in case the TEMPERATURE SENSOR is damaged during transit. The manufacturer decides this according to sauna models and packaging.

2. If your sauna comes with the **optional** shelf and/or aroma therapy dish, use the screws provided to mount the shelf and aroma therapy dish where indicated within the sauna room. (see Figure 18 and 19)

Figure 18

Figure 19

I. Installing RADIO HOUSING BOX and RADIO (radio model subject to change)

1. **If your RADIO HOUSING BOX is already assembled, then proceed to step 4.** Locate the wood sides for the RADIO HOUSING BOX. There is one for the front, side, and bottom. (see Figure 20, Figure 21, and Figure 22)
2. Attach "A" on the side panel with "A" on the bottom panel and attached with the screws.
3. Attach "B" on the front with "B" on the side panel and "C" on the front panel with "C" on the bottom panel and attached with the screws.
4. Screw the Radio Housing Box to the REAR PANELS. The back opening (the larger opening) on the Radio Housing Box will face the RIGHT REAR PANEL. The front opening (the small opening and where the radio is inserted) on the Radio Housing Box will face the LEFT SIDE PANEL
5. Locate the RADIO and remove it from any packaging. (see Figure 25) Be sure to remove the transport screws from the top of the radio.
6. Connect the plug from the RADIO with the plug coming down from the roof and the left/right speaker plugs. Note that the power for the radio comes from the wire harness leading to the power supply at the "DC 12V" port. (see Figure 23 and 24)
7. Connect the antenna plug to the back of the radio. (see Figure 26)
8. Insert the RADIO into the RADIO HOUSING BOX. It is not necessary to mount the RADIO once you slide it into the RADIO HOUSING BOX because the RADIO will just sit in place. (see Figure 27)

Figure 20

Figure 21

Figure 22

Figure 23

Figure 24

Figure 25

Figure 26

Antenna Connection

Figure 27

J. Putting on the ROOF COVER (Optional)

1. Place the ROOF COVER over the top of the sauna. Be cautious when pulling the power cord through the hole in the roof cover. Gently place the ROOF COVER onto the ROOF PANEL. When the edges are aligned, screw the ROOF COVER to the roof panel. (see Figure 28)

Figure 28

Assembly Completed

Operating the Sauna

Control Panel

Power On/Off: Press to control the main power of the sauna

Power Indicator: Indicates the status of the sauna's main power

Work Start/Stop: Press to control the working functions of the sauna

Work Indicator: Indicates the working status of the sauna

Heat Indicator: Indicates the status of heating function

Light: Press to control the lighting function

Time Display: Displays the heating time of the sauna in minutes

Time: Press to adjust the setting of the timer

Temperature Display: Displays the actual interior temperature the sauna room in $^{\circ}\text{C}/^{\circ}\text{F}$

Temperature: Press to adjust the temperature setting

$^{\circ}\text{C}/^{\circ}\text{F}$: Press to change the temperature display between $^{\circ}\text{C}/^{\circ}\text{F}$

1. Plug the sauna into the wall outlet.
2. Press the POWER button once. The POWER light will come on, the TIME DISPLAY will show 90 (minutes), the TEMPERATURE DISPLAY will show 151°F / 66°C , and the control panel will flash.
3. Press the up/down arrows under the TIME DISPLAY to adjust the amount of time you want the sauna to remain on. Press the C/F button to choose between Celsius and Fahrenheit. Press the up/down arrows under the TEMPERATURE DISPLAY to adjust the temperature setting. Once you have set these adjustments to the desired settings, press the START/WORK button. If you do not press the button for 5 seconds, the control panel will stop flashing and the set-up values will be memorized. The WORK and HEAT lights will now be on and the emitters will now be generating heat. You can either pre-heat the sauna to the set temperature before entering or sit inside the sauna as the temperature rises to the set temperature. Please keep in mind that you will increase the time it takes for the sauna to reach the set temperature if you enter the sauna room before it has reached the set temperature.
4. During your sauna session, set-up time will count down the minutes one by one. You can use the up/down arrows to adjust the time. If you do choose to adjust the time, the control panel will flash and the emitters will stop generating heat. Once you set the time to the desired setting, then press the START/WORK button twice and the control panel will stop flashing and heat will began coming from the emitters

once again.

5. Heating times do vary. Generally, it will take approximately twenty to thirty minutes to preheat the sauna to the average used temperature range of approximately 118 degrees Fahrenheit / 48 degrees Celsius. When the ambient temperature is low, heating requires additional time. For the first few times of use, you may use 115 degrees Fahrenheit / 46 degrees Celsius as a reference starting point for a time period of about 20 to 30 minutes (this represents the actual time you are in the sauna at the desired temperature). As you become more comfortable and familiar with the sauna, you can increase the temperature and time period according to your personal preference.
6. When the temperature is at the set-up value, the digital control will maintain the set temperature. The WORK light will remain on and the HEAT light will turn off. The emitters will stop generating heat. Once the inside temperature drops approximately 4 degrees Fahrenheit, the HEAT light will turn back on and heat will again be generated by the emitters. With the digital control, the inside temperature will always remain around the set-up value.
7. Reading lamps and/or roof lamps and/or color therapy lamps are operated by pressing the respective buttons located towards the center of the control panel. These lamps are offered on some models and are not available on all models.
8. **Color Lighting** can be operated as follows: First, you will need to install the battery. Once the battery has been inserted into the remote, you are ready to operate the color therapy lighting system . Press the READING LIGHT button on the sauna control panel. The white light will come on. While pointing the remote at the ceiling light, you can press any of the colors on the remote and that color will be displayed. You can use the SHADE button on the remote to go through a sequence of colors. If you want to turn the light off during your sauna session, you can press the POWER button on the remote. **Please note: You must be inside the sauna room for the remote to work.**

Please note that the lights and music will remain ON for approximately 15 minutes when the time on the control panel has timed out.

9. **Bluetooth** can be used on the radio. Please see the Owner's Manual for the radio to connect our Bluetooth device.

Please Note: On average, it takes our model saunas approximately:

- *20 minutes to reach into 100 degrees Fahrenheit/38 degrees Celsius (with a Starting temperature above 70 degrees Fahrenheit/21 degrees Celsius)**
- *25-30 mins to reach about 115-120 degrees Fahrenheit/46-49 degrees Celsius (depending on sauna model)**
- *35-40 minutes to reach about 125-130 degrees Fahrenheit/52-54 degrees Celsius (depending on sauna model)**
- *45-60 minutes to reach up to approximately 135 degrees Fahrenheit/57 degrees Celsius (depending on sauna model)**

Please keep in mind that you can either preheat the sauna to the set temperature before entering or sit inside the sauna as the temperature rises. In addition, you will increase the time it takes for the sauna to reach the set temperature if you enter the sauna room before it has reached the set temperature. Also, the most commonly used temperature setting is between 118 degrees Fahrenheit / 48 degrees Celsius and 122 degrees Fahrenheit / 50 degrees Celsius. The way the sauna room works is when you set the Control Panel to say 120 degrees F / 49 degrees C, the heat emitters will turn off when that set temperature is reached. And even though the sauna does allow the user to set the Control Panel to 151 degrees F/66 degrees C, this is specifically for those users who do not want the heat emitters to ever turn off as the sauna room will never achieve 151 degrees F / 66 degrees C. After 3 hours of continuous use, the sauna needs to be shut down for one hour.

CAUTION: Exit sauna immediately if you feel dizzy, sleepy, or any discomfort.

Tips for using Your Sauna

1. If you take a hot/warm shower or bath before using your sauna, you may perspire more and experience more comfort.
2. Drink water prior to, during, and after your sauna session to replenish body fluids.
3. To regulate the set temperature inside the sauna to your comfort level, use the movable roof vent or leave the door slightly open. The roof vent is installed on the sauna and used based on personal preference.
4. Use 2 towels during your sauna session. Fold the first towel several times and place it on the bench. As you sit on this towel, it will absorb a majority of your perspiration while adding comfort as you sit on the bench. Use the second towel to either constantly wipe the perspiration from your body to perspire faster and also to avoid having too much perspiration dripping onto the floor. Never place any towels over the floor heater. If your legs become cold, you can use a third towel to drape over your legs to trap the heat.
5. This is a non-commercial sauna. For every three hours ON, the sauna must be turned OFF for one hour to cool down.
6. At the first sign of a cold or flu, increasing your sauna sessions may be beneficial in boosting your immune system and decreasing the reproductive rate of the virus.
7. To help relieve sore and tense muscles, massage the affected areas during your sauna session.
8. To treat your ankles and feet more effectively, you can elevate them and move them close to one of the heat emitters to achieve a deep heating effect.
9. To utilize the sauna's heat therapy effect, put oil and treatment into your hair and wrap it with a towel. After your sauna session is over, rinse your hair thoroughly.
10. The peaceful and relaxed state rendered by a sauna session may help you to sleep easier and deeper.
11. To conserve energy consumption, please unplug your sauna when not in use – especially if you do not plan on using the sauna for an extended period of time.
12. After the sauna session is over, do not jump into the shower or bath immediately. Because your body was heated up during the sauna session, it will continue to perspire even after the heat emitters are off. Sit in the sauna with the door slightly opened and let your body cool down. Once your body has cooled down and you feel comfortable, you can exit the sauna. After about fifteen minutes and when your body has completely cooled down, you can take a shower or bath to clean your body.

Safety Instructions

1. Read and follow all instructions carefully before using the sauna.
2. When assembling and using the electrical equipment, safety precautions should always be followed.
3. To reduce the risk of injury, do not allow children to use the sauna unless they are closely supervised at all times by an adult. Children should not use the sauna

- unless prescribed or advised by their medical doctor.
4. Do not use the sauna immediately following strenuous exercises. Wait at least 30 minutes to allow the body to cool down completely.
 5. Pregnant or possibly pregnant women should contact their medical physician prior to using the sauna. Excessive temperatures have a high potential for causing fetal harm during pregnancy.
 6. **Hyperthermia Danger:** The normal body temperature can't rise above 103°F (39°C). Symptoms of excessive hyperthermia include dizziness, lethargy, drowsiness, and/or fainting. The effects of excessive hyperthermia may include, but are not limited to failure to perceive heat, physical inability to exit the sauna, unawareness of impending hazards, unconsciousness, and/or fetal harm in pregnant women. Hyperthermia could make your body's core temperature rise. Setting the desired temperature to an excessively high temperature is not recommended.
 7. The use of alcohol, drugs, or medications (prescribed or non-prescribed) prior to or during the sauna session may lead to unconsciousness and/or other harmful physical injuries.
 8. Persons suffering from obesity or with a medical history of heart disease, low or high blood pressure, circulatory system problems, diabetes, or other medical conditions should consult with a medical physician prior to using the sauna.
 9. Persons using medications should consult with a medical physician before using the sauna. Some medications may induce drowsiness while other may affect the heart rate, blood pressure, and/or blood circulation.
 10. Use care when exercising before and after sauna use.
 11. Never sleep inside the sauna.
 12. Do not use any type of cleaning agents on the interior of the sauna. Only wipe down the sauna room with water and a damp cloth. Never use any chemical based cleaners.
 13. Do not stack or store any objects on top of or inside the sauna.
 14. If the power supply cord becomes damaged, it must be replaced immediately by the manufacturer or its agent. If you find the power cord is too hot (normally it will become warm) or that the electrical equipment may be experiencing technical problems, please contact the manufacturer or its agent immediately to avoid hazardous situations.
 15. Make sure that the electrical outlet is in good working order. A common problem with electrical outlets is loose wiring on the connection points of the terminals of the outlet. A loose wire will also make for a bad connection and cause an unusual amount of heat buildup. Loose connections can also cause sparking in the junction box that can result in arcing. You'll likely see burn marks around the terminals if this occurs. If this happens, do not use the sauna and have the outlet replaced by a certified electrician. If the power cord is damaged, please contact Customer Support.
 16. Do not use the sauna during an electrical storm to avoid risk of shock or injury.
 17. Do not continuously switch the power ON and OFF excessively as it will compromise the life of the electrical components.
 18. Your hands must be dry and free of moisture before plugging and unplugging cords and wiring harnesses from the power supply and circuit boards. Never

operate the sauna with wet hands or wet feet to avoid the risk of electrical shock or injury. Never touch the metal prongs of the plug.

19. Do not attempt to make any repairs yourself unless authorized by the manufacturer or its agent. If a problem occurs with the sauna, please contact the manufacturer or its agent immediately to avoid safety risks. Unauthorized repair attempts will void the manufacturer's warranty.
20. Please make sure the outlet power supply meets the specifications required. Failure to meet the requirements may cause safety risks.
21. Some sauna models are equipped with reading and/or roof lamps. Because the lamp temperature will become very hot once powered ON, do not attempt to touch the lamp to avoid being burned. Do not attempt to touch it for at least 20 minutes or until it cools down completely if a need to touch it arises.
22. Do not pour water or any other liquids onto the infrared heat emitters. Do not bump, hit, or break the heating elements as it may cause an electrical short and pose a safety risk.
23. Do not make any modifications to the sauna, the sauna structure, or the sauna components.
24. Prior to each sauna session, the sauna room is to be inspected for correct operation. If for any reason your sauna does not seem to be operating properly, discontinue use and contact Customer Service.

Safeguards For Your Sauna

1. Do not install the sauna near water, near a bathtub (if water will splash on the sauna), near a shower (if water will splash on the sauna), in a wet basement, or near a swimming pool (if water will splash on the sauna).
2. Do not use liquid cleaners or aerosol cleaners on the sauna. Unplug the sauna from the wall outlet before cleaning. Use plain water and a soft damp cloth for cleaning.
3. The power supply cord should be routed so that it is not walked on or pinched by any object that may be placed against it.
4. When replacement parts are required, be sure they meet the specified requirements of the manufacturer. Unauthorized substitutes may result in a fire, electrical shock, or other hazardous situations. After any repairs, please ask the service technician to perform a safety check to determine that the sauna is in good working order.
5. Do not use any wall receptacle adapter, surge protector, or extension cord between the sauna cord and wall outlet.

Troubleshooting

	Issue	Possible Reason	Solution
1	indicator light for power supply not working	The connector is not connected properly	Check the connector or replace a new one

		No power supply input	Check your circuit breaker to confirm power at the wall outlet
		Indicator light is broken	replace the circuit panel
2	Indicator light for function is not working	The heating indicator light is broken	Replace the relevant control panel
		The circuit board or components are broken	Replace the circuit board
		The temperature sensor is broken	check the connection of the temperature sensor

		The wire junction or the heater's wire is not connected	Check that the connections are sung and tight
		The temperature sensor is broken	check the connection of the temperature sensor
		The circuit board or the relay is not working	replace the circuit board
4	Odor from the sauna	Power supply problem	Power supply may need to be replaced
5	Light bulb is not working	Light bulb is burned out	Remove burned out light bulb and replace it
		Light bulb wiring is loosen	Check connection and/or replace the lamp assembly
		Problems with electrical control panel	Replace the relevant control panel
6	Sauna is not powering up	Power cord is unplug	Plug the power cord into wall outlet
		Outlet has no power	Check your circuit breaker to confirm power at the wall outlet
		GFCI protected outlet/circuit breaker is not recommended	Replace the outlet/circuit breaker with non-GFCI ones
7	The temperature display shows "EP"	The connector of temperature sensor is loose, not connected, or sensor is damaged	Disconnect and reconnect the connector of temperature sensor or change to a new temperature sensor
8	The temperature display shows "H"	The temperature inside the sauna room is too high	Turn off the unit, and contact the manufacturer
9	Speaker does not work	The speaker is broken	Replace with a new one of the same specifications
		The speaker wire is loose	Disconnect and reconnect the speaker connections
		The power indicator light for radio is off	Turn on the switch to start work
10	Radio Player doesn't work	Power connector is loose or damage	Disconnect and reconnect the connection

		DC power supply has no power to the radio player	Check DC power supply wiring or replace the power supply
		Radio player is defective	Replace the CD-player
		Radio player protection fuses is burnt out	Replace the fuses

11. The Glass Door Is Rubbing The Door Jamb

Solution: The glass door may need to be adjusted. To adjust the glass door, you will need two pieces of cardboard like in the image below. The below images are from our more common sauna models. Please do note that you will need two people for this task. For the second person who will be holding the glass door, we recommend wearing protective gloves. Start by having the glass door slightly open and the first person loosening the hinge screws on the glass door. Only loosen the screws slightly so that the door can adjust itself once it is closed. Next, the second person will close the glass door. You may need to lift up on the door handle to get the door to shut all the way. Now cautiously retighten the hinge screws on the glass door. The screws must be tight.

Maintenance:

Cleaning

Do not use liquid cleaners or aerosol cleansers inside the sauna. Unplug the sauna from the wall outlet before cleaning. Use plain water and a soft cloth for cleaning. ***Do not use benzene, alcohol, or strong cleaning chemicals in or on the sauna.***

NOTE: Any chemical that can damage wood or be absorbed into the wood will damage the sauna.

Transportation and storage

1. Avoid exposure to rain, snow or other strong weather elements.
2. Do not store in damp environments.

Limited Lifetime Warranty

7 Year Limited Warranty: Golden Designs, Inc. under its brand names warranties the wood, structure, heating elements, and electronics against defects in material and workmanship for a period of 1 to 7 years from the original date of purchase. **This sauna is for INDOOR use only. Placing your sauna outdoors will VOID this warranty. Any damage due to exposure to outdoor elements such as rain, snow, sun, wind or extreme temperatures will not be covered by this warranty. Any damages as a result of modifications made to the sauna or its components will void this warranty.**

Extent of Warranty: This limited warranty applies to products manufactured or distributed by Golden Designs, Inc. under its brand names, delivered in the continental United States or Canada and extends to the original purchaser at the original site of installation only. This warranty becomes valid at time of purchase and terminates either by specified time frame listed above, owner transfer, or relocation. **Your sales receipt showing the date of purchase of the product is your proof of purchase. Warranty is not transferable.**

Manufacturer Warranty

All Golden Designs, Inc. products are manufactured with the highest quality appliances and are warranted to be free from defects in material and workmanship at the time of delivery. The appliance warranty is extended through the manufacturer for the product including, but not limited to: stereos, CD players, etc. All exchanged parts and products replaced under this warranty will become the property of Golden Designs, Inc. Golden Designs, Inc. reserves the right to change manufactures of any part to cover any existing warranty. Any parts determined to be defective must be returned to Golden Designs, Inc. to obtain warranty service. You must prepay any shipping charges, export taxes, custom duties and taxes, or any other charges associated with the transportation of the parts. In addition, you are responsible for insuring any parts shipped or returned. You must present Golden Designs, Inc. with proof of purchase documents (including the date of purchase). Any evidence of alteration, erasing or forgery of proof of purchase documents will be cause to **VOID** this limited warranty. Products on which the serial number has been defaced or removed is not eligible for warranty service. This warranty covers parts, but does not cover labor.

Warranty Limitations

This warranty does not apply if the unit has been subject to full commercial use, negligence, alteration, modification, misuse, abuse, repairs by non-Golden Designs, Inc. authorized personnel, inappropriate installations, or any case beyond the control of Golden Designs, Inc. invalidating this warranty including but are not limited to:

- Use of lacquer or paints
- Sauna and other Golden Designs, Inc. products accessories placed on non-approved surfaces
- Outdoor applications

- Normal wear and tear or weathering
- Use of product not in accordance with instructions
- Worn out receptacle

Surface cracks are not considered defects in material or workmanship, as they are normal characteristics of all woods. This includes minor cracks due to wood expansion and contraction. Note: Since the wood used in construction has been kiln dried, a certain amount of expansion and contraction occurs in the wood in a sauna environment.

Disclaimers

Golden Designs, Inc. and its affiliates shall not be liable for loss of use of sauna or other Golden Designs, Inc. products or other secondary or incidental or consequential costs, expense or damages - which may include the removal of permanent deck or other custom fixtures or the necessity for crane removal - arising directly or indirectly out of the use or inability to use the product. Any implied warranty shall have duration equal of the applicable warranty stated above. Under no circumstances shall Golden Designs, Inc. or any of its representatives be held liable for injury to any person or damage to any property, however arising. Specifications are subject to change without notice or obligation.

Legal Remedies

This limited warranty gives you specific legal rights. You may have other rights, which may vary from state to state.

Customer Service

For customer service, contact your authorized dealer. If you need additional information or assistance, please email Salus Saunas at service@salussaunas.com or call (888)287-0111.

*Limited Lifetime Warranty of Sauna Products is 7 years on heating elements and electronics from the date of purchase. The radio and wood structure have a 1 year limited warranty.
