

Heavy Duty Rails Instructions

(For 2, 3 & 4ft Rails)

1. Insert Wheel Plugs (G) into the Legs (B) This may require some force.
2. Screw Castor Wheels (H) into Wheel Plugs (G).
3. Inserts Bottom Bar (C) into bottom opening of Legs (B) They will secure when the spring clip locks into place.
4. Insert Uprights (A) into top opening of Legs (B) Secure by locking spring clip.
5. Connect the Top Rail (F) to one of the Uprights (A), then pull in the other upright until in-line with the Top Rail (F) above, finally connect the Top Rail (F) with the last Upright (A) to complete the rail.
