| Charging                         | The green light on the battery icon continues to flash                                                                                               |
| Fully Charged                    | When fully charged to 100%, green battery icon will stay on<br>After disconnecting the power input, the display screen will turn off                 |

## Maintenance

1. Before cleaning the product, please make sure that the power is turned off.
2. Turning counterclockwise can open the air intake grille.  
When cleaning, you can use a brush or a clean cloth to wipe the surface of the product and the air intake grille.
3. Do not clean product with water or other liquids.

## Radio and TV Interference Statement

WARNING!!! This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by whatever measures may be required to correct the interference.
