

ELECTRIC & WATER WIRELESS METERING

Who We Are

Wild Energy is the leading innovator of power measurement and monitoring equipment for the recreation, hospitality, manufactured housing and marine industries. We use detailed data to gain powerful insights into the utility use by your guests. Our technology streamlines operations, improves utility revenue collection, reduces overall utility use and provides a green alternative.

Why Wild Energy Meters?

WIRELESS, AUTOMATED
METER READING

OWNER PORTAL - READ ANY
METER FROM ANYWHERE

EV AND ELECTRIC RV
READY

EASY TO INSTALL

AN INSTANT RETURN ON
YOUR INVESTMENT

INTEGRATED BILLING WITH
YOUR RESERVATION
SYSTEM

35%

proven to lower overall energy
usage between 30-35%

120V and 240V Electric Meters

Wild Energy utilizes the I-210 line of single-phase meters from Aclara Technologies. These meters are the same meters installed by utilities across the United States, Canada, and other regions of the world.

Water Metering

Wild Energy's water meter reading system will work with any pulse output water meter. Our meter reading technology will not only report the meter reading, but we will also provide leak detection and high flow rate alerting. When combined with the Wild Energy electric metering, we provide the owner/operator with the most state of the art utility metering for their properties.

Our Meters Are Installed Across The United States
