APP function

1. Charge Page (Idle state)

- ① Information: Device information, share device, FAQ and feedback, remove device, etc.
- 2 Charging Current: Select the output current level of EV Charger. (Note: Choose the "Auto" option, and the current will automatically set to the highest acceptable level for the vehicle, but the output current level will not surpass the device's maximum current level.)
- ③ Plug and Charge Mode: After enabling this mode, the EVSE can directly charge the vehicle without requiring an unlock, which may pose certain security risks to your product. Please confirm.
- (4) Scheduled Charging: Set the start and end times for scheduled charging.
- (5) Reminder of booking charging mode and Set the start time and end time for scheduled charging.
- 6 Connector prompt, Sliding charge indicator, Charge mode indication.

Important Note:

You cannot activate both the 'Plug & Charge' mode and the 'Scheduled Charging' mode simultaneously. You can select the charging mode that best suits your needs.

2. Charge Page (Charging Status) & Charge Settlement

- (1) Current Charging Duration.
- ② Current charging power.
- ③ Current Charging Data: Voltage, Current, and Temperature of the EV Charger.
- ④ Increased data: power and mileage (for reference only).
- (5) End charging.
- (6) The mileage increased of this charge (for reference only).
- \bigcirc The duration of this charge.
- (8) The increased power of this charge (for reference only).
- (9) The electricity charge used for this charging (for reference only).

3. Schedule Charging

- ① Schedule charging start and end time.
- 2 Set charging current size (Defaults to AUTO).
- ③ Set charging date (Monday to Sunday).
- ④ Enable Push Notification Before Charging Starts.
- (5) Save or cancel the relevant settings for scheduled charging.

4. Data

- (1) Electric: Select to view the amount of power consumed by charging (for reference only).
- (2) Cost: Select to view the amount of money consumed by charging (for reference only).
- ③ Select Time: Select the start time and end time to check the data within the time period.

5. Set

(1) Temperature Unit: Select units in °Cor °F

- (2) Cost Unit: Currency type setting
- (3) Vehicle Information: Whether to display vehicle information
- (4) Range unit setting: Select units in km or Miles
- (5) Indicator Light Switch: Turn on or turn off the EV Charger lights
