

# monday.com: Pro vs. Enterprise

**Sarit Chalamish** - Sr. Channel Partner Manager, monday.com

**Deborah Guinan** - Sr. Marketing Manager at XTIVIA, Inc.

Exploring the benefits of monday.com Pro membership

# Features of the Enterprise Plan not included in Pro

The Enterprise Plan is the most advanced plan that monday.com offers. It includes all of the features of the other plans including much more!

- 250,000 Automations/ Integrations (as opposed to 25,000 on the Pro plan)
- 50 boards per dashboard (Pro - 10 boards per dashboard)
- Access to advanced security features not available on Pro
- Single Sign-On
- HIPPA compliance program
- IP restrictions
- Audit log
- 1000 GB storage (Pro - 100 GB)
- VIP support with an account manager

# Enterprise Plan Advanced Security Features

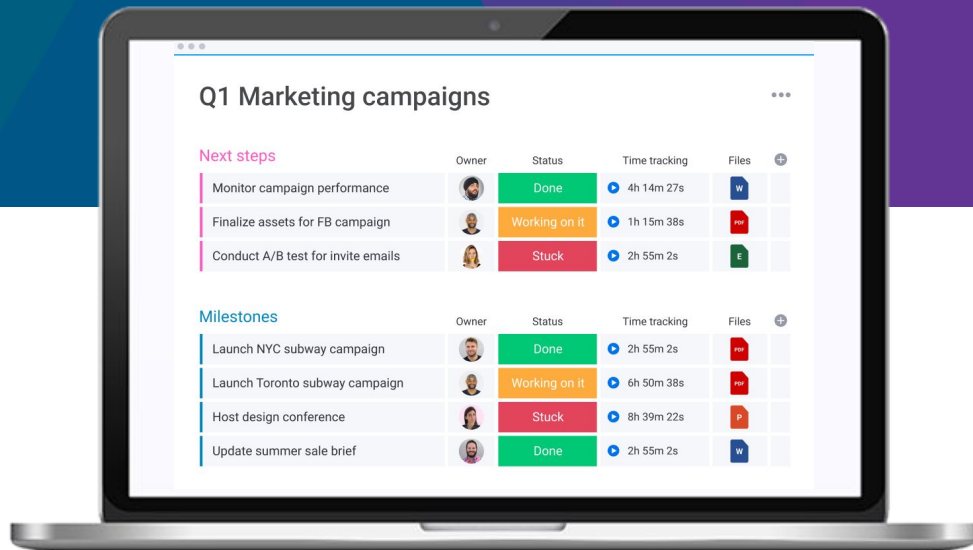

- **Compliance with HIPAA and SSAE** - vital for those in the medical field or those complying with strict guidelines.
- **Single Sign-On** - Keep your account secure and your IT team happy!
- **Panic Button Feature** - allows you to temporarily block your account if your team's login credentials are compromised.
- **IP Restrictions** - pre-define specific IP addresses that you wish to allow to join the account.

# monday.com Pro and Enterprise Permissions

Get intentional with what you want your team to view, edit, and interact with on your monday.com boards!

- Column Permissions (available on both Pro and Enterprise) - control who can view or edit certain columns.
- Item Permissions (only available on Enterprise) - gives you the ability to control everything in your workspace down to the individual item. This can be helpful in many ways. Lock certain columns that are meant to remain static. Control the way your team views your board so they aren't bogged down by unnecessary information.

# Other Benefits of the Enterprise Plan

More Automations and Integrations! 225,000 more than the Pro plan.

Hold on to all of your data with 1000 GB of storage. 900 GB more than the Pro plan.

50 Boards per dashboard! 40 more than with the Pro plan.

# Audit Log

Exclusive to the Enterprise plan, the audit log allows Admins to keep tabs on their teams. View when team members last logged in to the account, what device they were using, and what their IP address they are using. Keep an eye out for suspicious activity on the account, or use the metrics to help visualize your team's ideal working hours and locations to improve performance.

# THANK YOU

“Your brand experience rests on the technology that delivers it. Enhance your competitive advantage through the right technology. The future of your business depends on it.”

Dennis Robinson  
Chief Executive Officer
