Wood: Use basswood or tupelo for the figure, skis and ski pole basket. You will need bamboo skewers for the poles.

Tools: I carved this guy with a Draper Detailer and a String Beaner.

The skis are glued onto the bottom of the feet. The poles are bamboo skewers with the pole basket centers drilled and glued on. You will drill holes into the hands the same diameter as your bamboo skewers and then glue the pole into place. These holes are indicated in black on the pattern drawing.

Options:

Hair: Burn the hair and mustache, use a string beaner, or the classic V- tool

Painting: I used red for the jacket and hat. Brown for the skis. White for the beard and hair, yellow mittens and backpack and green pants.

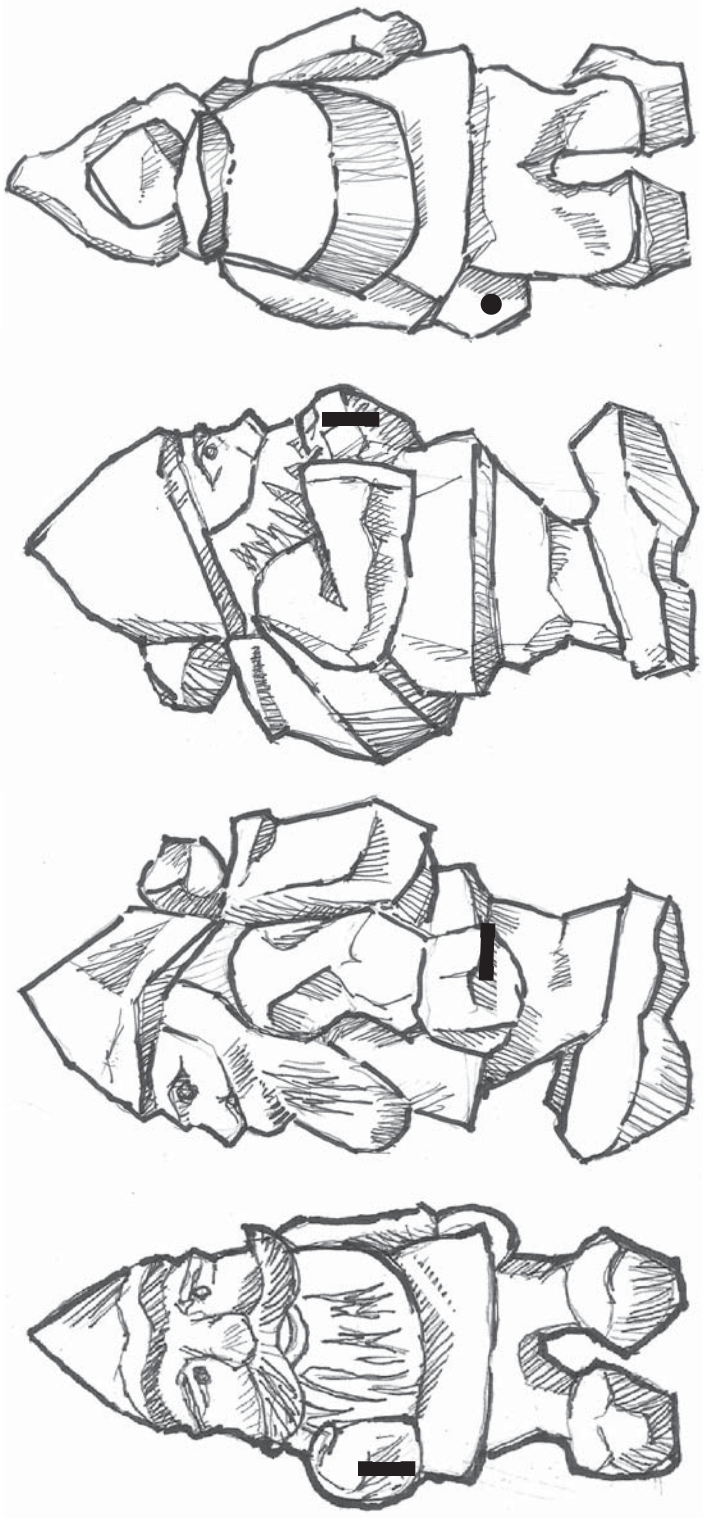

I then used an antiquing gel to give him and overall 'dirty' look.
