

INGREDIENT INDEX

Lipid Serum:

Water: the base of our serum and a universal solvent

Propanediol: functions as an emollient

Pentylene Glycol: a moisturizer

Glycerin (glycerol): a plant derived humectant

Sodium Hyaluronate: naturally occurring fatty acid polysaccharide found in connective tissues such as cartilage ethically sourced from a fermentation product

TSC (Disodium tetramethylhexadecenyl succinoyl cysteine): Our novel ingredient clinically proven to possess anti-aging properties and improve skin texture

Pentasodium Pentetate: a chelating agent

Citric Acid: adjusts pH

HYVIA® Crème:

Water: the base of our crème and a universal solvent

Caprylic/Capric Triglyceride: a primary constituent of coconut oil and has numerous skin benefits

Propanediol: functions as an emollient

Glycerin (glycerol): a plant derived humectant

Shea Butter: a skin conditioning emollient

Pentylene Glycol: a moisturizer

Limnanthes Alba Meadowfoam Seed Oil: a natural skin conditioning emollient

Glyceryl Stearate SE (self-emulsifying): a lipid used as surfactant and emulsifying agent

Stearyl Alcohol: a naturally occurring emollient

ALL EPICUTIS™ PRODUCTS ARE EWG VERIFIED™

INGREDIENT INDEX

HYVIA® Crème (cont'd):

Steareth-20: a wax used as an emulsifying agent

Tocopherols: a class of naturally occurring essential antioxidants, more commonly known as Vitamin E

Salvia Hispanica Oil: derived from a non-GMO chia species this patented oil extract called HYVIA® promotes skin hydration

DSD (Disodium S-Phetyl Diglycoloylcysteine): a proprietary Signum ingredient. It is an antioxidant that protects against environmental stressors by blocking UV and pollution induced skin damage

Spilanthes Acmella Flower Extract: a concentrated oily extract from the flower of the Acmella plant to reduce wrinkled appearance of face and neck

Ceramide NP: protects and moisturizes the skin

Isocetyl Alcohol: a mixture of branched chain 16 carbon aliphatic alcohols that offer skin barrier enhancement

Cetyl Alcohol: a long chain organic alcohol that offers skin barrier enhancement

Phytosterols: plant derived sterols to strengthen skin protection

Ferulic Acid: a plant-based antioxidant

Oenothera Biennis (Evening Primrose)

Seed Extract: this extract is used to boost lipid content of skin

Butylene Glycol (1,3-Butanediol): is a small organic alcohol used as a solvent and conditioning agent

Carbomer: is used as a thickening agent as well as an emulsifier to prevent oil and water from separating

Potassium Pentatate: a chelating agent

Potassium Hydroxide: is used to modulate the pH in cosmetic formulations
