INGREDIENT INDEX

Enzyme Exfoliating Powder:

Sodium Lauroyl Glutamate: an amino acid-based surfactant that can clean the skin

Synthetic Fluorophlogopite: a synthetic mica with a smooth surface that works as a base to improve usability

Silica: a naturally occurring mineral that is highly porous and can absorb sweat, sebum and dirt

Maltodextrin: a plant-based sugar that can work as a binding agent while stabilizing Protease and Lipase

TSC (Disodium Tetramethylhexadecenyl Succinoyl

Cysteine): Our novel ingredient clinically proven to possess anti-aging properties and improve skin texture

Protease: a naturally occurring enzyme that breaks down fats and oils into fatty acids while removing excess sebum and dirt

Lipase: a naturally occurring enzyme that helps to break down proteins and to remove dry skin flakes
