## Wichtige Hinweise zur Montage

Es ist zwingend erforderlich die Armaturen ausschließlich durch einen zertifizierten Sanitärfachhandwerker montieren zu lassen.

Wir empfehlen bei der Montage stets das Tragen den Handschuhen, um eventuelle Schnittwunden oder andere Verletzungen zu vermeiden.

Allgemein anerkannte Regeln der Technik sind einzuhalten (insbesondere Beachtung der DIN EN 1717).

Große Druckunterschiede zwischen den Kalt- und Warmwasseranschlüssen müssen ausgeglichen werden.

## WARNUNG

Bei Frostgefahr Hausanlage zunächst entleeren.

## Technische Daten

Betriebsdruck:	max. 1 MPa
Empfohlener Betriebsdruck:	0,1 - 0,5 MPa
Heißwassertemperatur:	max. 75°C
Empfohlene Heißwassertemperatur:	65°C

Das Produkt ist ausschließlich für Trinkwasser konzipiert.

## Pflegehinweis

Zur Vermeidung von Kalkablagerungen auf dem Produkt wird eine regelmäßige Reinigung des Produktes empfohlen. Das Produkt sollte mit einer neutralen Seifenlösung gewaschen, mit Wasser abgespült und mit einem weichen Tuch abgetrocknet werden.

Rückstände von Seife, Shampoo und Duschgel können ebenfalls Schäden auf der Oberfläche verursachen. Solche Rückstände sollten gründlich mit klarem Wasser entfernt werden.

Um Beschädigungen der Oberflächen des Produktes zu vermeiden, dürfen keine Scheuermittel oder Pasten zur Reinigung verwendet werden.

Um Farbveränderungen der Chromoberflächen zu vermeiden, dürfen keine aggressiven chemischen Säuren, Alkalien, Azeton, Ammoniumchlorid oder andere chlorhaltigen Komponenten zur Pflege verwendet werden.

*Der Hersteller behält sich ohne Ankündigung das Recht vor, Änderungen der Konstruktion, des Design oder der Zusammenstellung vorzunehmen.*

## Achtung!

Eine Hygieneschüssel ist kein Absperrventil und dient nur zum vorübergehenden Absperrern des Wassers.

Nach jedem Gebrauch ist es erforderlich, die Wasserzufuhr zur Hygieneschüssel mit einem Wasserhahn oder Absperrventil zu schließen und anschließend die Gießkanne und den Schlauch der Hygieneschüssel druckentlasten! Bevor Sie die Hygieneschüssel in die Halterung einbauen, müssen Sie das restliche Wasser davon abschütteln.

Wenn die oben beschriebenen Bedingungen nicht eingehalten werden, sind Undichtigkeiten möglich, für die der Hersteller und/oder Verkäufer nicht verantwortlich sind.

## Important notes about installation

The product must be fitted exclusively by a specialist sanitary engineer.

To prevent injuries gloves should be worn during installation.

Generally accepted engineering practices should be applied. (In particular, compliance with DIN EN 1717 is recommended).

The hot and cold supplies must be of equal pressures before installation of mixers.

### WARNING

Drain system completely if danger of frost.

## Technical Data

Operating pressure:	max. 1 MPa
Recommended operating pressure:	0,1 - 0,5 MPa
Hot water temperature:	max. 75°C
Recommended hot water temperature:	65°C

The product is exclusively designed for drinking water.

## Maintenance recommendations

To avoid lime spots at the product it is recommended to be regularly cleaned. The cleaning should be carried out by soap solution with the following rinse with water and removing moisture by dry soft cloth.

Remains of liquid soap, shampoo and shower gel may also cause damages of decorative cover. In case of their penetration onto the diverter housing it should be thoroughly cleaned with clean water

To avoid damages of product surface it is forbidden to use abrasive solutions and pastes for its cleaning.

To avoid changes color of decorative cover it is forbidden to use chemicals for cleaning that contain aggressive chemical substances of acids, alkali, ammonium chloride and other components containing chlorine.

*Producer reserves the right without prior notice to introduce alterations into design and component parts of devices.*

### Important!

A hygienic shower is not a shut-off valve and is designed to shut off water only for temporary water supply.

After each use, it is necessary to turn off the water supply to the hygienic shower with a faucet or shut-off valve, and then relieve pressure in the watering can and hose of the hygienic shower!

Before installing the hygienic shower in the holder, need to shake off the remaining water from it.

If the conditions described above are not observed, leaks are possible, for which the manufacturer and/or seller are not responsible.

## Ważne informacje dotyczące instalacji produktu

Instalacja produktu powinna być wykonana przez wykwalifikowanego specjalistę. Aby uniknąć obrażeń ciała, zaleca się używanie rękawiczek. Podczas instalacji należy zastosować przyjęte rozwiązania inżynierskie zgodnie z obowiązującymi przepisami (norma DIN EN 1717). Przed zainstalowaniem baterii, należy wyrównać ciśnienie zimnej i gorącej wody za pomocą zaworów regulujących dostarczenie wody do lokalu.

### UWAGA

W przypadku zagrożenia wystąpienia przymrozków, należy całkowicie usunąć wodę z systemu.

## Dane techniczne

Ciśnienie robocze:	max. 1 MPa
Zalecana praca ciśnienie:	0,1 – 0,5 MPa
Temperatura ciepłej wody:	max. 75°C
Zalecana temperatura gorąca woda:	65°C
Dezynfekcja termiczna:	70°C (3 min)

Produkt jest przeznaczony tylko dla wody pitnej.

## Zalecenia w użytkowaniu

Aby uniknąć pojawienia się plam, osadu, zaleca się regularne czyszczenie powierzchni. Mycie należy wykonywać za pomocą roztworu mydła, następnie należy opłukać myte powierzchnie wodą. Pozostałość należy usunąć za pomocą miękkiej ściereczki na sucho. Pozostałości mydła w płynie, szamponu, żelu pod prysznic również mogą spowodować uszkodzenie powłoki dekoracyjnej. W przypadku dostawania się tych środków na powierzchnię wyrobu należy opłukać to miejsce strumieniem czystej wody. Aby uniknąć uszkodzenia powierzchni produktu, nie zaleca się stosowania środków ściernych i past do pielęgnacji. Aby uniknąć zmiany koloru powierzchni zabrania się stosowanie środków chemicznych zawierających szkodliwe substancje chemiczne: kwasy, alkalia, aceton, chlorek amonu i inne składniki zawierające chlor.

Producent zastrzega sobie prawo do wprowadzania zmian w strukturze produktu oraz jego wyposażenia bez wcześniejszego powiadomienia.

### Ważny!

Prysznic higieniczny nie jest zaworem odcinającym i jest przeznaczony do odcinania wody tylko w celu tymczasowego zaopatrzenia w wodę.

Po każdym użyciu należy zakręcić kranem lub zaworem odcinającym dopływ wody do prysznica higienicznego, a następnie uwolnić ciśnienie w konewce i wężu prysznica higienicznego!

Przed zainstalowaniem prysznica higienicznego w uchwycie należy strząsnąć z niego pozostałą wodę.

Jeśli warunki opisane powyżej nie są przestrzegane, możliwe są nieszczelności, za które producent i/lub sprzedawca nie ponoszą odpowiedzialności.
