

Showcase The Beauty of Your Fountain With Our New Residential LED Lighting

Our residential LED lighting offers a stunning nighttime display at a great price. There are several distinctions from our commercial LED lighting. First is in the transformer, which is a non-submersible unit engineered with a durable all weather housing. In addition, the transformer on this style has a built in photo eye that automatically turns the lights on at dusk, and a timer that runs for 4, 6, or 8 hours before turning the lights off.

These 2 or 4 light kits install in minutes to your new or existing fountain and feature stainless-steel fixtures and brackets. Long-lasting. Energy-efficient. Simple to use. These LED lights will create a stunning focal point to your outdoor paradise.

2 or 4 light kits include:

- Stainless steel lights and arm brackets
 - Power cables
 - All-weather transformer
 - Durable exterior grade power supply
- 12 Volt
 - 9 Watts Per Fixture
 - 1230 Lumens
 - 2800K Warm White
