

34 S^T JOHN

Name: Raffinata 120cm solid surface work top

Code: JCT120.

Top View

Elevation

IMPORTANT NOTE:

Any holes created in the countertop can be done on-site using a hole saw or jig-saw, and any chipped edges should be sanded smooth. This work should be completed by a competent person with the countertop held securely on a flat surface. If making any square cut outs, do not square the corner out to a point, leave a small radius in the corner to disperse stress in the material.

All dimensions are shown in mm
