

# Poppy Playpen Assembly Instructions

We are delighted that you have chosen the Poppy Playpen and we know that you and your baby will love it! We are obsessed with safety at Anita's House and it's good to know that the instructions supplied with the playpen have passed stringent safety standards, so do make sure you follow them carefully to ensure that your playpen is assembled correctly and is safe to use.

**Please note:** This instruction sheet has been created as a full-colour guide to accompany the original instructions supplied by the manufacturer and is not intended as a replacement. Please check that you have read and followed the original instructions carefully.

An adult should assemble this playpen and it is so much easier with two people. The playpen has 3 base heights available\*. The lowest base height is the safest and should always be used in that position once the baby is old enough to stand. Just repeat steps 6 + 7 to adjust the base height as required. There is a cut mark on the inside of the end frame, which indicates the maximum height of the mattress when the base is at its highest.

**IMPORTANT:** All assembly fittings should always be tightened properly and care should be taken that no screws are loose.

Should you need any help at all, just call our team on +44 (0)207 371 5145 and we'll be happy to help.

## First, check you have everything you need:

<p>A - End frame</p>  <p>x2</p>	<p>B - Side frame</p>  <p>x2</p>	<p>C - Base</p>  <p>x1</p>
<p>D - Long silver housing</p>  <p>x8</p>	<p>E - Allen key</p>  <p>x1</p>	<p>F - Silver conical screws</p>  <p>x8</p>
<p>G - Cylindrical insert</p>  <p>x8</p>	<p>H - Bolt 6x30</p>  <p>x4</p>	<p>I - Flag bolt</p>  <p>x4</p>

Now follow the assembly instructions overleaf...

1. Place the Long Silver Housings (D) into the holes at the corners of the end frame (A). Ensure that the hole in the silver housing (D) is facing downwards.

2. Place the Cylindrical Inserts (G) into the side frames (B). Note the hole in the cylindrical insert must be aligned with the hole.

3. Place the side frames (B) onto the end frame (A) ensuring that the long silver housings (D) meet with the cylindrical inserts (G).

4. Secure the side frames to the end frame, using the Silver Conical screws (F) and the Allen Key (F) to tighten. Then repeat steps 3 and 4 to complete the square frame.

5. Place the Flag Bolts (I) into the End frame (A) at your desired height\*. Try to ensure the flat end is lying horizontal with hole facing upwards. Place the base (C) onto the flag bolts and align the holes in the flag bolt with the holes in the base.

7. Using the Allen key (E), Screw the Bolts (H) into the four corners of the Base (C), ensuring they thread through the Flag Bolts (I). Make sure all the bolts are tight.
