WHO IS WATTUM?

# WHO IS WATTUM?

Wattum is a complete Bitcoin mining solutions provider and one of the largest distributors of Bitcoin mining equipment based out of the United States. We offer a range of products and services, from ASIC Miners, mobile industrial Mining Containers and Power Transformers, to complete hosting and management plans and full facility buildouts.

At Wattum, we work with the ultimate goal of redistributing wealth in order to promote inclusive prosperity through mining Bitcoin. That's why we've created programs that allow our clients to sustainably start Bitcoin mining or grow their existing operations.

2980 NE 207th Street, Suite #705, Aventura, Florida 33180

## OUR STORY

Arseniy Grusha has been building and managing Bitcoin mining farms since 2015, developing innovative practices that have been proven to generate a greater profit while reducing costs of management.

Through outsourcing and remote working designs, he has perfected the ability to provide expert management and hosting services while requiring minimal staffing hours on-site: a skill that has proven its worth against a global pandemic and other such obstacles.

These practices form the foundation of Wattum's growth, beginning with the collaboration between Arseniy and the team at Nice Capital.

## COLO BUILDERS

This prompted them to search for like-minded, entrepreneurial partners that would help them continue to realize their goal, finding a group of engineers who were in the process of building a new mining facility.

The collaboration resulted in a new company being formed: Colo Builders, who were going to build a new facility that had an electricity cost sitting low at \$0.07/kwh.

This fact filled the team with certainty that they were finally in the clear and could focus on making their mark in crypto mining.

## NICE CAPITAL

When Nice Capital decided to begin focusing on GPU mining in 2017, their understanding of the Bitcoin mining world was limited to the belief that it was as easy as buying a machine, plugging it in, and watching the money fall into your lap. That interpretation of this advanced market quickly dissipated.

Their goal was to increase the lifespan of the equipment in their possession, leading them to host it in a data center that charged them \$0.40/kwh. As their machines would be generating \$0.75/kwh, they would be making \$0.35/kwh in profits - a reflection of the bullish status of crypto at the time.

It was indeed bullish, as this profit margin slowly dropped to \$0.60/kwh, and then \$0.40/kwh, at which point they hastily removed their rigs from the data center before the projected revenues would plummet to a predicted \$0.15/kwh.

OUR STORY

## WATTUM

Despite the team's optimism, a frigid "Crypto Winter" crept up, leaving the market bare and forcing the Colo Builders facility to shut off for the time being as profits froze below \$0.07/kwh, making it unsustainable to keep up their monthly \$12,000 staffing needs.

This is where Arseniy, the founder of Wattum, came into the picture. Colo Builders quickly began generating between \$0.10 and \$0.12/kwh while reducing their management costs to less than \$3,000 per month.

Over the next year, Wattum expanded its services to include mining equipment purchasing, selling, financing, hosting, repair services, as well as on-site and remote management.

A Chief Engineer with over 35 years of experience in data center building helps Wattum service multiple mining farms in the United States.

## CONTINUED GROWTH

In a 12-month span, Wattum grew from \$0 to \$200 million in projected sales, and increased its team from a mere dozen to over 90 dedicated experts.

We look forward to leveraging our professional relationships in order to become the #1 preferred Bitcoin mining equipment reseller and colocation management company in the world.

# PRODUCTS & SERVICES

We sell ASIC miners from the world's leading manufacturers

We offer mobile mining containers and pad-mounted power transformers

We offer a complete mining, hosting and maintenance program

We offer joint-venture opportunities

We help design and develop turnkey mining facilities
