

Permanent Painted Coatings

Application Information

FOR USE WITH PRESSURE SPRAYERS ONLY

Product Function:

Auto-foam is a powerful cleaner designed to remove heavy soils and contaminants from automotive surfaces.

This is a non-caustic product that will not dull high gloss finishes even with frequent concentrated use.

Cleaners containing sodium hydroxide can lead to paint film destruction - **auto-foam** is free of this material.

Auto-foam is a rapid wet product, as such, the requirement for high build clinging foams is obviated. While a complete foam blanket can be obtained it is the rapid breaking of the accumulated bubbles that allows the surfactants to continue wetting out and removing soil as the applied product moves from the vehicle.

Auto-foam meets all EU biodegradability requirements.

How to Use:

- Use on cool surfaces.
- Dilute product as required to reach a PIR (Panel Impact Ratio)
 - 1 part in 100 for light cleaning
 - 5 parts in one hundred for heavily soiled vehicles.
- It is important to know the flow rate of your equipment to determine the correct add rate. If in doubt measure the nozzle output and chemical feed rate.

Health & Safety

Keep material away from children. Avoid prolonged skin contact, wash from skin or eyes with copious quantities of clean water immediately. Do not ingest.

Further car enhancement products:-

Auto Clay— provides a method of removing harmful contamination from vehicle paint finishes, improving its durability and increasing the gloss level of subsequent waxes.
