

surfex HD

Water-based degreaser

Product Function

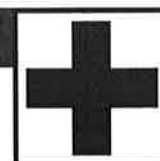

With increasing restriction on the use of solvent-containing degreasers and cleaners, safer, water-based materials have been developed. However it has been difficult to match the performance of the solvent-containing systems and increasing environmental restrictions on the ranges of acceptable water-based actives has further tested the formulators' ability. Bilt-Hamber surfex HD provides performance levels that can match and even exceed solvent systems while meeting the latest standards of biodegradability. surfex HD attacks all oil and grease based soiling, but unlike solvent based cleaners will additionally and effortlessly clean organic, or water deposited grime. surfex HD can be adjusted in strength to suit the level of soil, remaining active at add levels of just 1% in water for light work, or used neat for extreme duty. surfex HD is recommended for all arduous automotive, commercial and domestic cleaning duties.

How to Use

Use on cool surfaces. Dilute product as required; 1 part in 100 for light cleaning or use neat for maximum grease and oil removal. surfex HD may be dosed into jet washing equipment or applied by manual methods. For increased efficiency on heavy soil apply liberally and agitate with suitable brush. After degreasing rinse thoroughly with clean water, take care not to allow ingress of water or cleaner in to any electrical components or equipment. Small scale trials should be conducted before use.

Health and Safety

Keep material away from children. Avoid prolonged skin contact, wash from skin or eyes with copious quantities of clean water immediately. Do not ingest.
