

korrosol

gelled rust remover

Application Information

Korrosol Fallout Remover

A controlled pH non-alkaline fallout remover for the safe and effective removal of embedded metallic particles that contaminate the vast majority of road going vehicles.

You may not have noticed by looking at your paintwork, but next time it's washed and clean lightly feel the paintwork, especially the horizontal panels; bonnet, boot lid, roof etc. Very gently with finger tip touch you'll be able to feel a rough grittiness. You may well think this is dust landed from the air – it's not. Airborne metallic particles liberated by braking surfaces, such as pads and discs fill the air along our roads, when hot after the car in front of you brakes your car travels through them, as a result they embed themselves in your paintwork.

How these particles destroy paint films

Here they react with rainwater or air moisture and begin to corrode and as the corrosion product (rust) occupies four times the space of iron the paint is slowly ruptured around the embedded particle. This action destroys both the aesthetic and protective qualities of the finish.

Fast and effective... simply wash away

While harsh acids such as phosphoric and oxalic acids maybe use with good effect to remove the contamination, these acids do not discriminate between corrosion and good steel not even paint films themselves, so while the particle is removed and base metals or coatings can also be attacked.

korrosols effective formula is simply sprayed onto the contaminated panel a rapid and dramatic colour change takes place which indicates that the corroded part is water soluble after which a rinse with water leaves the panel free of metallic embedment.

korrosol is safe to use on all auto body paint finishes including lacquers.

The information set out in this flier is, so far as can be ascertained, true and accurate, but all recommendations or suggestions are made without guarantee.

Since the conditions of use of the Products sold by Permanent Painted Coatings Limited Permanent Painted Coatings Pty Ltd (Australia) ("PPC Pty Ltd") are beyond the control of PPC Ltd / and or PPC Pty Ltd ("the company"), the Company to the full extent allowed by law, disclaim any liability with respect to damage, injury or death consequent upon the use of the Products or consequent upon the use of the information contained herein.

The Company warrant that the Products supplied hereunder shall conform to the description or specification stated in this flier. The Company make no warranties that Products supplied are made to certain industry specifications. To the full extent allowed by law, the liability of the Company with respect to any breach of the aforesaid warranty shall be limited, at the option of the Company, to payment of the cost of replacing the Products or of acquiring equivalent products and in no case shall the Companies be liable for consequential loss or damage.
