

## Application Information

### Ultra durable deep shine liquid carnauba wax

Hydra-Wax is a superior, super-easy-to-use last stage treatment for the protection of highly finished automobile paint systems. The high grade T1 carnauba wax is used as the backbone to provide a deep rich gloss. Unlike other automotive waxes, excellent gloss, ease of application and buffability are provided by other gloss enhancing molecules. To achieve the ultimate smooth glass-like finish, the paint should be in good condition. This can be easily achieved before use with Korrosol and Auto Clay bar, before Hydra-Wax treatment.

### Detergent-proof water beading

This product offers detergent-proof longevity. It will continue to bead water long after more expensive sealers, premium paste waxes and so called 'nano coatings' have failed. For longest durability, pre-cleaning of paint using Cleanser-Fluid is recommended.

### Non-abrasive and dirt repellent

Hydra-Wax is a particularly good choice for those who want an excellent water and dirt repellent shiny finish to their paintwork, with ease and infrequent application. It is also an excellent choice for those who wish to apply a product as frequently as every week.

With easy application and satisfying buffing, no dust is produced and there are no abrasives to wear away the paint. We guarantee that this will give the user the most satisfying waxing experience ever.

### HOW TO USE

Thoroughly wash vehicle with hot soapy water using only salt-free automotive shampoos. Do not use wash and wax products. Dry vehicle using chamois leather or synthetic equivalent.

Hydra-Wax is not an abrasive polish; if your paintwork is faded, feels rough or has not been polished for a long period it will be necessary to use Cleanser-Polish and/or Auto-Clay before application. Once prepared in this way, regular application of Hydra-Wax will maintain a high gloss finish without need for further use of abrasive polishes. Use of Cleanser-Fluid prior to application of Hydra-Wax will dramatically boost the longevity of the buffed film.

Work on shaded cool panels. Using the sponge applicator provided, apply in light circular motions sparingly and allow to dull for approx 5-10 minutes. Buff to a high shine using the blue micro fibre cloth provided, turning frequently.

Both App Pad and microfibre cloth can be washed for re-use. Do not use fabric conditioner.

App-Pad should be stored away from direct sunlight.

If when the hydra-wax arrives it seems to be solid in the bottle, loosen the cap and place the bottle in about three inches of hot water, for about five to 10 minutes, and then shake the bottle well.
