**Hazard Statements** 

swallowed and enters airways. Causes skin and serious eye irritation. May cause drowsiness or dizziness. May damage fertility or the unborn child. May cause damage to organs through prolonged or repeated exposure.
Precautionary Statements

General Prevention Keep out of reach of children.

Obtain special instructions before use. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe spray. Wash hand thoroughly after handling. Do not eat, drink or smoke when using this product. Use only in a wellventilated area. Wear protective gloves and eye protection.

Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Harmful if swallowed. May be fatal if

Response	IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: G et medical advice/ attention. Take off contaminated clothing and wash before reuse. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Rinse mouth. Do not induce vomiting. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF exposed or concerned: Get medical advice/attention. Call a POISON CENTER or doctor if you feel unwell.
Storage	Store in a well-ventilated place. Keep container tightly closed. Store locked up. Protect from sunlight. Do not expose to temperatures exceeding 50 /C/122/F.
Disposal	Dispose of contents/container in accordance with local regulations.
Hazards Not Otherwise Classified	None identified.
Unknown Acute Toxicity	14 % by wt

## **SECTION 4 - FIRST AID MEASURES**

General	If exposed or concerned seek medical advice/attention.
Eye Contact	Immediately flush with clear water for at least 15 minutes, including under the eyelids. Consult a doctor.
Skin Contact	Remove with soap and water, rinsing and repeating for 15 minutes.  Use skin cream to counter any resulting dryness. Consult a physician if irritation continues. If large skin area is affected, remove contaminated clothing.
Ingestion	Do not induce vomiting! Immediately have the victim drink plenty of water. Do not give milk or digestible oils. Keep airways free. Contact a physician. Never give anything by mouth if victim is rapidly losing consciousness, unconscious, or convulsing.
Inhalation	Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if symptoms persist or if unconscious.
First-Aid Responder Protection	Wear adequate personal protective equipment based on the nature and severity of the emergency.
t Important Symptoms and Effe	cts, Both Acute and Delayed
Fire Contract	Lisuid as that many sources and a plane with me downto any instantion
Eye Contact	Liquid contact may cause pain along with moderate eye irritation.
Eye Contact Skin Contact	Liquid contact may cause pain along with moderate eye irritation. Prolonged or repeated exposure may cause skin irritation. Repeated contact may cause drying or flaking of skin. May cause more severe response if confined to skin.
•	Prolonged or repeated exposure may cause skin irritation. Repeated contact may cause drying or flaking of skin. May cause

Immediate Medical Attention No information available.

Suitable Extinguishing	Water, CO2, dry chemical, or universal aqueous film forming foam
Media	
Unsuitable Extinguishing Media	Water jet
ecific Hazards Arising from the Cherr	nical or Mixture
Decomposition Products	Oxides of carbon (CO, CO2), smoke, and/or vapors
Hazards from the Product	CONTENTS EXTREMELY FLAMMABLE AND UNDER PRESSURE. In a fire or if heated, a pressure increase will occur which m result in the container bursting. Vapours heavier than air may spread along the ground and travel to an ignition source.
lvice for Firefighters	
Protective Actions	Use water spray to cool fire exposed containers as contents may rupture violently from heat developed pressure.
Protective Equipment	As with any fire wear SCBA pressure-demand, MSHA/NIOSH approved, and full protective gear.
_	
ECTION 6 - ACCIDENTAL	RELEASE MEASURES
rsonal Precautions, Protective Equip	ment and Emergency Procedures
For Non-Emergency	No action should be taken by non-emergency personnel without suitable training. Evacuate surrounding areas. Keep
Personnel	unnecessary and unprotected personnel from entering. Do not touch or walk through spill. Remove ignition sources and provide adequate ventilation only if it is safe to do so.
For Emergency Responders	Use personal protection as recommended in Section 8. Observe precautions provided for non-emergency personnel.
vironmental Precautions	
vironmental Precautions Precautions	Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.
Precautions	
Precautions ethods and Materials for Containme	nt and Cleaning Up
Precautions	
Precautions ethods and Materials for Containme	nt and Cleaning Up Product is an aerosol, therefore spills and leaks are unlikely. In case of rupture, released content may be contained with oil/solvent absorbent pads, socks, and/or absorbents. DO NOT use combustible material such as sawdust. Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered

**Hygiene Recommendations** Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated clothing and protective equipment before entering eating or smoking areas.

#### Conditions for Safe Storage Including Any Incompatibilities

 Storage Requirements
 Storage of individual cans should be done in an area below 50/C (122 /F), and away from heat sources. Ensure can is in a secure place to prevent knocking over and accidental rupture. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended. This product is classified as a Level 3 Aerosol.

 Incompatibilities
 Segregate storage away from materials indicated in Section 10

### **SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION**

#### **Control Parameters**

#### **Occupational Exposure Limits**

10	OSHA			NIOSH			ACGIH		AIHA

3	Acetone in urine	End of shift	50 mg/L	Ns

Other Control Parameters Not Available

#### Appropriate Engineering Control

Engineering Measures	Use only with adequate ventilation. General ventilation (typically 10 air changes per hour) should be used. Ventilation r					
	should be matched to conditions. Local exhaust ventilation or an enclosed handling system may be necessary to control air					
	contamination below that of the lowest OEL from the table above.					

Individual Protection Measures	
Hygiene Considerations	Avoid breathing vapors and contact with the skin and eyes. Always replace overcap when not in use. Keep out the reach of children. Wash hands after use.
<b>Thermal Protection</b>	This product does not present a thermal hazard.
Respiratory Protection	An approved respirator with organic vapor cartridge may be permissible under certain circumstances where airborne concentrations are expected to exceed occupational exposure limits. If respirators are needed, compliance with OSHA standard 29 CFR 1910.134 is necessary.
Skin Protection	For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or repeated contact could occur, use protective clothing impervious to the ingredients listed in Section 2.
Eye/Face Protection	Safety glasses with side shields are recommended as a minimum for any type of industrial chemical handling. Where eye contact with this material could occur, chemical splash proof goggles are recommended.

Other Protective Equipment Safety showers and eye-wash stations should be available in the workplace near where the material will be used.

## **SECTION 10 - STABILITY AND REACTIVITY**

Reactivity

**Chemical Stability** Hazardous Reactions **Conditions to Avoid Material Incompatibility**  No specific test data related to reactivity is available for this product or its ingredients. This product is stable. Under normal conditions of storage and use, hazardous reactions are not expected to occur.

Keep away from heat, sparks, flame, and red hot metal.

Acids, Activated Carbon, Alkali Metals, Alkalis, Aluminum, Bases, Chlorine Dioxide, Copper, Halogens, Hexachloromelamine, Hydrogen Peroxide, Isoprene, Nitrogen Tetroxide, Silver Perchlorate, Strong Acids, Strong Oxidizing Agents, Strong Reducing Agents, Sulfur Dichloride, Tetranitromethane, Trichloromelamine, Uranium Hexafluoride

**Decomposition Productions** 

Oxides of Carbon, Acetic Acid, Formaldehyde fumes, Hydrogen Peroxide, Methanol may be formed depending on fire conditions.

### SECTION 13 - DISPOSAL CONSIDERATIONS

<u>Waste Disposa</u>l

Characteristics and waste stream classification can change with product use and location. It is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste must be disposed of in compliance with the respective national, federal, state, and/or local regulations.

Waste Disposal of Packaging

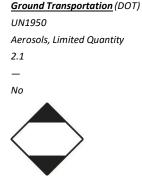

An aerosol container that does not contain a significant amount of liquid would meet the definition of scrap metal (40 CFR 261.1(c)(6)), and would be exempt from RCRA regulation under 40 CFR 261.6(a)(3)(iv) if it is to be recycled. If containers are to be disposed of (not recycled) it must be managed under all applicable RCRA and state regulations.
