

Application Information

PRODUCT INFORMATION:

Bilt Hamber Auto wheel is a pH balanced high activity wheel cleaner, designed to deep clean even the filthiest of vehicle road wheels, with a minimal amount of mechanical agitation.

Acid based wheel cleaners are very effective but can attack alloy if damage to the protective lacquer occurs.

Similarly alkaline or caustic wheel cleaners can damage substrates in a similar fashion. Alloy wheels are bombarded by hot particles that are generated from the braking surfaces - the most destructive of these are metallic and iron based, while still hot they embed themselves by effectively melting their way into the lacquer film, thousands together make a rough and very convenient surface for debris to adhere to and are difficult to clean.

Acid based cleaners are typically the most effective as they attach the metallic objects reducing their size which allows them to be released from the lacquer.

Auto Wheel provides the same release function by using a unique chelating process that renders the iron particles water soluble neutral together with a strong degreasing action auto-wheel provides safe effective wheel cleaning.

HOW TO USE :

1. Always test on small scale before use.
2. Use on cool surfaces.
3. Spray liberally over entire wheel surface ensuring good coverage of edges etc.
4. Reaction time is temperature dependent usually between 1 to 4 minutes is sufficient. The chelating process is indicated by a change in colour from clear to deep purple.

5. Once no further colour deepening has occurred the wheel must be power washed or rinsed off, extremely dirty wheels will benefit from agitation with a soft brush before rinsing.
6. Auto-wheel is safe on a wide range of surfaces including paint, lacquers alloys and steel. However small scale trial should be carried out before use. Due to the use of conductive films used to make "chrome" or plate plastic wheel centres and films these may be chelated by the active material and dulled - please keep away from these surfaces.

information set out in this flier is, so far as can be ascertained, true and accurate, but all recommendations or suggestions are made without guarantee.

Since the conditions of use of the Products sold by Permanent Painted Coatings Limited Permanent Painted Coatings Pty Ltd (Australia) ("PPC Pty Ltd") are beyond the control of PPC Ltd / and or PPC Pty Ltd ("the company"), the Company to the full extent allowed by law, disclaim any liability with respect to damage, injury or death consequent upon the use of the Products or consequent upon the use of the information contained herein.

The Company warrant that the Products supplied hereunder shall conform to the description or specification stated in this flier. The Company make no warranties that Products supplied are made to certain industry specifications. To the full extent allowed by law, the liability of the Company with respect to any breach of the aforesaid warranty shall be limited, at the option of the Company, to payment of the cost of replacing the Products or of acquiring equivalent products and in no case shall the Companies be liable for consequential loss or damage.

In no case will the Company be liable to defend or pay any award of damages assessed against the buyer in any suit or cause of action alleging that the use of the Products supplied hereunder infringe any patent. The Company hereby expressly disclaim any written or unwritten, express or implied representation, warranty or condition against infringement of any patent with respect to such goods.
