The Dr Sebagh Oxygen Facial

Indulge in the ultimate skincare luxury with The Dr Sebagh Oxygen Facial, a popular Korean Beauty treatment for achieving that coveted glowing complexion. This cutting-edge treatment harnesses the power of 90% pure oxygen delivered under hyperbaric pressure through our unique oxygen dome, paired with revolutionary anion therapy to rejuvenate skin cells, combat acne-causing bacteria, and restore your skin's natural balance.

Embark on a blissful four-step journey towards radiant skin. Beginning with a gentle exfoliation to sweep away impurities, followed by the application of the oxygen bomb whipping mask, activated by the inhalation of oxygen saturation under the dome, deeply cleansing and hydrating your skin.

Next, experience the luxurious mist of silky serum infused with pressurized oxygen, delivering nourishment deep into your pores. Finally, unwind as you detoxify for 20 minutes under the oxygen dome, benefiting from our patented anion technology while a sumptuous, Korean-based energy cream works its magic on your skin.

Leave our sanctuary with skin that's not just clean, but luminous and revitalized, ready to face the world with confidence. Elevate your experience by adding our Oxygen Facial to other treatments like RadioFrequency with Microneedling, Ultralift (HIFU) treatment or combine with a Dr Sebagh HydraFacial for maximum skin benefits.

Suitable for all skin types and requiring no downtime, the Dr Sebagh Oxygen Facial promises a transformative experience tailored to your skin's needs. Experience the pinnacle of skincare luxury and reveal your most radiant self today.
