

# Dr Sebagh

THE FACIAL ROOM in CHANDOS HOUSE

## Treatment Menu

### The Ultra Eyelift Facial

A quick-fix 30 minute treatment to brighten, depuff and lift the eye contour featuring a bespoke application of Dr Sebagh Advanced Ageing-Maintenance Skin Care products.

The treatment starts with a deeply purifying double cleanse before lifting the eye contour using Ultralift/HIFU technology. Using two different heads specifically made for the Dr Sebagh Clinic we target a number of areas around the eye. We target the sides of eyes to help minimise the appearance of crow's feet and under the eye area to drain puffy fluid from around the eyes. Eyes are left revitalised and bright with brows beautifully lifted.

This is followed with relaxing and rejuvenating facial Massage around the eye area to improve circulation, relax the muscles, promote alertness and wakefulness and prepare skin for the absorption of active ingredients.

Your facialist will apply an eye serum containing a mixture of potent ingredients including peptides and hyaluronic acid to instantly illuminate, tighten and refresh the eye area; correct dark circles; alleviate puffiness and soothe the skin; reduce the appearance of fine lines and deeper wrinkles; boost elasticity and add radiance to the eye contour. This is then followed with an eye cream the choice of which will be tailored to suit your needs.

Finally, an application of serums from the Dr Sebagh Serum Bar and a moisturiser tailored to your individual skin type and needs.
