The Ultralift Facial

Also known as the 'Glass Skin Facial', this brand new facial treatment combines cutting-edge ultrasound technology with a bespoke application of Dr Sebaugh Advanced Ageing-Maintenance Skin Care products for a truly lifted, sculpted and tightened visage.

First, skin is cleansed and exfoliated before being prepped for treatment with the Ultralift machine. Ultralift uses multi-functional high-intensity focused ultrasound (Multi-Functional HIFU) to stimulate skin rejuvenation by triggering the body's natural process of collagen synthesis. Warm pulses of ultrasound energy are delivered deep under the skin, causing the muscle layer to contract. The gentle heat also encourages a natural process of rejuvenation stimulating collagen production. Ultrasound waves are also capable of selectively impairing aged collagen, triggering the body's natural healing response to further stimulate collagen production in a specific area. In this way, The Ultralift treatment will stimulate the growth of new collagen over time, to gradually strengthen and tone your skin from within.

Although some sensation can be felt during the treatment it is unlikely to be painful. What can be felt during the treatment is tiny amounts of concentrated ultrasound energy delivered below the surface of the skin. The level of discomfort can vary patient-to-patient, but we will be sure to consult with you prior to your treatment to ensure your experience is as pleasant as possible.

After 10 minutes of treatment with the Ultralift machine, our facialist will blend a cocktail of serums from Dr Sebaugh's infamous Serum Bar tailored to each individual's skin needs and suitable for use after treatment with Multi-Functional HIFU. Immediately following The Ultralift Facial your skin should feel tighter, smoother and more youthful. Over time you may notice additional tightening.

Ultralift Facial **£350**

Advanced Ultralift Facial (+ 10 minutes Ultralift) **£380**
