MID-HANDLE SERIES

M10 Trigger Mechanism's proprietary 3 piece design utilizes compound leverage for industry leading force loads and trigger pull

Fully inlaid open muzzle with line wrap, line anchor, reel eyelet, and band slot

Integrated universal dovetail mount allows for fast and quick reel and accessory installation

M10 Trigger Mechanism accurately levels shafts for laser precision. Accepts all American back shafts

Our Mid-Handle series guns combine the unmatched performance of our M10 3-piece trigger system with a remote trigger design for maximum band stretch and Mid-Handle maneuverability. By moving the handle forward and keeping the mechanism in rear we get the best of both worlds: full use of the barrel for storing band power and easy handling by using the handle as a fulcrum to pivot the speargun. All Mid-Handles come standard with Elite rigging for ultimate silence while on the hunt. Designed for large game hunting, Mid-Handle Magnum and 450 models come standard with Warhead Slip Tips.

MID-HANDLE SERIES FEATURES:

- Laminated African Mahogany CNC machined barrel
- Integrated full spearshaft track for maximum accuracy
- Mid-Handle design with remote trigger mechanism for power and precise under water maneuvering
- Powered by 5/8" Elite Nitro Bands with triple core Spectra wishbones
- 5/16" Hand straightened and tuned 17-4 heat treated stainless steel spearshaft with shark fin load tabs
- Open muzzle with shockline directly attached to shaft
- Silent operation
- Positively buoyant (without spearshaft loaded)
- M10 three piece mechanism with remote trigger
- Ergonomic 45° honeycomb handle
- Comfortable load pad
- Integrated safety

WOODY EURO SERIES

WOODY EURO 120

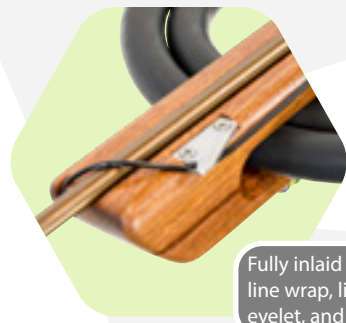

WOODY EURO 110

WOODY EURO 90

M10 Trigger Mechanism's proprietary 3 piece design utilizes compound leverage for industry leading force loads and trigger pull

Fully inlaid open muzzle with line wrap, line anchor, reel eyelet, and band slot

Integrated universal dovetail mount allows for fast and quick reel and accessory installation

M10 Trigger Mechanism accurately levels shafts for laser precision. Accepts all American back shafts

In this series we've found the perfect mix of power, weight, and balance. The Euro series features a sleek streamlined integrated muzzle. This is complemented by the integrated dovetail accessory mount that allows for tool-less installation of accessories such as our Pacific Reel. It also features hydrodynamic angled barrel chamfers to ensure effortless gun movement through water. These spearguns are designed for faster target acquisition while still having enough mass to tame recoil and avoid barrel flex. This all in addition to our legendary M10 3-piece trigger system and ergonomically correct 45° polymer handle. All Euro models feature 3/32" heat treated stainless steel shafts with point and 3" tuned flopper and Elite Nitro Bands.

WOODY EURO SERIES FEATURES:

- Solid African Mahogany CNC machined barrel
- Integrated full spearshaft track for maximum accuracy
- Hand straightened and tuned 17-4 3/32" heat treated stainless steel spearshaft with shark fin load tabs
- Powered by 5/8" Elite Nitro Bands with triple core Spectra wishbones
- Integrated open muzzle with shockline directly attached to shaft
- Integrated dovetail for tool-less accessory installation
- Fully chamfered barrel for improved sweeping and tracking
- Silent operation
- Positively buoyant (without spearshaft loaded)
- M10 three piece trigger mechanism
- Ergonomic 45° honeycomb handle
- Comfortable load pad

WOODY ELITE SERIES

Integrated universal dovetail mount allows for fast and quick reel and accessory installation

Fully inlaid open muzzle with line wrap, line anchor, reel eyelet, and band slot

M10 Trigger Mechanism accurately levels shafts for laser precision. Accepts all American back shafts

M10 Trigger Mechanism's proprietary 3 piece design utilizes compound leverage for industry leading force loads and trigger pull

The Woody Elite Series was designed to be accurate, powerful, and silent. At the heart of each Elite speargun lies the revolutionary M10 trigger system. An industry first. Its proprietary 3 piece design utilizes compound leverage and ¼” stainless components. These overbuilt qualities make it the strongest mechanism in the world. The M10 can withstand over 2200lbs of force and indulge shooters with a smooth, effortless trigger pull of less than 7lbs. The ergonomic handle and hexagon pattern increase grip control and accuracy. Two qualities that are a must when the water current is strong and the stakes high. Elite models have a fully inlaid muzzle, stainless steel line anchor with reel eyelet, universal accessory rail mount, and side grooves for increased traction. All models feature hand straightened 17-4 stainless steel shafts with shark fin tabs, tuned flopper, and point with 5⁄16” threads (Elite Custom model has 9⁄32” shaft with 6mm threads). The shooting line is directly attached to the shaft allowing for the removal of the slide ring. The end result is a faster, noiseless, streamlined shot. Elites can be shot Tahitian-style or with a break-away tip for large game fish. All models come standard with 5⁄8” Elite Nitro Bands for silent operation. Elites deliver precision accuracy in all conditions. They feature the legendary performance and durability that has made JBL a world leader in spearfishing for over 45 years. All Woody Elite guns can accommodate a third power band.

WOODY ELITE SERIES FEATURES:

- Solid African Mahogany CNC machined barrel
- Integrated full spearshaft track for maximum accuracy
- Inlaid muzzle with line wrap and anchor
- Integrated reel line eyelet
- Universal accessory rail (Custom excluded)
- Side grooves for increased traction
- Hand straightened and tuned 17-4 heat treated stainless steel spearshaft with shark fin load tabs
- Comfortable load pad
- Integrated threads for use with aftermarket spearheads
- Powered by 5⁄8” Elite Nitro Bands with triple core Spectra wishbones (2 or 3 depending on model)
- Open muzzle with shockline directly attached to shaft
- Silent operation
- Positively buoyant (without spearshaft loaded)
- M10 3 piece trigger mechanism
- Ergonomic 45° honeycomb handle

WOODY MAGNUM SERIES

WOODY MAGNUM

WOODY FLORIDA SPECIAL

WOODY SAWED-OFF MAGNUM

WOODY 38 SPECIAL

WOODY CUSTOM

Point, shoot, eat. It's about that easy if you're shooting a Woody Magnum Speargun. Each solid African Mahogany blank is hand chosen for straightness and grain pattern. These select pieces are then CNC machined for precision component fitment. The end result: A speargun that works just as well stoning fish as it does looking good. Just pick one up and you'll know what we're talking about. Comfortable in blue water or right off the beach, these guns are the best shooting partner you'll ever dive with. At the heart of every Woody Magnum is the M10 3-piece trigger mechanism. Its unique design can handle inhuman levels of pressure (2400lbs), yet still deliver a butter-smooth trigger pull (less than 7lbs). The secret is its proprietary three-piece trigger mechanism. Laser cut ¼" stainless components ensure that it's the strongest trigger in the world.

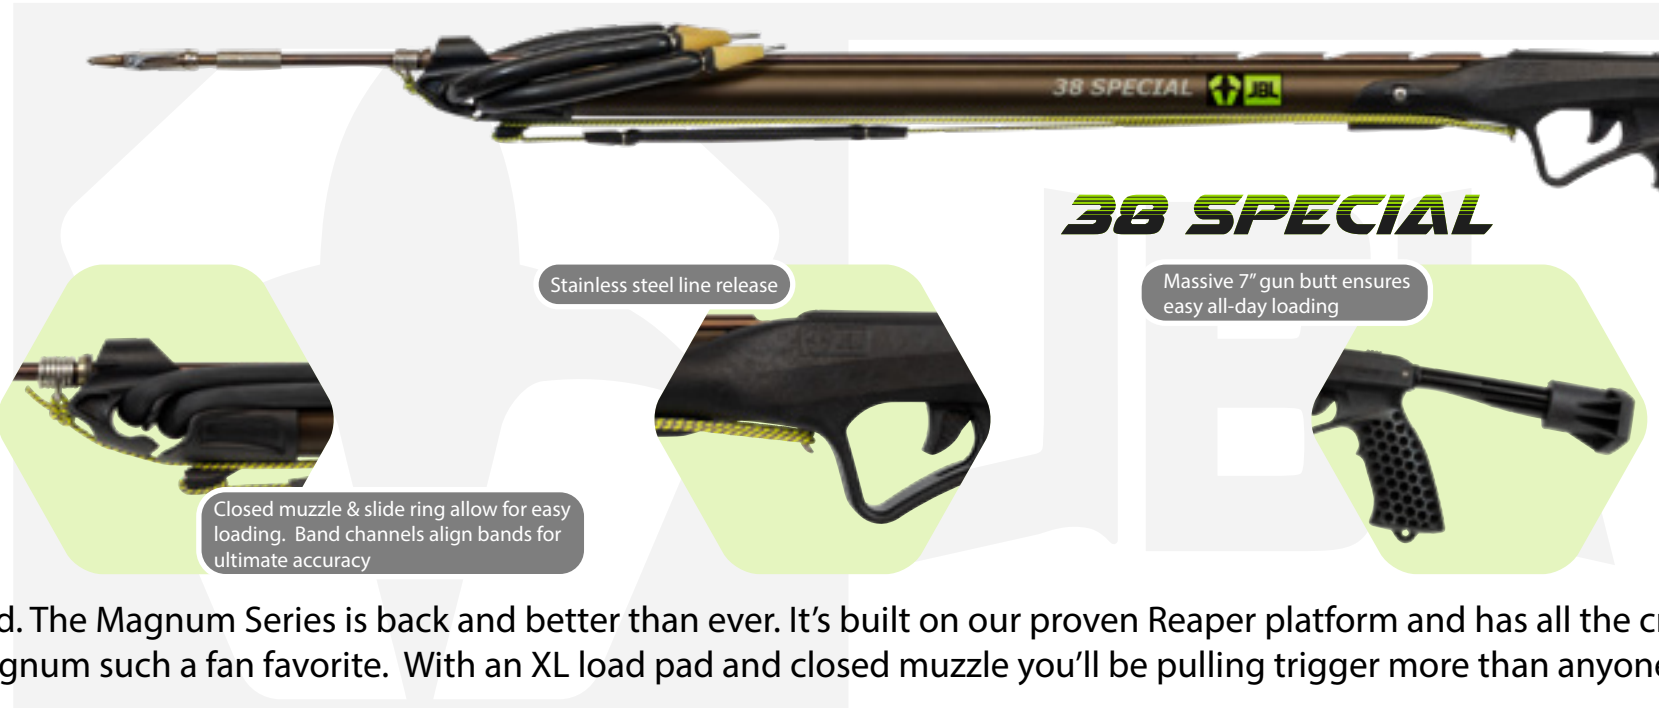

WOODY MAGNUM SERIES FEATURES:

- Solid African Mahogany CNC machined barrel
- Integrated full spearshaft track for maximum accuracy
- Hand straightened and tuned 17-4 heat treated stainless steel spearshaft (diameter varies by model)
- Powered by ⅝" Nitro Bands (2 or 3 depending on model)
- Closed muzzle & slide ring design for easy loading and operation
- Positively buoyant (without spearshaft loaded)
- M10 three piece trigger mechanism
- Ergonomic 45° honeycomb handle
- Comfortable load pad

MAGNUM SERIES

You asked, we listened. The Magnum Series is back and better than ever. It's built on our proven Reaper platform and has all the creature comforts that made the original Magnum such a fan favorite. With an XL load pad and closed muzzle you'll be pulling trigger more than anyone on the boat.

MAGNUM SERIES FEATURES:

- 1 1/8" overbuilt aircraft grade aluminum barrel for speedy target acquisition
- Integrated shaft rail – Ultimate accuracy
- Stainless steel sear
- 5/16" heat treated stainless steel spearshaft with 6mm threads
- Triple notched shafts for additional Add-A-Band
- Heat treated spinning double barbed spearhead
- Two 5/8" Nitro Bands
- Closed muzzle with slide ring for easy reloading
- Integrated barrel float chamber – Speargun floats without spearshaft
- 7" gun butt for easy loading
- Integrated mount for reel and other accessories
- Steel reinforced muzzle eyelet for reel line
- Ambidextrous safety and line release
- Ergonomic handle
- American Made

REAPER SERIES

Say hello to the newest member of our Speargun Family. Made right, from the start, here at the Oceanside California factory. The Reaper looks as deadly as it shoots. The carbon infused polymer handle is designed to feel like a natural extension of your arm, if you can point with this speargun, you can shoot fish. The aerospace aluminum extruded barrel with integral rail delivers unmatched stiffness and accuracy, easily taming the two 5/8" band power source. Its streamlined muzzle transfers energy in perfect parallel alignment with the 17-4 heat treated spring stainless steel shaft for precision shot placement. At the heart of the Reaper series is its trigger sear, cut from .25" 304 stainless, it ensures that The Reaper will shoot flawlessly long after the first time it gets wet.

REAPER SERIES FEATURES:

- Aircraft grade aluminum barrel with integrated rail for ultimate accuracy and minimal flex.
- 5/32" heat treated stainless steel shaft with integrated point and tuned flopper. Threaded shafts are available separately.
- Two 5/8" Elite Nitro Bands with triple core Spectra wishbones
- Integrated barrel float chamber – Speargun floats without spearshaft
- Optional gun butt for easy loading
- Integrated rail mount for accessories
- Steel reinforced muzzle eyelet for reels
- .25" stainless steel sear and line release
- Ambidextrous safety and line release
- Open muzzle
- Ergonomic handle
- American Made

REAPER STON

REAPER KRYPTEK

Just when you thought the best rail gun in the world couldn't get any more bad ass... It did. We're stoked to announce that our entire Reaper series of spearguns are now available in two different hydro-dipped camouflauge patterns. Take your stealth hunting to the next level with either Aqua Kryptek or Hydro-STØN.

TRAVEL REAPER

Have you ever seen a Reaper on a plane? You're about to. This 100cm rail gun breaks down into two pieces for easy travel and spearfishing around the globe. In addition to its compact design, you'll get all of the amazing perks of the Reaper series. This includes the carbon infused polymer handle, .25" stainless laser cut sear, aerospace aluminum barrel with integrated rail, and the hard hitting power of two 5/16" Nitro Bands.

TRAVEL REAPER SERIES FEATURES:

- Break-down travel friendly design
- Aircraft grade aluminum barrel with integrated rail for ultimate accuracy and minimal flex.
- 5/16" two part heat treated stainless steel shaft with integrated point and tuned flopper. Threaded shafts are available separately.
- Two 5/8" Elite Nitro Bands with triple core Spectra wishbones
- Integrated barrel float chamber – Speargun floats without spearshaft
- Optional gun butt for easy loading
- Integrated rail mount for accessories
- Steel reinforced muzzle eyelet for reels
- .25" stainless steel sear and line release
- Ambidextrous safety and line release
- Open muzzle
- Ergonomic handle
- American Made

EXPLORER SERIES

Closed muzzle allows for easy loading. Band channels align bands for ultimate accuracy

Heat treated double barb spearhead puts dinner on the table

Integrated universal dovetail mount allows for fast and quick reel and accessory installation

If you're looking for a speargun that's big on performance and more than capable of putting fish on the grill, the Explorer is for you. Explorer series spearguns pack quality features like an over engineered stainless steel sear, heat treated steel spearshaft, and ergonomic handle onto a compact 1 1/8" aerospace alloy barrel. The result is quick target acquisition and fatal results. The all new Explorer muzzle allows loaded bands to fall parallel to the spearshaft. This makes the Explorer extremely accurate because the shaft is propelled forward without directional bias. These spearguns are perfect for cagey fish when the shot window is a split second. At the end of the day it's the fish count that really matters, and nothing stacks them up like the Explorer.

EXPLORER SERIES FEATURES:

- 1 1/8" overbuilt aircraft grade aluminum barrel for speedy target acquisition
- Stainless steel sear
- 3/32" heat treated stainless steel spearshaft with 6mm threads
- Heat treated double barbed spearhead
- 1/16" Nitro Bands
- Integrated barrel float chamber – Speargun floats without spearshaft
- Optional gun butt for easy loading
- Integrated rail mount for reel and other accessories
- Steel reinforced muzzle eyelet for reel line
- Ambidextrous safety and line release
- Ergonomic handle
- American Made

CARBINE SERIES

SUPER CARBINE

CARBINE

MINI CARBINE

MINI

Don't let the price tag fool you, the Carbine series delivers more bang for your buck than anything in its class. Just like its bigger brothers, Carbines are constructed of aerospace grade aluminum and feature high-strength stainless steel shafts and triggers. They're powered by 1/2" Nitro Bands and feature a low-profile pistol grip handle that makes for easy target acquisition. So, if you want a speargun that will bring home plenty of fish without breaking the bank, the Carbine is the perfect choice.

CARBINE SERIES FEATURES:

- Aircraft grade aluminum barrel
- 3/32" heat treated stainless steel spearshaft
- Powered by 1/2" Nitro Bands
- Stainless steel trigger mechanism
- Integrated safety
- American Made

9' SHAKA BLACK

8' SHAKA BLACK

7' SHAKA BLACK

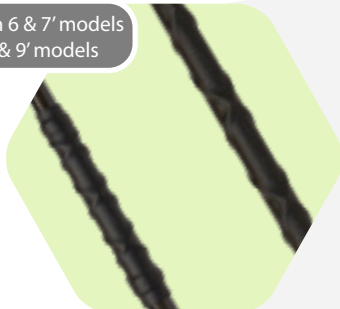

6' SHAKA BLACK

Tailor your Shaka Black to the ideal length with 2' extensions

Store safely and always be ready with included travel bag

All Shaka Black's ship with our flagship polespear slip-tip The Tomahawk

Hand grips on 6 & 7' models
XL grips on 8 & 9' models

Precision unions make this polespear feel like one piece

Shaka Black's come break-away ready

When it comes to polespear performance, nothing compares to the Shaka Black. It's designed to be the apex polespear. The Shaka Black features an all carbon fiber construction made from a proprietary unidirectional weave pattern. This material has been optimized for maximum strength and rigidity. It allows zero flex under load and maximum transfer of energy to your target. A weighted stainless steel head adds crucial mass for impacts that clobber game. The 3/8" wrench flats and removable 6mm threads allow for additional spearhead compatibility and easy repairs. The integrated hand grip (XL on 8 & 9' Black's) means your hold will always be positive, and band optimally stretched while hunting. With its rear notch Shaka Black's are ready for a break-away setup and the big game hunting it unlocks. Precision machined, over-sized aluminum unions add additional rigidity and durability. These three piece travel pole spears come complete with our flagship Tomahawk slip tip and travel case. No prey is safe with a Shaka Black in your hands.

SHAKA BLACK SERIES FEATURES:

- All carbon design
- Unidirectional proprietary carbon pattern ensures no loss of inertia when shooting
- Maximum stiffness
- Stainless weighted head
- Rear notch for Break-Away setup
- High modulus Nitro Band for improved speed and penetration power
- Convenient travel case for on the go hunting
- Tomahawk slip-tip for shooting larger game (820)
- 6mm male threaded tip with removable iron for 6mm female setups
- Made in America

**SHAKA
BLACK
SERIES**

7' SHAKA HYBRID

6' SHAKA HYBRID

The Shaka is the ultimate weapon if a speargun isn't your thing. We combined nano tech materials with our tried and true aircraft grade aluminum to deliver a hybrid polespear like no other. Unidirectional carbon weave allows for maximum transfer of energy. There's zero bend or flex so all your power goes to the tip, not the whip like other polespears that are constructed of flimsy, flexible, inferior carbon. The aluminum front piece fills with water to add additional mass. It pummels fish and is durable enough to use in rocks without a worry. The hand grip provides optimal placement and support while hunting loaded. Tailor your Shaka to the hunt, length can be adjusted by adding or subtracting sections (sections & adapter sold separately). Precision machined, over-sized aluminum unions add additional rigidity and durability. With its rear notch your Shaka is break-away ready for big game hunting. Armed with our proven Polespear Slip Tip, no fish is safe with this in your hand.

SHAKA HYBRID SERIES FEATURES:

- Unidirectional proprietary design ensures no loss of inertia when shooting
- Carbon fiber mid and rear sections keep your polespear stiff for maximum transfer of energy
- Aircraft grade aluminum front section is ideal for rocky and reef environments
- Rear notch for Break-Away setup
- High modulus Nitro Band for improved speed and penetration power
- Convenient travel case for on the go hunting
- Break-Away rockpoint tip for shooting larger game (890)
- 6mm spearhead threads
- Made in America

SHAKA HYBRID SERIES

ALUMINUM TRAVEL POLESPEARS

6' ALUMINUM TRAVEL

5'8" ALUMINUM TRAVEL

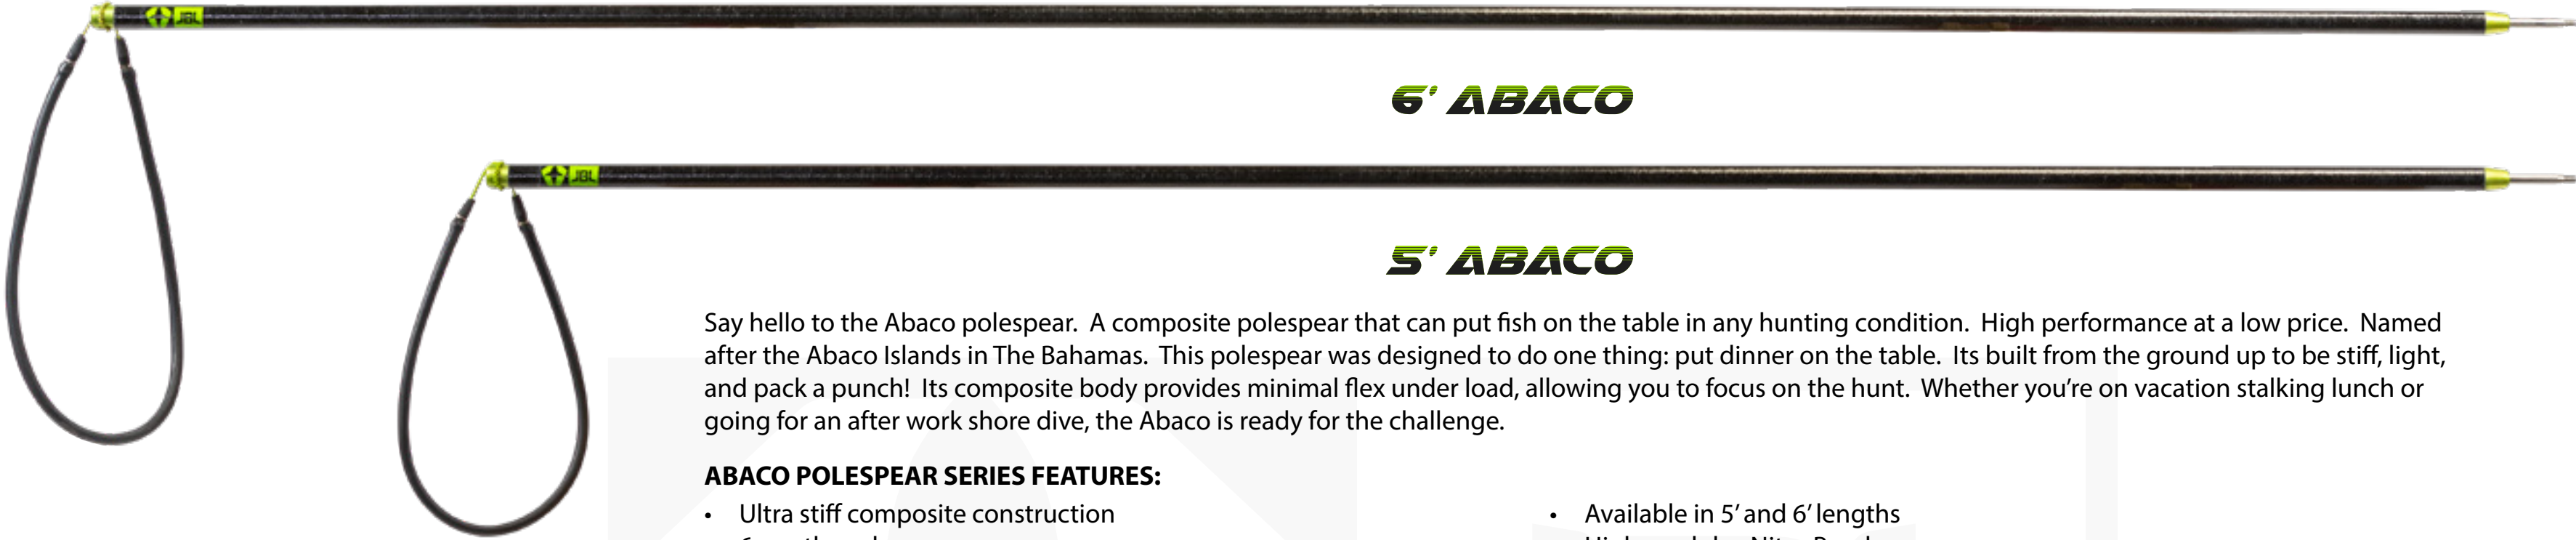

Big things come in small packages. JBL travel polespears pack light and are always ready for adventure. Made from 6061 aircraft grade aluminum, They feature a tapered front section, 6mm threaded removable stainless iron, and precision machined thread unions. The result is a polespear that's responsive, hydrodynamic, and so seamless it feels like a single piece. Tailor your polespear to the hunt, length can be adjusted by adding or subtracting sections. In case you were wondering, the Nitro Band is adjustable too. Each polespear comes with a Paralyzer spearhead and rolls up in a compact travel bag for on-the-go diving. These polespears were designed to fill with water while hunting to increase impact power. They're the ideal polespear for travelers, hunters, or anyone tight on space.

ALUMINUM TRAVEL SERIES FEATURES:

- 6061 aircraft grade aluminum construction
- 6mm spearhead threads
- Precision machined unions
- Machine swaged tapered front
- Adjustable length
- High modulus adjustable Nitro Band
- Travel case
- Paralyzer spearhead
- Made in America

ABACO POLESPEARS

6' ABACO

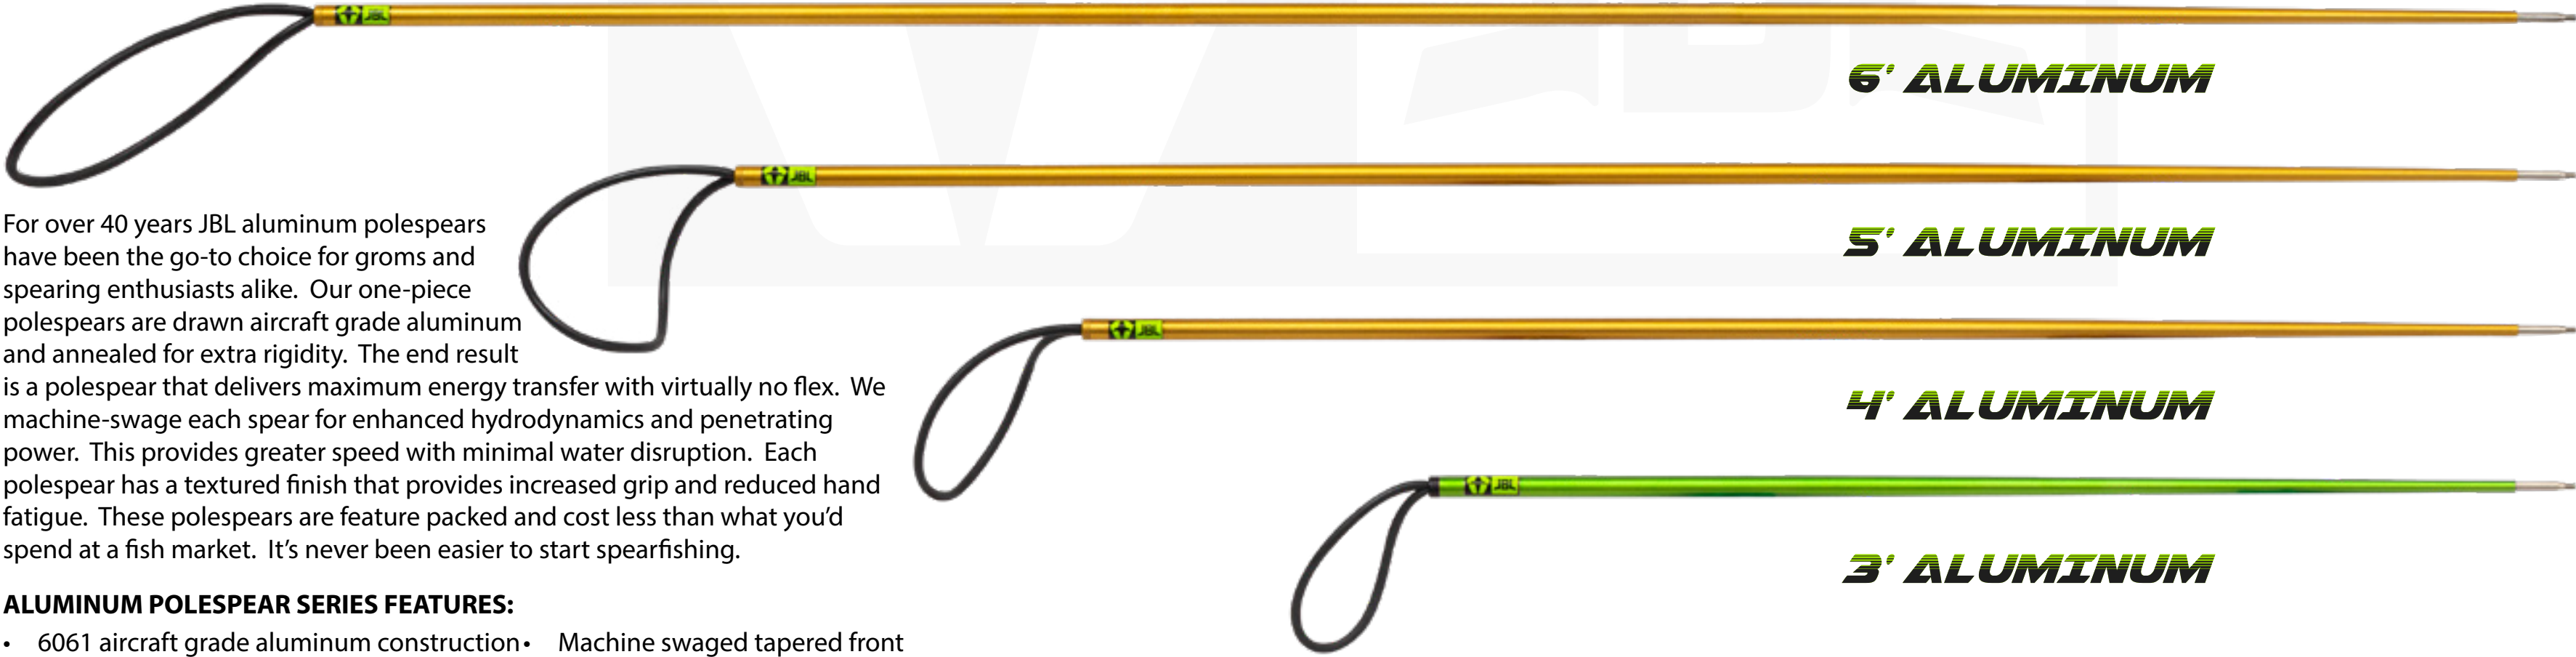

5' ABACO

Say hello to the Abaco polespear. A composite polespear that can put fish on the table in any hunting condition. High performance at a low price. Named after the Abaco Islands in The Bahamas. This polespear was designed to do one thing: put dinner on the table. Its built from the ground up to be stiff, light, and pack a punch! Its composite body provides minimal flex under load, allowing you to focus on the hunt. Whether you're on vacation stalking lunch or going for an after work shore dive, the Abaco is ready for the challenge.

ABACO POLESPEAR SERIES FEATURES:

- Ultra stiff composite construction
- 6mm threads
- Replaceable threaded iron
- Available in 5' and 6' lengths
- High modulus Nitro Band

ALUMINUM POLESPEARS

6' ALUMINUM

5' ALUMINUM

4' ALUMINUM

3' ALUMINUM

For over 40 years JBL aluminum polespears have been the go-to choice for groms and spearing enthusiasts alike. Our one-piece polespears are drawn aircraft grade aluminum and annealed for extra rigidity. The end result is a polespear that delivers maximum energy transfer with virtually no flex. We machine-swage each spear for enhanced hydrodynamics and penetrating power. This provides greater speed with minimal water disruption. Each polespear has a textured finish that provides increased grip and reduced hand fatigue. These polespears are feature packed and cost less than what you'd spend at a fish market. It's never been easier to start spearfishing.

ALUMINUM POLESPEAR SERIES FEATURES:

- 6061 aircraft grade aluminum construction
- Machine swaged tapered front
- 6mm spearhead threads
- High modulus adjustable Nitro Band
- Replaceable threaded iron
- Made in America
- Textured finish

POLESPEAR TIPS

Paralyzers stop reef fish dead in their tracks, and the trident tips are exceptional for bottom fish whether on a speargun or a polespear. Whichever point you choose, if it's from JBL you know you're getting your money's worth. Available in both 6mm and 7mm thread options.

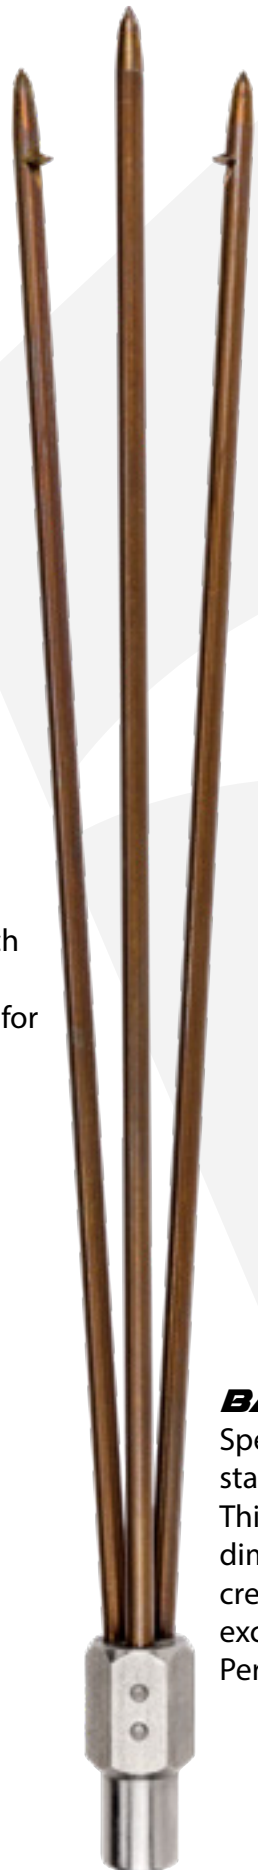

FLAT TRIDENT
Welded and barbed flat trident point used for small to medium fish on both polespears and spearguns.

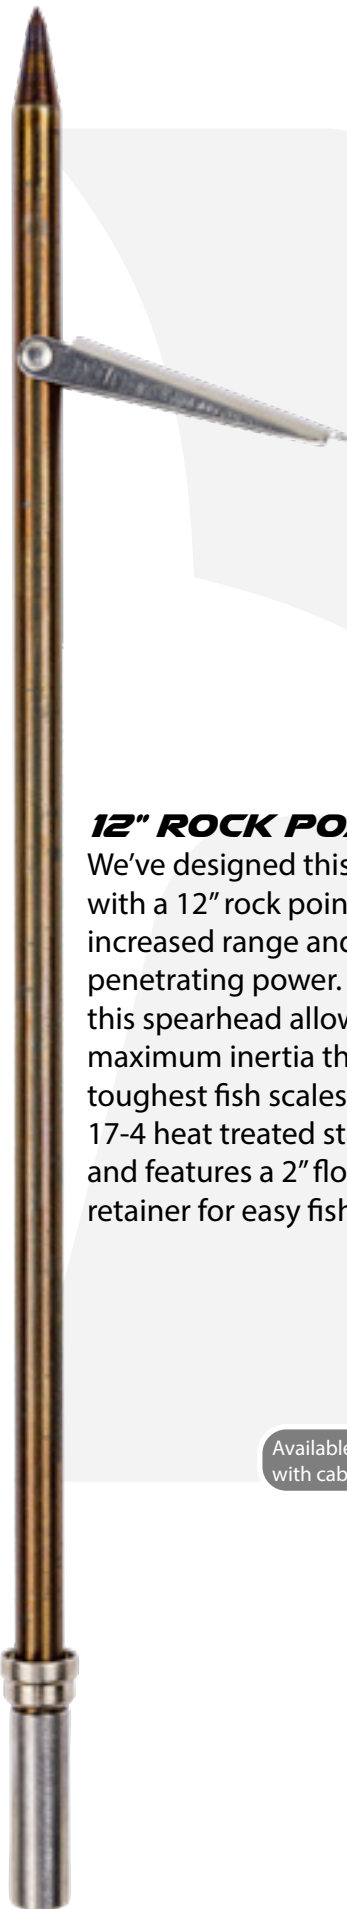

TRIDENT
Low maintenance barbed trident style point. Welded for improved durability. This tip creates an expanding 3 dimensional wound path which creates a paralyzing action for better holding power. Perfect for small to medium fish on both polespears and spearguns.

PARALYZER
Economical spearhead with hardened steel tines. This tip creates an expanding 3 dimensional wound path which creates a paralyzing action for better holding power. Perfect for small to medium fish.

BARBED PARALYZER
Spearhead with hardened spring stainless steel tines with barbs. This tip creates an expanding 3 dimensional wound path which creates a paralyzing action for exceptional holding power. Perfect for small to medium fish.

12" ROCK POINT
We've designed this spearhead with a 12" rock point for increased range and unmatched penetrating power. The weight of this spearhead allows it to carry maximum inertia through the toughest fish scales. It's made of 17-4 heat treated stainless steel and features a 2" flopper and wing retainer for easy fish removal.

Available rigged with cable

POLESPEAR SLIP TIP
If shooting large game fish with a Polespear is your thing, then the Polespear Slip Tip is a must. Constructed of heat treated 17-4 this tip is virtually indestructible. With razor sharp barbs for guaranteed deployment, speed load system, and secured with either 700 lb. Spectra or 1/16" stainless steel cable, it will never let you down. Ideal for medium to large fish.

TOMAHAWK SLIP TIP
This beast of a spearhead was designed to take massive fish down. The Tomahawk's two stage tip was engineered to penetrate the toughest fish skin, anchor, and not let go until your catch is on deck. The injector's proprietary "Pop Off's" ball head ensures instant disconnect once toggled. The double braided kevlar line also makes rigging a complete break-away setup on a polespear easier than ever.

SPEARHEADS ***ROTATING***

Let's get right to the point: these Tips are designed to punch through even the toughest fish, penetrating thick scales and hard bone. Constructed of hardened 17-4 stainless with a razor sharp finish, they'll make short work of just about any game fish. Low-profile stainless wings are quickly deployed and angled to grab tight and hold on. Sliding wing retainer allows for easy removal of fish. Our patented (#4685239) rotating design allows for 360 degree spin, providing greater holding power and minimizing the chance of your point unthreading from the shaft as a result of a fish "rolling" in battle.

ROTATING LONG WINGED ROCK POINT

Part No: **844**

4" Wing Span

A short-tapered, machine cut point provides enough muscle to withstand rock hits and still punch through skin and bone of even the toughest fish. Available in 6mm, 7mm, and 5/16" thread options.

Free-spinning base

ROTATING ROCK POINT

Part No: **843**

2-5/8" Wing Span

Designed to perform even after impact on rocks and reefs, this is a durable workhorse that is perfect for small to medium fish. Available in 6mm, 7mm, and 5/16" thread options.

Retainer wing allows
for easy fish removal

TRI-CUT LONG WING

Part No: **822**

4" Wing Span

Hardened spring stainless steel point maintains excellent cutting edge for extra easy penetration. Wing retainer allows for easy removal of fish. For all sizes of fish. Available in 6mm and 7mm thread options.

TWIN BARB ROCK POINT SWIFT

Part No: **819**

2-5/8" Wing Span

This spearhead is all killer and no filler. It features heat treated stainless steel construction, double barbs, and no wing collar. By

removing the the wing collar we are able to dramatically decrease the spearhead profile. This in turn allows for unparalleled speed when traveling through water.

ROTATING LONG WINGED TRI-CUT

Part No: **821**

4" Wing Span

One shot is all you will ever need with this tip. Three cutting edges hand sharpened to a precision finish provide a massive wound channel making it ideal for open water game. Available in 6mm and 7mm thread options.

ROTATING TRI-CUT

Part No: **831**

2-5/8" Wing Span

Our machined Tri-cut point is the quickest way to put fish on the deck. Three cutting edges combined with a precision point make this tip extremely lethal. Available in 6mm and 7mm thread options.

TWIN BARB ROCK POINT

Part No: **847**

2-5/8" Wing Span

Economical multi-purpose point. Double wing design increases holding power. Wing retainer allows for easy removal of fish. For small to medium fish. Available in 6mm and 7mm thread options.

SINGLE BARB

Part No: **825**

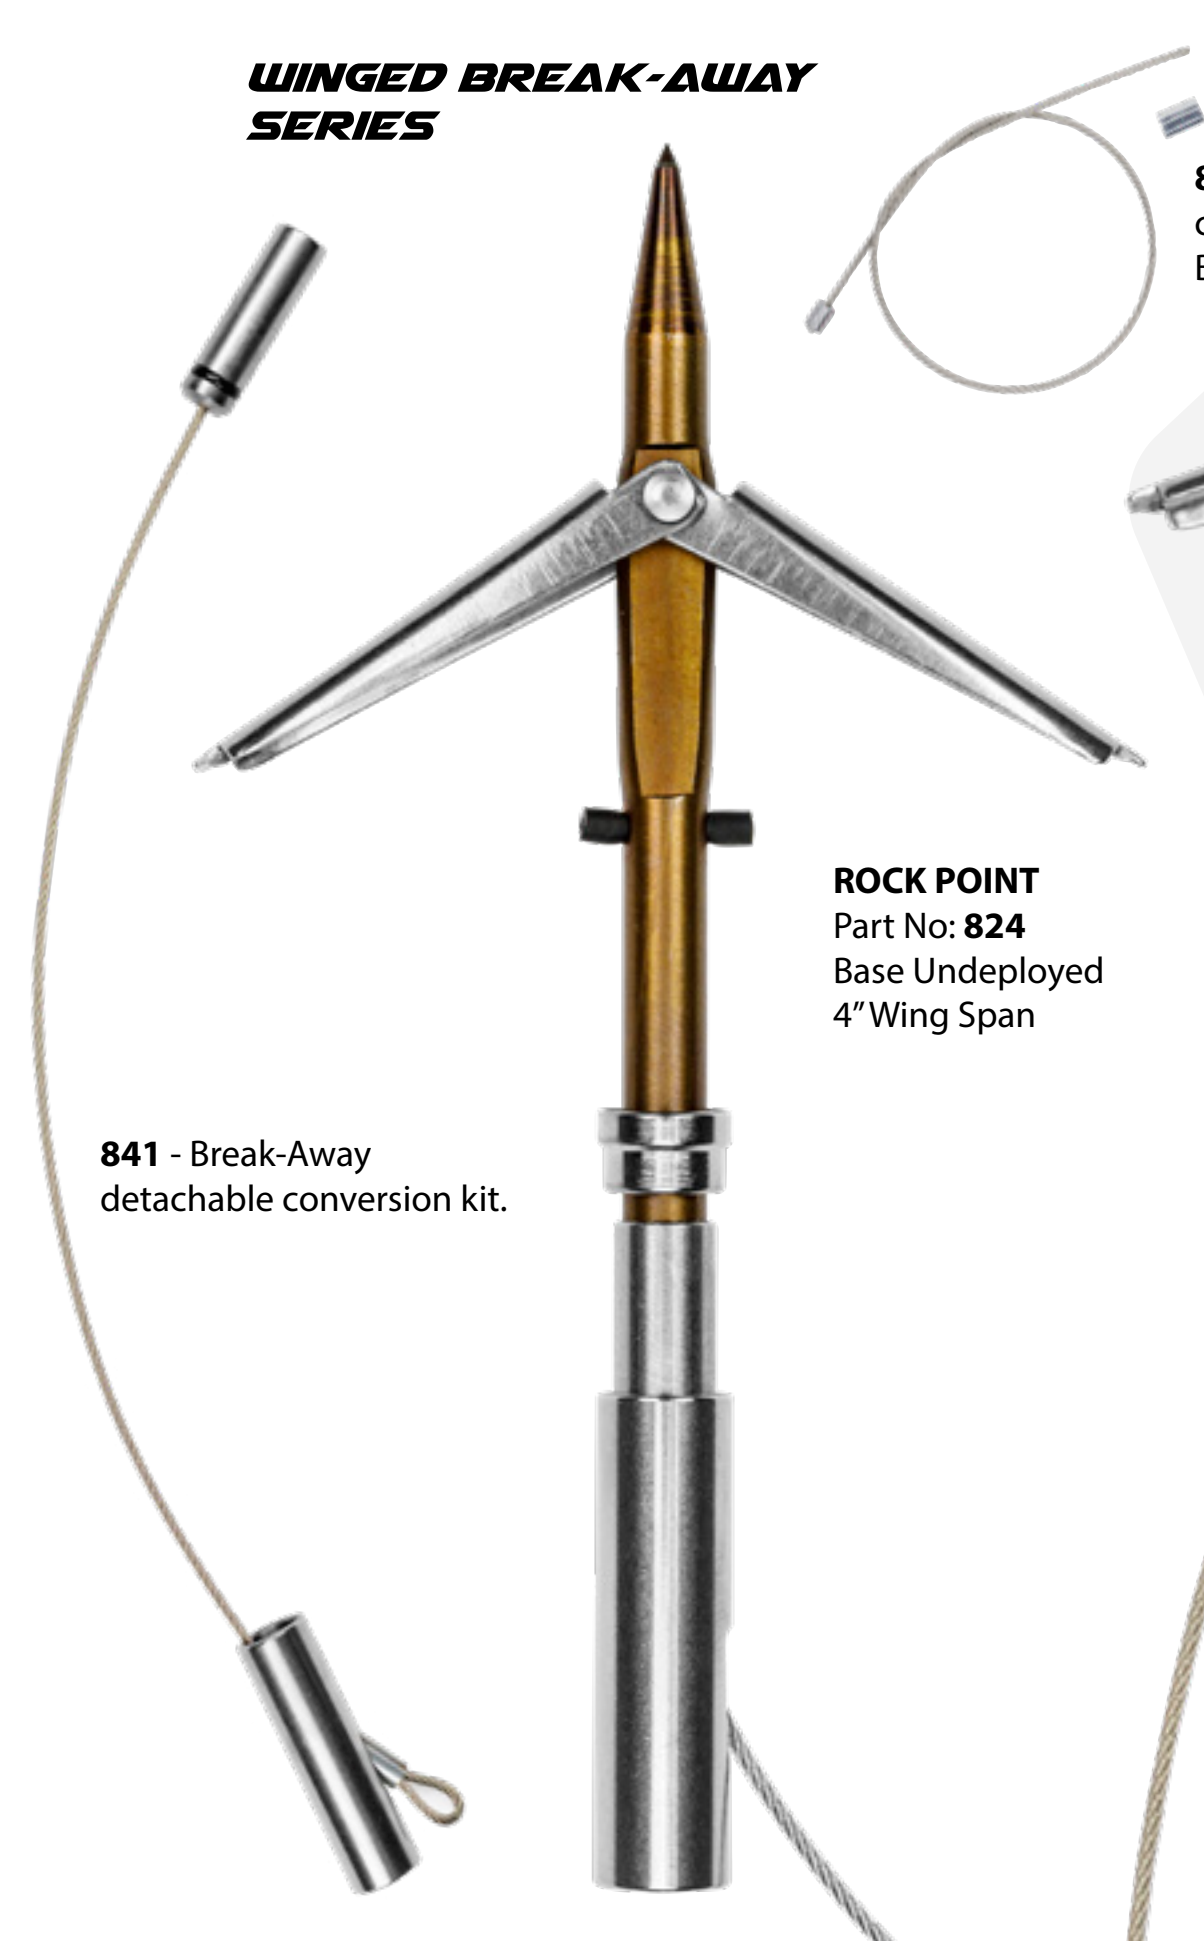

1-1/2" Wing Span

Multi-purpose stainless steel spearhead that features a single barb design that is well suited for small to medium fish.

BREAK-AWAY & SLIP TIPS

Designed for large powerful fish, our breakaway spearheads are available in 4" winged and 3", 4", and 5" slip-tip configurations. Tips are hardened 17-4 stainless and feature a multi-braid stainless cable in 1/16" and 3/32" diameter. These tips hang on no matter how hard the fight while minimizing damage to your spear shaft. Their low-profile, double barbed design allows for pinpoint accuracy and dependable deployment. Don't trust a once in a lifetime fish to anything else.

WINGED BREAK-AWAY SERIES

823 - R - Wire and crimp repair kit for Break-Away's

875 - 5" Slip Tip. Also available in 4" (**874**) and 3" (**873**)

FIXED WING SLIP TIP SERIES

895 - 5" Gulf Slip Tip with either 3/8 or 5/16 slide ring. Also available in 4" (**894**) and 3" (**893**)

886 - Slip Tip Adapter

886G Gulf style with sliding stop

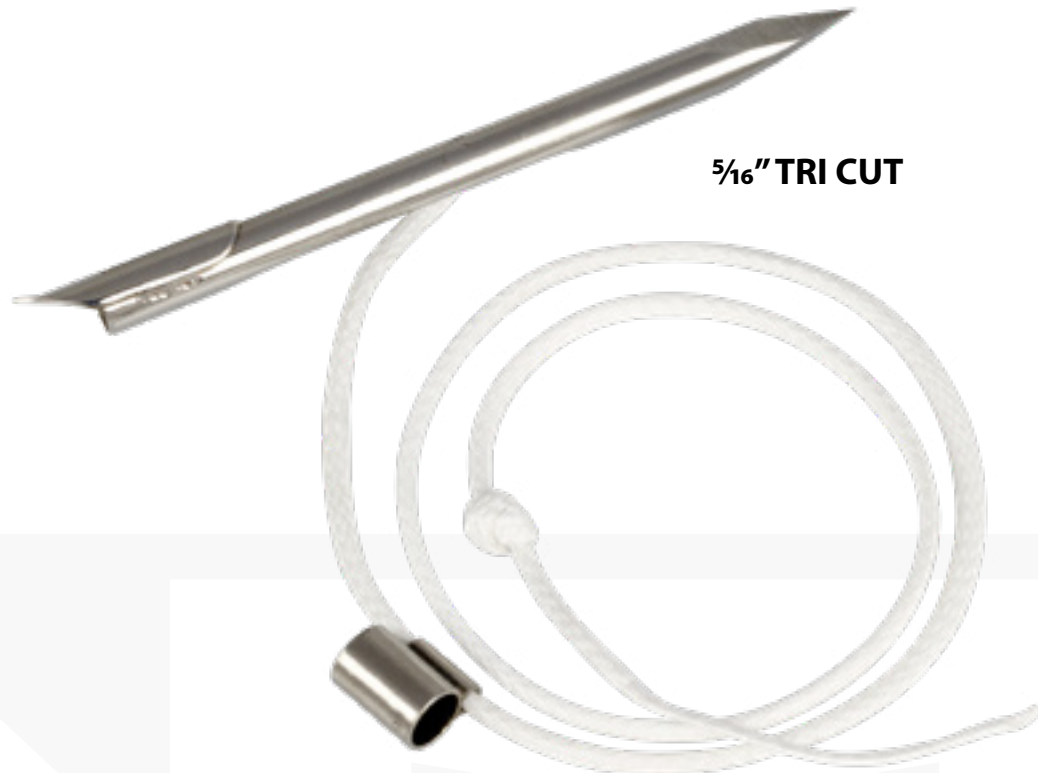

THE LITTLE NUKE

TACTICAL RUINATION

When a tactical strike is necessary nothing beats the Little Nuke. Precision machined 17-4 stainless and heat treated to maximum hardness, this slip tip means business. Low profile shape and a compact overall size creates minimal drag and delivers pin point accuracy. It's the solution for any rogue fish you may be hunting. Available in 4 x $\frac{9}{32}$ " (Bullet Nose only) and 5 x $\frac{5}{16}$ " sizes.

$\frac{9}{32}$ " BULLET NOSE

$\frac{5}{16}$ " TRI CUT

$\frac{5}{16}$ " BULLET NOSE

THE WARHEAD

LONG-RANGE DEVASTATION

The Warhead is the ultimate weapon against large fish. Its deadly accuracy is a result of tight tolerances and a precise fit and finish. A multi-dimensional seating adapter virtually eliminates accidental slip-off while ensuring perfect deployment. It's the only factory tip to incorporate a flopper, adding a triple level of fish retention.

ADAPTERS
Adapters work interchangeably with The Warhead and Little Nuke systems and are available for $\frac{9}{32}$ ", $\frac{5}{16}$ ", $1\frac{1}{32}$ ", and $\frac{3}{8}$ " shafts in both 6mm and 5/16" thread options.

* Slide ring stop and adapters are available separately. Please specify shaft diameter and threading for proper fit.

SPEAR SHAFTS

Constructed of corrosion resistant 17-4 (spring) stainless. Each shaft is hand-tuned for alignment, then heat treated for maximum hardness to reduce flex and provide optimum energy transfer. OEM shafts for JBL, A.B. Biller, Riffe and Alexander mechanisms are milled to spec for perfect fit and function. Shafts come available in a number of different configurations ensuring compatibility with tips already owned.

ADAPTERS

JBL Adapters allow you to match up just about any tip to shaft configuration you can imagine and are constructed from 303 stainless steel to help resist corrosion.

Through extensive research we've developed a proprietary latex formula that delivers unparalleled modulus strength. Its called Nitro Rubber. This elastic super material is what puts JBL Nitro Bands in a league of their own. They're designed to be the ultimate spearfishing propellant. Nitro Bands feature an exponential power to stretch ratio that delivers unmatched contraction. The result: maximum shaft propulsion. This means your shot goes from A-to-Fish before your target knows what hit it. Pull the trigger and let Nitro Bands do the rest. In addition to exceptional performance, Nitro Bands are designed for long lasting use. Nitro Rubber is anti-oxidants infused to help protect against damaging UV rays. Wishbones are made from either 302 stainless steel wire or coated triple core Spectra, depending on selection. Expect extreme strength and durability from Nitro Bands.

Nitro DIY kits have everything you need to tie your own bands. Available in 5/8" #300E and 9/16" #200E

Kevlar wishbones for fin tabs & rounded notches.

POLESPEAR SLINGS

Travel Polespear Sling

Sling Assembly for Aluminum Travel Polespears. Consisting of threaded sling adapter, sling, and sling lock. Part # 635

Make bands to whatever length you like with bulk Nitro Rubber!

JBL Polespear Sling

Sling Assembly for one piece JBL Polespears. Part # D6100 and D6200 for 3' Lion Tamer

Shaka / Abaco / Other Polespear Sling

Sling Assembly Shaka and other polespears. Available in multiple lengths. 24" for 5 foot polespears #648, 28" for 6' polespears #649, 34" for 7' polespears #647, 42" for 8' polespears #636, 48" for 9' polespears #637

THE SABER

The new JBL Saber fillet knife makes short work out of any fish. The 420 stainless blade is 1" wide, 9" long, and curved for close to the bone fillets. Steel is treated in a "heat and quench" method that offers maximum flex while still holding a razor sharp edge. Non slip polymer handle fits comfortably in your hand, and the oversized thumb rest enables more precise cutting with increased stability.

THE SHIV-X

Introducing the all new Shiv-X, the perfect knife for freediving. This full tang knife is made from 416 stainless steel and features a black oxide finish for maximum corrosion resistance and sharpness retention, no-slip ergonomic polymer handle, low profile sheath, and a tapered double-edge blade ready to handle anything you throw at it. Blade measures 4.5 inches and features straight and serrated edges.

VERTIGO V3 2 PIECE WETSUIT

Introducing Vertigo V3. A no compromise wetsuit designed to both look and feel invisible. V3 combines our proven 2-stage Vertigo camouflage with an all-new neoprene formula we call Pure-Stretch. Expect improved bottom times and aquatic hunting that's never felt more engaging. This proprietary foam blend keeps you warm and feels as natural as your own skin. V3 redefines what a diver can expect from their wetsuit and what they can do below the surface.

In addition to Pure-Stretch, V3 features our most advanced version of Vertigo; our proprietary 2-stage camouflage pattern. It's been upgraded to a whole new level. At its core, Vertigo is a design that uses two patterns to maximize predatory concealment. It features a base micro pattern to keep divers undetected. On top of that is a macro pattern that scrambles their outline. Under water, this suit is total stealth.

VERTIGO V3 2 PIECE SUIT FEATURES:

- Pure-Stretch Open Cell Neoprene
- Vertigo 2-Stage Camouflage
- 2 piece design
- Available in 3mm and 5mm thicknesses
- Bonded stitch terminations
- Smooth skin lined face hole and cuffs
- Hood with perforated bleed port
- Lined ear pockets
- Padded chest load pad
- Abrasion resistant knee pads
- Integrated knife / accessory pocket

VERTIGO V3

DIVE GLOVES

Protect those hands with JBL Dive Gloves. These gloves shield fingers from spines, reefs, and whatever else mother nature has to throw your way while diving. 3mm neoprene build ensures warmth while in colder conditions. Shooting gloves feature Amara reinforced palm and knuckles for durability in the toughest conditions. Light finger tips allow for hand flashing to lure in curious fish. Gloves also feature a tapered index finger. This means an easy trigger pull without sacrificing protection. Available in M, L, and XL.

DIVE SOCKS

Say no to blisters and abrasive fin foot pockets forever thanks to JBL dive socks. We designed these asymmetrical socks to perfectly contour the foot. They provide a soft, cushioned buffer between the foot and dive fin for all day use. The soles feature a rubberized traction pattern for increased durability and grip. This means maximum transfer of energy from each fin kick. They feature 3mm neoprene construction with Super Stretch nylon panels for enhanced flexibility in areas you need it most. It is due to this blend of materials that make these socks the perfect combination of warmth, fit, and flexibility. Available in 3mm and 4mm in S, M, L, and XL.

THE J TUBE

Designed for those at the top of the food chain, the perfect “J” snorkel features single bore construction for maximum oxygen intake and evacuation. It features 100% silicone construction for soft and comfortable fit in any configuration, even under a mask strap.

WEIGHTBELT

Made of durable, UV resistant, industrial grade rubber, these weight belts are comfortable and streamlined. Features quick release design for emergency removal. Heavy-duty 300 series stainless buckle is easy to use and lasts a lifetime. Rubber belt strap available separately. One size fits all.

VERTIGO 1 PIECE WETSUIT

Say hello to Vertigo, the most advanced aquatic camouflage on the planet. An industry first, VERTIGO features two levels of predatory concealment to keep divers hidden and undetected. To do this it utilizes a full spectrum color mosaic overlaid on actual tropical reef imagery. From there the “base” design is then interrupted by a complex pattern of geometric shapes, lines and bars. This “dazzle” style design, first introduced in WWI, breaks up the diver’s profile making it virtually impossible for fish to realize your size, range, speed or heading. Until it’s too late.

VERTIGO 1 PIECE SUIT FEATURES:

- 2.5mm lined one piece suit – Ideal for warm water conditions
- Super stretch neoprene
- Padded chest load pad
- Abrasion resistant knee pads
- Integrated knife/ accessory pocket

VERTIGO HYBRID TOP

The ideal top for warm water hunting thanks to its next generation aquatic camouflage and features usually found only on full freedive wetsuits. The only top with 2-stage pattern designed to keep body profiles distorted and undetected.

VERTIGO HYBRID TOP FEATURES:

- VERTIGO lycra sleeves and hood with 1mm lined neoprene chest and back panels – Ideal for warm water conditions
- Super stretch neoprene
- Padded chest load pad
- Waist draw string

XCELERATOR FINS

Available Sizes:

- Small (Men's 6-7 / Women's 7-8)
- Medium (Men's 8-9 / Women's 9-10)
- Large (Men's 10-11 / Women's 11-12)
- XL (Men's 12-13 / Women's 13-14)
- XXL (Men's 14-15 / Women's 15-16)

26° blade angle and reinforced base for maximum propulsion

XCELERATOR CARBON FIBER FINS

The Xcelerator carbon blades represent the next era of performance freediving. Their design is the result of years of research and development alongside leading engineers in the aerospace industry. The layered 45° twill carbon provides uniform stiffness at the toe and tapers to a medium flex at the blade's end. Unlike other fins, Vector-Flex carbon layering creates a seamless transition from stiff to flexible across the blade. This translates to a fin that can harness top power but doesn't cause fatigue or leg cramp.

Xcelerator freedive blades are constructed of pre-preg material to utilize resin content consistency. This construction provides unmatched durability. These fins are virtually bomb proof. They feature a molded 26 degree angle for optimum power thrust. The TPU side rails and tapered blade profile work in unison to channel water down the blade, not over the sides. This in turn helps maximize thrust and enhance water propulsion. The combination of this cutting edge blade and our legendary full foot pocket make this the ultimate freedive fin. Some would say Xcelerator fins almost make diving unfair.

Features:

- Full Foot Pocket that Utilizes Three Material Densities
- Stiff Foot Pocket Bed for Enhanced Thrust
- Soft Foot Pocket Upper for Reduced Foot Fatigue
- Stiff Blade Base for Maximum Transfer of Energy
- Modular Design
- TPU Side Rails
- Full Carbon Fiber Fin Blade
- 26° Blade Angle
- Tapered Blade Profile
- Vector-Flex Carbon Fiber Layering
- Embedded JBL Tuna Coffin Logo

22° blade angle & reinforced base for maximum propulsion

V2 POLYMER LONGBLADE FINS

When designing our second generation polymer fin, we set out to create something with the performance of our flagship Xcelerator fins but at a cost for everyone. To accomplish this we went back to the drawing board. We created an all new blade made from a proprietary carbon – nylon blend that replicates the properties of its carbon cousin. Its reinforced base is stiff and responsive. From there it becomes progressively thinner and more flexible, allowing for maximum energy transfer.

We mated this amazing blade to our newly developed tri-density foot pocket. It features three unique rubber blends that work together to create a pocket that is stiff, responsive, and soft in areas where it matters most. The end result is a performance freedive fin that kicks well above the competition.

Pockets and blades are modular. Secured with screws and blade clips. This allows for smaller storage, easy repairs, and upgrades.

Features:

- 22° Blade Angle
- Proprietary Carbon – Nylon Polymer Blade
- Tri-density Full Foot Pocket
- Stiff Foot Pocket Bed for Enhanced Thrust
- Soft Foot Pocket Upper for Reduced Foot Fatigue
- Modular Design
- Embedded JBL Tuna Coffin Logo

FIN KEEPERS

Constructed of durable rubber they keep fins in place to maximize power transfer. Available in medium, large and extra-large.

DIVE MASKS

THE X-RAY

You shouldn't have to give up field of view for a low volume mask and with the X-Ray you won't. Its wide angle bridge design was a result of studying eye movement patterns among divers, resulting in a huge field of view without the bulk of traditional masks. The soft matte black silicone skirt cradles your face and virtually eliminates glare. Lenses are tempered glass and feature anti-fog technology.

THE SEEKER

Do traditional dive masks cause pressure and hurt to wear? The Seeker's frameless design allows for maximum comfort on a variety of facial profiles. Its large field of view allows for excellent target acquisition while still being a true low-volume mask. Tempered glass lens features anti-fog technology for crystal clarity at all times.

THE CYCLOPS

Behold, the lowest volume frameless mask ever. Gone are the days when you had to sacrifice comfort for field of vision. This mask does it all. The Cyclops features a super low volume design with frameless construction. The result is that the only thing between you and your catch is crystal clear fog resistant tempered glass and a soft matte silicone skirt. No plastic. No frame.

THE ZERO

As the name implies, this mask takes volume down to the bare minimum. The soft silicone skirt cradles your face delivering a perfect seal and all day comfort. Large tempered lenses provide a huge field of view and matte finish frame adds an additional level of stealth. Easy adjust straps make for quick fit adjustments and confident face sealing. Comfort and performance; the Zero is the ultimate low volume mask.

DIVE ACCESSORIES

Low profile horizontal
mount position

THE PACIFIC REEL

The Pacific Reel was designed from the start to land big game fish. This low-profile, horizontal reel is the perfect companion to any speargun setup. Its frame is constructed of heavy duty glass filled polymer and molded on a steel reinforced base. This means you can put the brakes on even the most serious game fish. Our multi-disc drag system allows you to control the fish's run no matter how hard they pull. Compact body and deep spool design easily accommodates well over 150ft of shooting line. The oversized, tri-star drag clutch and reel knob make operating a snap even while wearing gloves. Comes with mounting base and anchor screws (no mounting hardware needed for Reaper Series spearguns).

PACIFIC REEL FEATURES:

- Low profile design
- High visibility drag clutch and reel knob
- Stainless steel reinforced base and line eyelet
- Quick disconnect dovetail design

SHOOTING LINE

Rest easy knowing that your catch of a lifetime isn't going to break off because of inferior line. JBL Shooting line features 600lb test Dyneema core and abrasion resistant poly-blend over braid. Recommended shooting line for JBL Pacific Reel.

SEAVINE II FLOATLINE

Constructed of hi-tech, durable, thermal polymer extruded shell and braided 600lb Dacron core, the new Seavine II is the ultimate fish taming floatline. The .050" wall allows for 100% stretch with optimum memory resistance, fish can run but they can't hide. No more extra baggage fees due to heavy, low tech bungees. The Seavine II has landed 200+ lb. tuna in Panama, 100+ grouper in Mexico and 70 lb. wahoo in the Gulf. Stainless tuna clips with terminal tackle rings and swivels take the guess-work out of landing big game fish. Available in 50ft (stretches to 100 ft) and 90 ft (stretches to 180 ft) lengths.

COMPETITION STRINGER

The perfect companion for any spearfisherman on the hunt. Features monofilament stringer line and tangle free swivel. We know, it looks better full of fish.

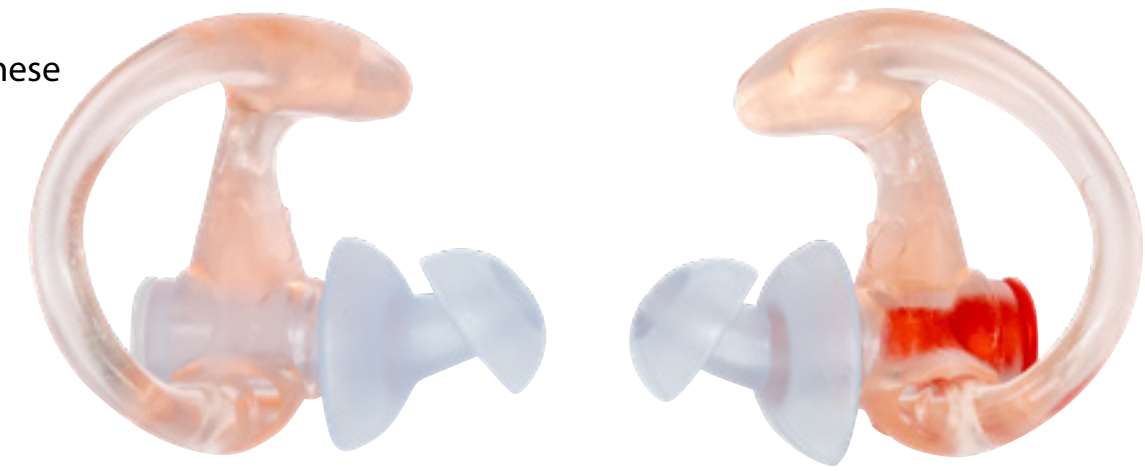

SURF ACCESSORIES

HYDRO SEALS

Hydro Seals are the perfect solution for surfers, divers, and water enthusiasts looking to keep their inner ear dry and still able to hear the world outside. These aqua plugs utilize an advanced multi-baffle design that provides exceptional protection against water entering the ear canal. Users are also able to clear their ears while diving. This is all possible thanks to exclusive Hocks Noise Braker technology. An industry first. This system creates a force-field like barrier to prevent water from reaching the inner ear without completely sealing it. The end result is that sound waves can pass through while preventing pressure from water intrusion. This makes them ideal for divers that have trouble clearing their ears at descending depths.

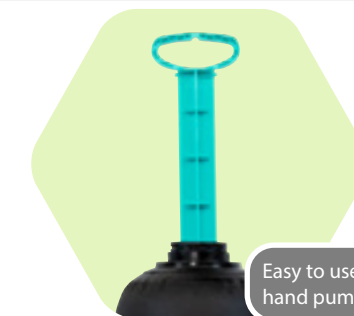

The benefits of using Hydro Seals while in the water are numerous. They greatly reduce the chance of infection by keeping bacteria from growing in stagnant inner ear water. Hydro Seals also help prevent the temporary loss of equilibrium. Lastly, they reduce the chance of surfer's ear by sealing out cold air and water, which is the primary cause of exostosis. Hydro Seals are simple and effective.

HYDRO SEALS FEATURES:

- Exclusive Hocks Noise Braker technology
- Soft silicon build
- Reduces water from entering the inner ear
- Hypoallergenic
- Ears can be cleared during use
- Hi-Visibility coloring
- Normal sound is not blocked
- Available in 3 sizes

WATER BUDDHA

May the Water Buddha shower you with happiness, everywhere you go. Ideal for camping, the beach, boating or anywhere a portable, pressurized water system is handy. The Water Buddha provides minutes of continuous stream for showering, rinsing, wash down and a variety of other pressurized water dependent tasks. Because it's self pressurized there's no need for gravity assistance or special fill adapters. Just grab & go. The handy carrying strap lets you take the Buddha anywhere you want. Its rugged 600D Nylon build and molded polymer base make this one tough Buddha. Welded seams ensure no leaks and the industrial grade pressure relief (9 psi) prevents over inflation. The Buddha's nozzle has been specially designed to provide maximum stream pressure. Fill the Buddha with hot water, or leave it in the sun to soak up natural heat. There's nothing like a warm shower to help you focus that Zen once again.

Easy to use hand pump

Built in pressure & dump valve

Portable design

WATER BUDDHA FEATURES:

- No clumsy attachments needed. Fill with any faucet or submerge in lake, pool, or other fresh water source
- Pressurizes with a few simple pumps, no need for hanging, gravity assist, or batteries
- Thumb activated nozzle
- 7ft coiled hose
- Industrial purge valve makes over inflating impossible (up to 9 psi)
- Black 600 denier ballistic nylon absorbs sunlight providing solar heat
- Molded freestanding base
- Travel case holds everything

APPAREL

The coolest hats and T's you'll ever see! Hats feature our trademark "Tuna in Coffin" embroidered logo, breezy mesh back, and classic one size fits all snap back. Keep the sun off your dome and let everyone know you are a true fish slayer. Our combed cotton, poly blend shirts are so soft you may never take them off. Classic crew neck T's, graphics are water discharge not screened. These shirts feel good, look good and wear good. Which means it's all good anytime you're wearing one. Sizes M, L, XL, XXL and 3XL
