

# Target

Released in 1972 by Wye College in the UK, Target is a cousin of Challenger and has developed to become a widely grown and established English Hop variety. It has a high tolerance to wilt and resistance to strains of powdery mildew but is susceptible to downy mildew.

Target is a robust hop with an excellent intense aroma, well regarded as an aroma hop for late hopping or dry hopping and used effectively as a bittering hop too.

Wye Target

**Group**

**Origin**  
United Kingdom

**Primary Use**  
Dual Purpose

**Height**  
Tall

**Supply Restrictions**  
None

## Key Flavours

Pleasant aromas of floral, spice, and sage

## Beer Styles Guide

British Ale, British Lager & Pale Ale.

## Growing Information

Season Maturity	Late
Ease of Harvest	Difficult
Yield	1350 - 1800 kg/hectare
Wilt Resistance	Tolerant
Powdery Mildew Resistance	Moderately Resistant
Downy Mildew Resistance	Susceptible
Hop Mosaic Resistance	-

## Virus Information

Arabis Mosaic Virus	Negative (2017)
Prunus necrotic ringspot virus	Negative (2017)
Hop Stunt Viroid	Negative (2017)
Hop Mosaic Virus	-
Hop Latent Viroid	Negative (2017)

## Brewing Values

Alpha Acid	8.5 - 13.5%
Beta Acid	4.3 - 5.7%
Alpha - Beta Ratio	2:1
Hop Storage Index	-
Co-Humulone	35 - 40%
Total Oils	1.0 - 1.4 mL/100g
Myrcene	45 - 55%
Humulene	17 - 23%
Caryophyllene	8 - 10%
Farnesene	0 - 1%

## Health Grade
