

# Yeoman

Bred at Wye College in the 1970's, Yeoman is no longer available on the commercial brewing market, but instead has made its mark in breeding other notable varieties. It is responsible for Pioneer and also the Australian hop Super Pride, which has since superseded Pride of Ringwood.

Its alphas are very high for an English hop. It seems well equipped for disease resistance and sports a pleasant bitterness and a citrusy aroma.

## Also Known As

### Group

### Origin

United Kingdom

### Primary Use

Dual Purpose

### Height

Tall

### Supply Restrictions

None

### Key Flavours

Yeoman has a strong English hop aroma with citrus notes.

### Beer Styles Guide

British Ale & Lager.

## Growing Information

Season Maturity	Early
Ease of Harvest	-
Yield	1610 - 1680 kg/hectare
Wilt Resistance	Tolerant
Powdery Mildew Resistance	Moderately Resistant
Downy Mildew Resistance	Moderately Resistant
Hop Mosaic Resistance	-

## Virus Information

Arabis Mosaic Virus	-
Prunus necrotic ringspot virus	-
Hop Stunt Viroid	-
Hop Mosaic Virus	-
Hop Latent Viroid	-

## Brewing Values

Alpha Acid	12.0 - 16.0%
Beta Acid	4.0 - 5.0%
Alpha - Beta Ratio	3:1
Hop Storage Index	-
Co-Humulone	25%
Total Oils	1.7 - 2.4 mL/100g
Myrcene	47 - 49%
Humulene	19 - 21%
Caryophyllene	9 - 10%
Farnesene	0 - 1%
