

Practice cutting on the lines!

Practice cutting on the lines! Stop when you get to the dot.

Practice cutting on the lines!

Practice cutting on the lines! Stop when you get to the dot.

Five vertical black lines for cutting practice, each ending in a solid black dot at the bottom.

Practice cutting on the lines! Stop when you get to the dot.

A series of five parallel diagonal lines sloping downwards from left to right. Each line is a thick black line. The top line is the longest, and each subsequent line below it is shorter. The bottom-most line ends in a solid black dot. The other four lines also end in solid black dots, but they are positioned slightly to the right of the line's end, making them appear as if they are about to reach the dot.

Practice cutting on the lines! Stop when you get to the dots.

Practice cutting on the lines!

Keep the scissors straight ahead,
Turn the paper 'round instead-
(when you get to the dots!)

Practice cutting on the lines!

Keep the scissors straight ahead,
Turn the paper 'round' instead-
(when you get to the dots!)

Practice Cutting!
Keep the scissors straight ahead,
Turn the paper 'round instead-
(when you get to the dots!)
