Greater Than, Less Than, and Equal To

Thank you for your purchase of HeidiSongs' Hidden Numbers 1-30! This set of worksheets is very easy to use. All children need to do is find the designated number in the puzzle and then color them the color that is designated at the top of the page. If you would like, have your students also color the rest of the sections with different quantities the color of their choice. The colored result is self checking; if they found the right number, the number should appear!

Once children understand how this type of worksheet is done, even non-readers will have no trouble with each worksheet, because the format is the same. Just have your students look at the number at the top in the directions portion of the worksheet, and then check for the color word at the top. Then they will need to try to match the label on a crayon to the color word listed at the top, and they should be able to figure out what to do. I also kept a color word chart on my wall so that children could refer to it, if they were unsure. Teaching your children the color word songs on Sing and Spell Vol. 2 or on the Colors and Shapes DVD will also help them identify the color words! Thank you for your purchase and support, and have fun!
