

Monster Drawing Instructions

by Heidi Butkus

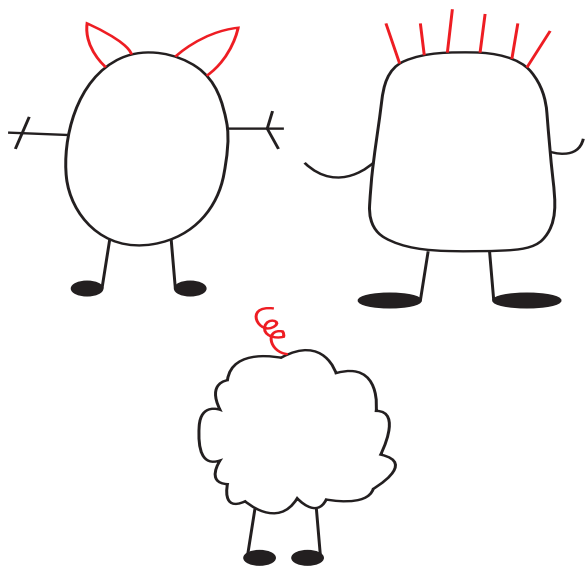

1. Draw some shapes for the body of your monsters! They can be shaped like a cloud, an oval, a rectangle, or anything else you can think of.

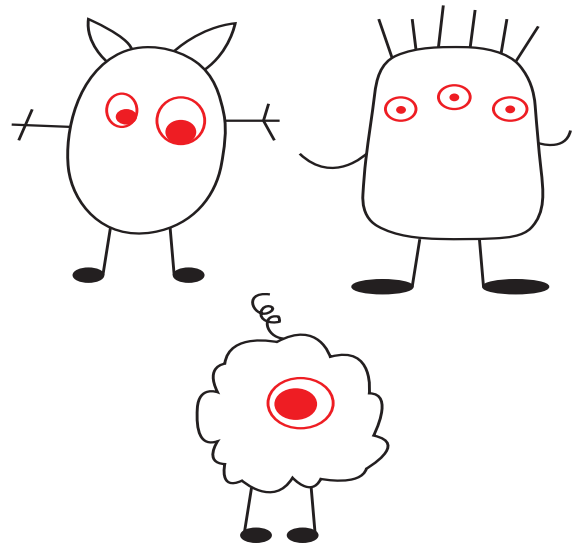

2. Give each monster some arms, feet, and legs. Draw the feet by making a capital L and then drawing a hot-dog on the bottom of it! The arms can be a smile or a lower case T on it's side.

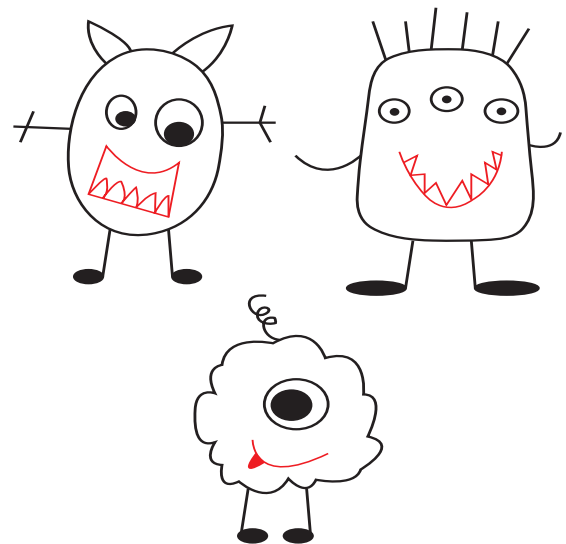

3. Give each monster some ears, hair, or antennae. Anything goes!

4. Put some eyes on your monster! They can have as little or as many as each child wants.

5. Now draw a mouth on your monster. You can give them teeth to make them scary, or tongues to make them funny.

6. Color in your monsters to bring them to life!
