

# Pete the Cat Match Numbers to Shoes Counting Activity!

## Purpose:

The purpose of this activity is to give children practice in matching numerals to the correct number of shoes. Therefore, this activity is to increase proficiency in counting, numeral recognition, and the development of number concepts.

## Preparation:

Duplicate the pages provided on white cardstock and laminate. Then cut the shoes apart. Add sticky back velcro to the back of the shoes and the "closet" pages. I suggest that you put long strips of velcro on the closet pages rather than individual velcro circles. Putting the correct number of circles on the closet shelves would give away the answer by indicating to the children exactly how many shoes to put in the closet. I always prepare several extra shoes than I will need to account for a few that may get lost.

## To Use:

Spread the shoes out and give the children one of the closet sheets. Tell them to look at the number on the closet and count out the correct number of shoes and place them on the Velcro in the "closet shelves." You may wish to have the children do this as a small group, or individually in centers, etc.

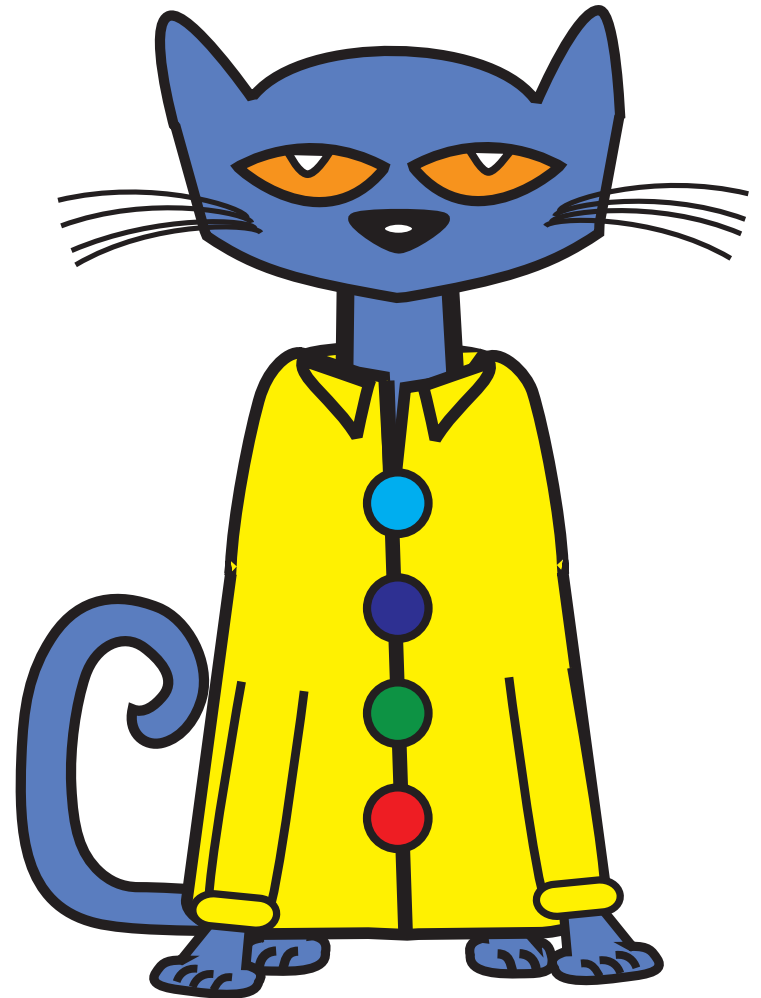

Have fun!  
Heidi
