

Sight Word Dice Game

Instructions:

1. Decide on the words that you want to teach. Write these words on the blank die and the blank recording sheet, or just use the words on the die and recording sheet that have been filled in for you.
2. Duplicate one recording sheet for each child. You will also need one die for every two children to share. (It might also work for three children to share one die, if they are patient and can share well.)
3. Cut out the outside of the die on the small dashed lines that look like this: - - - - - .
4. Fold the die between each of the faces on the dashed lines that look like this: _ _ _ _ _ so that it looks like a cube, and tape it together. I taped my die around a real foam die that I purchased at a teacher supply store so that it wouldn't get squished in the children's hands. It fits nicely around a die that has faces of about 1 and 1/4- 3/8 inches each. (*That means each face of the die is just short of one and a half inches.*)

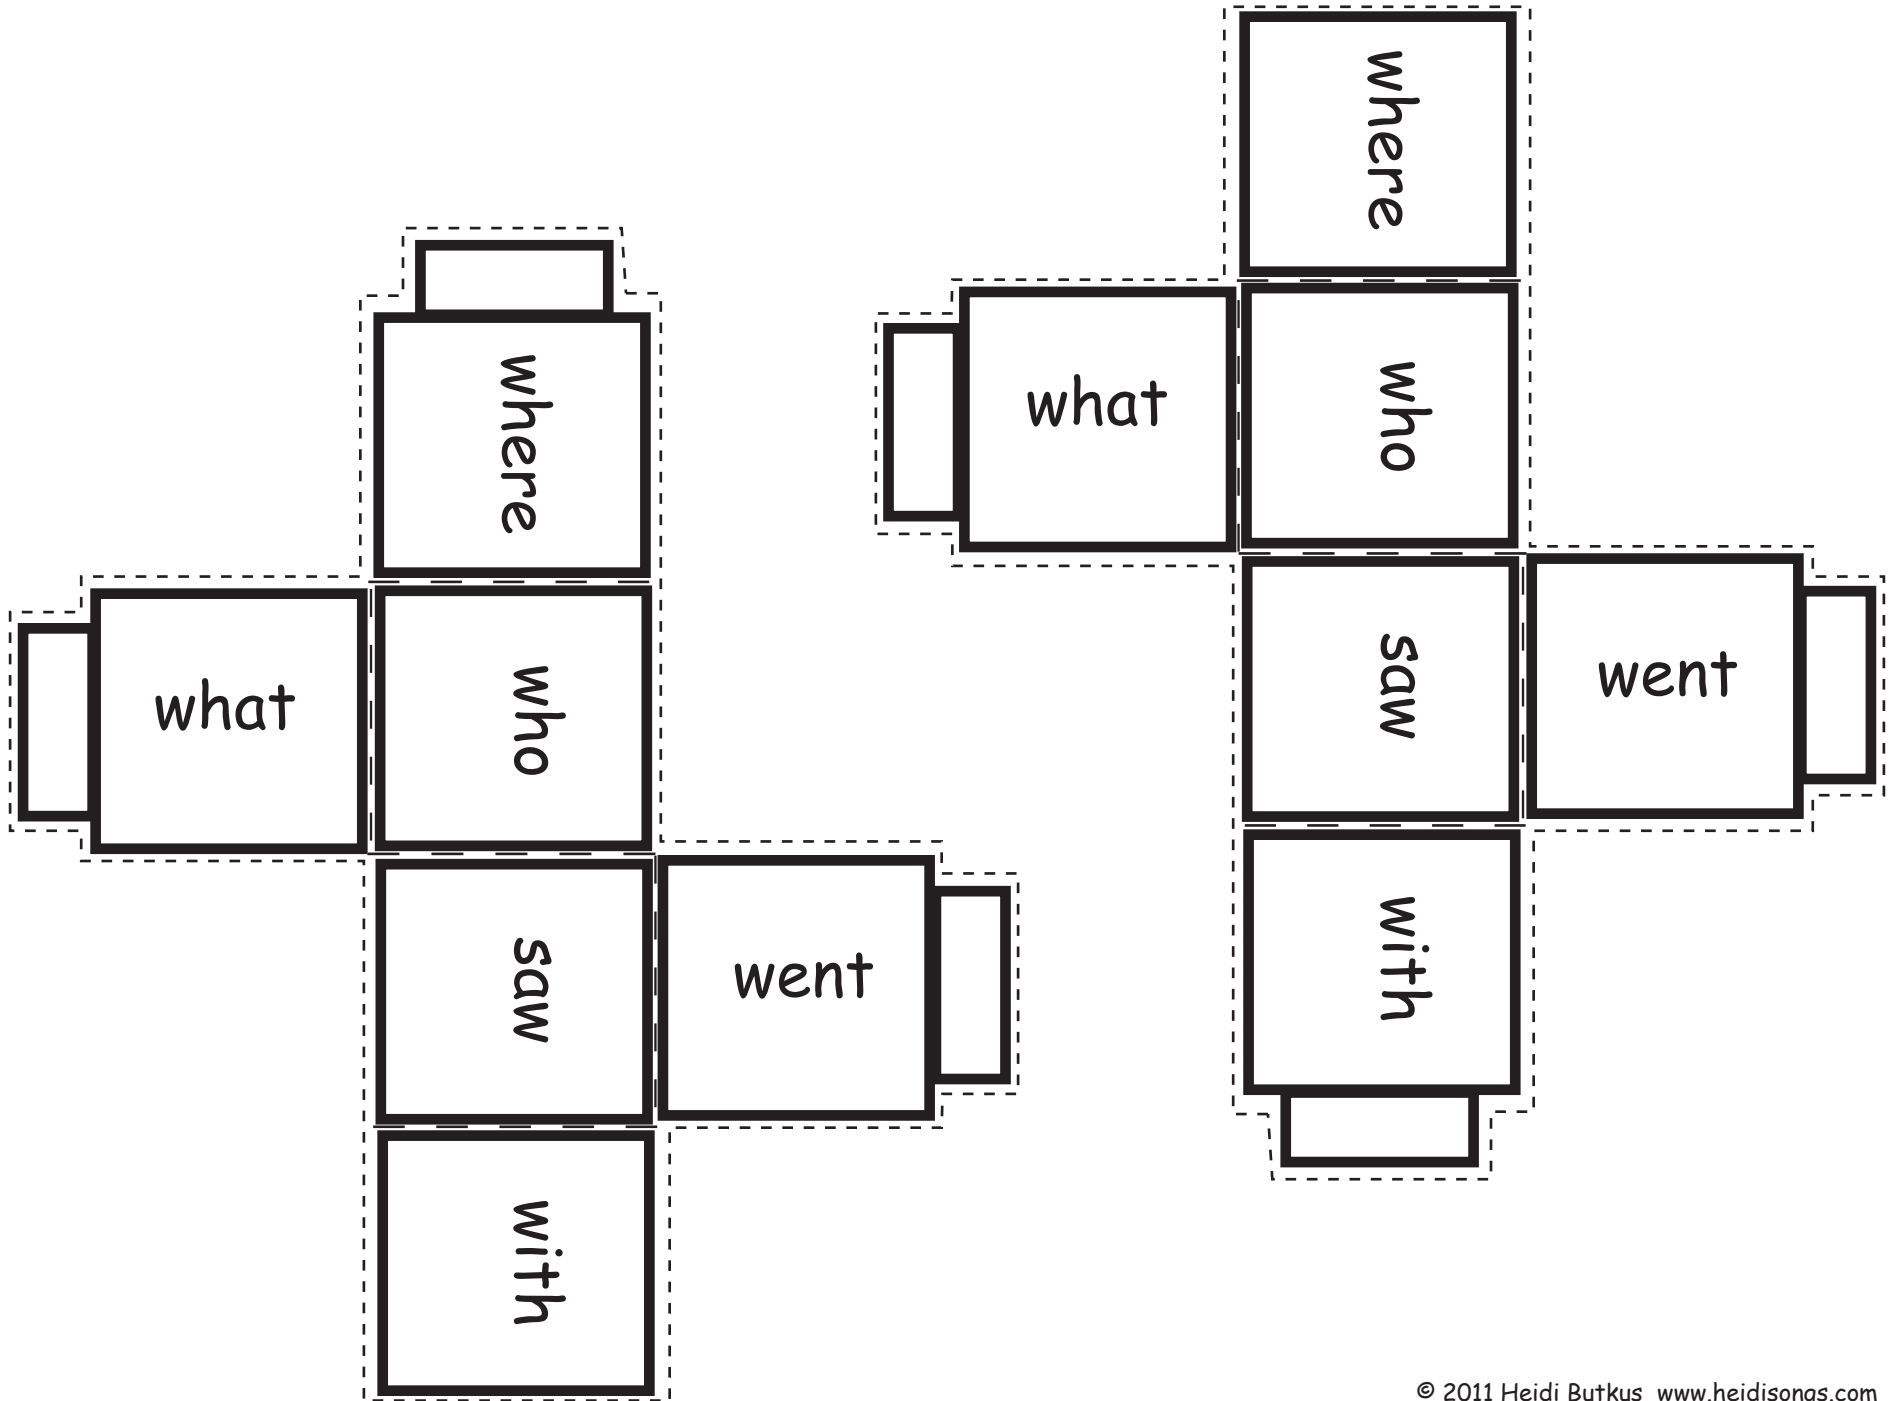

To play the game:

Each child rolls the die in turn and reads the word that comes up. He then writes it in the column under that word. The first child to fill up one entire column is the winner of the game! To make the game last longer, you can tell the children that the first person to fill *two* columns will be the winner. Have fun!
