COVER CLIMA BIG BLADE

Cover Clima Big Blade is available in sizes : XL, XXL, 3XL , VS , VL and VXL in kits complete with all accessories.

All Dimensions (Exterior & Interior Dimension) can be found on the next page.

Protection and Efficiency for Large-Scale Heat Pumps

Big Blade is designed to offer maximum protection and efficiency to large heat pumps. This cover not only conceals and protects the outdoor unit, but also provides an optimal ventilation. The large blades, which give the product its name, ensure a surface area for better ventilation. However, to avoid air stagnation and maintain an efficient airflow, the design is designed to balance protection and performance. With Big Blade, your heat pump is safe from the elements, without compromising its efficiency or durability.

Wall Installation

The outdoor unit of the air conditioner is fixed to the wall with brackets.

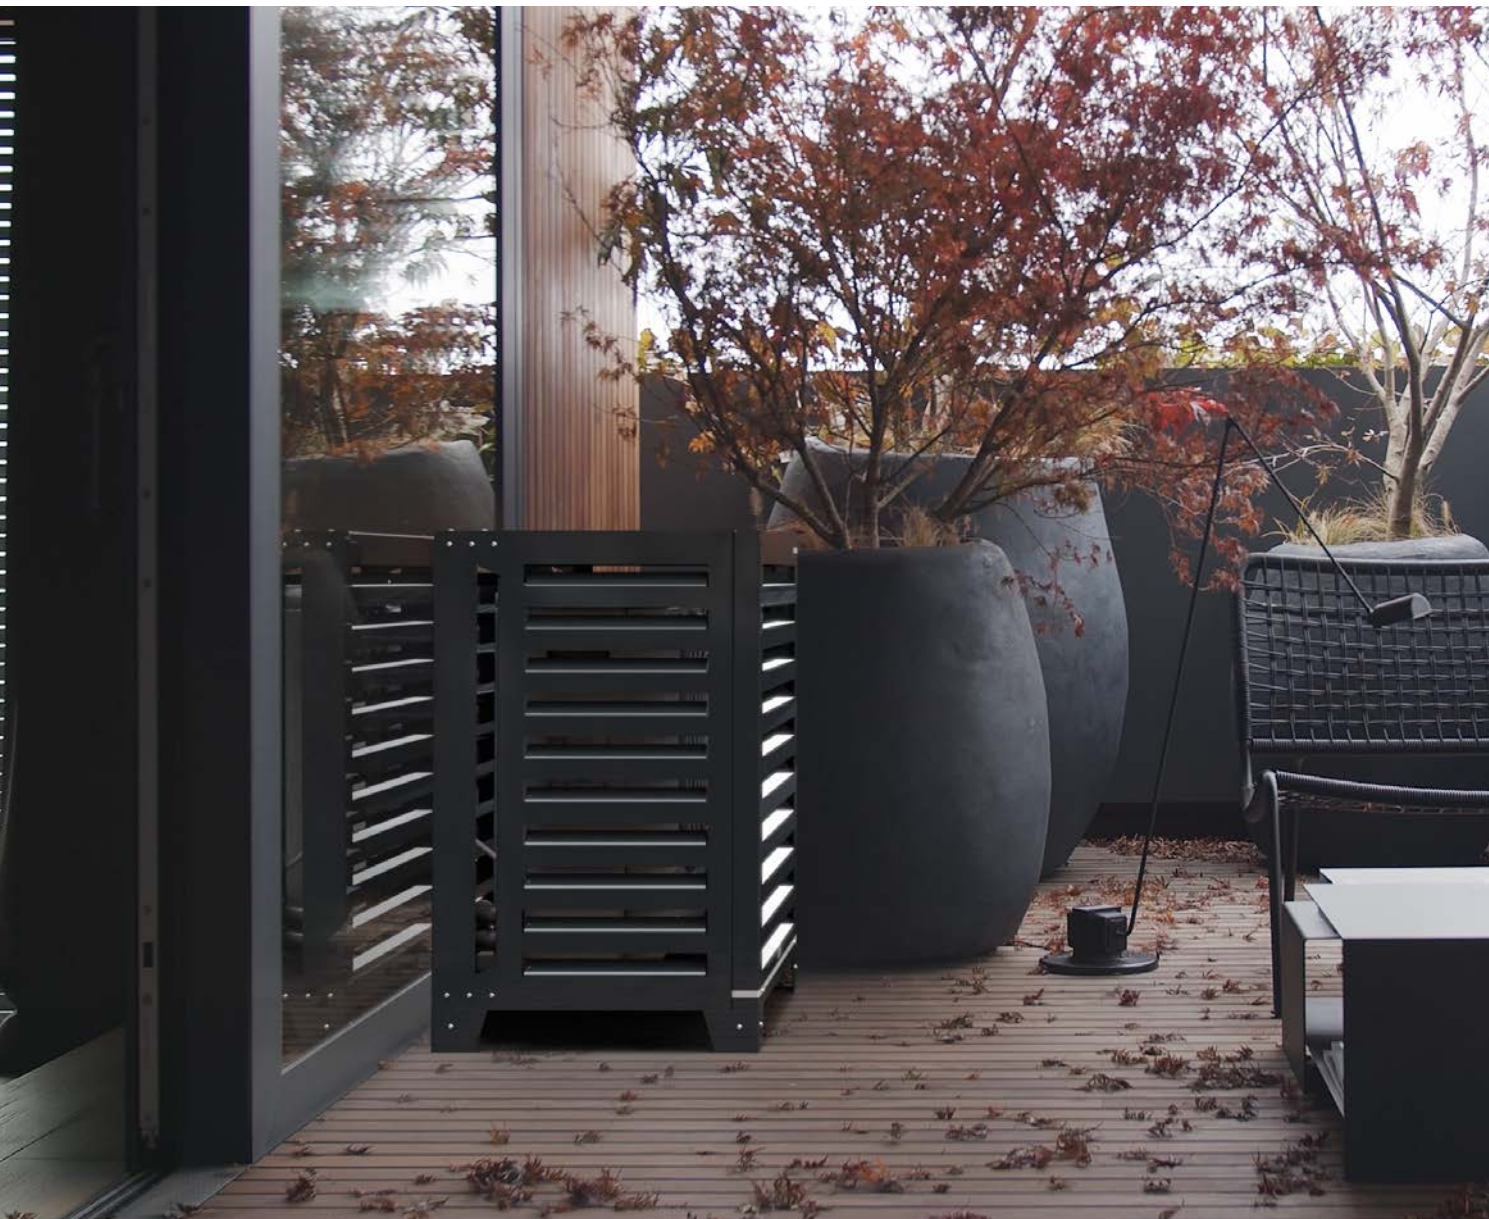

Floor Installation Near the Wall

The heat pump is placed on the floor near the wall.

The Cover Clima rests on adjustable feet and is installed against the wall.

Freestanding Floor Installation

The heat pump is fixed to the floor, away from the wall. The Clima Cover is supported by 4 adjustable feet and a back panel.

Curve: The Perfect Shield for Compact Heat Pumps

Unlike ordinary covers, Curve's composite aluminum design offers superior thermal insulation while maintaining perfect airflow to your unit. Its engineered louver system prevents overheating and weather damage, ensuring your heat pump runs efficiently year after year. The adjustable mounting adapts seamlessly to any installation, with a lightweight yet durable build that resists corrosion. Available in multiple finishes, Curve blends discreetly into your exterior or makes a stylish statement of your choice. A smarter shield for small heat pumps: protection that works without compromising the performance.

COVER CLIMA BIRD

Bird is the heat pump and air conditioner cover that combines design and functionality, inspired by Origami. It protects the outdoor unit from rain, hail and UV rays while reducing noise. Its geometric and modern lines add elegance to the facade, blending harmoniously with the architecture. Easy to install, Bird transforms a technical component into a unique style element.

Cover Clima Bird is available in sizes S, M, L.

COVER CLIMA Provence

Cover Clima Provence is available in sizes S, M, L.

- N.B -
Sizes & Colors Available identical to COVER CLIMA BLADE

Provence is the cover for heat pumps and air conditioners, inspired by the picturesque lavender fields of southern France. In addition to protecting the outdoor unit from rain and hail, it reduces noise and transforms the facade into a stylish element, combining functionality with refined design. With Provence, bring a touch of Provence to your outdoor space.

Innovative comfort durable design

Box Air Klima in Italy, is the leading manufacturer of high-quality air conditioner and heat pump covers. All our products are 100% made in Italy, crafted from premium materials like composite aluminum and stainless steel for durability and style. With expert craftsmanship and innovative design, we deliver covers that protect your unit while enhancing your outdoor space.

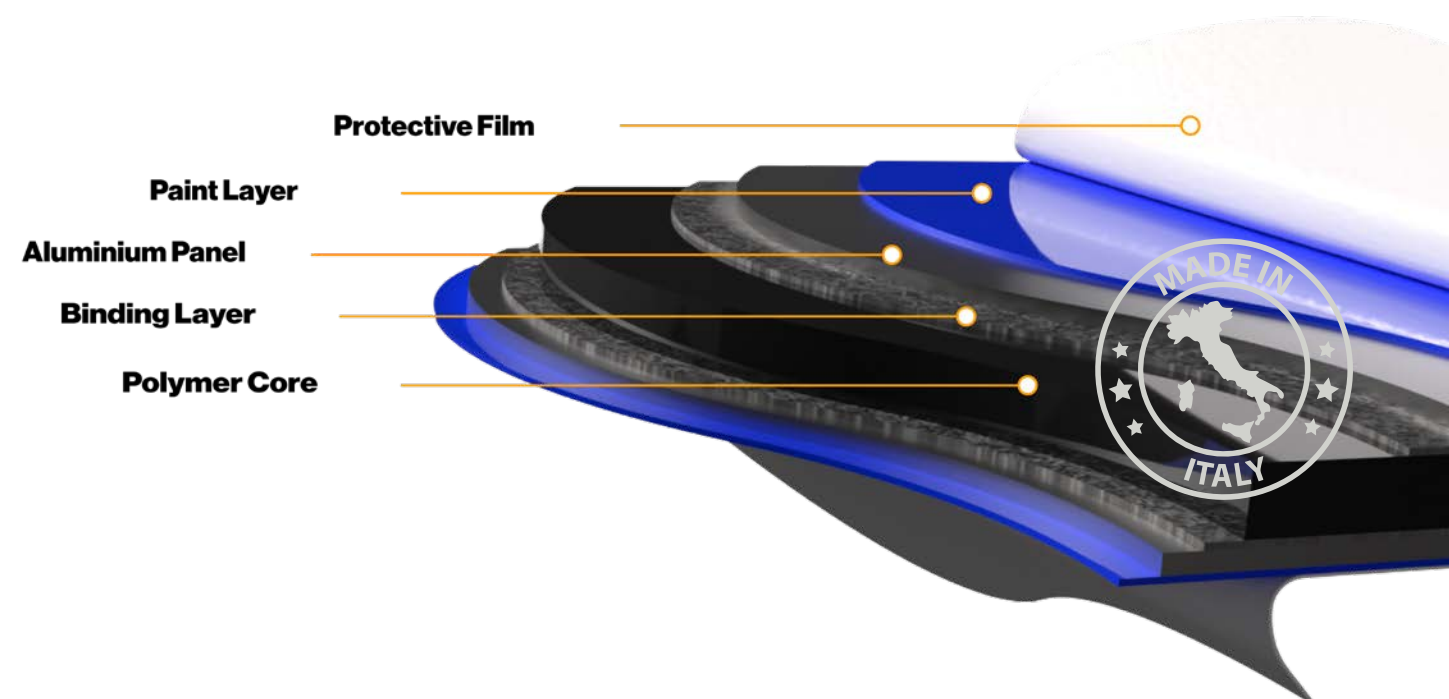

Our panels are designed to maximize sound insulation, reducing vibrations and unwanted noise to a minimum. Trust Box Air Klima for superior quality and Italian excellence. Cover Klima is the ideal solution for air conditioners and heat pumps. Available in 4 designs, colors and sizes, it fits every installation.

Made of aluminum composite and stainless steel, the unique design (EUIPO registered) combines elegance and sturdiness.

It offers sun protection and reduces rain noise, surpassing traditional sheet metal roofing.

Protect your installation with style and quality.

The shell of our cases is made of aluminium composite, with a solid, lightweight polymer panel enclosed between two strong layers of painted aluminium. Aluminium composite is a lightweight yet durable material that offers excellent protection against the elements and everyday wear and tear. It is corrosion-, weather- and UV-resistant, ensuring a long, maintenance-free life. The support elements, brackets and hardware are made of robust, stainless steel.

COVER CLIMA

HI-FI

Cover Clima Hi-Fi is available in sizes S, M, L .

- N.B -

Note that Hi-Fi is a unique cover and is not compatible with Cover Clima system accessories.

Hi-Fi: Timeless Design for Air Conditioners and Heat Pumps

Hi-Fi is the cover that revolutionizes the style of outdoor units, ideal for those seeking an alternative to classic rectangular designs. In addition to protecting against rain and hail, it reduces noise and adds a touch of elegance to the building.

Available in three sizes and two color combinations, it is delivered pre-assembled for easy installation.

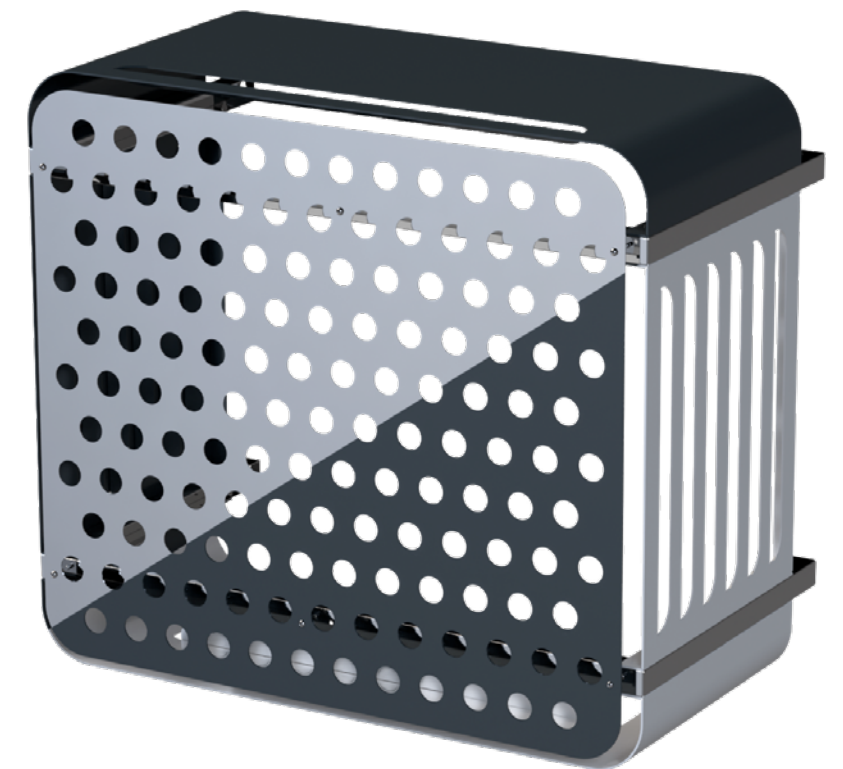

Sizes and colors can be customized upon request, making Hi-Fi the perfect solution for every need.

Available colours :

-  Silver / Anthracite
-  White / Anthracite

Hi-Fi is the cover that redefines the aesthetics of outdoor units, with a unique design that deviates from the traditional rectangular. In addition to providing protection from rain and hail, Hi-Fi reduces noise significantly, improving acoustic comfort and enhancing the appearance of the building.

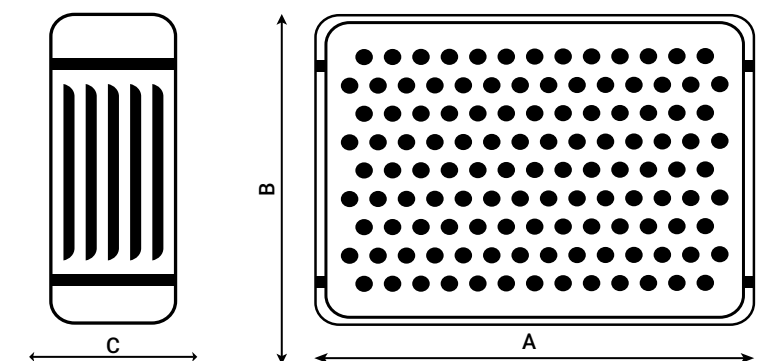

Wall Installation :

The outdoor unit of the air conditioner is fixed to the wall with brackets.

- N.B -

Note that Hi-Fi is a unique cover and is available only for installation to the wall

CLIO SPLIT-COVER

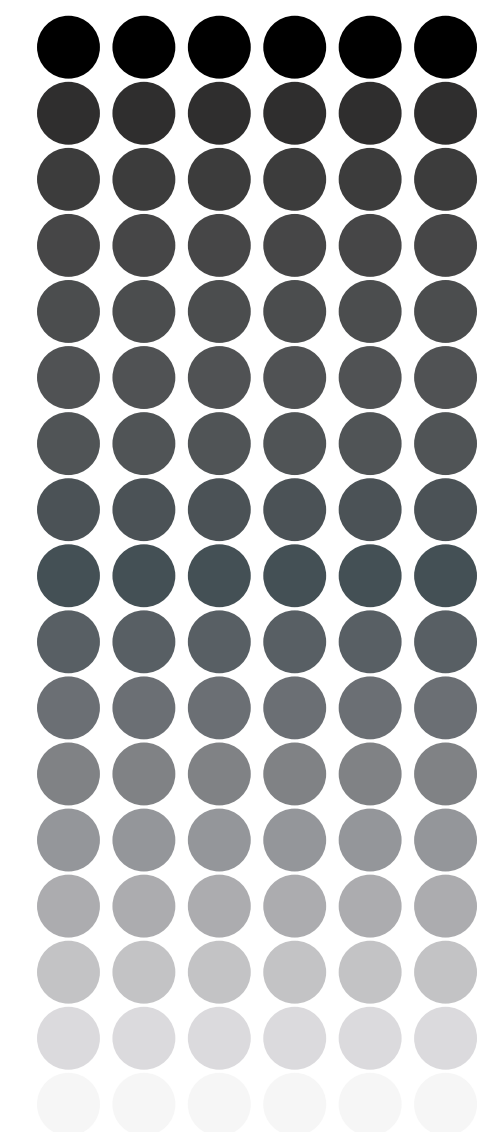

Clio is the ideal solution for those seeking a combination of practicality and style. With a simple yet refined design, it integrates perfectly into modern and classic environments, adding a touch of elegance without distorting the aesthetics.

Talia

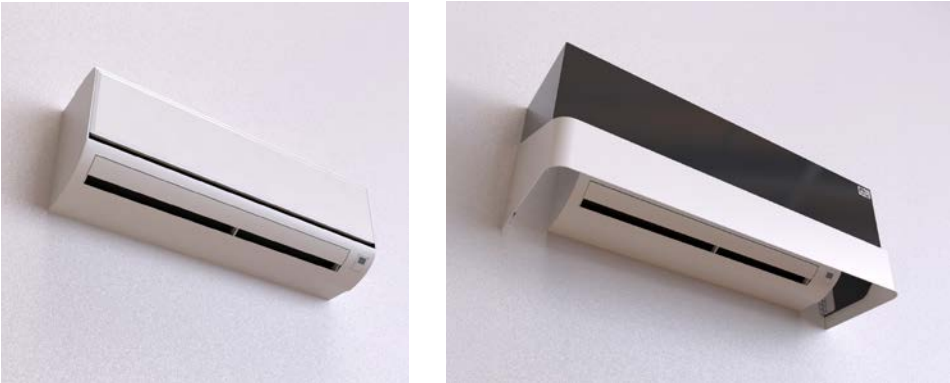

For modern and premium interiors

Talia is a minimalist cover for wall-mounted air conditioners, designed to blend seamlessly into professional and contemporary spaces. Its clean design adds a refined touch without disrupting your interior style.

Refined design. Strong, silent wall protection.

Crafted from aluminum composite, Talia is lightweight, robust, and engineered to protect wall-mounted air conditioning units from wear and discoloration over time. An ideal choice for those looking to merge durability with visual harmony.

A protective, elegant upgrade for your AC unit.

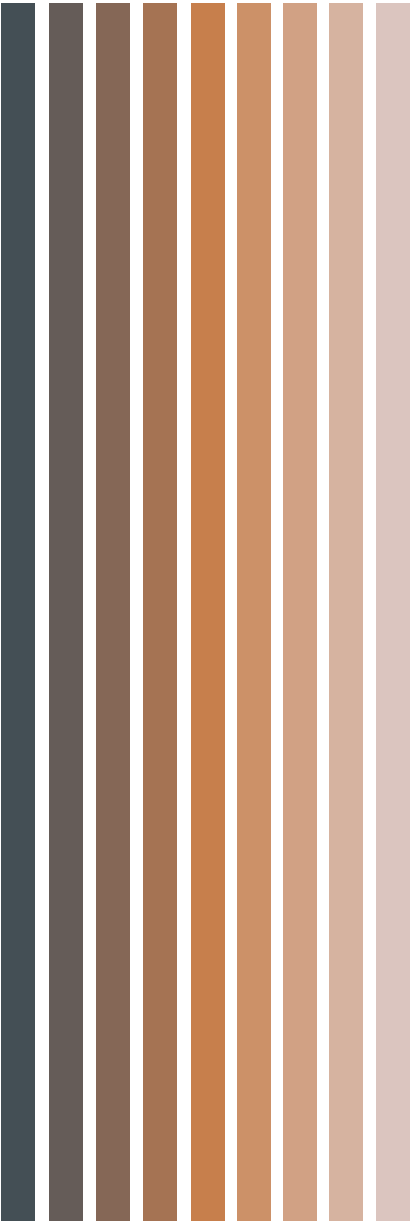

Crafted from high-quality aluminum composite, Tersicore is both lightweight and durable. It shields the indoor air conditioner from yellowing, dust, and damage, while enhancing the wall with a stylish architectural element.

Tersicore

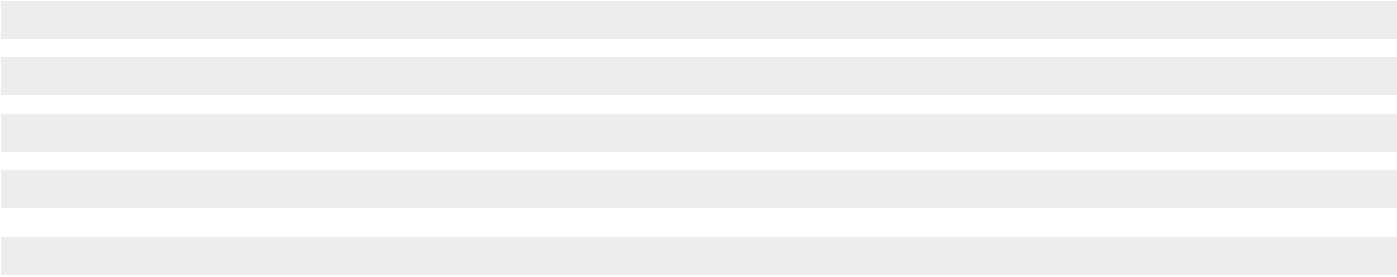

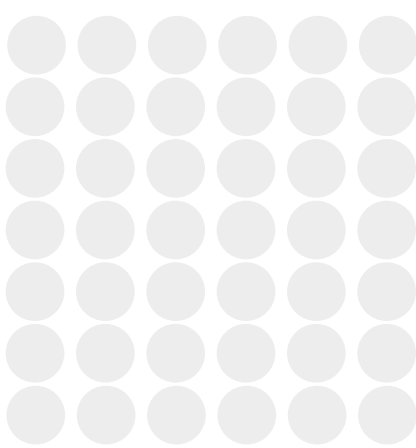

Natural elegance meets smart design

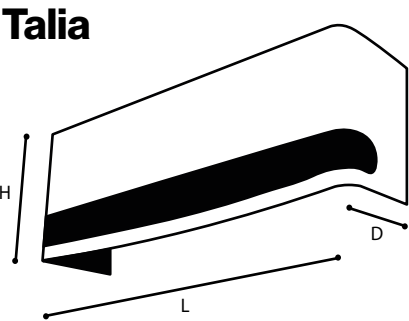

Tersicore is a decorative cover for indoor air conditioning units, ideal for those who appreciate refined aesthetics with a warm, natural feel. Its wood-effect finish and clean lines bring a sense of harmony to any space from cozy living rooms to modern offices.

WALLBOX cover system

Box Air Klima offers a range of solutions designed to protect electric vehicle charging stations. Our covers defend the wall box from agents weather such as heat, UV rays, ice and hail, ensuring durability and functionality over time.

With a design intended to blend harmoniously into the environment, our covers combine sturdy protection and thoughtful aesthetics, ideal for those who want to safety without sacrificing style.

Cover for Charging Stations and Wallboxes from Box Air Klima

Box Air Klima offers protective covers for electric car charging stations and wallboxes, providing complete protection from weather, dust and accidental damage. Available in two sizes (40x40cm and 50x50cm), the covers fit a variety of needs and feature an advanced gasket system for an effective seal against moisture and dust. Installation is quick and easy with clear instructions and a fastening kit.

Consider these Factors

Size and shape: The cover must fit perfectly with the wallbox.

Environment and location: Aesthetic integration and available space.

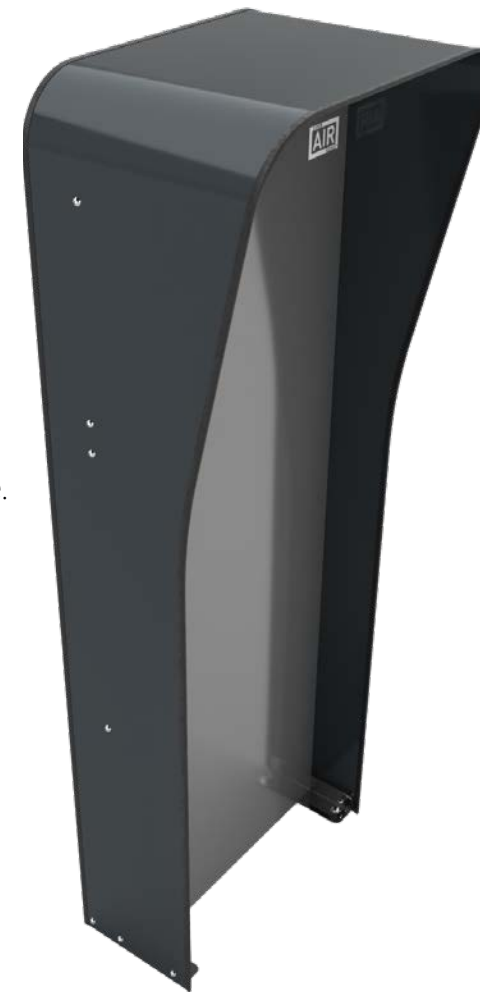

Materials: Robustness and durability to withstand the weather.

With Box Air Klima, protect your investment in e-mobility by combining safety, functionality and design.

Importance of Protection

Wallboxes are vulnerable to rain, snow, wind and UV rays, which can impair their performance.

Proper coverage ensures charging without interruptions and prolongs the life of the device.

Wallbox Stand L

Designed for enhanced performance and compatibility

Wallbox Stand L is the expanded solution for those who need more space, power, and versatility in their charging station. With a larger form factor, it accommodates a wider range of wallboxes and accessories, making it ideal for both residential and commercial installations.

Built for resilience and flexibility

Constructed from premium aluminum composite with a reinforced stainless steel structure, Wallbox Stand L is engineered to withstand even the harshest weather conditions. Its generous size allows for multiple configurations and easier integration of advanced electrical components.

Custom design meets practical innovation

With its refined, architectural lines, Wallbox Stand L elevates the look of any outdoor space. Available in a range of finishes, including customizable options, it blends seamlessly with its surroundings and reflects the aesthetic of your vehicle and home.

Secure, efficient, future-ready

Featuring a larger rear technical compartment, it simplifies installation while ensuring all systems are neatly and safely enclosed. The galvanized steel base and robust mounting system offer uncompromising stability and long-term durability.

Wallbox Cover Plus Smart protection with style

Limitless adaptability

Adjustable stainless steel brackets for mounting on any wallbox, turning the simple cover into a complete protection system.

Clean design, perfect installation

Integrated back panel to hide wiring, with modern lines that enhance the environment.

Shield Resistant

Aluminum composite structure that defends against weather and impact, ensuring durability and safety.

Wallbox Cover Protection for charging stations

Complete Protection, Wallbox screen and solar inverter from rain, snow, UV rays and dust. Easy installation, Includes complete fastening kit for quick and secure mounting. Durable materials that withstand the elements, with unobtrusive design. Essential protection, Preserves performance and extends the life of the charging station.

Cyber Cover Wallbox

Advanced protection with design

futuristic design for your charging station. Made of aluminum composite and stainless steel.

Total protection against weather and UV rays

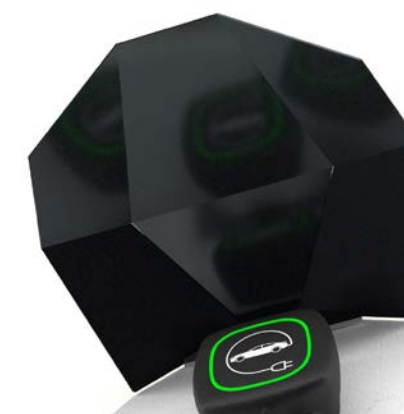

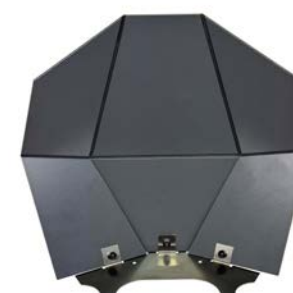

Innovative design that enhances outdoor spaces

Easy installation with complete kit included

Compact size (37x41 cm)

The ideal solution to protect your e-mobility investment in style.

Technology and design for safe charging at all times.

VELA

Where design meets electric innovation

Sculptural design for smart charging

Vela transforms the concept of a charging station into a refined design statement. With its distinctive sail-inspired shape and bold material contrast, it offers not just functionality but true architectural presence in any outdoor setting.

Built to endure, crafted to impress

Made with a combination of powder-coated steel and corten-effect aluminum, Vela is designed to withstand all weather conditions while adding character and elegance. Its structure ensures long-lasting performance, minimal maintenance, and aesthetic durability over time.

Tailored for versatility and safety

Vela integrates seamlessly with most wallboxes, offering flexibility in installation. The integrated cable support and protected mounting ensure ease of use, safety, and a clean appearance in both public and private spaces.

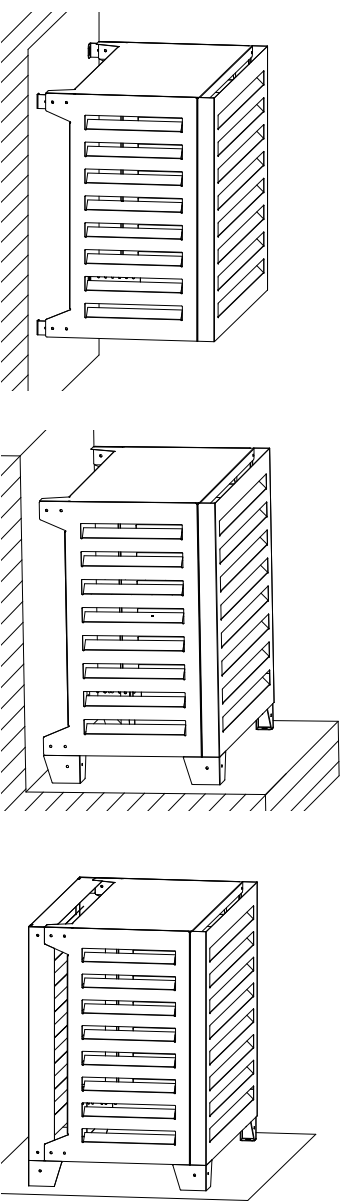

A new icon of e-mobility

Vela is more than a charging point—it's a symbol of sustainable innovation and Italian design. Perfect for residential driveways, corporate spaces, and premium hospitality areas.

COVER CLIMA

BIG BLADE

Clima Blade, Curve, Provence and Bird are available in sizes S, M & L.
Adjustable feet and back panel are sold separately.

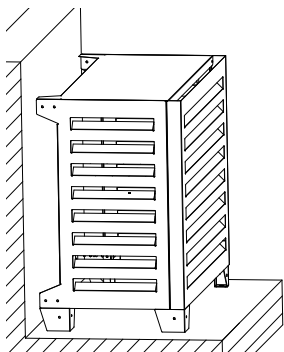

Cover Clima Big Blade is available in sizes XL, XXL, VS and VL in kits complete with all accessories. Select the kit according to the type of installation.

Types of installation

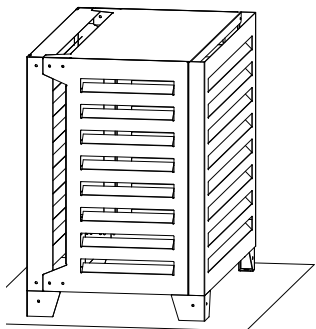

On the wall

The most common way to install an outdoor air conditioner is to wall mount the unit, which is usually attached to the wall with brackets.

On the floor, near the wall

The heat pump is placed on the floor near the wall. The Cover Clima is installed against the wall and rests on the floor on a pair of adjustable feet.

Freestanding

The heat pump is attached to the floor and moved away from the wall. The Cover Clima is installed with 4 adjustable feet and a back panel.
