HOTSTART ANTIBODY READY-TO-USE	TRAXSKU1030	250 Units (in solution)
	TRAXSKU1031	1000 Units (in solution)
	TRAXSKU5007	100 µg antibody (lyophilized)
HOTSTART ANTIBODY BULK	TRAXSKU5008	1 mg antibody (lyophilized)
	TRAXSKU5009	10 mg antibody (lyophilized)

DESCRIPTION & FEATURES

HotStart Antibody is a highly pure antibody that binds to Taq DNA Polymerase and thereby blocks its polymerase activity. At the very beginning of the thermal cycling protocol, the antibody is inactivated and with this "Hot Start", Taq DNA Polymerase regains its function. This highly controlled reaction start prevents non-specific amplification and grants maximum control over the reaction conditions.

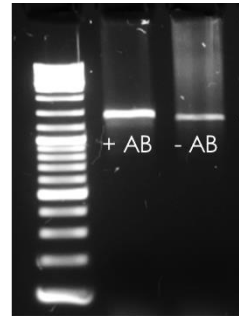

- FEATURES:**
- Inhibits polymerase activity until desired
 - Enhances polymerase performance & stability under harsh cycling conditions
 - No DNA contaminations detected with PCR

RECONSTITUTION

Carefully solubilize the lyophilized HotStart Antibody in sterile 50% Glycerol (prepared with PCR Grade dH₂O) to 1 mg/ml by gently inverting the tube. Aliquot for use as required and store at -20°C.

PROTOCOL

Taq Polymerase	1 U
HotStart Antibody	0.2 µl
incubate for 5' at room temperature	→ use directly or store at -20°C

Endpoint PCR with & without HotStart Antibody

For convenience, 5 U/µl Taq polymerase can be mixed with an equal volume of HotStart antibody, aliquoted and stored at -20°C until further use.
