

MAKING HOMES MORE FUN.
SINCE 1979.
WORLD WIDE **STEREO**

The connected home is no longer a luxury—it is a necessity for the modern home.

We work with homeowners, architects, interior designers, and custom builders to seamlessly integrate today's cutting-edge technology solutions into their projects.

We collaborate with you at every stage, ensuring meticulous planning, design, and installation of every project. This solid foundation empowers homeowners with extensive customization options to tailor their systems according to their preferences.

And then we layer in the fun part: the music, the movies, lighting control, the mood and ambience that brings family and friends together within the spaces you create for them.

As a leader in our field and trusted integration partner for over 40 years, our life's work is to design, build, and deliver incredible, intuitive and simple technology systems. You hold high standards for your work, and so do we. Every project, no matter the size or scope, receives the full dedication, passion, skills, and experience that has been World Wide Stereo's calling card for over 40 years.

HOME THEATER AND MEDIA ROOMS

The awe-inspiring, fully-immersive, belief-suspending home theater experience we're known for doesn't come in a box – it comes with insight about you, your family and your home environment. Your favorite movies, your listening preferences, how old your kids are, how big your room is, where the windows are, where the sun sets, where the dog sits, and so on. From there, the sky's the limit.

PRIVATE HOME CINEMAS

Have your own Hollywood screening room in the comfort of your own home. At your command, the lights dim and a 100-inch projection screen comes to life.

MEDIA & GAMING ROOMS

Build your dream media room designed for multi-purpose entertaining. Turn your family room into a home theater with concealed high performance audio by dimming the lights and lowering the shades. Experience the ultimate immersive gaming setup with a high-definition big screen display or with multiple screens networked together. Entertain your friends and family the night of the big game or practice your swing with your own personal golf simulator.

CUSTOM FURNITURE & ACOUSTIC TREATMENTS

Choose from our selection of luxe home theater and lifestyle furniture designed specifically for the most comfortable viewing and listening experience. Acoustic treatments will absorb and contain sound where you want it with styles that can either blend in or add to the interest of the space. Our in-house interior designer will work with you or your own designer on selection, material, placement, you name it.

HOME NETWORKS & WIFI

Designing, deploying and maintaining a sophisticated enterprise-grade network is a science and each solution is custom tailored to meet the unique needs of each client. Our process begins with a detailed review of your environment, lifestyle, and budget, to determine critical technology requirements for project success. We expect that your home entertainment systems and your Wi-Fi and streaming services are getting a lot of use right now, and we are here to support you and make your experience at home as comfortable and connected as possible.

ENTERPRISE-GRADE HOME NETWORKS

Your home's network is the digital "backbone" that all your other home technologies rely on. With higher bandwidth demands for streaming and an increasing number of connected devices, a robust network offering uninterrupted connection is no longer a luxury—it is a necessity for the modern home.

ENTERPRISE-GRADE QUALITY

Our solutions feature the only residential network provider that utilizes true enterprise-grade networking equipment. Fortune 500 companies across the globe are built on these network infrastructures, proving their performance and reliability within critical environments.

OUTDOOR ENTERTAINMENT

Let World Wide Stereo hook you up with the right outdoor entertainment gear, weather-proof and invisible. Customize your space with an outdoor TV or projector, outdoor music, landscape lighting, and full-property Wi-Fi coverage to control it all. Not sure what solution is best for your space? Our experts will come to your home and do a free on-site consultation, including an outdoor music or lighting demo, so you can experience it for yourself in your own backyard. It's time to go play outside!

OUTDOOR MUSIC

Outdoor speakers that deliver serious sound, blend in with the environment, and handle wind, rain, sleet - you name it.

OUTDOOR TELEVISIONS

Make room for a high-definition, all-weather TV designed to withstand the elements. Add a matching soundbar or go big with an outdoor speaker system.

LANDSCAPE LIGHTING

Customize your outdoor environment and add curb appeal with well-lit outdoor spaces. Incorporate path lights for safety or highlight architectural details and landscape features, we can show you how.

CUSTOM SHADES & INSTALLATION

Custom window treatments not only elevate and transform the look and feel of a space, but they can also make a significant impact on the comfort, privacy, and energy savings of a home. Adjusting shades based on the season or installing specialized insulated shades can make your space more comfortable while saving you up to 10–30% on heating and cooling costs.

SET THE SCENE

Easily adjust for privacy or sun glare with one tap on your phone or touchpad. Or even by a simple voice command.

SAVE ENERGY

Window treatments help control inside temperature, saving you money in the summer and winter on your electric bill.

MANAGE WITH EASE

Control everything from anywhere. Open your kitchen shades from your bedroom, or from your smartphone or a simple voice command.

LIGHTING DESIGN & WELLNESS

The right lighting designed and automated to the way you live can transform your entire home and improve your well-being. Smart fixtures and lighting control systems enhance your decor and elevate your mood, while also providing added convenience, security, and even energy savings.

LIGHTING FOR WELLNESS

Our "human centric" approach to lighting design includes high-performance fixtures and an intuitive control system that adjusts color temperature and brightness levels throughout the day to support your body's natural Circadian rhythm. This reduces stress and fatigue, increases productivity, and promotes a better night's sleep.

INTUITIVE CONTROL

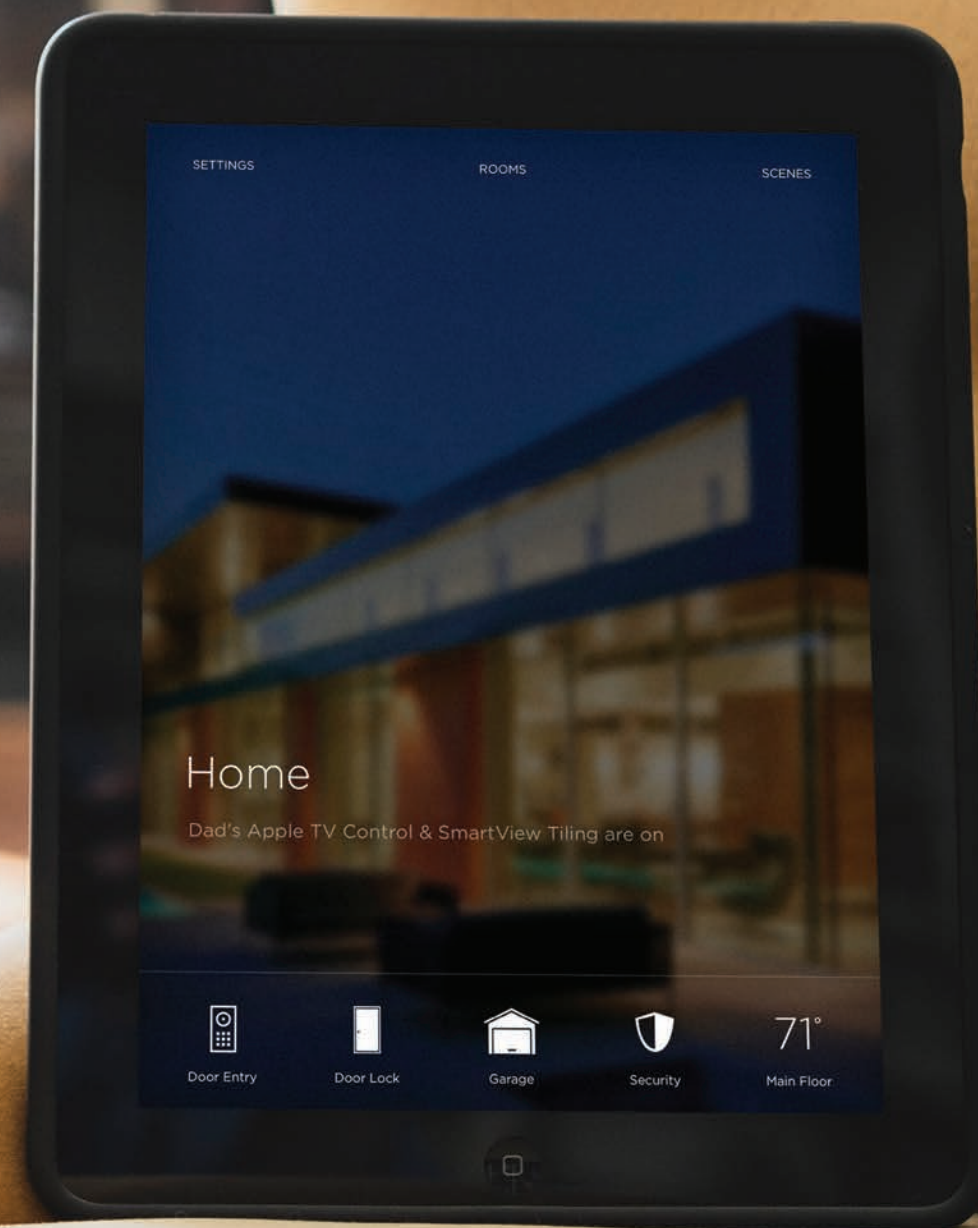

Custom designed and easy-to-control interior and exterior lighting lets you curate and control your home's atmosphere at the touch of a button (or voice command) whether you're in your living room, sitting by the pool, or on the other side of the world. Set your lights to turn on or off at a specific time of day or at the press of a button. Come home to a well-lit house or look like you're home even when you're not. It's that simple.

SMART HOME CONTROL SYSTEMS

Smart Control Systems – the ability to effortlessly control lights, shades, thermostat, home entertainment, cameras, you name it, from anywhere – remains our pièce de résistance. It demands the best of everything we do, and we do it all: the big jobs, the tricky jobs, and the rescue jobs — jobs where others may have failed or fallen short. The best part? We make it all so easy: no inch-thick manuals, nothing to memorize – everything runs via sleek touch pads on the wall, your nightstand, or your smartphone or tablet. Bottom line: you rule the home automation technology, not the other way around.

CONTROL EVERYTHING IN YOUR HOME

Lights, shades, thermostat, media player, home entertainment, security, cameras, pool, spa, gates, door locks, the sprinkler system, the works, remotely. Open/close, up/down, on/off, etc., from anywhere on the planet. If it plugs in, we can control it.

A tall, dark wood speaker cabinet stands on the left side of the image. It features three circular drivers: a large tweeter at the top, a midrange driver in the middle, and a larger woofer at the bottom. A black, horn-shaped satellite speaker is mounted on top of the cabinet. To the right of the speaker is an acoustic guitar with a natural wood finish and a dark pickguard. The background shows a window with a view of trees and a piece of abstract art on the wall.

WHOLE HOUSE AUDIO DESIGN & INSTALLATION

This is all about the music you love – and listening to what you want, when you want, where you want. World Wide Stereo's award-winning sound engineers design and install whole house audio and dedicated music systems in tune to both individual music preferences and home décor.

WHOLE HOUSE AUDIO

Fill your home with the music you love. Wirelessly stream your favorite streaming services, your entire digital library, even your vinyl or CDs in the rooms and outdoor spaces you spend time in and entertain most (yes, even the shower).

DEDICATED MUSIC ROOMS & 2-CHANNEL AUDIO

Dedicated, well-planned spaces for listening to music can make all the difference to how you experience your collection and just how good it can sound. We will help you to select the right gear, layout, acoustic treatments, and the proper furniture to show it all off. You will experience your music in a way you never could have imagined and we promise goosebumps.

OUTDOOR AUDIO

All that fantastic audio gear inside, and you pull out a 1990's boom box for entertaining outside? No, we can't have that. We will work with you or your landscape designer to incorporate on-wall, rock, or landscape speakers, in-ground subwoofers, and buried cables to create an outdoor music system that delivers serious sound, blends in with your landscaping, and can handle rain, wind, snow - you name it.

PEACE-OF-MIND & PROTECTION FOR YOUR TECHNOLOGY

Technology systems can sometimes experience disruptions, but with World Wide Stereo's SmartCare monitoring, you can protect yourself from issues before they arise. From proactive monitoring and remote fixing to easy system reset – we have you covered.

REMOTE REPAIR

We can monitor and access your system remotely, and in most cases can repair your system before a service call is needed.

24/7/365 SUPPORT COVERAGE

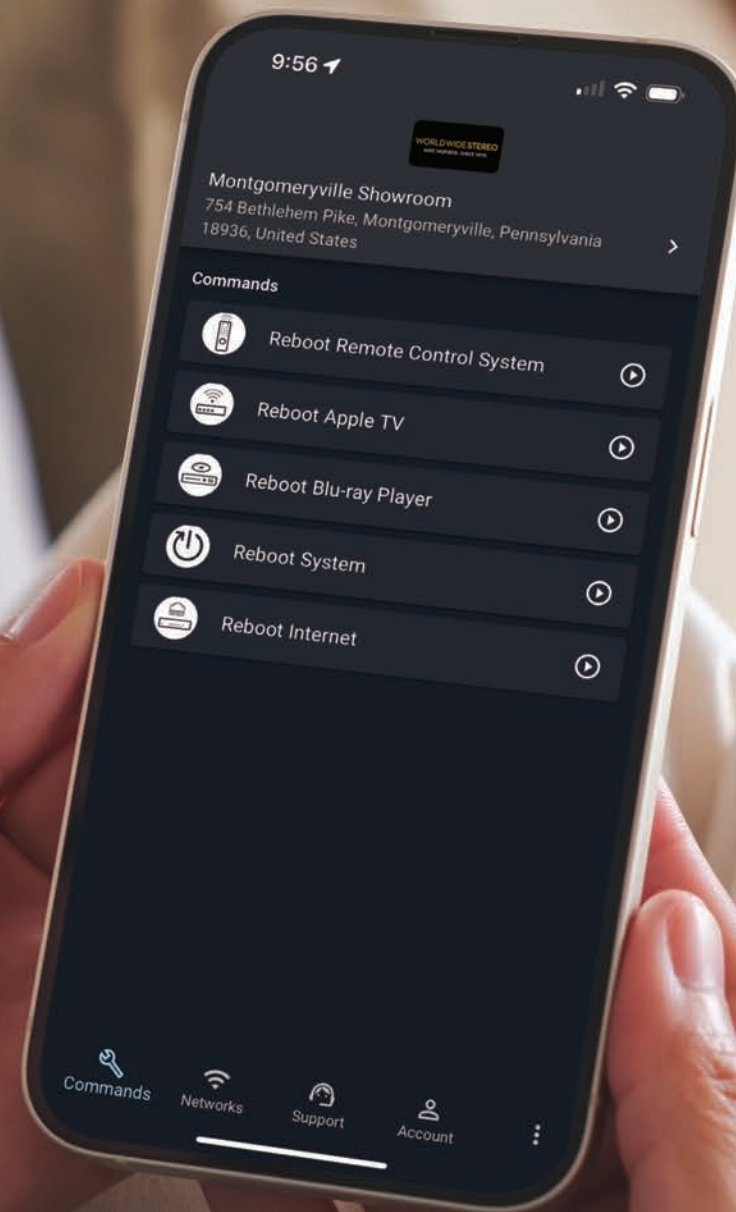

We have certified technicians in every timezone available to communicate with you 24/7/365, in whichever manner best fits your lifestyle.

APP CONTROL

You'll have access to a mobile app that provides solutions to many of the common issues that technology systems experience.

DISCOUNTED & PRIORITY SERVICE CALLS

In the unlikely event that a service call must be scheduled, you'll receive a preferred rate. SmartCare PRO members receive priority service calls.
