

# Wireless Charging Stand User Guide & Warranty

## Powering The Stand

Plug the included cable into the Type-C port on the back of the Stand. Plug the other end of this cable into a USB power source such as a USB wall adapter. The Stand can also be charged by utilizing other standard USB Type-C to USB Type-A cables.

When properly connected and powered on, the status light on the Stand will blink Green/Blue then go solid Green.

# Status Light

The status light is located on the right side of the Stand and will display various colors depending on the status. See the "Powering The Stand" & "Charging Your Device" sections of the manual for more details.

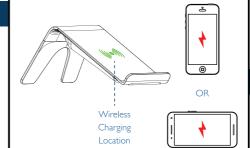

#### Charging Your Device

Before charging, check your devices specifications to ensure it is wireless charging compatible.

To start the charging process, simply place your device on the stand. For most devices, you are able to rest it in either a vertical or horizontal position. The status light will turn Blue once your device has started wirelessly charging. That light will turn off after approximately 15 seconds.

Note: If your device is inside a case, that case can not be more than 6mm thick or the wireless signal will not pass through. Any magnets or heavy metals on the rear of the device case will also interfere with wireless charging. The status light will blink Green if your device is not making proper contact with the wireless charging signal.

## Specifications

Wireless Power 10 W

Input 5 V / 2 Amp 9 V / 2 Amp

Output 5 V / 1 Amp

9 V / 1.1 Amp

Charging Distance 6 mm Efficiency 70%

Frequency 110 - 220KHz
