Net Weight: 2.2 lbs. / 1 kg Treats up to 100 sq. ft.

Flower and Vegetable
Power Inside!

6 - 2 - 3 PLUS KELP
& HUMATES

WOW founder Ron Wallace is a professionally trained Executive Chef and graduate of the prestigious Johnson & Wales University in Providence, Rhode Island. His passion for gardening started at an early age, and since that time he has been on a mission to grow the world's largest pumpkin. He is today regarded as one of the world's premier giant pumpkin growers. He is a two-time world record holder, three-time World Champion and was the first grower in the world to grow a pumpkin over 1500 pounds (1502 in 2006) and in 2012 he was the first to eclipse the 2000-pound barrier at 2009 pounds. His passion for creating an organic soil for extreme growth has led to WOW Wallace Organic Wonder. WOW's key ingredient for dynamic growth is a fungus called Mykos Mycorrhizae, with the addition of a natural, all-organic fertilizer. This strain has been living in soils for millions of years but has only recently been made available to home gardeners. Mycorrhizal fungi colonize plant roots, maximizing nutrient and water absorption, producing stronger roots and more vigorous plants that produce abundant vegetables and brilliant flowers!

WOW SOIL AND PLANT BOOSTER

Directions: Add WOW Soil and Plant Booster every 5 weeks during the growing season.

Free scoop inside, large side=1 tablespoon, small side=1 teaspoon

♦ Always water plants after fertilizing ♦

WOW Soil and Plant Booster must make contact with the plant's root system to provide the greatest benefit to plants.

Transplants: * Recommend using WOW Super Starter Paks. Dig hole for planting twice as large as root ball. Add 2 tablespoons of Booster. Mix with surrounding soil, add plant, backfill with soil, tamp down and water.

Established Vegetable Plants: 4 weeks after planting add 3 tablespoons of WOW Booster in a circle around the plant, keeping 4" from the stem. Cultivate lightly into top few inches of soil being careful not to damage plants roots.

Established Flowers: Lightly cultivate into soil – 2 tablespoons per plant.

Amending Soil for Vegetable and Flower Gardens: Broadcast 4 pounds per 100 sq. ft. and work into the top 4" to 6" of soil.

Container Gardening

New Plants: * Recommend using WOW Super Starter Paks. Prepare soil for new plantings by adding 1 cup of WOW Booster per cubic foot of soil. (3/4 tablespoon per quart).

Established Plants: Scratch in 2 teaspoons of WOW Booster per 4" of pot diameter. Example – a standard 12" hanging basket or pot would require 6 teaspoons of Booster.

New Grass Seeding: After preparing planting area, broadcast 16 pounds of WOW Soil and Plant Booster per 1,000 sq. ft.

Bulbs: Mix 1 teaspoon of Booster under each bulb before planting.

WOW Tip: Purchase WOW Wonder Brew organic compost tea for your watering can and apply every 7-10 days for season-long sustainable fertilizing!

Let WOW Soil and Plant Booster power up your plants potential!

Guaranteed Analysis	
Total Nitrogen (N).....	6.0%
0.15% Ammoniacal Nitrogen	
5.40% Water Insoluble Nitrogen*	
0.45% Other Water Soluble Nitrogen	
Available Phosphate (P ₂ O ₅).....	2.00%
Soluble Potash (K ₂ O).....	3.00%
