Tired of Waiting for Miracle Growth? For Vegetables, Flowers, Fruits and Herbs

0.92 - 0.19 - 1.00

Easy - To - Brew Compost Tea

- Contains beneficial microbes, bacteria & fungi
- Returns microbial life to soil and coir
- Will not burn when used as directed
- Great for containers, raised beds and gardens
- Reduces salt build-up
- Safe for people, pets and the environment*

WOW founder Ron Wallace is a two-time Guinness World Records holder and three-time world champion. He is today regarded as one of the world's premier gardeners and giant pumpkin growers. WOW Wonder Brew is an all-natural plant food and soil accelerator packed with a proprietary blend of organic matter and full of soil microbes.

With beneficial microbes present, fertilizers can be fully-harnessed and delivered to plants with unmatched efficiency, creating stronger roots and vigorous plants that produce more abundant vegetables, flowers, fruits and herbs. For greatest results use Wonder Brew in conjunction with WOW Super Starter Paks and WOW Soil and Plant Booster.

WOW WONDER BREW

WOW Wonder Brew is beneficial for all plants whether "quick" brewed or for added oxygenation, brewed in a WOW Tea Brewer, other compost tea brewer or pail with air stone. At WOW we do not think of soil as "dirt," and neither should you! Healthy soil is "alive" and contains billions of microscopic organisms. Soil is the most diverse ecosystem on planet earth. Let WOW Wonder Brew re-mineralize and improve the biological life of your soil for slow-release organic fertilizing. Wonder Brew is best used fresh, but may be refrigerated and stored up to 48 hours. **Great for Vegetables, Flowers, Fruits and Herbs. Ideal for container gardening!**

DIRECTIONS

Tea Brewer: Before use, make sure your compost tea brewer is clean! Add 3 - 5 gallons of non-chlorinated warm water to a WOW Wonder Brewer, other compost tea brewer or pail with air stone. Place one nylon tea brew bag intact in water, tear open one "activator" packet and add contents to water. Turn on brewer and allow to brew for up to 48 hours. Maintaining the Wonder Brew Tea temperature between 60-70° F (16 - 21° C) throughout the brewing process is ideal. Clean brewer thoroughly after each use with antibacterial soap and rinse clean.

Quick Brew Method: Tear open one "activator" packet, add contents to 3 - 5 gallons of warm water (this helps to wake up the microbes) and stir in. Squeeze one 80-gram nylon compost tea bag several times, add to water and give it a good mix without breaking the tea bag. When Wonder Brew is well mixed, apply immediately.

Applying: Pour Wonder Brew Compost Tea full strength around the base of each plant. Follow with a thorough watering to help work the tea down into the root zone. Water plants with Wonder Brew weekly.

Application Rate:

1-3 gallon container 1-2 cups
5-7 gallon container 3-4 cups
10-20 gallon container 5-8 cups
25-50 gallon container 1/2 gallon - 1 gallon
100 gallon container 2-3 gallons
WOW Wonder Brew may be diluted. Maximum dilution - 1 gallon Wonder Brew for every 10 gallons of water.

Hydroponics & Irrigation: Use Wonder Brew 24 hours before changing reservoir. Add Wonder Brew at the rate of 1 - 2 gallons for every 10 gallons of nutrient solution. Use Wonder Brew weekly throughout the growing season.

* Safety Pledge

This product is safe for people and pets because the meal ingredients were heat treated to eliminate potential pathogens. It is safe for the environment because it contains slowly available nitrogen that is not readily water soluble, reducing potential leaching into the water table.
