D'Limonene

GUM & GREASE REMOVER

RECOMMENDED USE:

D'LIMONENE effectively removes all gum. Unlike freeze-type gum removers, it easily removes gum which has penetrated deep into carpet with no damage to fibers. Used as a dry spotter before cleaning or as a touch-up product after cleaning. Also removes decal & tape residue.

DIRECTIONS:

GUM REMOVAL: Apply a small amount of D'Limonene on gum or area to be treated. Place a cloth soaked with gum remover over gum for a few minutes to soften gum only. Peel away gum from carpet fibers with a dull knife. Remove remaining gum residue by rubbing area with cloth soaked with gum remover.

TO REMOVE SOLVENT SOLUBLE SPOTS: Wet a clean cloth with D'Limonene. Blot spot. If necessary agitate with bone scraper or dull knife. Rinse spot with D'Limonene and a dry cloth.

CAUTION:

As with all solvents, D'Limonene can cause delamination of carpets at the latex bond and cause swelling and blackening of rubber backed carpets. To minimize these problems do not allow D'Limonene to penetrate into the carpet backing (i.e use sparingly).

TECHNICAL SPECIFICATIONS:

Shelf Life:	1 Year
Acids:	None
Alkali:	None
Fragrance:	Orange
Colour:	Clear
Effective Temperature Range:	0-40 C°
Packaging:	4 L
Product Number:	430
pH:	8.0-9.0
Freeze Thaw:	0 Cycles
