## PORTFOLIO

# WELCOME TO emi

## THE LEADING BRAND IN MODERN AND INNOVATIVE MANICURE TOOLS FOR PROFESSIONALS

With over a decade of experience in the industry, EMI has become a trusted partner for nail professionals worldwide.

We are proud to offer a wide range of high-quality products, including gel and nail polishes, gels, and accessories, that have been tested and approved by professionals in the field.

We go beyond just products, aiming to offer outstanding customer service, education, and support for our clients' business success.

**Whether you are a salon owner, nail technician, or distributor, we have the resources and expertise to help you succeed.**

We invite you to explore our brand history, manufacturing principles, and collaboration options to learn more about our commitment to quality and innovation.

Join the EMI community today and take your nail art to the next level.

## THE VISIONARIES BEHIND THE BRAND

**EMI is a brand born out of passion and dedication for the beauty industry.**

Behind every successful brand, there are visionary individuals who work tirelessly to turn their dreams into reality. Our brand is no exception. In this section, we will introduce you to the co-founders who had the courage and determination to turn their passion for nail art into a thriving business.

EKATERINA  
MIROSHNICHENKO

The founder and **creative director** of EMI. With a background in nail artistry, she has created and patented various nail design techniques and products. Ekaterina is also a **renowned speaker and educator in the nail industry**.

VERA  
MIROSHNICHENKO

The co-founder and general manager of EMI. With her expertise in **business development and management**, she has played a pivotal role in transforming the brand into a thriving success.

MAXIM  
KORNETSKIY

The co-founder of EMI is responsible for overseeing **global development and strategic management**. With expertise in finance and economics, his valuable experience plays a key role in guiding brand's growth and expansion.

We are pleased to introduce you to the rich history of our brand, which spans over a decade of dedication and passion for the beauty industry.

**2003****THE FIRST NAIL ACADEMY**

Ekaterina Miroshnichenko opened her own school for nail artists and developed unique method for nail art.

**2008****INNOVATIVE TECHNOLOGY**

Technology **Golden Casting** marked a significant advancement in the nail art.

**2010****RESOUNDING BREAKTHROUGH**

Ekaterina won the **first place** at the world championship. This recognition has opened up many opportunities.

**2011****BRAND PRESENTATION AND INNOVATIVE PRODUCT SHOWCASE**

Ekaterina and team introduced **Gel Paints**, an innovative product to fill a gap in the market, at an expo where the brand was represented for the first time.

**2012****RECOGNITION IN EUROPE**

EMI opened its international office in the Czech Republic.

**2013****RECOGNITION IN ASIA**

EMI opened its first representative office in Asia, in South Korea.

**INNOVATION IN NAIL DESIGN**

The brand introduces a groundbreaking nail design product that quickly conquers the market — **Empasta**.

**2015****GEL AND GEL POLISH SYSTEM**

The brand designed its own three-phase gel polish system **E.MiLac** that instantly won the hearts of consumers, along with a **line of nail modeling products** optimized specifically for beauty salons.

**2016****OWN NAIL POLISH SYSTEM**

The launch of **Ultra Strong Nail Polish Gel Effect** with a unique long-lasting shine system marked the company's first foray into lamp-free products.

**2017****VOLUMINOUS NAIL DESIGN**

**Genty Gel**, innovative decorative gel without any residual stickiness, was introduced for nail design.

**2018****NOVELTY IN NAIL RECOVERY**

**Nail Polymer Booster**, a game-changing product, was expertly formulated with advanced ingredients that help restore damaged nails and promote healthy growth.

**2019****TIME-SAVING INNOVATION**

**Twinnny's** launch wowed the industry. It combines stunning color with a unique gel sculpture formula that saves up to 40 min of manicure procedure.

**2020****REBRANDING**

The company's rebranding effort, which included logo renewal, repositioning, and a new promotion strategy, marked a new stage in its development.

**2021****SUSTAINABLE PACKAGING AND PRODUCTION SAFETY**

Company obtains certificates, repacks using recycled materials to follow trends and protect nature.

**2022****EMI ENTERED RETAIL SALES**

With its **Salon Effect** line, the company successfully entered major European platforms, gaining instant recognition and positive feedback.

**2023****THE NEW BRAND WAS BORN**

The subsidiary brand **ME** was created.

## PRESENT-DAY PROGRESS AND FUTURE ASPIRATIONS

Today, EMI is a global brand with a presence in more than 30 countries.

Our passion for beauty, dedication to quality products, and commitment to innovation are the driving forces behind our continued success.

**GLOBAL REACH**

over 110 representative offices worldwide,  
over 40,000 beauty salons around the world

**CREATIVE AND INNOVATIVE CULTURE**

culture of creativity and innovation within our  
company allows us to constantly develop new  
and exciting products

**QUALITY PRODUCTS**

only the best raw materials from top suppliers in  
Europe, South Korea, and the USA

**FASHION WEEK PRESENCE**

participation in Fashion Weeks in London,  
Seoul, and Paris, showcasing our latest nail  
designs and trends

**COMPLETE BUSINESS SOLUTIONS**

comprehensive business solutions for beauty  
studios, helping them to maximize their potential  
and succeed in the competitive beauty industry

**CELEBRITY TRAINING**

special training programs for nail technicians  
from EMI, including training for nail services for  
celebrities who demand the best in nail care

**OUR MISSION**

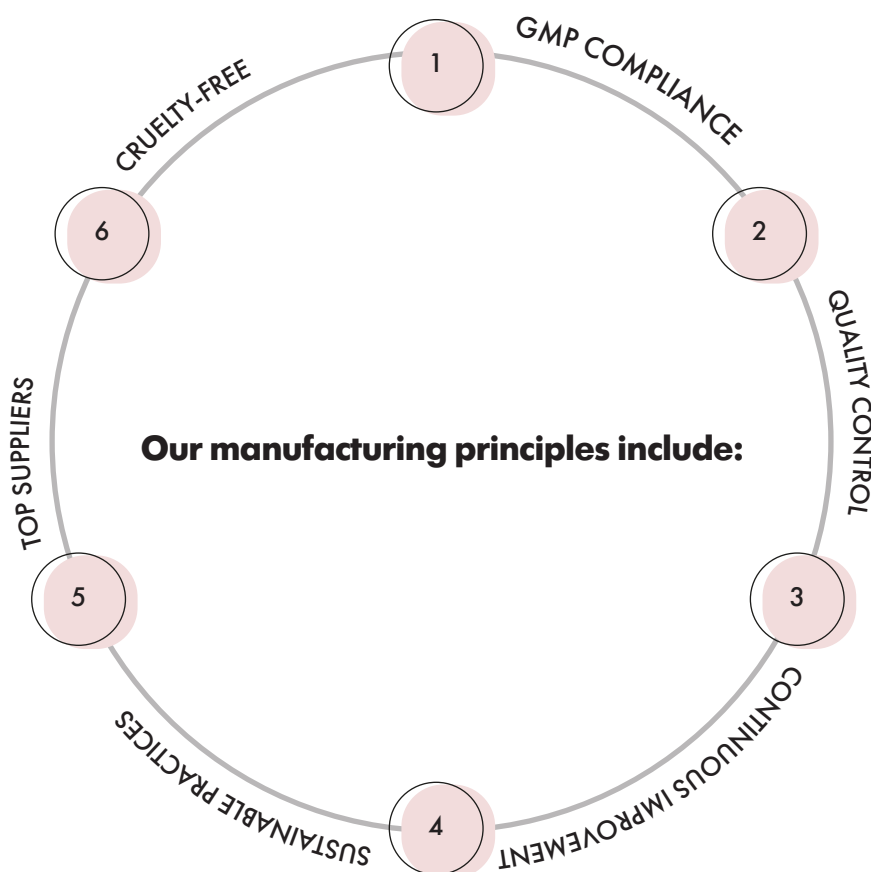

provides nail professionals with the  
modern and proven manicure and  
pedicure tools they need to create  
unique styles for their clients.

**OUR ASPIRATIONS**

include expanding our global reach,  
innovating new products, investing in  
sustainability, strengthening partner-  
ships, and supporting our community.

## We are highly mindful of our manufacturing processes.

We believe that using the highest-quality raw materials and following strict manufacturing principles are essential to creating the best possible nail care products.

1. Our manufacturing facilities are GMP-compliant, which means that they follow strict guidelines for cleanliness and safety.
2. We have strict quality control measures in place at every stage of the manufacturing process. This ensures that our products are consistent in quality and meet **our high standards**.
3. We are always looking for ways to improve our manufacturing processes and products.

4. We are committed to minimizing our impact on the environment and using sustainable practices. This entails using recyclable packaging materials and reducing waste in our manufacturing processes.
5. We work closely with top suppliers of raw materials to ensure that our products are of the highest quality.
6. We believe in the ethical treatment of animals and do not test our products on animals. Our commitment to cruelty-free practices extends throughout our entire supply chain.

## COLLABORATION OPTIONS

EMI brand is committed to providing exceptional beauty products and services to our customers. We welcome collaboration opportunities with businesses and individuals seeking to enhance their beauty offerings.

**BEAUTY SALON B2B**

Our products are created by professionals for professionals. We offer a wide range of materials and accessories for nail service masters, and release a new collection every season.

**PROFESSIONAL RETAIL**

EMI Brand products are available for purchase at several retail locations, including Eurokos in Lithuania, Tradehouse in Estonia, and K-Citymarket in Finland.

**ONLINE & OFFLINE TRAINING PROGRAMS**

EMI Brand's Nail Academy offers author's programs and professional manicure and pedicure courses. Our training programs are available both online and offline to accommodate diverse learning styles.

**HOME USE**

Experience the salon effect at home with EMI Brand's high-quality products. Our products create a comfortable and cozy atmosphere for an indulgent and relaxing beauty routine.

**ART PARTNER**

EMI offers an Art Partner option for individuals interested in teaching their own nail courses. With a license to organize EMI's original courses and teach EMI's methods, Art Partners can start earning income right away.

Welcome to the world of professional nail care with EMI's range of products that are designed to cater to all your manicure needs.

## Get familiar with the legend that categorizes our products:

-  NAIL POLISH SYSTEM (GRAY),
-  GEL POLISH SYSTEM (PINK),
-  GEL SYSTEM (BLACK),
-  STEP-BY-STEP PROCEDURE (BEIGE).

This simplifies understanding of which products belong to which system and their appropriate usage.

1. At the beginning of each chapter on the mentioned systems, an overview of the procedure is provided, along with the necessary products or product categories.
2. Each product is thoroughly described, including instructions on how to use it. **Beneath the product image in the table, key information** is summarized for quick comprehension.
3. The book's **composition is designed specifically for easy and quick navigation through the material**, allowing readers to **easily find the desired product by quickly flipping through the pages** without having to read the entire book.
4. Following the comprehensive product categories (e.g., base gels, top gels, gels), there are **comparative summary tables** that describe the products, providing a holistic understanding of their differences and characteristics.
5. **At the end of the chapters on each system**, the application methods of the products are **summarized**, taking into account the time required and the chronological sequence of the steps.

All our products are designed to meet specific requirements of our partners, ensuring the best results every time.

---

**We hope that you will enjoy using our products as much as we enjoy creating them for you.**

Preparation is key to a successful manicure, and having the right materials can make all the difference. From cleansing sprays to nail primers, **the proper preparation materials can help ensure that nails are clean, healthy, and ready** for a beautiful, long-lasting finish. Invest in quality preparation materials to elevate your manicure game and leave your clients feeling pampered and satisfied.

## STEP-BY-STEP GUIDE ON HOW TO PREPARE A CLIENT'S NAILS AND HANDS BEFORE A MANICURE

1

DISINFECTION

CLEANSING SPRAY

Disinfect the client's nails and the skin around the nails.  
Prevent the growth of bacteria and fungus with Cleansing Spray.

2

DEGREASING

EUROCLEANSER

Remove any remaining oil or residue from the nails and skin.  
This will help to improve the adhesion of the nail products.

3

DEHYDRATING

NAIL PREP AID

Dehydrate the nail surface and improve the adhesion of the products.

4

PRIMER

ULTRABOND

Provide a strong bond between the natural nail and the nail products, ensuring long-lasting wear.

5

REMOVER

GEL AND NAIL POLISH REMOVER

Gently remove nail or gel polish from natural nails.

Nail Polish System

Gel Polish System

Gel System

**Cleansing Spray** is a cosmetic product designed to **effectively clean** and prepare the nail plate before applying any nail enhancement products. The spray is formulated with a special blend of ingredients that effectively remove oils, dirt, and other impurities from the nails and surrounding skin, ensuring a clean and sanitized surface for optimal product adhesion.

The **gentle yet powerful formula** of the cleansing spray also helps to prevent the spread of bacteria, promoting healthier nails and cuticles. The convenient spray format allows for easy application, making it an essential tool for any nail technician or at-home manicurist.

- Prevents the bacteria growth and provides the reliably protection of the skin of hands and feet
- With a prolonged bactericidal effect
- **100% cleanliness.** Removes dirt, oil, and moisture from the nail plate
- Economical packaging. The nozzle with a spray allows dosing and provides **even application of product on the skin**
- It does not irritate the skin and **does not require rinsing**

#### HOW TO USE

1. For hygienic treatment of the skin of hands and feet, apply the product in one press and rub the spray into the skin for 20 sec.
2. It should be applied to both the client and the nail technician before the procedure.

**Eurocleanser** is a professional degreaser and cleanser used in nail care services. It helps to effectively remove oils, dust, and other impurities from the nail plate and surrounding skin, leaving it clean and ready for further treatment. Eurocleanser is also suitable for use in the preparation of natural nails for gel or acrylic nail extensions, as it helps to improve adhesion and prevent lifting. It is easy to use and does not require rinsing. The mild formula ensures that it does not dry out or damage the skin or nails.

- 1 product for 2 issues. It is a **degreaser** for the nail plate and a product for **removing the sticky layer**
- It does not irritate the skin and **does not require rinsing**

#### HOW TO USE

1. Cleanse the hands with the **Cleansing Spray** as was described above.
2. File and shape nail plates. Then soak a lint-free pad in **Eurocleanser** and degrease the clean nail surface. It is also used to remove the sticky layer from the nail plate.

Gel System

**Nail Prep Aid** is a specially designed product for preparing the nail plate before applying any nail product. It effectively removes excess oil and moisture from the nail surface, creating a better adhesion surface for the base coat, gel polish, or any other nail enhancement product. This product helps to improve the longevity of the manicure and prevents chipping, lifting, and peeling. It is easy to apply, dries quickly, and is suitable for use on natural nails, acrylics, or gels. **Nail Prep Aid is an essential step in any nail service** and ensures that the nails stay flawless for longer.

- Allows for the final **removal of excess moisture and natural oils** to ensure a strong bond with the surface of the nail plate
- Penetrates **only into the upper layers** of the nail plate, preserves the natural structure and thickness, and does not contribute to increased brittleness
- Due to its liquid consistency, it applies easily and has **economical usage**

## HOW TO USE

1. Cleanse the hands with the **Cleansing Spray**.
2. Prepare the nail plate: file, shape, and degrease with **Eurocleanser**.
3. Apply **Nail Prep Aid** to dehydrate the nail plate for gel polish on the entire nail surface. Air dry for 30 sec.

**Ultrabond** is used to promote the adhesion of the base coat to the nail plate. Ultrabond is a clear, liquid solution that penetrates the nail plate without causing any damage to the natural nail. Its fast-drying formula ensures that the base coat adheres firmly to the nail plate, preventing chipping or lifting of the nail polish. **Ultrabond is an essential product for achieving long-lasting** and flawless manicures.

- Ideal base coat primer for stronger adhesion
- **Methacrylic acid-free** for gentle nail plate and cuticle treatment
- Almost odorless
- Due to its liquid consistency, it applies easily and has **economical usage**

## HOW TO USE

1. Cleanse the hands with the **Cleansing Spray**.
2. Prepare the nail plate: file, shape, and degrease with **Eurocleanser**.
3. Apply **Nail Prep Aid** to dehydrate the nail plate for gel polish on the entire nail surface.
4. Apply **Ultrabond** to the free edge and cuticle area for base coat adhesion. Air dry for 30 sec.

Nail Polish System

Gel Polish System

Gel System

**Gel and Nail Polish Remover** is a product designed to quickly and easily remove gel and nail polish from nails. It has a gentle formula that does not dry out or damage the natural nail plate. This remover effectively dissolves and removes even the most stubborn gel and nail polish coatings, leaving nails clean and ready for a new manicure. It comes in a convenient bottle with a dispenser pump for easy and mess-free application.

- Gently removes the coating without damaging natural nails
- Softens E.MiLac without filing the top layer
- Has a non-corrosive, **pleasant scent**

#### HOW TO USE

1. Before softening, it is recommended to remove the shine and color with a file. Leave a gap of 1-2 mm around the cuticle area — this will help avoid injury to the natural nail.
2. Soak cotton pads in **Gel and Nail Polish Remover** and apply to nails.
3. Wrap the cotton pads in food foil. Leave on for 10-15 min.
4. Remove the application from one nail and try to remove the gel polish with a wooden stick. If it does not come off in some areas, apply the application again.

## WELCOME TO THE NAIL POLISH SYSTEM

This system is designed to provide a long-lasting and beautiful finish for the natural nails. The system consists of three phases, each with its own specific purpose.

- The first phase, **adhesion**, ensures strong adherence to the natural nail.
- The second phase, **color**, offers a wide variety of shades to suit any style or mood.
- The final phase is **protection**, which includes applying a top coat to prevent chipping and prolong the durability and appearance of the manicure.

The Nail Polish System provides durable and attractive manicures for both: professionals and home use, making it a great retail product.

ADHESION

**Ultra Strong Base Coat** is a patented product designed for weak and damaged natural nails. It contains innovative Pro-UV technology that strengthens and improves the nail structure while preventing chipping and providing a reliable foundation for polish. It also provides comprehensive nail care and protection against pigments, making it suitable as a protective base or as a standalone coating. Strengthening and modeling properties

- Contains innovative Pro-UV technology that allows for stable coating
- Strengthens and improves the nail structure
- Protects nails from pigments
- Prevents cracks and chips
- Can be used alone or as a protective base coat under color

Choose from a wide range of trendy shades to suit any occasion or mood.

BASIC COLLECTION

COLOR FOR DESIGN

**Nail Polishes for Stamping** are special nail polishes for stamping design. Compared to Ultra Strong Gel Effect Polishes, Nail Polishes for Stamping have a **more pigmented formula**, rich and dense color to create an even and contrasting pattern on any surface.

These polishes are specifically formulated to ensure that every design comes out flawless and vibrant. They are easy to apply, and the highly pigmented formula ensures that the design stands out on any base coat color.

**Whether you're a professional nail artist or a DIY enthusiast, Nail Polishes for Stamping are a must-have in your nail art collection.**

NAIL POLISHES FOR STAMPING

HOW TO USE

1. Apply a **chosen base gel** from Gel Polish System to the prepared nail plate and cure for 2 min in any lamp.
2. Apply the **E.MiLac color** coating without removing the dispersion layer and cure for 2 min in any lamp. This creates the basis for the stamping design.
3. Select the desired pattern on the **Stamping Plate** to create the stamping design.
4. Cover the pattern on the plate with one or more strokes of **Nail Polishes for Stamping**.
5. Use a **scraper** to erase excess polish, swiping from top to bottom with a push.
6. Make an imprint with a stamp along the pattern using a rolling movement from left to right. Ensure that the pattern is imprinted on the stamp for stamping.
7. If the transfer fails, use a lint-free wipe and **Gel and Nail Polish Remover** to wipe the design from the stamp, and then wipe the pattern on the plate with the same napkin.
8. When you successfully transfer a clear pattern to the stamp, transfer the pattern from the stamp to the nail plate with a rolling motion. Air dry for 1 min.
9. Apply a **top gel** from Gel Polish System and cure for 2 min in any lamp.

PROTECTION

**Ultra Strong Top Coat** is a top coat for nail polish manicures that provides a glossy finish and extends the life of the manicure. It has a high resistance to chips, scratches, and fading, making it ideal for long-lasting and durable.

Ultra Strong Top Coat features a **unique Pro-UV technology** that ensures the coating is fully cured in natural light, creating a strong and stable finish that lasts for **up to two weeks**.

- Contains a UV filter that protects the color of the nail polish from fading or yellowing due to sunlight exposure
- Self-leveling formula that ensures an even and smooth application, without leaving any streaks or bubbles
- Easy to apply and dries quickly, making it a great choice for both professional nail technicians and at-home users
- Special brush provides easy and precise application, allowing for a flawless and professional-looking finish

HOW TO USE

1. Apply **Ultra Strong Top Coat** on the dried color layer and let it air dry for 3-5 min.

ULTRA STRONG TOP COAT

SERVICED CLIENTS PER VOLUME	18

**Ultra Strong Matt Top Coat** is an ultra-lasting matt fixating nail coating. It instantly **transforms a glossy surface into a velvety matte finish**.

Its microparticles neutralize any gloss while creating an efficient anti-chipping protective film that prevents color from fading away. With a liquid formula, it's easy to apply and dries instantly without the need for curing. It's perfect for those who want to keep their nails healthy and looking great for **up to two weeks**.

- Soft touch effect
- Self-leveling formula that ensures an even and smooth application, without leaving any streaks or bubbles
- Easy to apply and dries quickly, making it a great choice for both professional nail technicians and at-home users
- Prevents color from fading away
- Fast drying — speeds up the work, reduces the cost of a treatment

## ULTRA STRONG NAIL POLISH MANICURE IN BEAUTY SALON AND AT HOME

1. Prepare the nail plate.

2. Applying a base coat in the Nail Polish System is optional, but we recommend it to prolong the lasting of the manicure and to strengthen the nail plates.

3. Apply a coat of **Ultra Strong Nail Polish Gel Effect** over the dried layer. Allow it to air dry for 5-7 min. Repeat the step if necessary.

4. Apply a top coat and allow it to air dry for 3-5 min.

## WELCOME TO THE GEL POLISH SYSTEM,

where you will learn about the professional approach to achieving a perfect, long-lasting gel polish manicure.

The Gel Polish System for better understanding can be divided into a three-phase process that includes adhesion, modeling, and protection.

- 1 The first phase, **adhesion**, is the foundation of gel polish. It ensures long-lasting manicure.
- 2 Phase two, **modeling**, shapes, aligns, and strengthens the nails. The Gel Polish System can lengthen nails by up to 2 mm.
- 3 The final phase, **protection**, applying a top gel to prevent chips, prolong the look of the manicure, and create special effects like matte or shiny finish with EMI's range of top gels.

The Gel Polish System is a reliable way to achieve a professional-grade, durable gel polish manicure that can keep your nails looking stunning for weeks on end.

## THE RECOMMENDED METHOD TO WORK WITH THE GEL POLISH SYSTEM

1

### DISINFECTION

Using the Cleansing Spray, sanitize the client's nails and the skin, as well as the hands of the nail technician.

2

### UV PROTECTION & DEGREASING

UV protection is an important aspect to consider during a gel polish manicure. Protect the client skin from harmful UV radiation emitted from the lamp during the curing process with UV-Block Cream. Then eliminate any leftover oil or residue from the nails using Eurocleanser.

3

### DEHYDRATING & PRIMER

Enhance adhesion of nail products by dehydrating the nail surface using Nail Prep Aid, followed by strengthening the bond between natural nails and the products with Ultrabond. Air dry for 20 seconds.

4

### ADHESION & MODELING

A good and reliable base gel is key to achieving a long-lasting manicure. Colored base gels often have weaker adhesion due to the pigment in the formula. To address this, we recommend using E.MiLac Base Gel as an additional step in the process.

5

### COLOR

It's time to add some grace to the nails! Choose from a wide palette of E.MiLac gel polishes shades and don't forget about decorations!

6

### PROTECTION

Seal the masterpiece with a top gel to protect it from wear and tear. This step can also add an interesting touch to the manicure by using a top gel with sparkles or flakes.

ADHESION

**E.MiLac Base Gel** is a high-quality gel-based product that is an essential for creating long-lasting, professional-looking gel manicures. It provides a smooth surface for gel polish application and adheres to the natural nail plate, creating a strong foundation for gel polish. Chipping, peeling, and other damage to the nails are prevented with the help of E.MiLac Base Gel. With proper use and care, the gel manicure can last **up to four weeks**.

- Strengthening and modeling properties
- Reliable protection against color coating dye penetration
- Can be easily removed with **E.Mi Gel Polish Remover** in 10-15 min without the need for additional filing
- Applies evenly in a thin layer without spreading or pooling at the cuticle

E.MILAC BASE GEL

COLOR	transparent			
SOAK-OFF	YES			
CONSUMPTION PER CLIENT	0.2 ml			
VOLUME	9 ml	15 ml	30 ml	100 ml
SERVICED CLIENTS PER VOLUME	45	75	150	500

- Strengthening     Modeling     Extension

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. We recommend turning the finger over and waiting **3 sec** for the material to self-level. Cure for 2 min in any lamp. 
4. Perform a color/decoration layer. Cure for 2 min in any lamp. Apply any chosen top gel. Cure for 2 min in any lamp.

**A helpful life hack:** to achieve better adhesion, apply a thin layer of E.MiLac Base Gel before applying modeling base gels. It's useful to note that colored base gels or coats with additional properties may have weaker adhesion due to the added components in their formulas. Therefore, we highly recommend using **E.MiLac Base Gel** to compensate for this fact and ensure a long-lasting manicure.

## ADHESION

**E.MiLac Base Gel for Pedicure** is a specialized gel designed for use on toenails. It serves as a foundational layer for creating a long-lasting pedicure. This base gel has strong adhesion properties, preventing chipping or peeling of the pedicure. It also has a self-leveling formula, allowing for easy application and an even finish.

E.MiLac Base Gel for Pedicure is an easily removable, liquid and elastic. It quickly evens out the nail plate without sinking and allows for the natural movement of the nail plate, all while enhancing an adhesive bonding with gel polish.

- Contains tolnaftate that produces an antifungal effect and is used for treatment and prevention of fungus diseases in nails
- Antiseptic properties
- Liquid and elastic
- Equally perfect for strong, weak, soft and thin nails

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel for Pedicure**. Cure for 2 min in any lamp.
4. Perform a color/decoration layer. Cure for 2 min in any lamp.
5. Apply any chosen top gel. Cure for 2 min in any lamp.

ADHESION, HEMA FREE

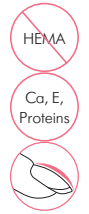

**E.MiLac Base Gel HEMA FREE** is a specially formulated gel polish base gel for individuals who are sensitive or allergic to HEMA (2-Hydroxyethyl methacrylate). It is free from HEMA, a common ingredient found in many nail products that can cause allergic reactions. This HEMA-free base gel provides a smooth, even surface for gel polish application while minimizing the risk of allergic reactions. E.MiLac Base Gel HEMA FREE also provides a strong foundation for gel nail polish and helps to prevent chipping, peeling, and other damage to the nails. With proper use and care, the gel manicure can last **up to four weeks**.

- HEMA-free, making it safe for both clients and nail artists
- Contains vitamins (Calcium, E) and proteins for added nail health benefits
- The rubberized structure makes it easier to level the nail plate
- Does not cause a burning sensation under a lamp
- Suitable for use on strong, weak, fragile, soft, and thin nails alike

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel HEMA FREE**. We recommend turning the finger over and waiting **3 sec** for the material to self-level. Cure for 2 min in any lamp.
4. Perform a color/decoration layer. Cure for 2 min in any lamp. Apply any chosen top gel. Cure for 2 min in any lamp.

- Strengthening     Modeling     Extension

**E.MiLac Hard Base Gel HEMA FREE** is a high-quality, durable base gel for gel manicures that is free from HEMA (2-Hydroxyethyl methacrylate). This makes it a safer and healthier option for individuals who may have sensitivities or allergic reactions to HEMA. It has a thick consistency that helps to fill in ridges and smooth out the surface of the nail for an even application of gel polish. It contains keratin, which makes it ideal for weak nails. With proper use and care, the gel manicure can last **up to four weeks**.

- HEMA-free, making it safe for both clients and nail artists
- Contains keratin and proteins for extra protection for weak or brittle nails
- The rubberized structure makes it easier to level the nail plate
- Does not cause a burning sensation under a lamp

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.

ADHESION, HEMA FREE

**E.MiLac Kera Base Gel** is a base gel with keratin. HEMA FREE product, so it does not contain ingredients that cause a severe allergic reaction. Hydrolyzed keratin prevents damage to the nail plate, and helps the regeneration of natural nails. Keratin provides a stronger adhesion of the base coat to the nail plate. Excellent for all types of nails. Perfect for damaged and soft nails. The rigid crystal lattice forms a framework that does not allow natural nails to bend and break, but also does not tighten or thicken them. With proper use and care, the gel manicure can last **up to four weeks**.

- HEMA-free, making it safe for both clients and nail artists
- Hydrolyzed keratin strengthens and regenerates the natural nail plate
- Rigid crystal lattice does not allow natural nails to bend and break
- Crystal clear base masks the unevenness of the nail plate, gives the natural nail a healthy look
- Suitable for use on strong, weak, fragile, soft, and thin nails alike

MODELING

**E.MiLac Hard Base Gel** is a rigid base gel for modeling and preparation the nail plate before applying the color layer. It is perfect for those who have weak or brittle nails, as it provides an additional layer of protection for the natural nail. It has a thick consistency that helps to fill in ridges and smooth out the surface of the nail for an even application of gel polish.

It shall be applied **solely in a modeling layer**; this base gel is recommended for use on performing a dry and hardware manicure. With proper use and care, the gel manicure can last **up to four weeks**.

- Durable and long-lasting
- Provides extra protection for weak or brittle nails
- Perfect for nail modeling, strengthening, repair and further extension
- Glassy coating effect
- Strongly holds the structural frame

**E.MiLac One Step** is a single-phase gel polish specifically designed for pedicure. These gel polishes come in trendy shades that provide rich and long-lasting coverage without the need for a base and top coat. The thin coating does not create excess thickness, reducing the risk of onycholysis and is specially designed to not weigh down the nail plate or create excess volume.

- **Single-phase** gel polishes designed specifically for pedicure
- **No need for a base or top coat, saving time and cost**
- Thin coating that doesn't create excess thickness
- Designed to not weigh down the nail plate or create excess volume
- Reduces the time needed for pedicure procedure

**E.MILAC ONE STEP FOR PEDICURE**

SUITABLE FOR	all nail types

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of E.MiLac for pedicure gel polish on the nail plate and cure for 1 min. For better adhesion to the nail, we recommend making the first layer thin. Apply a second layer and cure for another 2 min in any lamp.

PROTECTION

**E.MiLac Top Gel** is a high-quality top gel that provides a durable, high-gloss finish to gel polish manicures, making it a popular choice among nail professionals. It is formulated with a special polymer that gives it a high level of adhesion and durability, ensuring that the manicure lasts for **up to four weeks** without chipping and peeling. The top gel also has a self-leveling formula that helps to smooth out any imperfections, creating a flawless, glossy finish.

- Glossy finish
- Versatile
- Guards against scratches and chipping
- Protects the color from fading
- Thin consistency makes it easy to apply in a single, smooth layer

HOW TO USE

Apply **E.MiLac Top Gel** as a top coat. Cure for 2 min in any lamp.  
Use Eurocleanser to remove a sticky layer.

PROTECTION

**E.MiLac Top Gel Tackless** is a no-wipe top gel that provides a strong, long-lasting bond to the nail plate. Unlike traditional top gels, it does not require wiping the sticky residue after curing, saving time and effort during the manicure process. It is formulated with high-quality ingredients, including a UV filter that protects the color of the gel polish from fading and yellowing.

- High-gloss finish
- Enhances the color of the gel polish and adds depth to nail designs
- Resistant to chipping and peeling
- Protects the color of the gel polish from fading and yellowing
- Medium-thick consistency make it easy to work
- Ideal for decorating with Princot, Textone, Glossemi, and pigments

PROTECTION

**E.MiLac Ultra Shine Top Gel** is a high-gloss top coat designed to provide an ultra-shiny, mirror-like finish to gel polish manicures. It is formulated with high-quality ingredients that enhance the color of the gel polish while adding depth and dimension to nail designs. It creates a **glass-like texture** on top of the nail that offers long-lasting protection to the gel polish against wear and tear, including scratches and chipping, for up to four weeks. This top gel is an excellent choice for creating a high-gloss finish on any gel polish manicure.

- Super glossy finish
- Extra strong
- **Glass-like texture** protects against wear and tear, including scratches and chipping
- **It is not suitable for weak, soft nails**

**E.MILAC ULTRA SHINE TOP GEL**

PROTECTION

**E.MiLac Velvet Top Gel** is a no-wipe top gel that creates a unique matte finish. This top gel provides a velvet effect that is perfect for creating trendy and stylish nail designs. The product is designed to be used as a final layer on top of gel polish. It creates a velvet texture that is soft and comfortable to the touch. It also has a protective effect, helping to prevent scratches and chips to the underlying gel polish. It can be used to create a variety of nail designs, from classic French manicures to more creative and intricate nail art.

- Noble matte effect
- Perfect for all shades, whether dark or light
- Provides protection against chipping and peeling
- Medium-thick consistency make it easy to work

PROTECTION + EFFECT

**E.MiLac Dramatic Top Gel** is a glossy top gel containing small flakes of imitation gold leaf. Multifaceted particles create a disco ball effect, revealing pink, blue, green, and golden hues under different lighting angles. Depending on the color of the base coat or gel polish, the top gel shimmers with different gradients, creating either a playful daytime look or a daring evening manicure design.

- Multifaceted particles of **imitation gold leaf** create a stunning disco ball effect, **shimmering in a range of colors under various lighting angles**
- Universal look: it appears light and playful on **light shades**, and shimmers brightly on **dark shades**, creating a daring gradient shine
- Medium viscosity top coat self-levels well and does not run
- Small particles are easily distributed over the surface

**E.MILAC DRAMATIC TOP GEL**

PROTECTION + EFFECT

E.MiLac Silver Drop Top Gel is a no-wipe glossy top coat with medium-sized matte silver flakes. Its transparent base with a scattering of silver color exudes sophistication and elegance. The evenly distributed medium-sized foil pieces contrast with the dark shades of the basis and emphasize the lightness of light tones, making it perfect for any shade. E.MiLac Silver Drop Top Gel elevates a manicure into an exquisite work of art.

- The manicure becomes a work of art: with **light silver particles** adding perfect final touches like an artist
- Perfect for any shade, whether used for a monochromatic manicure or complementing a decorated one
- Medium viscosity top coat self-levels well and does not run

PROTECTION + EFFECT

**E.MiLac Artefact Top Gel** is a glossy finish with a scattering of fine shimmer. The finest graininess of particles allows to emphasize the elegance of the look. Artefact Top Gel helps to reveal a new dimension of familiar shades. The top gel showcases alluring gradients that transition elegantly, tailored to the color of the base coat or gel polish. This exquisite feature effortlessly creates refined and sophisticated manicure designs, ranging from vibrant and playful daytime elegance to bold and daring styles fit for evening occasions.

- A valuable addition to a nail artist's portfolio for quick creation of elegant manicures
- Multifaceted: a diverse range of shades blended with shimmer, creating enchanting iridescence for both solid manicures and used decorative elements
- Medium viscosity top coat self-levels well and does not run
- Small particles are easily distributed over the surface

**E.MILAC ARTEFACT TOP GEL**

Apply **E.MiLac Artefact Top Gel** as a top coat. Cure for 2 min in any lamp.

PROTECTION + EFFECT

**E.MiLac Scandium Top Gel** is a glossy top coat with cold silver shimmer. Tiny particles of silver lie beautifully on the surface without creating empty areas and without needing to be leveled. The effect of velvet radiance is created by a light reflective effect. For a brighter and more radiant effect, the shimmer inside has a slight reflective effect. Adds lightness and grace to light shades, dark ones, in turn shading and highlighting. E.MiLac Scandium Top Gel is resistant to external pollution and mechanical stress.

- Top gel with cold silver shimmer
- Particles of shimmer have a slight reflective effect
- Medium viscosity top coat self-levels well and does not run
- Small particles are easily distributed over the surface

HOW TO USE

Apply **E.MiLac Scandium Top Gel** as a top coat. Cure for 2 min in any lamp.

FOR DESIGN PURPOSES

**E.MiLac Slider Top Gel** is a special top coat designed for fixing sliders. It has a sticky layer that securely seals the decorative elements onto the nail plate. It is recommended for attaching and covering the slider before the final coating. This is not a finishing coat for a gel polish manicure, but rather a special top coat (similar to “glue”) for stickers. It is universal and suitable for all types of sliders, and it works perfectly with Naildress and Nailcrust slider stencils. In addition to providing strong fixation, it also offers reliable protection for the unique slider design, helping to prevent cracks and abrasions.

**E.MILAC SLIDER TOP GEL**

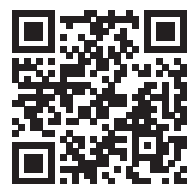

STICKY LAYER	YES		
VISCOSITY	MEDIUM		
EFFECT	for applying stickers		
SOAK-OFF	YES		
CONSUMPTION PER CLIENT	0.2 ml		
VOLUME	9 ml	15 ml	30 ml
SERVICED CLIENTS PER VOLUME	45	75	150

- A special top coat designed for fixing sliders
- Suitable for all types of sliders. Perfectly complements **Naildress and Nailcrust** slider stencils
- Securely seals the slider onto the nail plate
- **This is not a protective top coat! Any top gel from the E.MiLac Gel Polish or Gel System needs to be applied on top**

HOW TO USE

1. After applying and curing the color layer, apply **E.MiLac Slider Top Gel**. Cure for 2 min in any lamp.
2. Then apply the sticker according to the instruction.
3. Apply **E.MiLac Slider Top Gel** again. Cure for 2 min in any lamp.
4. Apply any top gel from the E.MiLac Gel Polish or Gel System. Cure for 2 min in any lamp.

### Advantages of working with a gel polish system:

- Quick and efficient application process
- Wide range of colors and finishes available
- Soft, highly elastic material, which is perfect for strengthening short and medium-length nails
- Can be removed by filing or soaking
- Can be used for prosthetics of damaged nails

## WELCOME TO THE WORLD OF GEL SYSTEM

This revolutionary system provides a long-lasting and durable manicure that lasts up to several weeks. The Gel System consists of three essential phases: adhesion, modeling, and protection.

- The first phase, **adhesion**, is the foundation of gel covering. It ensures long-lasting manicure.
- Phase two, **modeling**, shapes, aligns, and length the nails.
- The final phase, **protection**, applying a top gel to prevent chips, prolong the look of the manicure, and create special effects like matte or shiny finish with EMI's range of top gels.

The Gel System offers the functional solution for achieving durable and beautiful manicures, providing strong adhesion, ideal shaping, and ultimate protection for stunning nails that last.

## THE RECOMMENDED METHOD TO WORK WITH THE GEL SYSTEM

1

### DISINFECTION

Using the Cleansing Spray, sanitize the client's nails and the skin, as well as the hands of the nail technician.

2

### UV PROTECTION & DEGREASING

UV protection is an important aspect to consider during a gel manicure. Protect the client skin from harmful UV radiation emitted from the lamp during the curing process with UV-Block Cream. Then eliminate any leftover oil or residue from the nails using Eurocleanser.

3

### DEHYDRATING & PRIMER

Enhance adhesion of nail products by dehydrating the nail surface using Nail Prep Aid, followed by strengthening the bond between natural nails and the products with Ultrabond. Air dry for 20 seconds.

4

### ADHESION

A good and reliable base gel is key to achieving a long-lasting manicure. The EMI range includes a specially designed adhesion product for the Gel System called Super Bond Gel.

5

### MODELING, EXTENSION

This stage involves applying a gel product onto the nails to create extensions, if desired, or to strengthen and reshape the natural nails.

6

### COLOR

It's time to add some grace to the nails! Choose from a wide palette of Gel Paints or E.MiLac gel polishes shades and don't forget about decorations!

7

### PROTECTION

Seal the masterpiece with a top gel to protect it from wear and tear. This step can also add an interesting touch to the manicure by using a top gel with sparkles or flakes.

ADHESION

**Super Bond Gel** is a high-quality, professional-grade product that helps create a strong and long-lasting bond between the natural nail plate and artificial materials, such as tips or sculpting forms. This clear, self-leveling gel is easy to apply and cures quickly under UV/LED lamps. The enhanced adhesive formula of Super Bond Gel provides excellent adhesion properties, preventing lifting and chipping, and ensuring that the nail enhancements stay firmly in place for weeks. **It is a must-have product** for any nail technician looking to create beautiful and durable nail extensions.

- **New formula with high adhesion** and optimal consistency
- Applies smoothly as a thin coating, allowing for a natural and seamless appearance
- Quick polymerization — saving time during the manicure process
- Non-running formula for precise application, no smudging

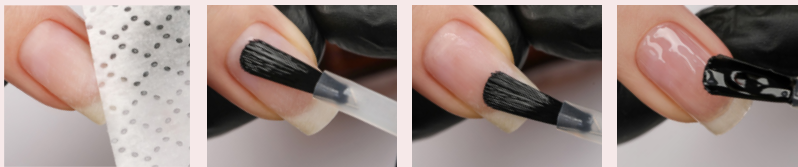

SUPER BOND GEL

SUITABLE FOR	normal and dry nails
ADHESION	HIGH
VISCOSITY	LOW
SELF-LEVELING	YES
COLOR	transparent
SOAK-OFF	NO
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **Super Bond Gel**. Cure in LED and LED/CCFL for 30 sec, or in UV and CCFL lamps – 1 min.

4. Use the products from the gel system to provide strengthening, modeling, or nail extension as needed.
5. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.
6. Apply any chosen top gel. Cure for 2 min in any lamp.

ADHESION + MODELING

**Easy One Gel** is a revolutionary product that makes the nail extension process quick and easy. It is a **one-phase gel** that doesn't require a base or top coat, saving time and effort. The Easy One Gel is self-leveling, making it perfect for both novice and professional nail artists. It has an optimal viscosity, providing a smooth and even coverage that eliminates the need for multiple layers. The gel is odorless and doesn't cause a burning sensation, making it safe and comfortable to use. With proper use and care, the gel manicure can last **up to four weeks**.

- 3in1: base, strengthening, and protection in one jar
- Elastic, flexible, easy to work with
- 100% self-modeling, does not require filing
- Has a high gloss and transparent colors
- Perfectly fixes foil and PRINCOT as a protective gel
- Economical consumption

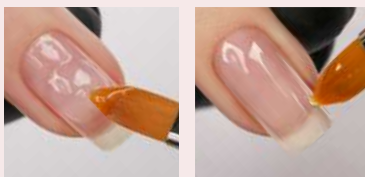

EASY ONE GEL

MODELING

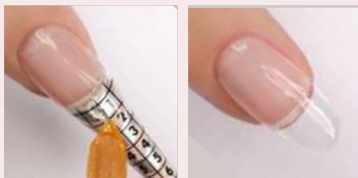

**MonoPhase LED Gel** is a high-quality, versatile gel product for nail extension and modeling. This gel has a one-phase formula, which means that no extra base or top coat is needed. It provides a strong, durable bond that helps prevent chipping and lifting. The gel has a smooth, self-leveling consistency that is easy to apply. Overall, MonoPhase LED Gel is an excellent choice for anyone looking for a high-quality, versatile gel product 3in1. With proper use and care, the gel manicure can last **up to four weeks**.

- 3in1 gel: base, strengthening, and protection in one jar
- Works great for extension on forms
- 100% self-modeling, requires minimal filing
- Clear, transparent color
- Suitable for nail strengthening before gel polish / gel application
- High gloss

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.

3. For extending the free edge, apply a form and apply **MonoPhase LED Gel**. Use the **Leaf** or **Oval Brush (#4/#6)** in case of working with gel in the jar. Cure for 2 min in any lamp.

4. Perform nail architecture modeling using **MonoPhase LED Gel**. Cure for 2 min in any lamp.

5. If necessary, file and dehydrate using **Eurocleanser**. Alternatively, directly apply colored / decorative coating without removing the dispersion layer. Cure for 2 min in any lamp.

6. Apply a final layer\* of **MonoPhase LED Gel** cure for 2 min in any lamp.

\* It is also possible to use top gels from the gel polish system. We recommend using top gels specifically from the gel polish system when applying a colored layer with gel polishes (rather than gel paints) to avoid cracking and the appearance of a grid pattern.

MODELING + COLOR

SOFT GELS

**Soft Gels** are a series of ultimate solutions for camouflaging gel manicures. This elastic, flexible, and easy-to-use sculpting gel requires minimal filing, making it the perfect choice for all types of nails. With its ability to **perfectly conceal the free edge line**, Soft Gels give a natural and seamless finish to the nails, **without any visible borders during regrowth**.

With various shades that include nude and pastel colors, Soft Gels provide a palette to choose from. With their low viscosity, these gels offer a smooth and easy application.

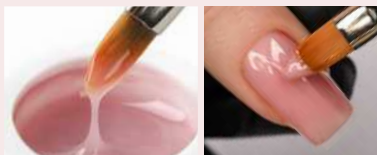

Whether you're a advanced nail technician or a beginner, Soft Gels are the ideal solution for **camouflaging manicures in gel systems**.

- Camouflaging sculpting gel
- Elastic, flexible, easy to work with
- 100% self-modeling, requires minimal filing
- Perfectly covers the free edge line at minimal height, without creating a boundary during growth
- Economical consumption

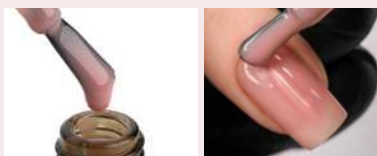

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **Super Bond Gel** or **E.MiLac Base Gel** as an adhesive layer. Cure in any lamp for 30 sec (intermediate). Full curing time is 2 min.

4. Sculpt the nail architecture using the chosen gel from the **Soft Gel** range. Use the **Leaf #4** or **Leaf #6** in case of working with gel in the jar. Cure for 2 min in any lamp.

In the case of working with gels in bottles, apply a thin layer of gel using a brush directly from the bottle. Then, place a drop, turn the finger over, and center. Cure for 2 min in any lamp.

5. If necessary, file and dehydrate using **Eurocleanser**. Alternatively, directly apply colored / decorative coating without removing the dispersion layer. Cure for 2 min in any lamp.

6. Apply the chosen top gel and cure for 2 min in any lamp.

MODELING

SOFT PINK JELLY GEL

**Soft Pink Jelly Gel** is a thick jelly-like gel with a delicate pink color that has excellent camouflaging properties, concealing all the flaws of the nails. It is soft in filing and has a natural camouflage shade that smoothes the transition from natural nail to artificial and prevents visible borders during regrowth. The gel is elastic, obedient, holds the height well, and does not spread.

Due to its high viscosity, Soft Pink Jelly Gel is perfect for sculpting in one drop and on several nails simultaneously. It is a multifunctional product suitable for both French manicure and classic modeling techniques.

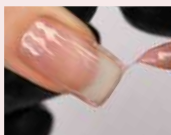

- Suitable for modeling on the form (not on nail tips)
- A soft pink color that **effectively hides any nail imperfections**
- The gel is elastic, obedient, and holds the height well without spreading
- Suitable for sculpting **on multiple nails at the same time**
- The gel is ideal for both sculpted French technique and classic modeling

MODELING + EXTENSION

**Natural Composite Gel** is a unique gel specially designed for nail modeling. It has a dense consistency and is self-leveling, which makes it easy to use for both beginner and professional nail technicians. The gel is natural in color, which makes it suitable for creating a natural look for nails. It is durable and flexible, making it suitable **for both nail extensions and nail repairs**. It has excellent adhesion to the nail plate, which ensures that the nails last for a long time without chipping or breaking.

One of the key features of the Natural Composite Gel is that it is easy to sculpt, and does not require any additional filing after curing. This feature helps to **save time** and effort during the nail modeling process.

- Suitable for modeling on the form (not on nail tips)
- Super strong. It protects the free edge from delamination
- It is easy to seal the edges, restore broken corners and chips
- It does not flow on the form, allowing to work on **4-5 fingers at the same time**, it holds the arch perfectly
- The beige shade of the gel matches the color of the natural nail

EXTENSION

FORM GELS

**Form Gels** are sculpting gels that will revolutionize the nail game! They are specifically designed for lengthening and restoring the free edge of the nails. Their elastic and durable formula makes it easy to work with, while still providing the strength and flexibility the nails need. Form Gels are a type of sculpting gel used for **extending and restoring the free edge of the nail**. These gels are designed for achieving a natural-looking nail extension and are popular in the nail industry due to their unique properties.

- The best for **modeling on forms** (not on the nail tips)
- Suitable for pinching and **extreme shapes** modeling
- **Not suitable for modeling over the natural nail, only the free edge**

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **Super Bond Gel** or **E.MiLac Base Gel** as an adhesive layer. Cure in any lamp for 30 sec (intermediate). Full curing time is 2 min.

4. For extending the free edge, apply a form and lengthen the nails using the chosen gel from the **Form Gel** range. Use the **Leaf** or **Oval Brush (#4/#6)**. Cure for 2 min in any lamp.

5. Perform the modeling stage according to the chosen technique using suitable gel (e.g. Soft Gels or MonoPhase).

6. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.

7. Apply the chosen top gel and cure for 2 min in any lamp.

MODELING + COLOR

**Acrygel** is a product that combines the best qualities of both acrylic and hard gel. That hybrid material is easy to apply, mold, and sculpt, making it a perfect choice for both nail extensions and strengthening natural nails. Acrygel has a **dense and sticky texture**, which allows for precise application and maximum control during the modeling process.

One of the biggest advantages of Acrygel is its **durability**. The product is resistant to cracking, chipping, and breaking, making it an ideal choice for those who want long-lasting, beautiful nails. It can be used to create a wide range of designs, from classic French manicures to bold and colorful nail art.

Acrygel is also very versatile in terms of its usage. It can be applied with a brush or spatula, and can be used over natural nails, tips, or forms.

- Combines the best qualities of both acrylic and hard gel
- Suitable for extension **on both nail tips and nail forms**
- **Suitable for weak and damaged nails**
- For easier work with brush use **Cleansing Spray**
- Used in sculpted French technique as well as in classic modeling
- Heavier filing dust that settles on the table

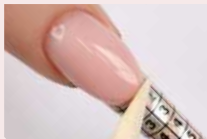

ACRYGELS

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **Super Bond Gel** or **E.MiLac Base Gel** as an adhesive layer. Cure in any lamp for 30 sec (intermediate). Full curing time is 2 min.

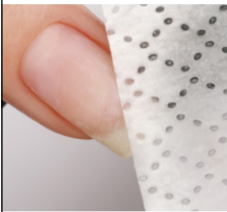

4. For extending the free edge, apply a form and take the required amount of **Acrygel** using a nail stick. Apply it onto the nail plate.

5. Use a moistened brush — **Oval #4 or #6** — to spread Acrygel over the nail surface, shaping it into a desirable form. Press and then spread the product in a thin layer near the nail cuticles and nail walls, and then spread it over the entire nail plate with stretching movements. Cure for 2 min in any lamp.

6. Avoid applying too much pressure, as this may cause brush marks.
7. Use the **Nail File White 100/180** for artificial nails, or the **Soft File 100/180**, to shape the nails. Cleanse the surface with **Eurocleanser**.
8. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.
9. Apply the chosen top gel and cure for 2 min in any lamp.

## SCULPTED FRENCH

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.

2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.

3. Apply a thin layer of **Super Bond Gel**.

Cure in LED, LED/CCFL for 30 sec, UV and CCFL lamps – 1 min.

4. Place a disposable form. Apply a thin layer of **Monophase LED Gel** as a base and perform extension using **Leaf Brush #4 or #6**.

Cure for 2 min in any lamp.

5. Apply **Acrygel Dusty Rose/Glass/Milk/Cover** on the nail bed using a nail stick and perform sculpting.

Cure for 2 min in any lamp. Dehydrate and, without removing the forms, file the smile line.

6. Apply **Acrygel White** to sculpt the free edge from the smile line to the tip with using **Leaf Brush #4 or #6**.

Cure for 2 min in any lamp. If the extension has a greater thickness, it is recommended to increase the curing time.

7. File and refine.

Apply the chosen top gel. Cure for 2 min in any lamp.

MODELING + COLOR

**Firm Flux Gel (F&F)** is a camouflage, multifunctional liquid acrygels in bottles. F&F Gel is a line with an innovative formula that combines the best properties of a classic gel system with a comfortable consistency of the base. The exceptional strength and rigidity of acrylic will ideally last the entire period of wear, and thanks to its comfortable consistency and perfect self-leveling, it will be easy for a technician with any level of training to work.

FIRM FLUX GEL

- Innovative formula — the exceptional strength and **rigidity of acrylic combined with the flexibility** and leveling properties of the base gel
- The strength of the material ensures that the coating is resistant to damage, chipping, and peeling
- **Suitable for weak and thin nails**
- Easy to apply, the gel is well modeled and leveled, does not spread and requires minimal filing

MODELING + COLOR

TWINNY HARD GELS

**Twinny Hard Gels** are the perfect solution for a fast and flawless manicure. This rigid color sculpting gel combines the benefits of **nail sculpture and color** coating in one product, ensuring the ideal alignment of the nail plate with a beautiful color finish. With its natural pastel shades and **large-figured shimmer**, Twinny Hard Gel creates a sophisticated and elegant look that will last for **up to four weeks**. It's also 100% self-leveling, so it's possible to achieve a perfect, smooth finish every time.

The optimal viscosity prevents the gel from running on the nail plate, making it easy to work with. The color palette includes six sweet pastel shades that look equally flawless when coated with a glossy or matte top coat. The fine shimmer adds a touch of sophistication, while the large-figured glitter can be used as a design element.

- 2in1: modeling + pastel shades with shimmer
- **Superfast manicure**, reduces the time of nail care service
- Barely visible semitransparent border when the nails grow out
- Looks flawless either when coated with glossy or matte top coat
- Optimal viscosity, does not run on the nail plate

EXPRESS NAIL EXTENSIONS

**Plastic Nail Forms** is the ultimate solution for effortless, quick, and comfortable nail extensions. With our innovative nail extension technology, applying the Acrygel material becomes a breeze. The high-quality plastic nail forms are specifically crafted for professional nail technicians who strive for perfection. They are ideal for achieving flawless and fast nail sculpting, **even on short nails**. Say goodbye to time-consuming techniques and hello to superfast express nail-sculpting.

PLASTIC NAIL FORMS

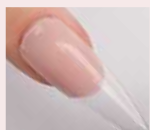

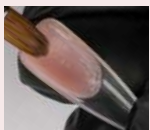

VOLUME	140 pcs in 14 sizes
	
Almond	Classic

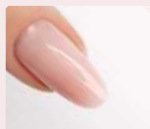

- **Multiple-use**
- Flexible, yet strong plastic nail forms
- **Convenient markings** make the nail modeling and the express nail extensions easier
- Express nail extensions and ease building up the correct nail architecture **without the need to file extra**
- Compatible with any materials used for nail extensions

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **Super Bond Gel** or **E.MiLac Base Gel** as an adhesive layer. Cure in any lamp for 30 sec.

4. Apply a small amount of **Acrygel** onto the inner surface of the **Nail Plastic Form**, and spread the material using smooth strokes.

5. Place the **Nail Plastic Form** onto the nail plate with a slight margin.

6. Adjust the material from the inner side of the form.

7. Cure for 2 min in any lamp. Remove the **Nail Plastic Form** and shape the nail as desired.

8. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.

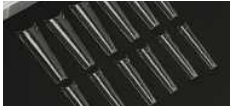

9. Apply the chosen top gel and cure for 2 min in any lamp.

## EXPRESS NAIL EXTENSIONS

**Express Manicure Nail Tips** are "gel" nail tips for express manicures are designed to reduce the time required for a manicure without compromising on quality. These easy-to-use and easy-to-file nail tips offer a great alternative to traditional gel nail extensions. With no need to build the nail structure, nail technicians can **save time** during the extension process. Achieve flawless and quick extensions, **even on short nails**. Can be used **without removal using a correction procedure**.

## EXPRESS MANICURE NAIL TIPS

VOLUME	120 pcs in 12 sizes
	
Coffin	Stiletto

- Easy to use and easy to file
- Do not require the construction of the architecture of the nail
- Gel tips look like natural nails
- Can be used without removal using a correction procedure

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. File the contact zone of the tips inside to the size of the nail bed.
4. Apply a thin layer of **E.MiLac Base Gel** / **E.MiLac Sculpt-Medium Base Gel** / **E.MiLac Sculpt-Maxi Base Gel**. Cure for 30-60 sec in any lamp.
5. Apply a thin layer of **E.MiLac Base Gel** / **E.MiLac Sculpt-Medium Base Gel** / **E.MiLac Sculpt-Maxi Base Gel** ON THE TIPS.
6. a) Fix the **Express Manicure Nail Tips Stiletto** on the nail plate and cure for 1-2 min.  
b) In case of using **Express Manicure Nail Tips Coffin**, cut the length to the required size.
7. File the border between the tips and the natural nail.
8. Clean the border between nail tips and natural nail. If necessary, apply **Cuticle Remover**, hold for 2 min and remove the remnants of the epidermal sawdust, finalize the manicure.
9. Degrease nail tips. Apply **E.MiLac Base gel** / **E.MiLac Sculpt-Medium Base Gel** / **E.MiLac Sculpt-Maxi Base Gel** to even out the border between nail tips and natural nail.
10. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.
11. Apply the chosen top gel and cure for 2 min in any lamp.

## NAIL EXTENSIONS USING EXPRESS MANICURE NAIL TIPS STILETTO

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.

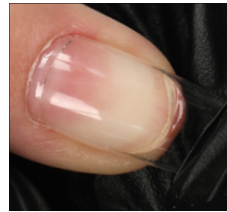

3. File the contact zone of the tips inside to the size of the nail bed.

4. Apply a thin layer of **E.MiLac Base Gel** on the nails. Cure for 30-60 sec in any lamp.

5. Apply a thin layer of **E.MiLac Sculpt-Medium Base Gel** or **E.MiLac Sculpt-Maxi Base Gel** on the tips. Apply the base coat carefully along the edge of the tip, avoiding spreading it across the entire inner surface.

6. Secure the **Express Manicure Nail Tips Stiletto** by pressing it onto the nail plate at a 45° from the edge, gradually lowering it onto the nail surface. This ensures even distribution of the product beneath the tip.

7. Fix the **Express Manicure Nail Tips Stiletto** on the nail plate and cure for 1-2 min.

8. File the border between the tips and the natural nail.

9. Clean the border between nail tips and natural nail. If necessary, apply **Cuticle Remover**, hold for 2 min. Remove the remnants of the epidermal sawdust.

10. Degrease nail tips. Apply **E.MiLac Sculpt-Medium Base Gel** or **E.MiLac Sculpt-Maxi Base Gel** to even out the border between nail tips and natural nail.

11. Apply a color and / or decorative layer if desired. Cure for 2 min in any lamp.

12. Apply the chosen top gel and cure for 2 min in any lamp.

## NAIL EXTENSIONS USING EXPRESS MANICURE NAIL TIPS COFFIN

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.

COLOR

GEL PAINTS

**Gel Paints** are highly pigmented gel colors designed for nail art and painting. They come in a wide range of shades, including metallics, neons, pastels, and glitters. These gel paints are perfect for creating intricate designs and detailed nail art, as they offer precise application and control. They can be used to create a variety of nail designs, including ombre, marble, and abstract patterns.

Gel Paints are easy to apply and cure in a UV/LED lamp for fast and long-lasting results. They have a thick consistency that does not run or bleed, making them perfect for use with brushes, dotting tools, and stamping plates.

These gel paints are also durable and resistant to chipping and fading, ensuring that the nail art stays vibrant and beautiful for **up to four weeks**.

- **Highly pigmented** gel paints with rich colors that provide vibrant and long-lasting nail art designs
- Smooth texture that makes it easy to apply with a brush or a dotting tool
- **For usage with Gel System only!**
- Available in a wide range of colors and finishes, including metallic, glitter, and matte, to cater to various design preferences
- **Has a sticky layer**

SUITABLE FOR	all nail types
CONSUMPTION PER CLIENT	0.3 ml
VOLUME	5 g (jar), sets of 5 g
SERVICED CLIENTS PER VOLUME	16

It is possible to use E.MiLac in the Gel System as well.

HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply **Gel or Acrygel** and cure for 2 min in any lamp.
4. Apply the **Gel Paint** and cure for 2 min in any lamp. Thanks to its excellent consistency, only one layer is needed. But if desired, repeat this step.
5. Apply the chosen top gel and cure for 2 min in any lamp.

Overall, Gel Paints are an excellent choice for nail artists who want high-quality, versatile, and long-lasting gel colors for their nail art designs.

## MASTERING THE GEL SYSTEM: RECOMMENDED METHOD RECAP

			<b>cure for 2 min + 2 min</b>				
			Easy One Gel	E.MiLac Color or Gel Paint	E.MiLac Color or Gel Paint	Easy One Gel	
			Monophase LED Gel	1. layer	2. layer	Monophase LED Gel	

### Advantages of working with a gel system:

- Longer durability of gel nails (compared to gel polish manicure)
- Reduced risk of breakage and chipping
- Less frequent need for intermediate repairs
- Clients cannot perform the procedure at home (unlike gel polish manicure)
- Gel system allows the nail technician to address the needs of thin and weakened nails that are not suitable for a gel polish system
- The higher the bill, the higher the income

## WELCOME TO THE WORLD OF SELF-EXPRESSION AND STYLE

We believe that every detail counts when it comes to creating a unique look.

That's why we offer a wide assortment of nail decorations, including stickers, sliders, pigments, dust, rhinestones, and much more.

Whether you're looking to add a subtle touch of sparkle or create a bold and vibrant design, our selection of decorations has got you covered.

Let your imagination run wild and bring your nail art ideas to life with EMI, making it a great retail product.

## STICKERS

**Charmicon 3D Silicone Stickers** are a versatile and easy-to-use nail art accessory. They can be used with gel, acrylic, or nail polish, making them suitable for use with any nail system. These stickers are made from high-quality silicone material that is soft and flexible, making it easy to apply them to any nail shape or surface. What sets Charmicon 3D Silicone Stickers apart from other nail stickers is their durability. They can last up to several weeks, depending on the nail system used and daily activities.

**These stickers are perfect for adding a unique touch to any manicure**, whether it's a simple design or a more complex one.

- High-quality silicone material
- Flexible and durable
- **Compatible with any nail systems**
- Can be easily removed without damaging the natural nail or leaving any residue behind
- Come in a variety of designs, including flowers, leaves, butterflies, and more, **allowing for endless creative possibilities**

### CHARMICON 3D SILICONE STICKERS

**Naildress Slider Design** is a type of nail decoration that allows to create nail designs quickly and easily. This is a transfer film that is perfect for creating intricate and detailed nail art with minimal effort. Simply apply it to the nails and seal them in with a top coat for a flawless and long-lasting finish. With a wide range of designs available, from florals and geometrics to abstract patterns and more, there's something for every style and occasion.

- Is easy to apply and does not require any special skills or tools
- Durable and long-lasting
- **Compatible with any nail systems**
- Various designs allows **to create endless nail art options**

### NAILDRESS SLIDER DESIGN

## STICKERS

**Nailcrust Pattern Sliders** are a must-have ready-to-use design for each nail art enthusiasts. These sliders are designed to create intricate and beautiful patterns on the nails effortlessly. With a variety of designs to choose from, including florals, geometric shapes, and abstract designs, it's easy to find the perfect match for any occasion. These sliders are made from high-quality materials that ensure their durability and long-lasting effect. They are easy to apply and remove, and the result is always flawless. Simply cut out the desired design, then douse it in water for a few seconds. Remove the slider from the paper base and glue it to the nail surface. Smooth out any bubbles or wrinkles.

- Comes in a variety of designs and colors, providing endless creative possibilities for nail art
- High-quality material ensures long-lasting wear

**DECOUPAGE  
STICKERS 3D**

## CHARMICON 3D SILICONE STRICKERS

### GEL POLISH & GEL SYSTEM

1. Prepare the nail plate, apply **UV-Block Cream**, and degrease the nails. Apply a **base gel**. Cure for 2 min in any lamp.
2. Apply the **E.MiLac** colored coating, cure for 2 minutes. Apply **E.MiLac Top Gel Tackless**, cure for 2 min.
3. Attach the chosen **Charmicon** element. If necessary, trim excess with scissors.
4. Apply the chosen **top gel** and cure for 2 min.

### NAIL POLISH SYSTEM

1. Perform a manicure, degrease the surface. Apply **Ultra Strong Base Coat** and let it dry in the air.
2. Apply 1-2 coats of **Ultra Strong Gel Effect**. Allow to dry.
3. Attach the chosen **Charmicon** element. If necessary, trim excess with scissors.
4. Apply **Ultra Strong Top Coat** and let it dry in the air.

## NAILDRESS SLIDER DESIGN

### GEL POLISH & GEL SYSTEM

1. Prepare the nail plate, apply a **base gel and color**. Then apply **E.MiLac Slider Top Gel** and cure for 2 min.
2. Cut out the **Naildress** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, cure for 15-30 sec in a lamp.
3. Apply **Ultrabond** around the perimeter to dissolve any remaining slider and remove the residue. For better adhesion, apply **Ultrabond** to the entire nail surface and air dry for 1 min.
4. Apply **E.MiLac Slider Top Gel** and cure for 2 min. Then apply finishing **top gel** and cure for 2 min.

### NAIL POLISH SYSTEM

1. Perform a manicure, degrease the surface. Apply **Ultra Strong Base Coat** and let it dry in the air.
2. Apply 1-2 coats of **Ultra Strong Gel Effect**. Allow to dry.
3. Cut out the **Naildress** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, apply **Ultrabond** to the entire nail surface and air dry for 1 min.
4. Apply **Ultra Strong Top Coat** and let it dry in the air.

## NAILCRUST PATTERN SLIDERS

### GEL POLISH & GEL SYSTEM

1. Prepare the nail plate, apply a **base gel and color**. Then apply **E.MiLac Slider Top Gel** and cure for 2 min.
2. Cut out the **Nailcrust** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, cure for 15-30 sec in a lamp.
3. Apply **Ultrabond** around the perimeter to dissolve any remaining slider and remove the residue. For better adhesion, apply **Ultrabond** to the entire nail surface and air dry for 1 min.
4. Apply **E.MiLac Slider Top Gel** and cure for 2 min. Then apply finishing **top gel** and cure for 2 min.

### NAIL POLISH SYSTEM

1. Perform a manicure, degrease the surface. Apply **Ultra Strong Base Coat** and let it dry in the air.
2. Apply 1-2 coats of **Ultra Strong Gel Effect**. Allow to dry.
3. Cut out the **Nailcrust** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, apply **Ultrabond** to the entire nail surface and air dry for 1 min.
4. Apply **Ultra Strong Top Coat** and let it dry in the air.

## NAILCRUST 5D

### GEL POLISH & GEL SYSTEM

1. Prepare the nail plate, apply a **base gel and color**. Then apply **E.MiLac Slider Top Gel** and cure for 2 min.
2. Cut out the **Nailcrust 5D** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, cure for 15-30 sec in a lamp.
3. Apply **Ultrabond** around the perimeter to dissolve any remaining slider and remove the residue. For better adhesion, apply Ultrabond to the entire nail surface and air dry for 1 min.
4. Apply **E.MiLac Slider Top Gel** and cure for 2 min. Then apply finishing **top gel** and cure for 2 min.

### NAIL POLISH SYSTEM

1. Perform a manicure, degrease the surface. Apply **Ultra Strong Base Coat** and let it dry in the air.
2. Apply 1-2 coats of **Ultra Strong Gel Effect**. Allow to dry.
3. Cut out the **Nailcrust 5D** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, apply Ultrabond to the entire nail surface and air dry for 1 minute.
4. Apply **Ultra Strong Top Coat** and let it dry in the air.

## NAILCRUST 5D GLASS

### GEL POLISH & GEL SYSTEM

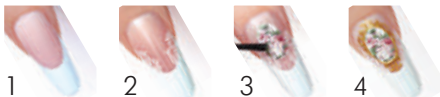

1. Prepare the nail plate, apply a **base gel and color**. Then apply **E.MiLac Slider Top Gel** and cure for 2 min.
2. Cut out the **Nailcrust 5D Glass** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, cure for 15-30 sec in a lamp.
3. Apply **Ultrabond** around the perimeter to dissolve any remaining slider and remove the residue. For better adhesion, apply Ultrabond to the entire nail surface and air dry for 1 min.
4. Apply **E.MiLac Slider Top Gel**. Use a thin brush to remove excess gel from the glass decorative elements, and cure for 2 min. Then apply finishing **top gel** and cure for 2 min.

### NAIL POLISH SYSTEM

1. Perform a manicure, degrease the surface. Apply **Ultra Strong Base Coat** and let it dry in the air.
2. Apply 1-2 coats of **Ultra Strong Gel Effect**. Allow to dry.
3. Cut out the **Nailcrust 5D Glass** element, dip it in water for a few seconds, remove from the paper base, stick it onto the nail surface, and smooth it out. For better adhesion, apply Ultrabond to the entire nail surface and air dry for 1 min.
4. Apply **Ultra Strong Top Coat**. Use a thin brush to remove excess gel from the glass decorative elements. Let it dry in the air.

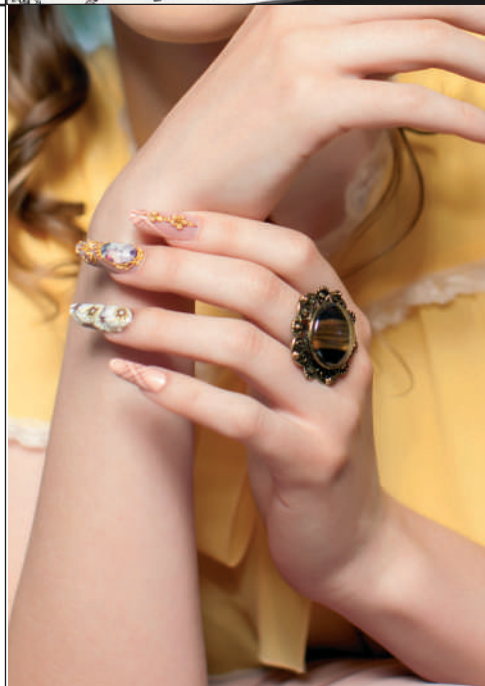

## DECOUPAGE STRICKERS

### GEL POLISH & GEL SYSTEM

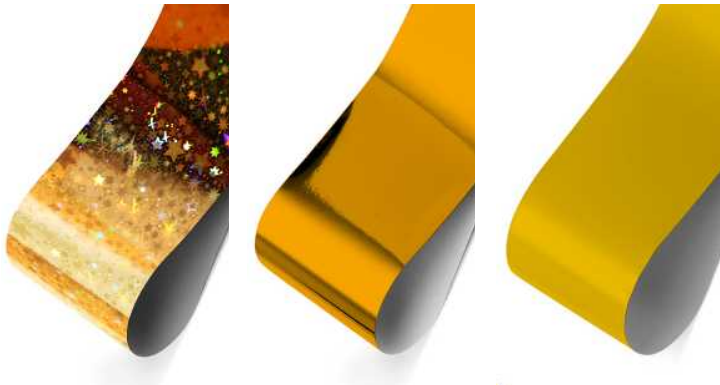

1. Prepare the nail plate, apply **UV-Block Cream**, and degrease the nails. Apply a **base gel**. Cure for 2 min in any lamp.
2. Apply the **E.MiLac** colored coating, cure for 2 min. Remove a sticky layer.
3. Attach the chosen **Decoupage Sticker** element.
4. Apply **E.MiLac Slider Top Gel** and cure for 2 min. Then apply finishing **top gel** and cure for 2 min.

## STICKERS

**Foil** is a special nail decoration that adds a touch of glamour and shine to any manicure. It consists of thin, metallic sheets in a variety of colors and designs that can be easily applied to nails for a stunning, reflective effect.

One of the main advantages of Foil is its durability. Once applied, the foil will stay in place for weeks without peeling or chipping, even with frequent hand washing and exposure to water. Additionally, the foil is resistant to fading, ensuring that the nails will look beautiful and shiny for a long time.

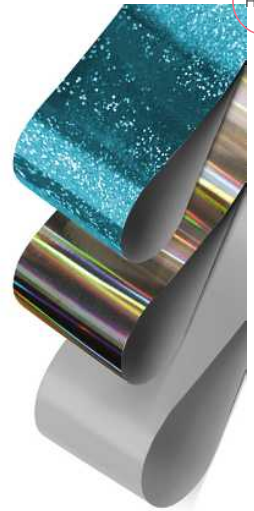

- Come with different effects: glossy, matte, holographic, and satin
- Available in a variety of colors and designs
- Compatible with gel polish and gel systems
- Can be used to create various nail art designs such as ombre, gradient, and abstract patterns
- Come in a convenient size for easy storage and transportation

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a color coat, cure it but **do not remove the sticky layer**.
5. Place the **Foil** onto the sticky layer with the design facing up. Press gently to ensure it adheres to the nail.
6. Peel off the foil quickly and in one motion to transfer the design onto the nail.
7. Cover with **E.MiLac Top Gel Tackless**. Cure for 2 min in any lamp.

## FOILS

COLOR

VOLUME

1.5 m (per one pack)

## GLAM ACCENTS

**Dust** is a type of nail decoration that adds texture, shimmer, or glitter to a nail design. This finely milled powder comes in a range of finishes, including metallic, holographic, and matte. Among professional nail technicians, dust is a popular option, as it is easy to use and can add an extra level of glam to any manicure. With its various finishes, Dust by EMI offers a versatile way to add a touch of sparkle or shine to any nail design.

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a coat of your desired color and cure for 2 min.
5. Apply a thin layer of **E.MiLac Slider Top Gel** and cure it for 2 min in any lamp.
6. Apply **Dust** and rub it in. Then, apply another thin layer of **E.MiLac Slider Top Gel** and cure it for 2 min in any lamp.
7. Finish by covering the nail with any top gel and Cure for 2 min in any lamp.

DUST

COLOR

**Pigment** is a type of nail decoration that adds color and depth to a nail design. Unlike Dust, Pigments are a finely ground color powder that is often mixed with an Empasta or Spider Gel White to create a unique shade. This paste can then be applied to the nails using various techniques: rubbing, dabbing, or brushing. Pigment by EMI comes in a variety of colors and finishes, such as metallic, iridescent, and holographic, allowing for endless creative possibilities.

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a coat of your desired color and cure for 2 min.
5. Apply **E.MiLac Top Gel Tackless** and cure it for 2 min in any lamp.
6. Apply **Pigment** and rub it in.
7. Finish by covering the nail with any top gel and cure for 2 min in any lamp.

PIGMENTS

COLOR

various: chameleon, solid, shavings, semitransparent, neon

VOLUME

0.5-2.3 g

**Rhinestones** and **Nail Studs** are widely favored as nail decorations in nail art, elevating manicures with a touch of glamour and elegance. **Rhinestones** are small, glittering gems made from crystal, glass, or acrylic materials. They come in various shapes, sizes, and colors, and are often applied to nails using nail glue or a topcoat. **Nail Studs**, on the other hand, are small metal embellishments that are attached to nails using nail glue or a topcoat.

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a coat of your desired color and cure for 2 min. Then, apply a top gel and cure for 2 min in any lamp.
5. Apply a small drop of **E.MiLac Base Gel**, and place a **Rhinestone** or **Nail Stud** on the drop. Cure it for 2 minutes.
6. Finish by applying any top gel and cure for 2 min in any lamp to cover the nail.

**Spider Gel** is a thick, gel-like substance that can be used to create thin, delicate lines on the nail surface, giving a spider web-like effect. The gel's exceptional adhesion properties make it easy to work with and enable precise application. Spider Gel is perfect for creating both simple and complex designs, making it a must-have for any nail artist.

- Elastic and easy to stretch out
- **Does not tear**, and stretches into a thin, elegant line
- Perfect for creating geometric designs
- Comes **with a sticky layer** for easy application and immediate adhesion to the nail plate
- **Can be mixed with Pigments** to create a custom color palette for endless design possibilities

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a color coat. Cure it for 2 min in any lamp.
5. Cover with **E.MiLac Slider Top Gel** and cure for **30 sec**.
6. Use **Spider Gel** to create the desired design and cure for 2 min in any lamp. **DO NOT cover with the top gel again.**

**Gemty Gel** is a transparent gel, free from any residual stickiness, enabling you to create voluminous designs even faster and easier. Gemty Gel can be used alone to **imitate precious stones** or in combination with other decorations, such as Charmicon and Naildress, which are specially designed for use with Gemty Gel.

- Voluminous nail designs imitating precious stones
- Dense, paste-like texture
- No top gel required
- High shine
- **Without sticky layer**

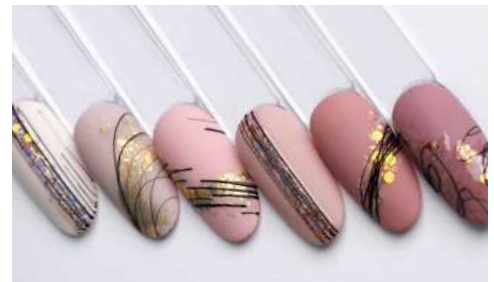

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel**. Cure for 2 min in any lamp.
4. Apply a color coat. Cure it for 2 min in any lamp.
5. Apply the chosen top gel. Cure for 2 min in any lamp.
6. Make a volume design with **Gemty Gel**. Cure for 2 min in any lamp. **DO NOT cover with the top gel again.**

## WE ARE GLAD TO GREET YOU AT THE CHAPTER ABOUT NAIL RECOVERY

This is the perfect place to find a product to address weak, brittle, or damaged nails. Our collection of specially formulated products is designed to restore nails to their former strength and beauty. From fortifying base coats to nourishing treatments, we offer everything needed to support the journey to nail recovery.

We are confident that our selection of nail recovery products will help people achieve healthy, strong, and beautiful nails.

## NAIL BOMB

**Nail Bomb** is a jelly-conditioner that provides quick and deep moisture and nourishment to the nails while protecting them from external factors. It restores the nail plate and promotes cell regeneration.

- Provides quick and deep moisture and nourishment to the nails
- Protects the nails from external factors
- Restores the nail plate and promotes cell regeneration
- Hydrates and makes the skin more elastic
- Has strong antioxidant properties
- Improves the nail plate's firmness
- Eliminates dryness and microcracks

SUITABLE FOR	thin and fragile nails
USAGE FREQUENCY	once a week
MAIN COMPONENTS	aloe vera extract, shea butter extract, D-Panthenol, glycerin
CONSUMPTION PER CLIENT	0.2 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	45

## ACTIVE COMPONENTS

ALOE VERA EXTRACT	hydrates and makes the skin more elastic
SHEA BUTTER EXTRACT	softens and nourishes the skin and nail plate
D-PANTHENOL	nourish and instantly hydrate, improving the nail plate's firmness and eliminating dryness and microcracks
GLYCERIN	

## HOW TO USE

## • As a Mask:

Apply Nail Bomb to the nail plate and the skin around the nails, let it soak in for 5-10 min. Massage the remaining product with circular movements. No rinsing required.

## • As a part of a Manicure Procedure:

1. Apply Nail Bomb to the nail plate and massage the product with circular movements.
2. Remove any residual product, degrease, and dry the nail plate before applying a decorative coating.

## FORTIFYING BASE COATS

**Intense Care Matte Effect** is a nail intensifier that promotes the growth of strong and healthy nails while providing a matte finish.

- Activates the growth of strong and healthy nails
- Restores the keratin layer and strengthens the nail structure
- Intensively moisturizes and restores the moisture balance in the nails
- Naturally stimulates the formation of keratin in the nails
- Creates a matte nail coating, **suitable for both men and women**

INTENSE CARE  
MATTE EFFECT

ACTIVE COMPONENTS	
K-BOOST COMPLEX	restores and strengthens the nail structure by enhancing the keratin layer
BIOTIN	stimulates keratin formation to intensely hydrate and restore moisture balance in nails
CAFFEINE	improves the nail plate's barrier function to protect from external factors
VITAMINS B5 AND C	nourish and hydrate the nail plate, promoting strong nail growth

SUITABLE FOR	thin and fragile nails
USAGE FREQUENCY	twice a week
MAIN COMPONENTS	keratin, biotin, caffeine, vitamins B5 and C
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

## HOW TO USE

Apply a thin layer on the prepared nail plate as a self-sufficient nail coating or as a base under a nail polish twice a week.

## FORTIFYING BASE COATS

**Nail Strengthener Natural Force** is a revolutionary product that uses the power of nature to strengthen and restore natural nails. With 80% herbal ingredients, it offers **full recovery** of delaminated and damaged nails in **just 8 weeks**.

- Strengthens and restores natural nails
- **Full recovery** of delaminated and damaged nails in **8 weeks**
- Contains 80% herbal ingredients
- Promotes deep regeneration of the nail plate
- **Slows down the aging process**

NAIL STRENGTHENER  
NATURAL FORCE

ACTIVE COMPONENTS	
NATURAL PLASTICIZER	improves nail flexibility and forms a water-repellent film
PISTACIA RESIN OIL	promotes deep regeneration of the nail plate and gives it a natural shine
ROSE STEM CELLS	slow down the aging process
COMPLEX OF AMINO ACIDS	provides an antioxidant effect that moisturizes, nourishes, and increases nail thickness

SUITABLE FOR	weak, damaged nails
USAGE FREQUENCY	course for 8 weeks
MAIN COMPONENTS	pistacia resin oil, rose stem cells, a complex of amino acids
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

## HOW TO USE

## • For prevention:

Use as a base coat or apply 2 layers as a self-coating (no need for top coat).

## • For therapy of weakened and damaged nails:

First 2 weeks: apply daily, layer by layer

Weeks 3-4: apply every other day

Weeks 5-6: apply every 2 days

Weeks 7-8: apply every 3 days

At the end of each week, remove the coating with Nail Polish Remover.

**NAIL STRENGTHENER NATURAL FORCE + ANTIFUNGAL + PROTECT OIL  
ALSO AVAILABLE IN SET TREAT US**

## TREAT US

**Antifungal** is a product specially designed to treat and prevent fungal infections while promoting healthy nail growth. Its unique 2-in-1 formula stimulates nail growth, prevents splitting, and restores weakened and damaged nails.

- Powerful antifungal properties
- 2-in-1: suitable for both treating and **preventing fungal infections** while **stimulating nail growth**
- Promotes strong, healthy nails by preventing splitting
- Economical to use due to its liquid consistency
- Recommended for preventing fungal infections in cases of onycholysis

## HOW TO USE

- **For small onycholysis:** apply Antifungal into the subungual pockets twice a day until complete healing.
- **To repair weakened, damaged nails:** soak prepared nails and wait until dry before applying nail polish.
- **For onychorrhexis:** apply Antifungal in the morning and evening on the damaged part of the nail until complete recovery.

**Set Treat Us** is the all-in-one solution for nail care, prevention, treatment, and recovery. This box of usefulness combines the power of Tea Tree Oil, Pistachio Oil, Rose Stem Cells, and a potent complex enriched with amino acids in three carefully crafted bottles. With a **synergistic approach**, these products work together to provide comprehensive nail care, giving you stronger, healthier, and more beautiful nails.

- All-in-one solution: comprehensive nail care, prevention, treatment, and recovery in one set
- Powerful formulations for effective results
- Synergistic effects promote strength and resilience
- Easy application: user-friendly design for precise usage

## HOW TO USE

Drop a bit of Antifungal onto the hyponychium area. Apply **Protect Oil** to the cuticle and let it sit for 1 min. Remove any excess material and apply a layer of **Natural Force** to the nail. Let it air dry.

**Using these products together can speed up the treatment process.**

## ANTIFUNGAL

MUST HAVE

SUITABLE FOR	onycholysis; onychorexis; weak, damaged nails
USAGE FREQUENCY	twice a day
MAIN COMPONENTS	tolnaftate, calcium, keratin, provitamin B5, wheat amino acids, vitamins C and E
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

## SET TREAT US

THE SET INCLUDES	• Nail Strengthener Natural Force; • Antifungal; • Protect Oil
VOLUME	9 ml

## PREVENTION OF FUNGAL INFECTION AND RESTORATION OF NATURAL NAIL PLATE

1. Apply Antifungal to the prepared nail plate on affected areas. Process the under-nail pockets and let it air dry for 1 min.

2. Apply a layer of Nail Strengthener Natural Force and let it air dry for 1 min.

3. Apply E.MiLac Protect Oil to the cuticle area using massaging movements.

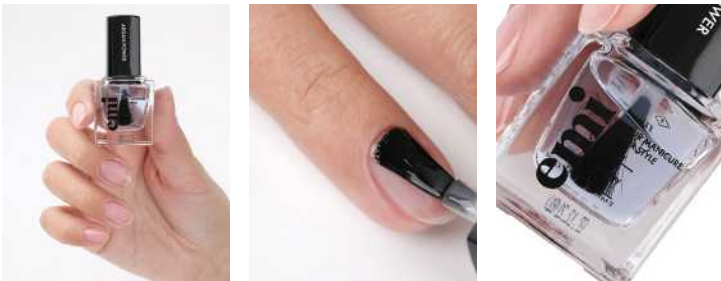

## NAIL THERAPY SYSTEM

**Argan Power** is a vitamin therapy designed to nourish and reinforce dry and fragile nails that lack nutrients. It contains Argan oil, as well as vitamins A, C, and E, which work together to make the nail plate more flexible and healthy-looking. It is ideal for those who want to grow strong and healthy nails, nourish the nail plate with vitamins, and protect it from external factors.

- Argan oil promotes nail plate strengthening
- Can be used as a stand-alone nail coating or be used as a base coat under nail polish
- Great for salon nail therapy and at-home nail recovery; no special tools or skills required
- Using together with Vitamin Complex and Keratin Serum provide a more powerful action than using either product alone

## ACTIVE COMPONENTS

ARGAN OIL	promotes nail plate strengthening
VITAMINS A, C, AND E	nourish the nail plate, making it more flexible and preventing delamination

## HOW TO USE

1. Apply **Argan Power** as a base coat under a color nail coating or as a self-sufficient main coating, on the prepared nail plate. For best results, we recommend to apply in 2 layers.
2. For at-home use, we recommend to use it once a week.

## ARGAN POWER

SUITABLE FOR	brittle, dry, thinned nails
USAGE FREQUENCY	once a week
MAIN COMPONENTS	Argan oil, vitamins A, C, E
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

For best results, we recommend to use it **together** with other products from our **Nail Therapy System**:

- 1st layer: Argan Power
- 2nd layer: Vitamin Complex
- 3rd layer: Keratin Serum

Scan to see more

**ARGAN POWER + VITAMIN COMPLEX + KERATIN SERUM  
ALSO AVAILABLE IN SET NAIL THERAPY SYSTEM**

**Vitamin Complex** is a special formula enriched with vitamins to nourish the nail, improve its elasticity, and recover the nail structure. It is ideal for thin and weakened nails after wearing an artificial nail coating.

- Nourishes and improves the nail elasticity, recovering its structure
- Beneficial for fragile, weak, and thin nails  
(especially after removing the artificial nails)
- Can be used as a stand-alone nail coating or be used as a base coat under nail polish
- Great for salon nail therapy and at-home nail recovery; no special tools or skills required
- Using together with Argan Power and Keratin Serum provide a more powerful action than using either product alone

#### ACTIVE COMPONENTS

VITAMINS A, E, AND F

nourish the nail plate, prevent delamination, stimulate the active nail growth, and give the nail shine

#### VITAMIN COMPLEX

SUITABLE FOR	fragile, weak, and thin nails
USAGE FREQUENCY	once a week
MAIN COMPONENTS	vitamins A, E, F
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

For best results, we recommend to use it **together** with other products from our **Nail Therapy System**:

- 1st layer: Argan Power
- 2nd layer: Vitamin Complex
- 3rd layer: Keratin Serum

#### HOW TO USE

1. Apply **Vitamin Complex** as a base coat under a color nail coating or as a self-sufficient main coating, on the prepared nail plate. For best results, we recommend to apply in 2 layers.
2. For at-home use, we recommend to use it once a week.

Scan to see more

**ARGAN POWER + VITAMIN COMPLEX + KERATIN SERUM  
ALSO AVAILABLE IN SET NAIL THERAPY SYSTEM**

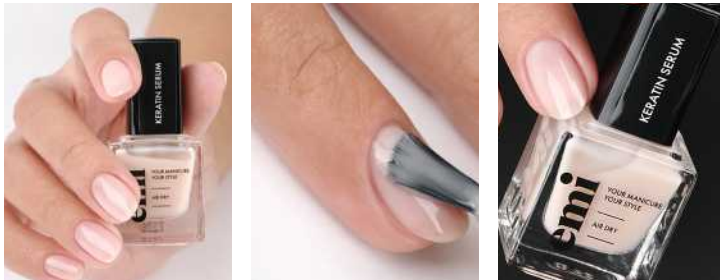

**Keratin Serum** is a specially formulated serum designed for soft, fragile and brittle nails. The active ingredients work together to provide a protective layer that strengthens the nail plate, preventing breakage and promoting healthy growth.

- Specially formulated for fragile and brittle nails
- Creates a protective layer that reinforces the nail plate
- Can be used as a stand-alone nail coating or be used as a base coat under nail polish
- Great for salon nail therapy and at-home nail recovery; no special tools or skills required
- Using together with Argan Power and Vitamin Complex provide a more powerful action than using either product alone

#### ACTIVE COMPONENTS

KERATIN	deeply penetrates the nail plate, restoring and strengthening the nail structure
PLANT EXTRACTS	provide intense hydration and restore moisture balance

#### KERATIN SERUM

SUITABLE FOR	soft, fragile, and brittle nails
USAGE FREQUENCY	once a week
MAIN COMPONENTS	keratin, plant extracts
CONSUMPTION PER CLIENT	0.1 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	90

For best results, we recommend to use it **together** with other products from our **Nail Therapy System**:

- 1st layer: Argan Power
- 2nd layer: Vitamin Complex
- 3rd layer: Keratin Serum

#### HOW TO USE

1. Apply **Keratin Serum** as a base coat under a color nail coating or as a self-sufficient main coating, on the prepared nail plate. For best results, we recommend to apply in 2 layers.
2. For at-home use, we recommend to use it once a week.

**ARGAN POWER + VITAMIN COMPLEX + KERATIN SERUM  
ALSO AVAILABLE IN SET NAIL THERAPY SYSTEM**

## COMPREHENSIVE RESTORATION OF NATURAL NAIL PLATE WITH NAIL THERAPY SYSTEM

1. Apply the Argan Power onto the prepared nail plate and air dry for 1 min.

2. Apply the next layer, Vitamin Complex, and air dry for 1 min.  
For best results, it is recommended to apply Vitamin Complex in 2 layers.

3. Apply the final layer, Keratin Serum, and air dry for 1 min.  
For best results, apply Keratin Serum in 2-3 layers.

## POLYMER FILLER

**Nail Polymer Booster** is a natural nail restorer that features the nourishing benefits of avocado and jojoba oils. This unique product penetrates deeply into the nail plate, moisturizing, nourishing, and thickening the nails. When polymerized, Nail Polymer Booster crosslinks and forms a protective cage that locks in the nourishing oils.

- Penetrates deep layers of the nail plate for thorough moisturizing, nourishing, and thickening
- **Crosslinks to create a protective cage that locks in nourishing oils**
- Promotes healthy and strong nail structure, maintaining elasticity and flexibility
- **Regular use can help recover and improve the nail structure**
- **It can be applied under nail polish, gel polish, or as a stand-alone coat**

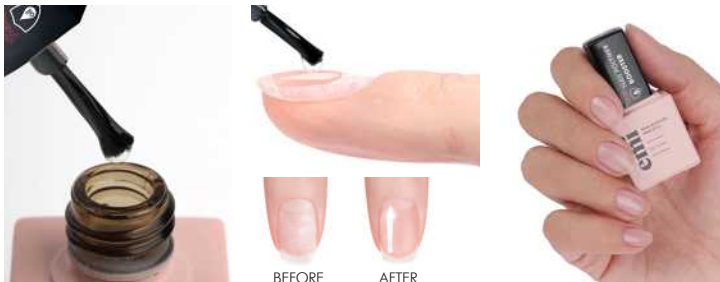

## NAIL POLYMER BOOSTER

SUITABLE FOR	thin, fragile, damaged nails
USAGE FREQUENCY	once every two weeks
MAIN COMPONENTS	jojoba oil, avocado oil
CONSUMPTION PER CLIENT	0.2 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	45

## ACTIVE COMPONENTS

AVOCADO OIL	for deep regeneration, growth, and strengthening of the nail plate
JOJOBA OIL	to contribute to nail growth, strengthening, and protection from ultraviolet irradiation

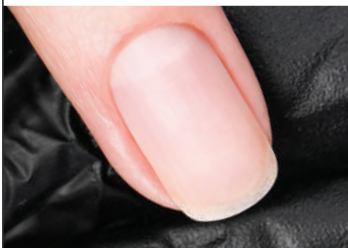

## HOW TO USE

1. File the nail plate. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Polymer Booster** to the nail plate in a thin layer.
3. Heat **with a hair dryer or heat lamp** for 2-3 min, so that the Nail Polymer Booster is absorbed and penetrates into the deep layers of the nail.
4. Remove excess with a dry cloth.
5. Cure for 2 minutes in an LED/CCFL EMI lamp.
6. Degrease the nails with **Eurocleanser** or **Gel and Nail Polish Remover**.
7. Apply nail polish or gel polish according to the instruction.

## RESTORING DAMAGED NAILS IN A BEAUTY SALON

1. Prepare the nail plate.

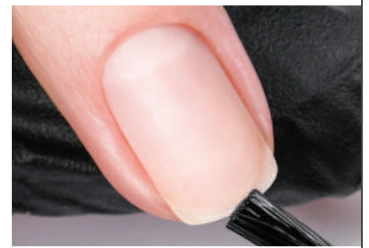

2. Apply Nail Polymer Booster, warm it up under a heat lamp or with a hair dryer for 2-3 min to allow the composition to penetrate deeper into the layers of the nail.

3. After warming up, remove excess with a dry towel and cure in a lamp for 2 min.

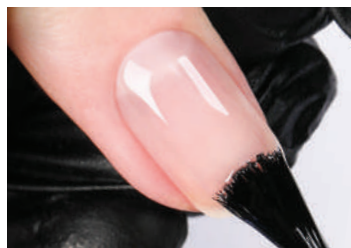

4. Clean with Eurocleanser, apply Nail Prep Aid to the cuticle area.

5. Apply Ultrabond to the nail tip.

6. Apply Natural Force healing nail polish as a base under colored polish or as a polish square under gel polish base for gel polish coverage/strengthening.

7. Apply base, color, and top gel.

## WELCOME TO CARE SYSTEM

Here, we will introduce you to a range of our products designed to pamper your hands. We take pride in the high-quality formulas of each product and believe that taking care of your hands is essential for maintaining healthy and beautiful skin.

Whether you are looking to enhance professional salon services or extend your business for retail, our care products are sure to provide the perfect solution.

## CUTICLE REMOVER

**Cuticle Remover** is a professional-grade product designed to remove excess cuticles around the nail plate quickly and easily. It softens and dissolves the cuticles, making them easy to push back and remove without damaging the nail or surrounding skin. The formula is enriched with moisturizing and nourishing ingredients to help keep the cuticles healthy and prevent dryness.

- Thanks to its liquid consistency, it is easy to apply and has an **economical consumption**
- Works actively even when applied in a thin layer
- Quickly and intensely softens the cuticle, slows its growth, and improves the nail structure
- Helps to give nails a healthy and well-groomed appearance **in seconds without damaging the nail bed**

## HOW TO USE

1. Prepare hands and nails. File and shape the nails.
2. Apply **Cuticle Remover** to the cuticles and leave for 1 min.
3. Carefully push back the cuticles with a wooden stick. If necessary, use nippers to remove hangnails. Try to use nippers minimally to avoid provoking the growth of cuticles.

## CUTICLE REMOVER

PURPOSE	cuticle softener		
CONSUMPTION PER CLIENT	0.02 ml		
VOLUME	9 ml	15 ml	30 ml
SERVICED CLIENTS PER VOLUME	450	750	1 500

**Cuticle Remover AHA Complex** is a professional-grade cuticle remover that contains AHA and vitamin E. It gently exfoliates the epidermis' stratum corneum, protecting living tissues from free radicals while retaining moisture. The fast-acting formula provides healthy-looking nails in a matter of seconds without damaging the nail bed.

- Contains AHA complex and vitamin E
- Delicately and gently exfoliates the cuticle with lactic acid and Microcitrus Australasica Fruit Extract
- With glycerin
- Fast-acting formula
- Suitable for professional and home use

## HOW TO USE

1. Prepare hands and nails by filing and shaping the nails.
2. Massage **E.MiLac Cuticle Remover AHA Complex** onto the cuticles.
3. Use an orange stick to remove the cuticle and rinse off any remaining product with running water.

## CUTICLE OIL

**Cuticle Oil Touch of Nature Barbie Girl** is a specially designed formula that incorporates 98% natural ingredients. This fast-absorbing oil provides deep nourishment to the cuticles, effectively moisturizing them while slowing down their growth. The result is stronger and healthier nails, as well as a well-groomed appearance to the manicure.

- **98% natural ingredients**
- Contains **almond oil, grape seed extract, and avocado oil** to nourish and protect the cuticles and nail plate
- Quickly and gently softens cuticles
- Instantly absorbed, does not leave a greasy residue
- Has a pleasant tropical perfume composition

## HOW TO USE

At the end of the manicure procedure, apply **Cuticle Oil Barbie Girl Touch of Nature** with massaging movements onto the cuticles.

**For home use:** apply cuticle oil with massaging movements onto the cuticles every evening to maintain the beautiful look of the manicure until the next salon visit.

## UV PROTECTION

## UV-BLOCK CREAM

**UV-Block Cream** is a perfumed cream that provides UVA and UVB protection with SPF 30. It is designed specifically to protect hands and feet from UV lamps and sunlight influence during manicure and pedicure procedures. The cream contains new generation filters that combine innovative blockers of both UVA and UVB with SPF 30. **UV-Block Cream is essential to protect** clients' hands and feet against UV radiation influence, which can cause early photo-aging and other skin defects.

- Provides UVA and UVB protection with SPF 30 to protect hands and feet from UV rays
- Protects **from both UV lamps and sunlight exposure**
- Contains a **new generation of UV filters** that effectively block both UVA and UVB radiation
- Moisturizes and cares for the skin while protecting **against photoaging**
- Its lockable pump and recyclable mono-material packaging make it an **eco-conscious choice**

## HOW TO USE

1. Apply the **UV-Block Cream** to the hands (or feet, if used during a pedicure) before exposing them to UV light.
2. Massage the cream into the skin until it is completely absorbed. Then, **degrease the nail plate and cuticle with Eurocleanser** before continuing with the next products, such as Nail Prep Aid, Ultrabond, and others.

MUST HAVE ✓

SPF 30

PURPOSE	protection against UVA and UVB rays from both UV lamps and sunlight exposure
CONSUMPTION PER CLIENT	2 ml
VOLUME	300 ml
SERVICED CLIENTS PER VOLUME	150

**This is a must-have product for every manicure and pedicure procedure to protect against the harmful effects of UV radiation.**

**Pink Sugar Scrub** is a gentle yet effective scrub designed for both hands and body, providing nourishment to the skin. With a medium abrasive texture, it exfoliates the outermost layer of the skin, leaving it silky smooth and even-toned. This scrub contains a cocktail of vitamins and microelements, providing nutrition, hydration, and rejuvenation to the skin.

- Delicate cleansing, without injuring the skin
- Activates blood circulation, saturating cells with oxygen
- Suitable for home use, without requiring special tools or skills
- Protects against UV rays and environmental aggressors
- With a pleasant aroma, Pink Sugar Scrub is a great addition to any beauty routine, providing both exfoliation and nourishment to the skin

## PINK SUGAR SCRUB

SUITABLE FOR	any skin type
GRAININESS	medium/coarse
USAGE FREQUENCY	one-two times a week
MAIN COMPONENTS	shea butter, glycerin, hydrolyzed silk, D-Panthenol, vitamin E
CONSUMPTION PER CLIENT	2 g
VOLUME	150 g
SERVICED CLIENTS PER VOLUME	75

### ACTIVE COMPONENTS

SHEA BUTTER	has nourishing and softening properties, protecting the skin from environmental influences
GLYCERIN	provides an anti-aging effect, allowing the skin to retain moisture
HYDROLYZED SILK	promotes skin elasticity and smoothness
D-PANTHENOL	intensely moisturizes the skin; stimulates the renewal of the epidermis
VITAMIN E	has antioxidant properties, protects the skin from UV radiation

### HOW TO USE

1. Apply the **Pink Sugar Scrub** on wet skin, massage gently, and then rinse with water.  
**Warning:** Do not use the product on damaged skin or after epilation.

**Crystal Scrubbing Paste** is the ultimate solution for smooth, soft, and glowing skin on the hands and body. With its airy, melting texture and ultra-smoothing effect, it gently cleanses and removes dead, dull, and dry skin cells. Also, its texture makes it a delight to use, leaving the skin with an immediate ultra-smoothing effect, smoothing out skin relief and complexion.

- Delicate cleansing, without injuring the skin
- Can be used on the whole body
- Activates blood circulation, saturating cells with oxygen
- Suitable for home use, without requiring special tools or skills
- Protects against UV rays and environmental aggressors
- **Instant effect from the first application**

## CRYSTAL SCRUBBING PASTE

SUITABLE FOR	any skin type
GRAININESS	gentle
USAGE FREQUENCY	one-two times a week
MAIN COMPONENTS	salt microcrystals, prunus armeniaca seed powder, sorbitol
CONSUMPTION PER CLIENT	2 g
VOLUME	150 g
SERVICED CLIENTS PER VOLUME	75

### ACTIVE COMPONENTS

SALT MICROCRYSTALS	gently remove dead and skin cells, resulting in an ultra-smooth, soft, and glowing skin
PRUNUS ARMENIACA SEED POWDER	massages and softens the skin, smoothing out its surface
SORBITOL	ensures deep hydration, helping the skin retain its natural moisture balance

### HOW TO USE

Apply **Crystal Scrubbing Paste** on wet skin using massaging movements and rinse off with warm water. For an efficient peeling foam, use sponges moistened with water.

- **Recommended treatment:** This Crystal Scrubbing Paste is ideal as a standalone beauty treatment, and can be used as a complementary procedure to manicure.

**Paraffin Effect Mask** is a natural-based mask designed to provide luxurious care for the skin on hands and body. With its low melting point paraffin and a blend of essential and base oils, this mask delivers an array of benefits for the skin. Unlike hot paraffinotherapy, this mask is more hygienic as one portion of paraffin is used only once, eliminating the need to dip hands into a shared basin. No additional equipment is required for heating, making it easy to apply at home or in beauty salons.

- Provides fast, long-term effects for clients at any time of the year
- Contains low-melting point paraffin, essential and base oils
- More hygienic than traditional paraffinotherapy since one portion of paraffin is used only once
- Has no major contraindications, making it **safe for use by people with high blood pressure, diabetes, and varicose vein disease**
- **Instant effect from the first application**

ACTIVE COMPONENTS	
SHEA BUTTER	gently remove dead and skin cells, resulting in an ultra-smooth, soft, and glowing skin
PRUNUS ARMENIACA SEED POWDER	massages and softens the skin, smoothing out its surface
SORBITOL	ensures deep hydration, helping the skin retain its natural moisture balance

## PARAFFIN EFFECT MASK

SUITABLE FOR	any skin type
USAGE FREQUENCY	one-two times a week
MAIN COMPONENTS	shea butter, vitamins A and E
CONTRA-INDICATIONS	<ul style="list-style-type: none"> <li>• Skin inflammation</li> <li>• Infections, viruses, bacteria</li> <li>• Scratches and abrasions</li> </ul>
CONSUMPTION PER CLIENT	1 g
VOLUME	150 g
SERVICED CLIENTS PER VOLUME	150

### HOW TO USE

Apply **Crystal Scrubbing Paste** on wet skin using massaging movements and rinse off with warm water. For an efficient peeling foam, use sponges moistened with water.

- **Recommended treatment:** This Crystal Scrubbing Paste is ideal as a standalone beauty treatment, and can be used as a complementary procedure to manicure.

## REVITALIZING CRYSTAL AND PARAFFIN SPA RITUAL IN A BEAUTY SALON

The procedure is performed **after** a manicure.

1. Perform a hygienic manicure procedure. If a manicure is not planned, push back the cuticle with a wooden stick.

2. Apply the Crystal Scrubbing Paste with a spatula.

3. Distribute the scrub on the skin of the hands with light massaging movements.

4. Rinse with warm water using a tissue. Dry the hands with a towel.

5. Using a spatula, take the necessary amount of the Paraffin Effect Mask and distribute it on the skin with a brush. One layer is enough.

6. Wrap the hands with plastic wrap or a bag.

7. Put on terry cloth gloves over the wrap. To create additional warmth, cover with a towel.

8. After 10-15 minutes, remove the plastic wrap and pat any remaining residue with a tissue.

9. Optionally, perform a massage.

Recommended frequency of use is 1-2 times a week.

Procedure time is 20-25 minutes.

## Introducing an **Ultra-Moisturizing Series for Hand and Body Skin Care.**

Our line offers a variety of textures to choose from, ensuring that every client can find their perfect match based on their skin type and the season. All products provide extra nourishment and ultra-moisturizing benefits and come in 5 exquisite fragrances

MAIN COMPONENTS	glycerin, d-panthenol, aloe vera, vitamin E, mango butter
USING	<ul style="list-style-type: none"> <li>• after scrubbing or other more complex skin procedures</li> <li>• after a bath or shower</li> </ul>

## COLLAGEN TREATMENT

## COLLAGEN GLOVES

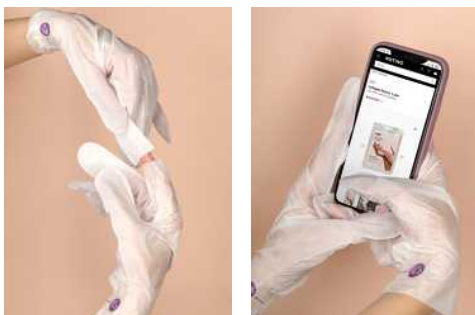

**Collagen Gloves** provide a luxurious spa treatment for the hands in the comfort of clients home or at the salon. These gloves are designed to efficiently soften, nourish, and regenerate dry and cracked hands. They are also designed with perforated areas around the fingers, making them ideal for use during a manicure.

- Efficiently softens, nourishes, and regenerates the skin of the hands
- Provides SPA-like skin care during a manicure, saving time
- Features perforated areas around the fingers, allowing for manicure procedures while simultaneously caring for the hands in the gloves
- Suitable for use in a salon or at home

ACTIVE COMPONENTS	
HYDROLYZED COLLAGEN	improves skin elasticity and tone, forms a protective film to prevent moisture loss
GLYCERIN	deeply moisturizes and nourishes the skin, while recovering the hydrolipidic balance and sealing microcracks to protect the skin
SHEA BUTTER	penetrates deeply, nourishes cells, fights dry and rough skin
ARGAN OIL	improves the skin condition, protects it from UV radiation, and prevents the early appearance of age-related wrinkles
UREA	boosts the process of cell regeneration, has a significant softening and moisturizing effect

MAIN COMPONENTS	hydrolyzed collagen, glycerin, shea butter, argan oil, urea
VOLUME	1 pair

## HOW TO USE

1. Wear the **Collagen Gloves** on clean and dry hands before a manicure and fixate with special tape.
2. Remove the part of the socks covering the fingers to allow for a manicure.
3. After completing the manicure, take the gloves off and massage any remaining product into the skin. Clean any excess with a wet wipe or wash it off.

**Note:** When using **Collagen Gloves at home**, there is no need to remove the part of the gloves covering the fingers. For best results, wear the gloves for at least 20 min.

**Massage candles** are a luxurious SPA product that combines the benefits of a scented candle with a full-body massage. Infused with a blend of nourishing oils and butters, these candles provide intense hydration and improve skin elasticity. **Let the client experience a gentle and nourishing massage while indulging in amazing fragrances that leave client's skin feeling soft, smooth, and rejuvenated after salon procedures.**

- Nourish and moisturize the skin
- Scented candles that can be used for a full-body massage
- Offers gentle and luxurious care, leaving the skin feeling soft and smooth
- Made from soy wax, which has a **low melting point and does not emit toxic substances** or soot when burning

#### ACTIVE COMPONENTS

SHEA BUTTER	saturates the upper layers of the skin with healthy fats, promoting the production of collagen and resulting in softer, more elastic skin
COCONUT AND OLIVE OILS	relax and soothe the skin, while also providing moisturizing and nourishing benefits
VITAMIN E	helps moisturize and maintain skin firmness and elasticity

#### HOW TO USE

1. Light the **Massage Candle** for 2-5 minutes until enough organic oil has melted.
2. Extinguish the candle and allow the oil to cool to a comfortable temperature before applying it to the skin.
3. Use the warm oil for a massage on the hands, feet or body. Excess oil can be blotted with a paper towel, and there is no need to rinse the product off with water.

#### MASSAGE CANDLES

#### SCENT

- vanilla
- strawberry
- coffee

#### MAIN COMPONENTS

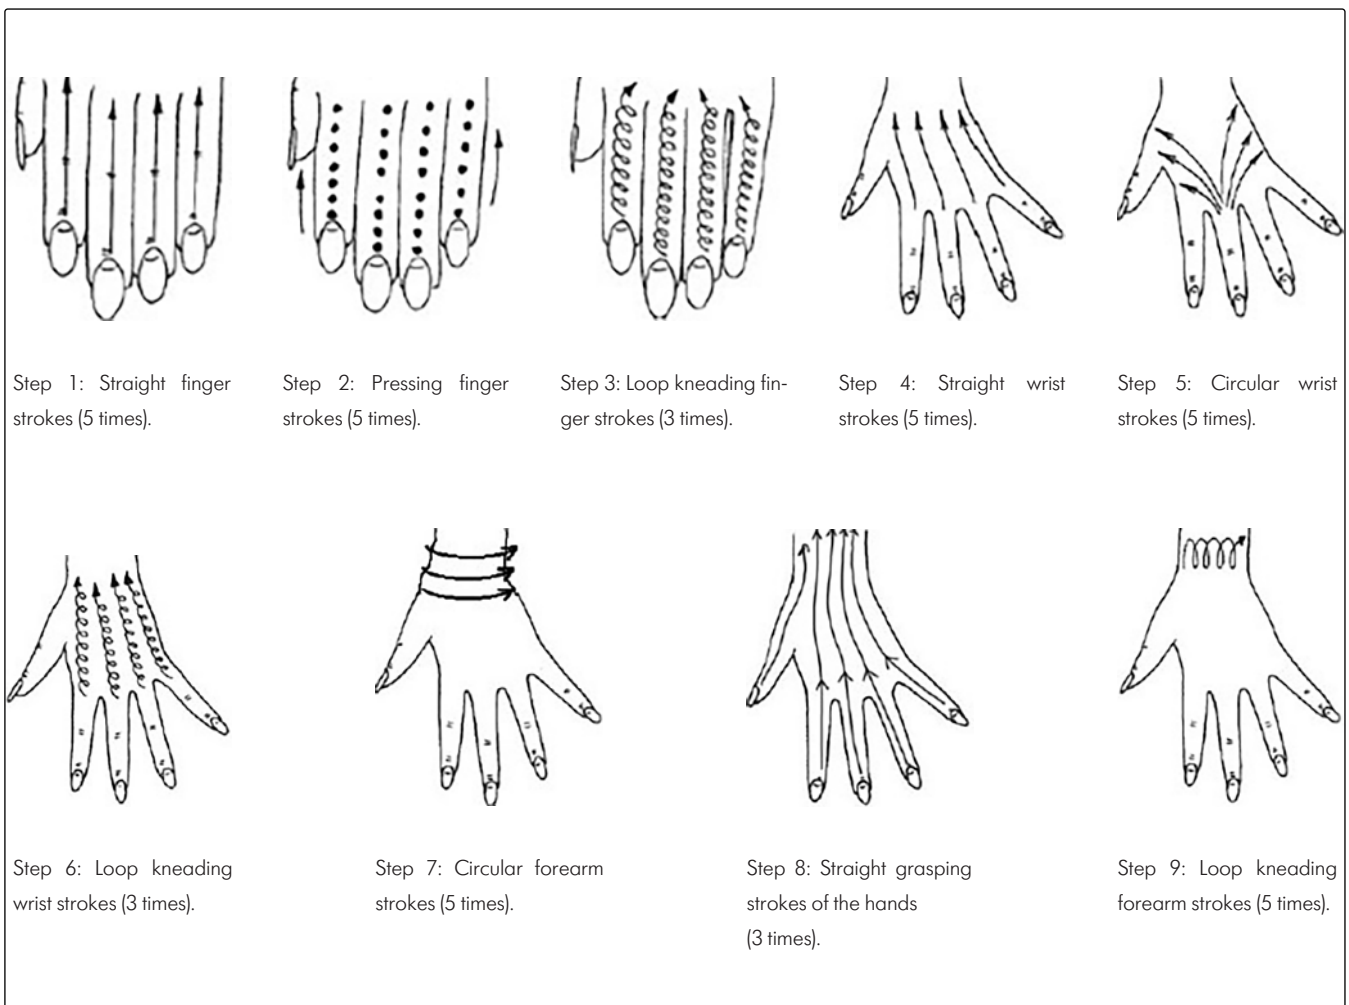

shea butter, coconut oil, olive oil, vitamin E

#### VOLUME

30 g

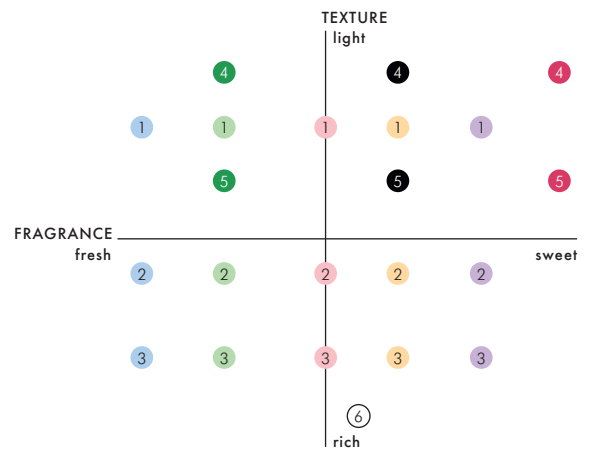

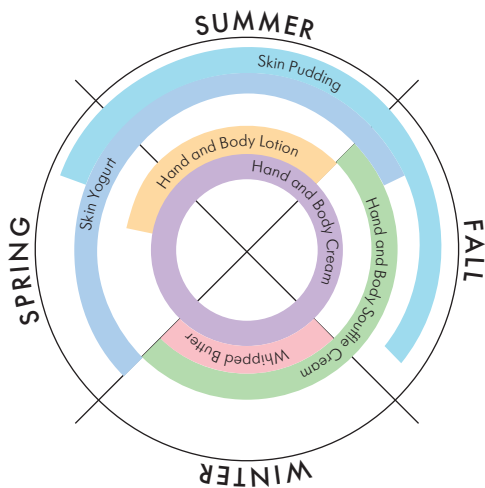

## LUXURIOUS SPA IN A BEAUTY SALON

After the massage, it is recommended to cover the hands with a warm towel and rest for 5-10 min, allowing the excess oil to soak into the skin for better results. Alternatively, the excess oil can be removed, but leaving it to soak into the skin is the better option.

## WELCOME TO EMI PEDICURE LINE, A COMPLETE SOLUTION FOR FOOT CARE NEEDS.

Our line is designed to provide clients with smooth, soft, and healthy feet. The Pedicure Line features a variety of specially formulated products that provide both options: enhance professional salon services or extend our partners business for retail.

### THE RECOMMENDED METHOD TO WORK WITH THE GEL POLISH SYSTEM

1

#### CLEANSING

Clean and soften the feet before starting the treatment.

2

#### EXFOLIATION

Soften the skin of the feet with keratolytics to remove rough skin and calluses, leaving the feet smooth and soft.

3

#### MOISTURIZING

Hydrate and nourish the feet with a cream while also providing protection against fungi.

## CLEANSING

## FOOT BATH GEL

**Foot Bath Gel** is a versatile product that serves as a **multipurpose remedy** for cleaning, soaking, and nourishing foot skin. While primarily intended to prepare the feet for pedicure by cleaning and disinfecting, it can also provide a light exfoliation if needed, making it suitable for those who do not require a keratolytic agent. Additionally, it improves skin texture and restores hydro balance for smoother and healthier-looking feet.

- Soft gel formula **for soaking, cleansing, and nourishing** feet skin
- Cleans and softens the feet before the pedicure procedure
- **Can be used as a light exfoliating remedy (not a keratolytic) if gentle exfoliation is desired**
- Has a pleasant scent that leaves a subtle fragrance on the feet
- Helps to reduce foot odor and keeps feet feeling fresh

ACTIVE COMPONENTS	
GLYCERIN	provides an anti-aging effect and increases the thickness of the epidermal layer
ALOE VERA	boosts skin regeneration and restores hydro balance
TARTARIC ACID	improves skin texture and has antioxidant properties
D-PANTHENOL	intensely moisturizes the skin and suppresses inflammatory reactions
UREA	gently softens and exfoliates dead cells

SUITABLE FOR	all skin types; individuals with diabetes
MAIN COMPONENTS	glycerin, aloe vera, tartaric acid, d-panthenol, urea
CONSUMPTION PER CLIENT	4 ml
VOLUME	300 ml
SERVICED CLIENTS PER VOLUME	75

## HOW TO USE

- **As a cleansing agent:** apply a small amount to the client's feet and distribute it over the foot with smoothing movements. Then rinse with warm water.
- **As a cleansing and softening agent in a foot bath:** apply a small amount to the feet and immerse them in warm water. Leave for 3-5 minutes. Then rinse.
- **As a light exfoliating agent (if the use of a keratolytic is not planned):** apply a small amount to the feet, evenly distribute the product and leave for 10 minutes. Then rinse with warm water.

## EXFOLIATION

**Keratolytic Rough Skin Softener** is a powerful solution to rough and calloused feet. The quick-acting formula effectively removes imperfections on the feet, without the need for additional heating from pedicure machines. It is suitable for both classic and machine pedicures, reducing the time needed for the procedure.

- Effectively softens and moisturizes rough skin on the feet
- Removes calluses, rough patches, and hyperkeratosis
- Suitable for both classic and machine pedicure
- Acts quickly with active exfoliation, but **should be thoroughly rinsed** due to its alkaline nature

## HOW TO USE

1. Cleanse the feet. Then apply\* the **Keratolytic Rough Skin Softener** to the affected areas for **7 min** under a film.
2. Remove the application and use a pedicure file or rotary file to treat the softened skin.
3. **Rinse thoroughly** with warm water or wipe with a damp cloth due to its alkaline nature. Apply moisturizer after use.

\* Please note that the product should not be applied to feet with open wounds.

## KERATOLYTIC ROUGH SKIN SOFTENER

SUITABLE FOR	rough and non-sensitive skin
MAIN COMPONENTS	urea, glycerin
INDICATIONS	<ul style="list-style-type: none"> <li>• Treatment of "glass-like heels"</li> <li>• Hyperkeratosis</li> <li>• Thin, dry, or sensitive skin</li> <li>• Skin damage</li> </ul>

VOLUME	100 ml

**Exfoliating Gel for Feet** is a keratolytic-based product containing urea, glycerin, and lactic acid. It gently exfoliates dead skin cells, removes corns and calluses, and provides long-term hydration and increased elasticity to the skin after a pedicure. The product is suitable for sensitive skin and provides a well-groomed look to the feet with its gel texture.

- Exfoliates dead skin cells from the surface of the skin
- Provides long-term skin smoothness and hydration
- Increases skin elasticity after pedicure procedure
- Suitable for sensitive skin
- Gel texture allows for economic consumption

## HOW TO USE

1. Cleanse the feet. Then apply\* the **Exfoliating Gel** to the problem areas of the skin and cover with a film for **5-10 min**.
2. Remove the film and clean the skin with a dry tissue. Use a pedicure nail file or rotary file to treat the softened skin, and then rinse with warm water.
3. Apply a nourishing cream after the treatment.

\*Please note that the product should not be applied to feet with open wounds.

## EXFOLIATING GEL

SUITABLE FOR	all types of skin
MAIN COMPONENTS	urea, glycerin, lactic acid
CONTRA-INDICATIONS	<ul style="list-style-type: none"> <li>• Allergy to ingredients</li> <li>• Skin damage</li> <li>• Diabetes</li> <li>• Not recommended for children under 14 y.o.</li> </ul>
VOLUME	100 ml

## EXFOLIATION

**Exfoliating Foam for Feet** is keratolytic based on urea, has a mild softening effect, exfoliates dead cells from the skin surface. It provides long-term skin smoothness and hydration by preventing peeling and drying, increasing elasticity and moisturizing the skin of the feet. The foam texture allows for easy application and low consumption. **This is the most gentle and soft keratolytic** of EMI Pedicure Line, making it suitable for even the most sensitive skin types.

- A urea-based exfoliating foam provides long-term skin smoothness and hydration
- Carbamide acts as a moisturizer, prevents peeling and drying
- Allantoin reduces skin irritation and sensitivity
- Provides smoothness to the skin
- Foam texture provides easy application and gentle treatment

## HOW TO USE

1. Cleanse the feet. Then apply\* the **Exfoliating Foam** to the problem areas of the skin for **5-10 min** without rubbing it in.
2. Clean the skin with a dry tissue and treat the softened skin using a pedicure nail file or a rotary file. Rinse with warm water.
3. Apply a nourishing cream after the treatment.

**\*Please note that the product should not be applied to feet with open wounds.**

## MOISTURIZING

**Antifungal Foam Cream** is a gentle remedy that prevents the growth of pathogenic bacteria and fungus while softening and regenerating the skin. This cream foam provides mild care for damaged skin on the feet, preventing peeling and drying. It stimulates the renewal of the epidermis and has antibacterial and antimicrobial properties. The airy texture of the foam gently moisturizes and softens the skin.

- Inhibits the growth of pathogenic bacteria and fungus
- Softens and regenerates the skin
- Prevents peeling and drying, stimulates epidermal regeneration
- Contains antibacterial and antimicrobial properties
- Based on **urea**, which gently moisturizes the skin and prevents fungal diseases
- Contains **D-Panthenol**, which promotes skin renewal
- Airy texture provides light and non-greasy care

## HOW TO USE

1. Perform the pedicure procedure.
2. At the final stage of the procedure, **shake the product** and apply a small amount of **Antifungal Foam Cream** to the feet and toes, massaging it in.

We recommend using it **twice a day**: in the morning and evening.

## ANTIFUNGAL FOAM CREAM

SUITABLE FOR	all types of skin; individuals with diabetes
MAIN COMPONENTS	urea, glycerin, d-panthenol, piroctone olamine
VOLUME	125 ml

**Crack Treat Cream** is a highly effective cream designed for repairing chapped feet. This cream contains a combination of active ingredients, including urea, glycerin, and a blend of nourishing oils that provide gentle yet thorough care for cracked heels. It deeply nourishes and moisturizes damaged skin, promoting regeneration and healing in just 4 days.

- Intense repair — **heals chapped skin and heels in 4 days**
- Contains **urea, glycerin, and a combination of oils** for gentle yet thorough care
- Deeply nourishes and moisturizes damaged skin
- Provides caring care for problem heels

## HOW TO USE

1. Perform the pedicure procedure.
2. At the final stage of the procedure, **apply the Crack Treat Cream** to the affected areas. Gently massage for 1-2 min until the product is completely absorbed.

## CRACK TREAT CREAM

SUITABLE FOR	all types of skin; individuals with diabetes
MAIN COMPONENTS	urea, glycerin, shea butter, argan oil, lactic acid
VOLUME	300 ml

## PEDICURE TREATMENT IN A BEAUTY SALON

1. Apply Foot Bath Gel and distribute it over the foot using smoothing movements.

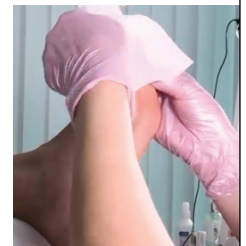

If a keratolytic is intended to be used, rinse it off with warm water. If not, leave it on for 3-5 min and rinse off (skip the next step).

2. Apply the selected keratolytic to the problem areas of the skin and wrap it with film. Leave it on for 5-10 min, according to the instructions.

3. Remove the applications and treat the softened skin with a pedicure file or a rotary file.

4. Rinse with warm water or wipe with a damp cloth. Apply moisturizing cream with antifungal properties or healing properties.

Repeat the procedure for the second leg.

## COOLING AND REFRESHING

**Foot Deodorant Powder** is a specially designed product that helps keep the feet cool, dry, and odor-free for extended periods of time. Its powerful formula effectively neutralizes unpleasant odors and prevents excessive sweating, making it the perfect solution for individuals who are looking for a reliable foot care product.

- Long-lasting freshness
- Neutralizes unpleasant odors
- Easy to apply as a powder
- Helps prevent excessive sweating
- Suitable for all skin types

## HOW TO USE

1. Wash and dry the feet.
2. Apply a small amount of **Foot Deodorant Powder** to the feet, including toes.
3. Rub the powder in and put on socks and shoes.
4. Use a foot mask or cream at night for extra care.

With hyperhidrosis, it may be necessary to use the product twice a day.

## ANTIFUNGAL NAIL AND CUTICLE CARE

**Antifungal** is a product specially designed to treat and prevent fungal infections while promoting healthy nail growth. Its unique 2-in-1 formula stimulates nail growth, prevents splitting, and restores weakened and damaged nails

- Powerful antifungal properties
- 2-in-1: suitable for both treating and **preventing fungal infections** while **stimulating nail growth**
- Promotes strong, healthy nails by preventing splitting and restoring weakened nails
- Economical to use due to its liquid consistency
- Recommended for preventing fungal infections in cases of onycholysis

## HOW TO USE

- **For small onycholysis:** apply Antifungal into the subungual pockets twice a day until complete healing.
- **To repair weakened, damaged nails:** soak prepared nails and wait until dry before applying nail polish.
- **For onychorexis:** apply Antifungal in the morning and evening on the damaged part of the nail until complete recovery.

## ANTIFUNGAL

MUST HAVE

SUITABLE FOR	onycholysis; onychorexis; weak, damaged nails		
USAGE FREQUENCY	twice a day

CONSUMPTION PER CLIENT	0.1 ml		
VOLUME	9 ml		
SERVICED CLIENTS PER VOLUME	90		

Using **Pedicure Cuticle Oil** can speed up the treatment process.

**Pedicure Cuticle Oil** is a specialized product that is perfect for pedicure procedures. It contains tea tree oil, which has antiseptic properties that help protect and heal the skin. It is designed to prevent the growth of bacteria and other harmful microorganisms, making it a great choice for use on the feet. The oil can be applied directly to the cuticles and surrounding skin to help prevent infection and promote healing.

- Contains tea tree oil with antiseptic properties
- **Mold prevention**
- Perfect for pedicure use
- Quickly absorbed with no greasy residue
- Nourishes and moisturizes cuticles
- Helps to prevent cuticle damage

## HOW TO USE

Apply a thin layer of the **Pedicure Cuticle Oil** on the cuticle, and massage gently. Wait for a minute until the product is fully absorbed/dried.

## PEDICURE CUTICLE OIL

## COLLAGEN TREATMENT

## COLLAGEN SOCKS

**Collagen Socks** provide a luxurious spa treatment for the feet in the comfort of clients own home or at the salon. These socks are designed to efficiently soften, nourish, and regenerate dry and cracked feet. These socks are also designed with perforated areas around the toes, making them ideal for use during a pedicure.

- Efficiently softens, nourishes, and regenerates the skin of the feet
- Provides SPA-like skin care during a pedicure, saving time
- Features **perforated parts in the toe area**, allowing for pedicure procedures while simultaneously caring for the feet in the socks
- Suitable for use in a salon or at home

ACTIVE COMPONENTS	
HYDROLYZED COLLAGEN	improves skin elasticity and tone, forms a protective film to prevent moisture loss
GLYCERIN	deeply moisturizes and nourishes the skin, while recovering the hydrolipidic balance and sealing microcracks to protect the skin
SHEA BUTTER	penetrates deeply, nourishes cells, fights dry and rough skin
ARGAN OIL	improves the skin condition, protects it from UV radiation, and prevents the early appearance of age-related wrinkles
UREA	boosts the process of cell regeneration, has a significant softening and moisturizing effect

MAIN COMPONENTS	hydrolyzed collagen, glycerin, shea butter, argan oil, urea
VOLUME	1 pair

## HOW TO USE

1. Wear the **Collagen Socks** on clean and dry feet before a pedicure and fixate with special tape.
2. Remove the part of the socks covering the toes to allow for a pedicure.
3. After completing the pedicure, take the socks off and massage any remaining product into the skin. Clean any excess with a wet wipe or wash it off.

**Note:** When using **Collagen Socks at home**, there is no need to remove the part of the socks covering the toes. For best results, wear the socks for at least 20 min.

## GEL POLISH APPLICATION

**E.MiLac One Step** is a single-phase gel polish specifically designed for pedicure. These gel polishes come in trendy shades that provide rich and long-lasting coverage without the need for a base and top coat. The thin coating does not create excess thickness, reducing the risk of onycholysis and is specially designed to not weigh down the nail plate or create excess volume.

- **Single-phase** gel polishes designed specifically for pedicure
- **No need for a base or top coat, saving time and cost**
- Thin coating that doesn't create excess thickness
- Designed to not weigh down the nail plate or create excess volume
- Reduces the time needed for pedicure procedure

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of E.MiLac for pedicure gel polish on the nail plate and cure for 60 sec. For better adhesion to the nail, we recommend making the first layer thin. Apply a second layer and cure for another 2 min.

## E.MILAC ONE STEP FOR PEDICURE

SUITABLE FOR	all nail types
COLOR	 *HEMA FREE
CONSUMPTION PER CLIENT	0.5 ml
VOLUME	9 ml
SERVICED CLIENTS PER VOLUME	18

**E.MiLac Base Gel for Pedicure** is a specialized gel designed to serve as a foundational layer for creating a long-lasting pedicure in three-phase gel polish application. It is specifically formulated for use on toenails. It is recommended to use this base gel for pedicure and then apply the chosen E.MiLac gel polish color from the wide palette for color coverage.

- Contains tolnaftate that produces an antifungal effect and is used for treatment and prevention of fungus diseases in nails
- Antiseptic properties
- Liquid and elastic
- Equally perfect for strong, weak, soft and thin nails

## HOW TO USE

1. Prepare the nail plate. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. Apply **Nail Prep Aid** to the cuticle area and **Ultrabond** on the nail end. Air dry for 20 sec.
3. Apply a thin layer of **E.MiLac Base Gel for Pedicure**. Cure for 2 min in any lamp.
4. Perform a color/decoration layer. Cure for 2 min in any lamp. Apply any chosen top gel. Cure for 2 min in any lamp.

## WELCOME TO THE SECTION ON TOOLS

In this section, we will be discussing the essential tools for nail art and manicure: rotary files, files, and brushes. These tools are the backbone of every nail technician's kit, and mastering their use is crucial for creating beautiful and long-lasting nail designs.

**Professional Multi LED Lamp 36 W** is a LED lamp for manicure that is preferred for its quick curing time, energy efficiency, and longevity. It offers low heat emission, compatibility with LED-friendly gel polishes, and minimal UV exposure, making it an excellent choice for professionals who care about their clients and time.

This lamp is constructed using non-toxic plastic for its body and features a removable metal bottom. The bottom also includes finger markers, with separate spaces for the thumb and shared spaces for the index, middle, ring, and little fingers.

## PROFESSIONAL MULTI LED LAMP 36W

TYPE	LED
Q-TY OF LAMPS	18
MODES	three modes: 30 sec, 60 sec, and 30 sec for E.MiLac Base Gel
SIZE	180x180x75 mm
USAGE DURATION	5 000 hours
WARRANTY	12 months from the date of purchase

- Power-packed 36W output for comprehensive polymerization of all nail coatings and sculpting systems
- Equipped with **18 next-generation LED lamps**, strategically positioned at varying angles, ensuring uniform coverage from all sides
- Soft Mode button for **gradual power increase** during base coat drying
- **Finger-shaped markings on the bottom**
- Effectively **cures even the most challenging materials**
- **Detachable metal bottom** secured with magnets for easy cleaning and maintenance

### HOW TO USE

1. Apply the **UV-Block Cream** before using the lamp. Massage until completely absorbed, then remove any residue from the nails using **Eurocleanser**.
2. To switch the lamp on, choose from three timer settings: 30 sec, 60 sec, and a special 30-sec mode tailored for E.MiLac Base Gel. Push the button.
3. The lamp will turn off automatically.
