SCANDINAVIAN CHARACTER MEETS SUSTAINABLE DESIGN

We use only high-quality, sustainable materials and traditional printing techniques to create wallpapers with a unique hand-painted feeling. We are committed to responsible production, ensuring transparency at every step of the manufacturing process.

Our inspiration originates from Scandinavian design heritage and, of course, the beautiful flora and tales of nordic countries. By sketching and mixing colours by hand, our designer brings depth and vibrancy to each design. We print the wallpapers in Sweden using the surface print technique. We're in love with this technique, which dates back to the early 1800s and gives an incredibly distinctive appearance.

Each roll is crafted with great care and attention to detail, ensuring the final product is of the highest quality. With a focus on quality and sustainability, we strive to produce wallpapers that are not only beautiful but also responsibly made.

Norrviva uses a paper mass of FSC-certified pulp and recycled materials and waterbased dyes. Our wallpapers are OEKO-TEX® Standard 100 certified and free from

harmful substances. Read more about our manufacturing process on our website: www.norrviva.com/crafted-with-care

Explore Norrviva's 2023 collection of organic patterns brought to life by fine craftsmanship. Order samples and experience the particularly distinguishing expression and hand-painted effect of Norrviva wallpapers.

ABOUT OUR WALLPAPERS

- The rolls are standard EU size: width: 53 cm (20.87 in.), length: 10.05 m / roll (32.97 ft.) and a half-drop pattern match.
- All wallpapers are made of high-quality 150 g/m² non-woven paper, made to last and easy to apply.
- The non-woven material comes from Germany. The colours come from the Netherlands. Packaging material is made in Sweden.
- The synthetic fibres in the non-woven material come from recycled materials like PET bottles. The paper pulp comes from FSC-certified forests.
- The wallpapers' colours and coatings are water-soluble and completely free of PVC, heavy metals and other environmentally hazardous substances.
- Water is the only solvent used in production. Any residue dyes are reused. Production waste is incinerated to produce energy. The energy used during production is carbon offset.
- Our wallpapers comply with OEKO-TEX® Standard 100 Certification (certifying no harmful substances in the product) and the European Fire Classification B-s1 d0 (EN 13501-1).
- We offer a 60-day open purchase and return policy.

VERY GOOD LIGHTFASTNESS

Resistant to sunlight, not easily sun-bleached.

WASHABLE

Can be wiped down gently with a damp cloth.
