

# BRING BACK THE BEES

## A community science project

Worldwide bee numbers are declining

About two-thirds of our food plants depend on insect pollination

**BEES NEED...**

Let's work with nature to bring back the bees

### FOOD

Plant flowers in your garden to provide a source of pollen and nectar.

### A POISON-FREE ENVIRONMENT

Stop or reduce spraying poisonous insecticides.

### A HOME

Build or buy a bumblebee nest box.

Wildflower Pollinator mix is a joint initiative of:

The Bugman,  
Ruud Kleinpaste
