

# LEATHER- & TEXTILE COLLECTION.

THE COLLECTION THAT SETS NEW STANDARDS FOR THE ARCHERY INDUSTRY

powered by

© BEARPAW GmbH

# The best the archery industry has to offer.

In 2022, the BEARPAW PRODUCTS brand releases the new and unique leather and textile collection on the archery market. This will set new standards for the entire industry. A product range is deliberately improved in many ways - for the environment, for the product, and for people.

[Click further to learn all about the new collection.](#)

SUSTAINABLE | TOP QUALITY | FAIR

## Why did we decide on this project?

Almost all significant decisions we make are built on a strong question of “why”. Our "why" for the creation of a special leather and textile collection has a clear and uncompromising answer: Timeless Top Quality. We have the privilege to live in a time where a lot of good things are already available. One or the other may still be discovered. We discover this phenomenon every day at BEARPAW. A little over 1 1/2 years ago, we began our journey around the creation of a special leather and textile collection. Much of what we have designed was made to stay with us for a long time. Many other aspects, among others not directly related to the product itself, were allowed to be improved, challenged, and rethought. So, it was our starting point to search for many hidden potentials that were waiting to be discovered.

The creation of the special collection is a clear statement against the trend, which we observe every day. Every month, the same product is copied and appears on the market: of one quality or another. Some copies are good, some are worse. Some are more colorful, and some remain the same. On our journey, we quickly realized one thing: on the way from diversity to top quality, one aspect is missing: sustainability.

We believe that our future lies in bringing out the best of all aspects. For this reason, we focus not only on the product itself, but also on the infinitely long path before the finished product: the supply chain. At first glance, it seems hypocritical to talk about sustainability when we are talking about leather products, among other things. There are many challenges, such as water consumption, which make it impossible to speak of maximum sustainability. Nevertheless, we are discovering potentials to make sustainability possible in this project. A large aspect is to bring the workmanship and the design into harmony in such a way that we would still choose these products again in 5 or 10 years. Even if there is an opinion with every person in the world about what design and workmanship is, we have done everything we can to meet the global demand. The most important moral lever for us were the conditions and the people who bring the products to life for all fans.

#### Production site

Our partner ensures a safe and fair working environment for the local team and always guarantees a high-quality standard. Our partner is BSC and BCORP certified and thus follows the highest global standards.

#### Top quality

The process starts with the selection of the raw material. Like most leather manufacturers, we source our cowhide from the food industry. The difference: the products are not made from cheap split leather, but from pure full grain leather. This has two advantages: The leather is stronger and does not need to be modified. The leather is also tanned particularly gently, so the surface remains soft.

#### Cost structure

To ensure that our quality standards are still easy on your wallet, we avoid unnecessary middlemen and work directly with our partner. These measures not only lead to better cost control and quality, but also allow us to implement two important concerns: A fair price for our customers and above average security and compensation within the partner production facility.

We wanted to discover and secure the timeless top quality on the following points:

#### People:

The people behind the product should be valued.

#### Environment:

The purpose of the new collection is to deliver on a maximum quality promise to the environment. For today... tomorrow... and all the other days to come.

#### Product Benefits:

Our product is intended to provide all athletes with top quality and therefore fun while performing the sport.

# PRODUCT RANGE

ORIGIN & MATERIALS, COLORS, COLLECTIONS, PRODUCTS.

## ORIGIN: WHERE OUR PRODUCTS ARE MADE

One question, one answer: our products are manufactured in Pakistan (Karachi). In the biggest city of Pakistan, we have the best partner we can imagine. This statement is based on many different arguments, which is a win-win-win situation for the product, the customer, and the local people.

Here's why.

Our partner in Karachi attaches great importance to consistent quality and good working conditions for their employees. The employees in the production have 8-hour workdays and have the possibility to take enough breaks. Furthermore, our partner provides insurances for the employees and their families and employees receive a secure income through employment. The salary of the local employees is triple of what is average for this region. While these aspects may be taken for granted by many of us, these conditions are unique in Pakistan. In Pakistan, working conditions are normally characterized by low job security, low wages, and a lack of co-determination rights in the companies. Each employee has been carefully selected - they are true experts in their field. This is very noticeable in the high-quality workmanship and consistent quality as well as a noble appearance of the products.

Our partner is also "B Corp" and "BSCI" certified! "B Corp" is an international certificate with which the non-profit organization "B Lab" awards companies for their social and environmental impact. The aim of "BSCI" is to improve working conditions worldwide. A certain code of conduct must be adhered to within the supply chain.

**100% HAND MADE.**

Each of our products is made by hand. Whether archery glove, arm guard or quiver: Behind each product is a person who performs his work with love and passion.

Our partner had a team of between 30 and 40 employees working on our products. Each individual was trained in the processes and products. From the "sample maker" to the final product, the entire team put their hearts into their work. There are employees who have been working and practicing their craft profession for up to 35 years.

## MATERIALS: SELECTION & PROCUREMENT

In our leather and textile collection, we place a particularly high value on the selection and sourcing of materials. On one hand, the right use of materials should be sustainable, and on the other hand, top quality should be guaranteed. To bring sustainable, high-quality, and well-designed products to the market, we use only "REACH-compliant" materials. REACH-compliant products and articles are those that meet all the conditions of the EU Chemicals Regulation. We try to use as many natural materials as possible. For example, most of our quivers are lined with leather, not synthetic materials. For all materials, we try to source locally and consider short transportation distances.

### Leather in our archery gloves:

The leather for the archery gloves is selected under the strictest quality standards: High quality, best quality, and most importantly... durable. Furthermore, our leather is very soft and skin friendly. Which leather is used for which product? Find out on the following pages.

### The right thread makes the difference

The seams of our products are processed with "German Gütermann Thread". This is no coincidence, because this thread is particularly tear resistant.

### Cordura:

Cordura is a very robust and abrasion-resistant nylon fabric. The slightly roughened surface gives Cordura a pleasant feel. It is quick drying and has a water repellent finish so that moisture rolls off. For this reason, it is used in many of our products.

## MATERIALS: SELECTION & PROCUREMENT

### Mesh:

Mesh, as the name suggests, consists of many small and woven meshes. Because of the many holes, the fabric is breathable and temperature regulating. Due to the nature of the fabric, mesh is also wrinkle-resistant and easy to clean. These properties make the fabric perfect for the season collection.

### Polyester:

Polyester is a fabric made from synthetic fibers. Due to its uncomplicated nature and small pores, the fabric is very easy to clean (repels dirt or water). Therefore, this material is best suited for two of our products to give you a suitable equipment to the hand.

### Buttons on the arm guard:

One of our arm guards uses buttons. Each of these buttons is handmade and made of real wood. The nice effect of this is that each button has its own individual look.

### Embossing of our logo:

Each product is embossed by hand. We emboss with precision-milled brass embossing stamps. The embossing process works with pressure and heat, treating each leather and each product differently. We adjust the settings according to the material and check them regularly.

## HOW IS THE LEATHER TANNED?

Many people have the belief that chrome tanning basically means something bad. We can counter this statement, at least when it comes to the processing of the leather products of our special collection.

REACH-compliant materials are always tanned exclusively with "chrome III".

"The use of chrome III has a history of over 150 years in the leather industry. In addition, the trivalent form of chromium is considered an essential trace element that the human body needs in small amounts. It helps in the metabolism of carbohydrates, lipids, and proteins, so it is included in many dietary supplements. Chromium III is naturally present in many foods, such as bread yeast, meat, potatoes, cheese, molasses, spices, whole grain bread, cereals, fresh fruits and vegetables." (Source: Lederakademie).

The use of "Chromium III" in our leather is therefore considered harmless to health and does not cause any problems for the vast majority of people. For this reason, we can declare our leather products as skin-friendly with a clear conscience.

## COLLECTION COLORS: IT'S A MATCH!

The entire leather and textile collection is divided into different collections. Beyond these collections, you will find a consistent color concept everywhere. You can combine your Basic glove with a Traditional quiver in the same colors - your products will always match!

## COLORS & NATURAL MATERIALS.

Did you know that the uniform dyeing of natural materials is a great challenge? Nevertheless, using exact color values, minimal deviations may occur, especially with lighter shades (e.g. beige). This is a natural occurrence: different materials process colors differently.

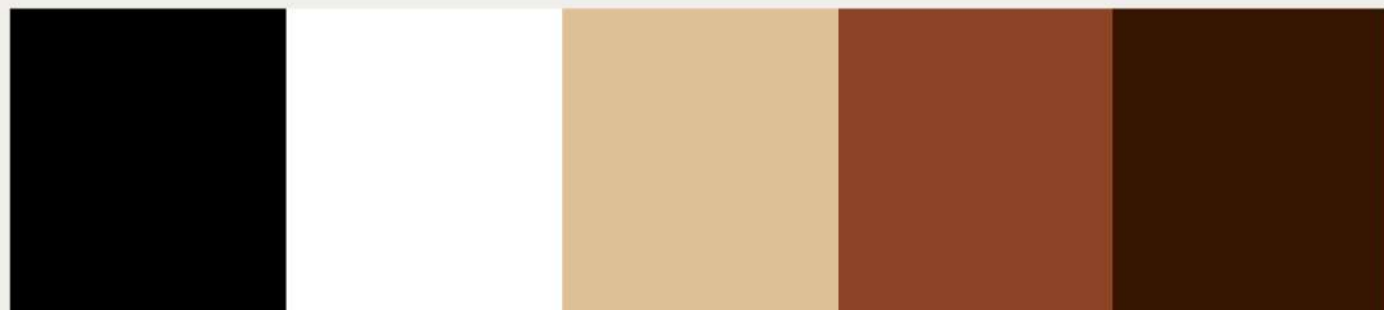

BLACK

WHITE

BEIGE

————— DOA

## BASIC: SIMPLE & CONVINCING

In our Basic collection, we want to give our customers something simple but at the same time timeless.

### Archery Gloves:

Our Basic archery gloves speak for maximum comfort and simple design. The body of our Basic gloves is made of goatskin. Goatskin has no fat deposits and is therefore very robust. At the same time, the goatskin remains extremely supple and light. On the fingertips we use Cordura, which guarantees a comfortable grip due to its slightly roughened surface.

### Armguards:

With our arm guards, the rule is: lots of protection and easy to wear. Depending on the model of our basic arm guards, you can choose between smooth leather and suede. The suede (cow) is very stable and firm. The smooth leather (buffalo) stands for durability, as it is particularly robust.

### Quivers:

With the Basic quivers, you have a wide choice of different models. Here, too, we use high-quality cowhide and buffalo leather to ensure high quality and durability for you.

① Recommendation: beginners, advanced users with a love of simple design.

## PREMIUM: LEATHER IN CLASSIC APPEARANCE

The Premium collection combines high-quality materials and a refined design.

### Archery Gloves:

For our Premium gloves, we have exclusively processed leather and chosen fine color combinations. The body of our premium gloves is made of cowhide on the one side and buffalo leather on the other. Both materials are very robust and provide a tasteful look. We have also rounded off the tips with cowhide. The precise hand-embossing of the logo provides the perfect finishing touch.

### Armguards:

Muted colors, high-quality leather, and exciting designs - that's what you'll find in our premium arm guards. The buffalo and cowhide leather also do very well for an arm guard: sturdy, durable, and classy.

### Quivers:

The premium quiver not only provides an appealing look but is perfectly rounded off by a cowhide leather.

ⓘ Recommendation: archers with higher draw weight, because robust leather is used in the archery gloves.

## TRADITIONAL: APPRECIATION OF DESIGN

For all experienced or beginner archers who love traditional design.

### Archery Gloves:

Our Traditional archery gloves are not only characterized by traditional design, but also by a high-quality look. In these models we have exclusively processed cowhide, in alternation of suede and smooth leather.

### Armguards:

Matching the archery gloves, you will find arm guards in a traditional design, which are made of cowhide and buffalo leather and thus perfectly match the other products. By combining suede and smooth leather in one product, the traditional look is enhanced.

### Quivers:

You will find a large selection of elaborate and visually appealing quivers in the Traditional collection. Through the processing of cowhide leather, we have created stable and high-quality quivers for you.

① Recommendation: For those who appreciate & love traditional design.

## SPORT: SIMPLE & DYNAMIC

Products which equip you properly during a workout.

### Archery Gloves:

The Sport gloves allow you a comfortable wear and a sporty look. By the processing of simple textiles, you have a glove which is robust, abrasion-resistant, and UV-resistant. In colder temperatures, the sport glove also keeps you warm. Another advantage: After your training, you can clean the sports gloves by handwashing without hesitation.

### Quiver:

Our sport quiver is perfect for your workout due to his simplicity. The special strap system allows the quiver to be worn over the shoulder or as a backpack quiver.

 Recommendation: For sports and training-oriented archery enthusiasts.

## SEASON: WHEN THE WEATHER PLAYS A ROLE

When it gets too hot for your hands in the summer and too cold in the winter, you can turn to BEARPAW's SEASON products.

### Archery Gloves:

The archery gloves from the season collection serve their purpose 100% in all weather scenarios. In the summer, a light mesh fabric supports you in the practice of your sport. Air permeable, breathable, comfortable on the skin and hand washable - all these advantages are waiting for you. The season gloves we have refined with Cordura tips. They have a quick drying and water repellent finish, so that moisture rolls off.

In winter, a thick and warm fleece is waiting for you. The fleece quality of the gloves is high quality and provides a cozy feeling. The winter glove is perfectly rounded off by leather patches and tips (cowhide).

The fleece is too warm for you? Also not a problem. With the Hunter glove made of polyester you have a product, which protects you in colder seasons, but is still a light material. On the tips, you will find Cordura and on the palm we have sewn a patch, which gives you a good grip.

ⓘ Recommendation: For those who want to adapt to the weather.

## DOA: AFFAIR OF THE HEART

In the DOA collection, you will find a perfectly matching set that pays homage to our DOA Foundation. Every time a product from the DOA collection is sold, 3% of the sales price automatically goes to the DOA Foundation. With DOA, you'll find unique pieces here, with a good cause.

### Archery Gloves:

Created from deerskin, the DOA glove is consistently a classy and sleek leather product. Did you know that deerskin is extremely soft, supple, and thin?

### Armguards:

Perfectly matching the archery glove, we have created an arm guard made of cowhide, which also convinces with its noble appearance.

### Quivers:

More than just a quiver with plenty of room for your arrows. The DOA quiver is made of cowhide and is the perfect finish for your set.

### Pull-up effect: What's behind it?

With the armguard, quiver, and branding on the archery glove, we have enabled a special effect. Pull-up effect means that the leather has been dyed a light color. A dark wax layer gives the products their final color. When the product is used, the vintage style is created: the light coloring appears.

 Recommendation: For all who feel like giving something back. Learn more about the DOA Foundation here:

 This is how the pull-up effect looks like!

## KIDS: BECAUSE CHILDREN ARE OUR FUTURE

For kids, archery is all about having fun!

### Archery Gloves:

- ① There are no separate archery gloves in the Kids collection. The reason for this is that many children need to get a feel for the string and shooting in the beginning. Experience shows that this is easier without a archery glove. Since children's bows usually have weaker draw weights, this can also be done without concern. Once children enter adolescent age, we recommend archery gloves with a soft leather (e.g. Easy 100020 archery glove).

### Armguards:

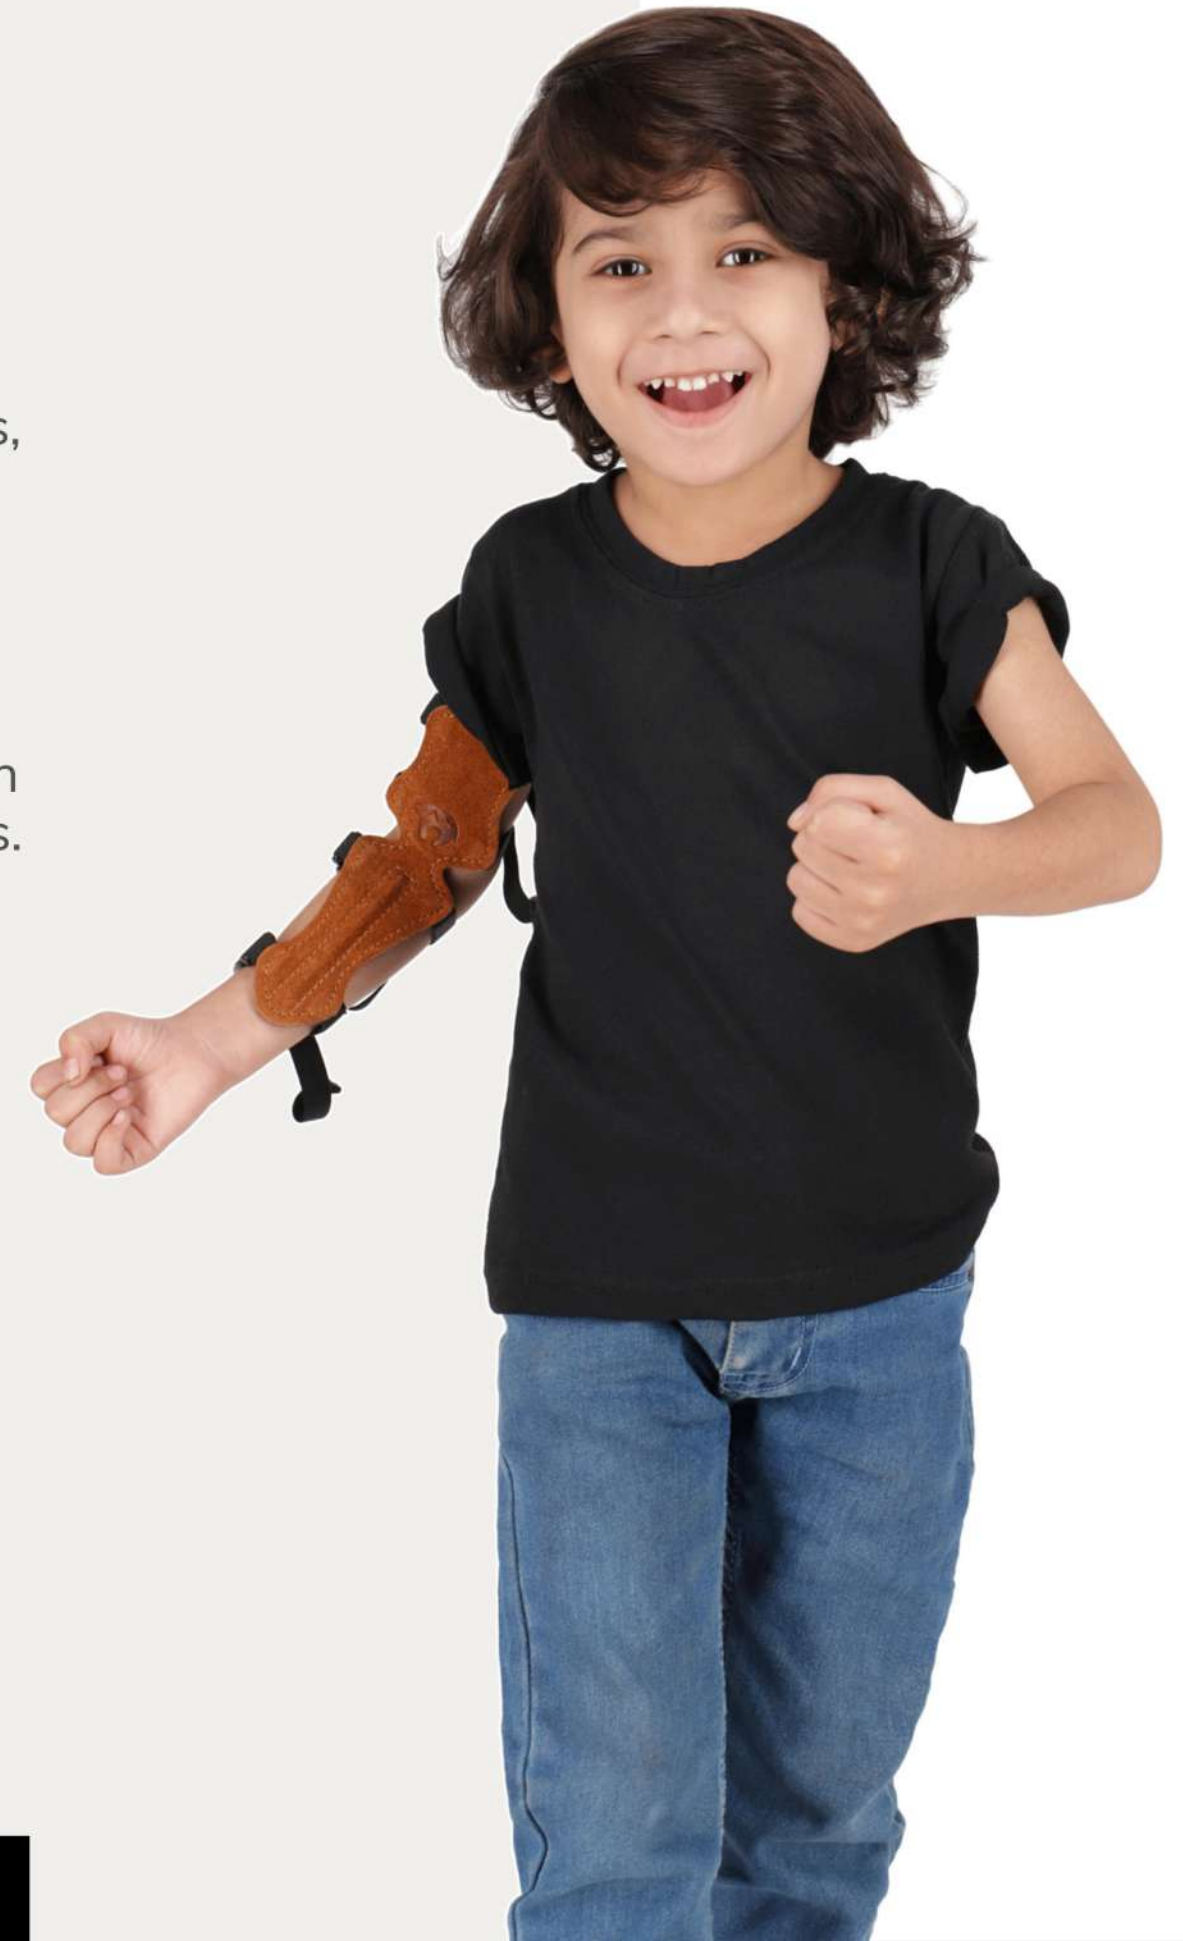

Great protection is especially important for children. Therefore, our Kids arm guards are designed to provide maximum protection to the child's arm. With a cowhide leather, in addition to protection, we also get a high-quality product that can be passed on to younger generations.

### Quivers:

Simple and effective, the quivers from the Kids collection are uncomplicated to use for all children and offer enough space for several arrows. Made of cowhide for longevity or faux leather for the very young, our quivers are an easy-care product.

- ① Recommendation: For children and teenagers.

————— KIDS

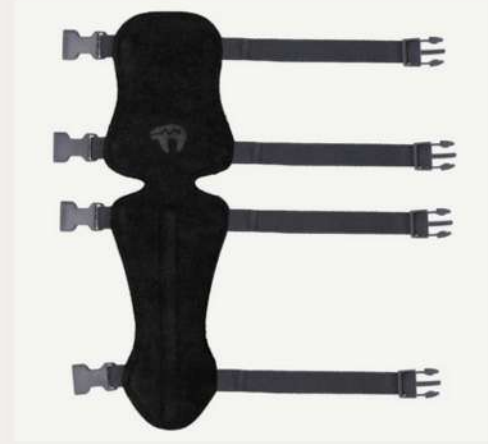

## KIDS: PRODUCT OVERVIEW.

Armguard Easy Kids  
100026

Suede (cow leather)  
Fits with dress size: 104/110\*  
Age: approx. from 4 years\*
