## PRECISION INDUCTION COOKTOP (PIC)

### About the NuWave®

#### Precision Induction Cooktop

NuWave® Ultimate Cookware is compatible with common kitchen heat sources such as gas and electric stoves, as well as induction cooktops. Induction is the safest and most efficient heating method because it uses magnetic energy to make the cookware itself quickly and evenly heat up without wasting energy.

The NuWave PIC line of induction cooktops offers precise temperature control at the press of a button. All models of PIC can reach high temperatures to sear a steak or maintain a low temperature to perfectly melt chocolate.

Paired with your NuWave® Ultimate Cookware, they make the perfect kitchen combination.

Get the most from your Ultimate Cookware Set with this revolutionary appliance. The NuWave® PIC can be found in stores or online at

4. Never bring salt in direct contact with the cookware. Always add other ingredients before adding salt.
5. To maximize the life of your cookware, minimize the exposure to acidic foods or salt solutions.
6. Allow your cookware to cool completely before washing or immersing in any liquid.
7. Lids and cookware may become hot during prolonged cooking.
