More!

## Before First Use

1. Remove this plastic covering from the Ozone Emission Removal Filter.
2. Slide the unwrapped Ozone Emission Removal Filter back into Slot 3.
3. Repeat this process with the other filters.

## Cleaning the Ozone Emission Removal Filter

**The Ozone Emission Removal Filter does not need to be cleaned in order to remain effective. However, if you wish to clean it, follow the instructions below and remember that when working with any used filter, wear a face mask and gloves and work outside or in a well-ventilated area.**

1. Carefully remove the Ozone Emission Removal Filter from its slot.
2. Gently clean the Ozone Emission Removal Filter using the brush attachment on your vacuum cleaner. Alternately, you can use a soft, non-abrasive brush and a garbage bag, brushing the surface straight down into the garbage bag.
3. Repeat this process on the other side.
4. When finished, reinstall the Ozone Emission Removal Filter.

**DO NOT WASH, IMMERSE, SPRAY, OR WET THIS FILTER IN ANY WAY.**
