

THE ADVANCED HYBRID STEAM ROOM

The most sanitary and energy-efficient
steam room on the market

FINALLY, A FULLY INTEGRATED, TURN-KEY STEAM ROOM: THE ADVANCED HYBRID STEAM ROOM

- Luxurious Personalized Design
- Moon-glow Ceiling with Lighting
- Custom Benching
- Full Glass Door with Chrome Frame
- Complete Steam Room Equipment
- PowerZone® 100 Auto-Sterilizer All Included

The Advanced Hybrid Steam Room is a free-standing aluminum-framed room that only requires an open space for installation. No interior finished, insulated, waterproof walls or ceiling are needed.

The Advanced Hybrid Steam Room wall and ceiling materials are attached to the free-standing aluminum frame from the inside and include a fully sealed gasket system.

PowerZone® Sterilization System

Slimy benches, moldy rooms that require aroma pumps to mask the smell of mildew, and toxic cleaning chemicals are a thing of the past.

Our PowerZone® generates ozone for the disinfection and cleaning of environments, odor removal, water treatment, purification, and medical equipment sterilization.

This Powerful machine makes steam room sterilizing as easy as pressing a button and saves thousands of dollars since it does not require extra staff or expensive cleaning chemicals. Hang the PowerZone® on the wall, set the timer, close the door, and return 15-60 minutes later to a fully sanitized and sterilized room.

The most energy efficient steam room on the market

Traditional tile steam rooms require thick CMU walls or concrete substrates that will continually absorb the heat from the steam room. These materials usually require up to twice as much energy to maintain a room at the proper temperature.

The Advanced Hybrid Steam Room's acrylic panel design eliminates the need for CMU / concrete substrates. As a consequence, less energy consumption results in a lower running cost.

Cost-Efficient

Eco-Friendly

Easy to Install

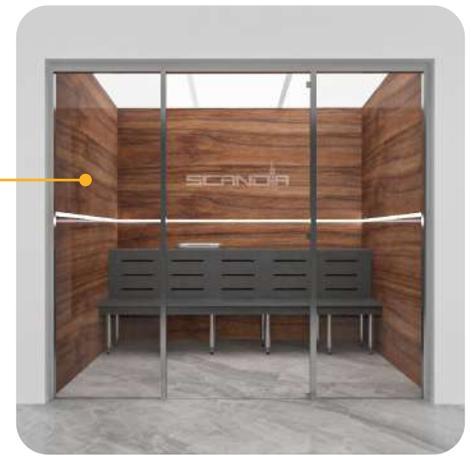

Low Maintenance

Leed Credits	Score
Water Efficiency	WE 3.1
Optimized Energy Performance	WE 3.2
Low-Emitting Materials	WE 3.1
Indoor chemical & Pollutant	EQ 4.1
Source Control	EQ 5

Wall Panel & Bench Options

Personalize your Advanced Hybrid Steam Room to show the world who you are.

The acrylic panels on the Advanced Hybrid Steam Room are fully customizable. You can choose numerous prints, colors, or even a high-resolution photo of your liking. You can also select one of our eight standard bench colors and include one, two, or three-tier benching on one or all walls of the steam room.
