

Outdoor Event Cooler - Digital Graphic

Product Parts

- 1 - Cooler
- 2 - Lid
- 3 - Spout
- 4 - Graphic

Sign Install

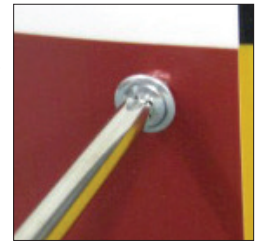

Step 1

Remove the screws with a phillips screwdriver from the previous graphic and set aside. Place the die-cut hole of the Graphic (4) around the spout (3) and wrap the Graphic (4) around the Cooler (1) and line up the side edges, handle cut-outs and spout hole.

Once the wrap is properly aligned, secure it using double-faced tape (attached to graphic).

Step 2

Locate the screws from step 1 and equally space them down the edge of the Graphic (1) into the Cooler (1) as it was when the screws were removed.

Cooler Setup

Step 1

Open Cooler Lid (2) by swinging it open on its axis point located at the rear of the Cooler.

** Be careful not to apply any downward pressure on the lid while it's open to prevent any damage.*

Fill with ice and close the lid.

Step 2

To drain water from the cooler turn the tab out of the Spout (3).

Easily move your filled Cooler (1) with the built in wheels.

Storage

Store in a cool dry location.

Care

To clean, wipe with damp cloth.
