I-TOTAL LED LAMP

new led technology

NUOVA TECNOLOGIA A LED

Nuovo design e nuova tecnologia per I-Total Lamp, dallo stile intramontabile la nuova lampada è caratterizzata dal funzionamento tramite piastra riscaldante che permette alla cera di fluttuare nel liquido creando l'iconico movimento rilassante delle bolle. Illuminate da luce a LED Il funzionamento avviene tramite corrente

NEW LED TECHNOLOGY

New design and new technology for the I-Total Lamp, with a timeless style the new lamp is characterized by the operation via a heating plate which allows the wax to float in the liquid creating the iconic relaxing movement of the bubbles. Illuminated by LED light Operation by current

NOUVELLE TECHNOLOGIE LED

Nouveau design et nouvelle technologie pour la lampe I-Total, avec un style intemporel la nouvelle lampe se caractérise par le fonctionnement via une plaque chauffante qui permet à la cire de flotter dans le liquide créant le mouvement relaxant emblématique des bulles. Éclairé par la lumière LED Le fonctionnement se fait via le courant

NEUE LED-TECHNOLOGIE

Neues Design und neue Technologie für die I-Total-Lampe, mit zeitlosem Stil. Die neue Lampe zeichnet sich durch den Betrieb über eine Heizplatte aus, die das Wachs in der Flüssigkeit schweben lässt und so die ikonische entspannende Bewegung der Blasen erzeugt. Beleuchtet durch LED-Licht. Der Betrieb erfolgt über Strom

NOVA TECNOLOGIA LED

Novo design e nova tecnologia para a I-Total Lamp, com um estilo atemporal a nova lâmpada é caracterizada pelo funcionamento através de uma placa de aquecimento que permite que a cera flutue no líquido criando o icônico movimento relaxante das bolhas. Iluminado por luz LED A operação é via corrente

NUEVA TECNOLOGÍA LED

Nuevo diseño y nueva tecnología para la Lámpara I-Total, con un estilo atemporal la nueva lámpara se caracteriza por el funcionamiento a través de una placa calefactora que permite que la cera flote en el líquido creando el icónico movimiento relajante de las burbujas. Iluminado por luz LED El funcionamiento es por corriente

TRAFFIC LIGHT CLOCK

Orologio verticale a forma di semaforo, poggia su una base ed è regolabile fino a due altezze. in alternativa può essere appeso a muro togliendo la base. Vertical clock, rests on a base and is adjustable up to two heights. two use: desk clock or it can be hung on the wall by removing the base

FUNCTION:

1. Time, alarm and snooze
2. Count up and countdown timer
3. Two levels of light intensity
4. Detachable and stretchable stem
5. Display ON/OFF

Technical info

- POWER ON/OFF
- 1x button cell (CR2032) included for time memory
- Work by USB cable included.
- DC input 5V/500mA-1000mA excluded.
- Size: Regular 9 x 9 x 24.5cm
- Stretch size: 9 x 9 x 31.5cm

ECO BAGS

OUR R-PET BAGS

The idea comes from a number: more than 100 million plastic bottles are used every day. by which our mission is inspired to make this project aiming to reduce such waste and to give a new life to it by recycling and their reuse at the same time. The RPET process, where R stands for Recycled of the PET (polyester) material of which the plastic bottles are made, consists in collecting such used bottles, so that they are ground into small pieces (polymerization) after cleaning. Then fabric (filanto) is extracted from it, which will then be used to create rolls of fabric of which our products are made. Usually 2 recycled 500ml bottles are used for cases, and 30-35 recycled 500ml bottles are used for larger backpacks. All our products in this line are 100% made of recycled plastic, both in the external and internal fabric (except for the ZIP which are in metallic material). Our productions are certified according to the Global Recycled Standard

L'idée vient d'un nombre : plus de 100 millions de bouteilles en plastique sont utilisées chaque jour. En prenant cela en considération, notre mission sera basée sur le projet de réduire leur utilisation et également de leur donner une nouvelle vie grâce au recyclage afin d'être réutilisées dans d'autres objets du quotidien. Le procédé RPET, où R signifie Recyclé du matériau PET (polyester) qui compose les bouteilles en plastique, consiste à collecter de telles bouteilles utilisées et, après les avoir nettoyées, les broyer en petits morceaux (polymérisation). A partir de celles-ci sont obtenus les filaments de tissu (filanto) qui seront ensuite utilisés pour créer des rouleaux de tissu avec lesquels nos produits sont fabriqués. Nous utilisons 2 bouteilles (500 ml) pour les trousseaux, et de 30 à 35 bouteilles (500 ml) pour les grands sacs à dos. Tous nos produits de cette gamme sont 100% en plastique recyclé, que ce soit pour le revêtement externe et le tissu interne (à l'exception des ZIP qui sont en matériau métallique). Nos productions sont certifiées selon le Global Recycled Standard

L'idea nasce da un numero: piu di 100 Milioni di bottiglie di plastica vengono utilizzate ogni giorno; partendo da questo la nostra mission e di ridurre l'utilizzo delle stesse e contemporaneamente con questo progetto di dare una nuova vita tramite il riciclo e il loro riutilizzo. Il processo RPET, dove R sta per Recycled della materia PET (poliestere) di cui sono composte le bottiglie di plastica, consiste nel raccogliere le bottiglie e, dopo averle pulite, vengono macinate in piccoli pezzi (polimerizzazione) e da li ricavati dei filamenti di tessuto (filanto) che poi serviranno alla creazione di rotoli di tessuto con i quali sono appunto fatti i nostri prodotti. Per i quali servono dalle 2 bottiglie (da 500ml) per gli astucci, alle 30-35 bottiglie (da 500ml) per gli zaini più grandi. Tutti i nostri prodotti di questa linea sono al 100% fatti da plastica riciclata, sia nel tessuto esterno che quello interno (ad eccezione delle ZIP che sono in materiale metallico). Le nostre produzioni sono certificate secondo gli standard Global Recycled Standard.

La idea proviene de un número: se usan más de 100 millones de botellas de plástico todos los días, a partir de esto nuestra misión, es reducir el uso de las mismas y al mismo tiempo con este proyecto para dar una nueva vida a través del reciclaje y su reutilización El proceso RPET, donde R significa Reciclado del material de PET (poliéster) del que están compuestas las botellas de plástico, consiste en recoger las botellas y, después de limpiarlas, se muelen en trozos pequeños (polimerización) y de ellos se obtienen los filamentos de tela (filanto) que luego se utilizará para crear rollos de tela con los que se fabrican nuestros productos. Se utilizan desde 2 botellas (500 ml) para cajas, hasta 30-35 botellas (500 ml) para mochilas más grandes. Todos nuestros productos en esta línea están hechos 100% de plástico reciclado, tanto en el tejido externo como en el interno (excepto el ZIP que está en material metálico). Nuestras producciones están certificadas según el Global Recycled Standard.

Die Idee stammt von einer Zahl: Jeden Tag werden mehr als 100 Millionen Plastikflaschen verwendet; Unser Ziel ist es daher, die Verwendung von Plastikflaschen zu reduzieren und ihnen gleichzeitig durch Recycling und Wiederverwendung ein neues Leben zu geben. Das RPET-Verfahren, bei dem das "R" für "Recycled" des Materials "PET" (Polyester) steht, besteht darin, die Flaschen zu sammeln und sie nach der Reinigung in kleine Stücke zu zerkleinern (Polymerisation). Daraus werden Stofffäden und dann die Geweberollen hergestellt, aus denen unsere Produkte gefertigt werden. Man braucht 2 Flaschen (500 ml) für die Mäppchen und 30-35 Flaschen (500 ml) für die größeren Rucksäcke. Alle Produkte dieser Linie bestehen zu 100 % aus recyceltem Kunststoff, sowohl im Außen- als auch im Innenmaterial (mit Ausnahme der ZIPs, die aus Metall gefertigt sind). Unsere Produkte sind nach dem Global Recycled Standard zertifiziert.

A ideia deriva de um número: mais de 100 milhões garrafas de plástico são utilizadas diariamente; com base nisto, a nossa missão é reduzir a sua utilização e, ao mesmo tempo, com este projecto para lhes dar uma nova vida através da reciclagem e reutilização. reciclando-os e reutilizando-os. O processo RPET, onde R significa Reciclado do material PET (poliéster), do qual as garrafas plásticas são compostas, consiste na recolha do garrafas e, após a sua limpeza, são moídas em pequenos pedaços (polimerização) e a partir delas são feitos filamentos de tecido (filanto), que são depois utilizados para criar rolos de tecido a partir dos quais os nossos produtos são feitos. Para o qual precisamos de 2 garrafas (de 500ml) para as caixas, a 30-35 garrafas (de 500ml) para as mochilas maiores. Todos os nossos produtos nesta linha são 100% feitos de plástico reciclado, tanto no tecido exterior como no interior (com excepção dos ZIPs, que são feitos de material metálico). Os nossos produtos são certificados de acordo com o Global Recycled Standard.
