Natural-White Sticky Light Mini for the Dioramo Lighting System

INFORMATION

THE MODEL BUILDERS' FAVORITE

STICKY LIGHT mini

- The Light of Choice for many Scale Model Builders.
- Small and Effective 5x5mm Pad Size.
- **Sticky Light Mini hits the sweet spot:**
 - The Smallest Adhesive Backed Light available.
 - Easy Peel-and-Stick Installation.
 - Fits in Smaller, more Discreet spaces.
- Available in a Full Spectrum of Light Colors.
- Wired with a generous 3 feet of our Premium Ultra-Flexible 30 AWG Soft Silicone Wire (#32001), allowing for friendly cable management.
- Includes an Authentic 3M VHB Double-Sided Adhesive Pad. Beware of the cheap imitations, where the stick doesn't last. Our Sticky Pad offers a secure attachment to any clean surface, yet comes off clean if needed.

Replacement pads are available on Dioramo.com as #55205.

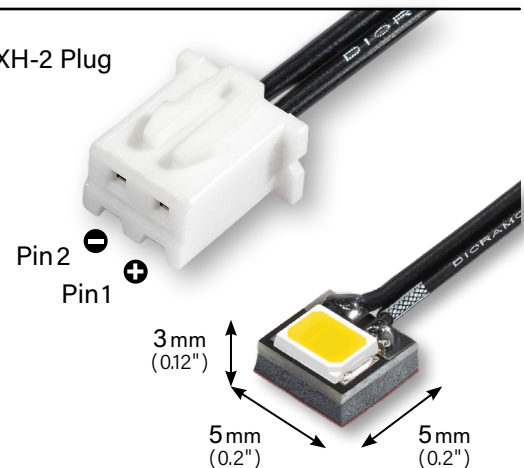

INSTALLATION

The Superior Adhesion properties of the Sticky Pad may result in the backing film being a challenge to remove. We recommend carefully using a hobby knife to separate the backing film. Once removed, press the Sticky Light firmly against a clean surface for lasting adhesion.

TECHNICAL DETAILS

Light Color		Natural-White
