

★ COLUMBUS UNIT SUMMARY ★

Since Christopher Columbus is widely regarded as one of the first to encounter the New World, the study of his voyages and explorations begins our journey. As travelers, we start with the basics of geography, such as maps, the compass rose, globe skills, oceans, and continents. Learning about early navigation, the sun, stars, planets, and constellations takes center stage, as well as developing the skills of observation and recording. Our literature reveals the hopes, dreams, and struggles of Columbus and the importance of staying with what you do best. Using the Wildlife Handbook, we can see the animals and wildlife that Columbus and his crew observed and learn about life aboard ship. You will journey back to a time when dreams of discovery led men to risk all and watch them seek to make the most of the opportunities they were given.
